The surface of the country is generally undulating forest land, with mountains from 1,500 to 5,000 feet in height, and expanses of level, open plains. There are numerous streams, the Derwent and the Tamar being the largest. The climate is fine and salubrious, and well suited to European constitutions; the hot winds of Australia do not reach the Island. At Hobart in 1921 the mean annual temperature was 55·5°, the mean temperature for Dec., Jan., and Feb. being 62·5°, and that of June, July, and Aug. 48·6°. The western side of the island is very wet, the eastern side having a rainfall similar to that of eastern England; the average rainfall varies from 20 inches to 100 inches in different parts.

GOVERNMENT.

The island was first settled by the British in 1803 as an appendage to New South Wales, from which it was separated in 1825. In 1851 a partly elective legislature was inaugurated, and in 1856 Responsible Government was added. In 1901 Tasmania became a State of the Australian Commonwealth, *q.v.* The State executive authority is vested in a Governor (appointed by the Crown), aided by an Executive Council of responsible Ministers.

GOVERNOR.

Governor of Tasmania (vacant)	£2,750
Private Sec.,	
Administrator of the Government, Hon. Sir Herbert Nicholls, Chief Justice (*b.* 1868)	

EXECUTIVE COUNCIL (Oct. 26, 1923).

Premier, Treasurer, and Minister of Railways, Hon. J. A. Lyons	£1,200
Chief Secretary and Minister of Mines, Hon. J. A. Guy	1,000
Lands, Public Works, Agriculture and Forestry, Hon. J. Belton	1,000
Attorney-General and Education, Hon. A. E. Ogilvie	1,000
Without Portfolio, Hon. A. Lawson.	

UNDER-SECRETARIES, &c.

Under-Secretary, D'Arcy Addison, I.S.O., M.V.O.	£650
Under-Treasurer, P. J. Strutt	650
Auditor-General, E. Pretyman	850
Registrar-General, J. P. Laughton	540
Govt. Statistician, L. F. Giblin	575
Public Service Commissioner, R. J. Meagher	750
Commissioner of Police, Lt.-Col. J. E. C. Lord, C.M.G., D.S.O.	675
Sec. for Public Works, E. O. Rowland	625
Conservator of Forests, L. G. Irby	600
Chief Engineer and General Manager, Hydro-Electric Dept., J. H. Butters, C.M.G, M.B.E.	1,450
Commissioner of Taxes, H. E. Downie	750
Do., Railways, G. W. Smith	1,700
Director of Education, G. V. Brooks	850
Surveyor-General and Secretary for Lands, E. A. Counsel, I.S.O.	625
Director of Pub. Health, E. S. Morris, M.B.	1,000
Government Printer, J. Vail	600
Director of Agriculture, L. A. Evans (*actg.*)	544
Engineer of Works, W. R. Reynolds	675
Secretary for Mines, W. A. Pretyman	550
State Shipping Dept., W. Robinson	800
State Insurance Dept., E. A. Reid	800
Government Geologist, Loftus Hills, B.Sc.	600
Commissioner of Stores, G. F. Dawson	600

AGENT-GENERAL IN LONDON.

Agent-General in London, A. H. Ashbolt, Australia House, Strand, W.C.2.	
Secretary, H. W. Ely	£500

THE LEGISLATURE.

Parliament consists of two Houses, a *Legislative Council* of 18 members, elected for six years; and a *House of Assembly* of 30 members, elected by proportional representation for three years, the electors for the latter being all adult Tasmanians who have resided continuously in the State for 6 months; the electorate for the Council is smaller, having a property or educational qualification for both sexes.

President of the Legislative Council, Hon. Tetley Gant, C.M.G.	£500
Speaker of House of Assembly, Hon. J. W. Evans, C.M.G.	500

THE JUDICATURE.

There are justices of the peace and courts of petty, general and quarter sessions, and a Supreme Court with a Chief Justice and two Puisne Judges.

Chief Justice, Hon. Sir H. Nicholls	£1,800
Puisne Judges, Hons. N. K. Ewing; H. Crisp each	1,500
Solicitor-General, L. E. Chambers	750
Registrar Supreme Court, W. O. Wise	625
Recorder of Titles, A. A. Richardson	675

EDUCATION.

Primary education is compulsory, secular, and free, there being 590 State schools in 1922, with 39,000 children on the registers. *Secondary* education is also provided by the State (6 high schools with 800 scholars), and by private endowment. There is a *University* at Hobart, and technical schools at Hobart, Launceston, Queenstown and Zeehan.

FINANCE.

Year.	Revenue.	Expenditure.	Debt.
1901	£826,163	£923,731	£8,511,005
1913–14 ...	1,238,086	1,235,013	12,265,012
1920–21 ...	2,105,449	2,189,157	18,776,306
1921–22 ...	2,181,395	2,302,077	21,945,411
1922–23 ...	2,174,061	2,472,523	22,439,176

Banking.—Dec. 31, 1922, the banks of issue had total deposits £5,260,767; the savings bank deposits were £4,224,662.

PRODUCTION AND INDUSTRY.

Agriculture and Live Stock.—Of the total area of 16,778,000 acres there were, in 1921–22, 293,708 acres under crops. The live stock included 216,704 cattle, 1,551,273 sheep, 49,743 pigs, and 38,439 horses. The wool production was 9,634,624 lb. The butter produced amounted to 5,270,243 lb.

Electrical Energy.—The Hydro-Electric Department of Tasmania has completed an important waterpower development at the Great Lake, in the centre of the State. The capacity of the present installation is 63,000 h.p., and is shortly to be increased to 75,000 h.p. The present plant is supplying the industrial needs of Hobart and district in the south, and Launceston and district in the north of Tasmania, as well as the Derwent Valley district.

Forestry Department.—Total area of timber land estimated at 9,000,000 acres. "The Forestry Act" provides for the dedication by the year 1928 of 1,500,000 acres as State forests. Timber resources of the State are now being placed on a sound basis, and under the control of a Conservator of Forests, managed on forestry principles. 14,040 acres have so far been dedicated as State forests. Timber reserves total 1,698,150 acres. Area held under lease or forest permits for sawmilling, logging, &c., 271,870 acres. The amount of timber milled for 1922 was 48,224,222 super feet, valued at £411,650. This is exclusive of timber used for piles, poles, fencing, and for practically all sleepers. Undressed overseas exports for 1922–3 (excluding exports to States within the Commonwealth) approximated 4,770,565 super feet. Exports beyond the Commonwealth are chiefly for harbour works and sleepers.

Minerals.—The chief minerals produced are copper, tin, silver, lead, coal and osmiridium, the value of all minerals produced in 1922 being £877,906.

Manufactures.—The chief factories for export are metallurgical, fruit preserving, woollen mills and confectionery; the value of the gross output in 1921 was £5,796,625, the capital invested in the 686 establishments being £4,096,959.

TOWNS.

CAPITAL, Hobart. Population (1921), 51,895. Other towns are Launceston (pop. 27,356), Devonport, Ulverstone, Burnie, and Queenstown.

Transmission of mails, approximate, 31 days.

VI.—WESTERN AUSTRALIA.

Includes all that portion of the continent west of 129° E. long., the most westerly point being in 112° 52′ E. long., and from 13° 30′ to 35° 8′ S. lat. Its extreme length is 1,500 miles, and 1,000 miles from east to west, and its total area 975,920 square miles.

Physical Features.—Large areas of the State, for some hundreds of miles inland, are hilly and even mountainous, although the altitude, so far as ascertained, rises nowhere above that of Mount Bruce (4,024 ft.) in the north-west division or the Stirling Range (3,640 ft.) in the south-west. The greater portion of the far interior may be described as a great tableland, with an altitude of from 1,000 to 2,000 ft. above sea-level, the surface of which consists in parts of sand-dunes, varied by wide stretches of clayey soils. Long, straggling rivers, broken during the summer into a series of pools, cross the country as far inland as the hills extend, widening in many cases nearer the coast into large sea-estuaries. Of the area of Western Australia, which is equal to more than half that of European Russia, probably about two-thirds is suitable for pastoral purposes, immense tracts having already been proved eminently so. Some 60,000 square miles are as yet neither alienated nor in process of alienation in the S.W. Division, the portion more immediately fitted for agricultural purposes, especially for the production of wheat, wine, and fruit, and considerable areas are already under cultivation. Gold, coal, and other minerals in abundance are found in many parts, and wide stretches of land are covered with forests of great commercial value.

POPULATION.

Year.	Males.	Females.	Total.
1917 (Estimated)	157,355	149,137	306,492
1918 ,,	159,662	150,120	309,782
1919 ,,	174,750	152,655	327,405
1920 ,,	176,638	154,181	330,819
1921 ,,	178,222	156,951	335,173

At the census of April 4, 1921, the population was ascertained to be: 177,013 males, 155,200 females, total 332,213. The total number of men who enlisted in the State during the course of the war was 34,353, and of these 23,670 returned. The settlement of the soldiers in suitable occupations has been vigorously pushed on since the end of the war. The tide of immigration from the United Kingdom and elsewhere has again set in, and in view of the unlimited scope Western Australia offers for further settlement, the Government is doing its utmost to encourage it. It is confidently expected that a better knowledge of the great resources of this as yet very meagrely peopled part of the Empire will more and more attract large numbers of suitable settlers from Great Britain and other populous countries, particularly as the Western Australian Government is again offering every inducement to the *bonâ fide* immigrant.

Natural Increase of the People.

Year.	Births.	Deaths.	Marriages.
1917	7,882	2,769	1,621
1918	7,106	2,833	1,612
1919	6,937	3,590	2,194
1920	8,149	3,388	2,931
1921	7,807	3,480	2,656

Religions.

There is no State aid to religions. At the Census of 1911 there were 109,435 persons belonging to the Church of England, 56,616 Roman Catholics, 34,348 Methodists, and 26,687 Presbyterians.

PHYSIOGRAPHY.

The coastal regions of the west and of the north are undulating, with an interior slope to the unsettled central portion of Australia. The Darling and Hamersley ranges of the west have a western slope to the Indian Ocean, into which flow many streams, notably the Swan, Murchison, Gascoyne, Ashburton, Fortescue, and De Grey. In the north the Fitzroy flows from the Leopold range into the Indian Ocean, and the Drysdale and Ord into the Timor Sea.

Climate.—The average temperature of Perth (lat. 32° S.) for the past 25 years was 65°, while the mean for the barometer for 37 years was 30·02 inches. There are wet and dry seasons, the former lasting from May to October. The total rainfall at Perth during 1910 was 37·02, during 1911 23·38, during 1912 27·85, during 1913 38·28, during 1914 20·21, during 1915 43·61, during 1916 35·16, during 1917 45·64, during 1918 39·58, during 1919 30·66, during 1920 40·35, and during 1921 41·09; the average for the past 46 years being 33·91.

The climate is one of the most temperate in the world, especially in the south-western portion, where excessive cold is never and excessive heat very rarely known. The summer heat, which is mostly dry, with hardly any rainfall, is during the greater part of the hot season relieved by cool sea-breezes in the afternoon. The winters are rainy, but with occasional dry spells of perfect weather.

GOVERNMENT.

Western Australia was first settled by the British in 1829, and in 1870 it was granted a partially elective legislature. In 1890 responsible government was granted, and the Administration vested in a Governor, a Legislative Council, and a Legislative Assembly. The present constitution rests upon an Amending Act of 1899, further amended by the Constitution Acts Amendment Act, 1911; the Executive is vested in a Governor appointed by the Crown and aided by a Council of Ministers.

GOVERNOR.

Governor of Western Australia, His Excellency Sir Francis Alexander Newdegate, K.C.M.G., *born* 1862 (1920)	£4,000
Private Sec., Maj. B. Kerr-Pearse, M.V.O.

ROYAL MINT.

Deputy Master, Capt. J. Campbell	£1,100

RAILWAY AND TRAMWAY DEPARTMENT.

Commissioner, Col. H. Pope, C.B.	£2,000
Secretary for Railways, J. F. Tomlinson	600
Chief Traffic Manager, C. S. Gallagher	876
Chief Mechanical Engineer, E. A. Evans	1,000
Chief Engr. Way and Works, H. A. Cresswell	1,000
Chief Accountant, L. H. Gwynne	800
Comptroller of Stores, H. Bromfield	725
General Manager, Tramways and Electricity Supply, Wm. H. Taylor	1,000

AGENT-GENERAL IN LONDON.

Agent-General in London, Hon. H. P. Colebatch, C.M.G. *Offices*, Savoy House, 115–116, Strand, W.C. 2.	£1,500
Secretary, C. B. Rushton (and allowance, £182)	636

THE LEGISLATURE.

Parliament consists of a *Legislative Council* of 30 members elected for 6 years, and a *Legislative Assembly* of 50 members elected for 3 years by universal adult suffrage; the electorate of the Council is restricted by a property qualification, that of the Assembly being subject to residence and registration.

President of the Legislative Council, Hon. Sir E. H. Wittenoom, K.C.M.G.	£700
Speaker of the Legislative Assembly, Hon. George Taylor	700

THE JUDICATURE.

There are magistrates' courts and general and quarter sessions, and a Supreme Court with a Chief Justice and three Puisne Judges.

Chief Justice, Hon. Sir R. F. Macmillan... £2,000
Puisne Judges, Hons. R. B. Burnside, J. A. Northmore, and T. P. Draper each 1,700

EDUCATION.

Education.—Education is compulsory and free, and numerous elementary schools are under the control of the Minister of Education. There are a training college, technical schools, a school of mines and a Goldfields High School at Kalgoorlie, a modern school, and a University. The total amount expended on education during the year ended June 30, 1922, was £571,925 (including the University, £15,900).

It has been consistently the object of successive Governments to place within the reach of each child in the State every advantage of education, from the kindergarten to the university.

FINANCE.

The revenue and expenditure and gross public debt of the State for the 5 years ended June 30, 1918-1922, are stated as under :—

Year.	Revenue.	Expenditure.	Debt.
	£	£	£
1918	4,662.536	5,328,279	42,304,001
1919	4,944,850	5,596,865	43,637,076
1920	5,863,501	6,531,725	46,822,003
1921	6,789,565	7.476.291	49,039,668
1922	6,907,106	6,639,241	54,959,778

Banking.—There were, including the Commonwealth Bank of Australia, 9 cheque-paying banks, formerly banks of issue, in the State on June 30, 1922, with total assets £15,835,268 and liabilities £12,823,460. The amount due to depositors in the State Savings Bank at June 30, 1922, was £5,736,318; in the School Savings Bank, £61,133; and in the Commonwealth Savings Bank the amount due to depositors in Western Australia on March 31, 1922, was £1,873,557.

War Funds.—The public contributions in Western Australia to a variety of War Funds up to Dec. 31, 1920, totalled approximately £1,188,650, or between £3 10s. and £4 per head of the mean population during the war period.

PRODUCTION AND INDUSTRY.

Agriculture and Live Stock.—Of the total area (624,588,800 acres) about 1,901,500 acres were under crops in 1921–22, wheat for grain accounting for 1,336,228 acres; large areas of good wheat-growing soil exist in the southern districts. The live stock included 893,108 cattle, 6,506,177 sheep, 63,001 pigs, 30,352 goats, and 180,334 horses. There were about 3,000 acres of vineyards.

Land Settlement and Agriculture.—It is only a few years since the immense capabilities of the State as one of the world's potential great wheat-producers were more generally realised. In those few years the area under wheat for grain has increased annually by leaps and bounds, the acreage in 1908 being only 279,609, whilst in 1916 it was 1,734,117. From 1916, owing to the War, a temporary retrogression set in, the acreage in 1922 being 1,336,228. Fruit-growing, prior to the war, was rapidly creating a considerable export trade to foreign markets. Large numbers of English and other immigrants were then annually settled on the still unoccupied agricultural areas of the State. With the energetic policy of development now once more initiated by the Government, assisted therein by the British Emigration Scheme, land settlement is again progressing rapidly, and Western Australia is absorbing a constantly increasing stream of immigrants. A very large portion of the south-western division of the State, containing many millions of acres, is especially suitable for wheat-growing, whilst the hills of the Darling Range and many other portions of the State produce grapes and other excellent fruit in the greatest variety.

Manufacturing Industries.—There were on December 31, 1920, a total of 998 industrial establishments in the State employing either machinery or at least four hands. The total number of persons employed by them was 17,977, as against 18,799 in 1914, the highest number previously reached. The combined output of these establishments was computed at £13,141,327.

Forestry.—The forests are among the most extensive within the Commonwealth, and contain some of the very finest hardwoods in the world. Two of these, jarrah (*Eucalyptus marginata*) and karri (*Eucalyptus diversicolor*), are largely exported.

Minerals.—The groups of the Coolgardie goldfields (covering a vast portion of the interior and extending to the 125th meridian), as well as other fields, are being constantly worked, the production of gold being 553,731 oz. in 1921, and 351,391 oz. in the first eight months of 1922. The total amount produced in the State from 1886 to August 31, 1922, is 34,653,513 fine oz. Magnetic iron, lead, copper, and tin ores exist in large quantities, as also coal.

Trade.—The principal ports are Fremantle, Albany, Bunbury, Geraldton, and Broome. The opening of the Trans-Australian Railway in Oct. 1917 has afforded another means of ingress and egress, both for travellers and merchandise. The imports chiefly consist of provisions, sugar, tea, tobacco, spirits, beer, soap, machinery, ironmongery, clothing of various kinds, &c. The principal exports are of wool, gold, jarrah timber, silver, tin, copper ore, sandalwood, barks for tanning, pearls and pearl-shells, hides and skins, wheat, flour, fruit, &c. The principal exports for the year ended June 30, 1922, were:—Wool, £3,202,145; timber, £1,141,047; sandalwood, pearl shell, pearls, hides and skins, £701,018; wheat, £3,037,976; and flour, £1,022,937.

During 1921–22 the total imports into Western Australia were valued at £12,037,779, including £2,484,521 from the United Kingdom, and £7,729,638 from other States of Australia. The exports totalled £13,181,555, including £4,869,326 to the United Kingdom and £2,079,757 to other States of Australia.

TOWNS.

CAPITAL, Perth. Population (1921) of Metropolitan area, including Fremantle, 155,592.

Perth, the capital, stands on the right bank of the Swan River estuary, 12 miles from Fremantle. The King's Park (approximately 1000 acres), on a hill overlooking the city and the wide estuarine reaches of the river, possesses unique natural beauty. Other towns are Fremantle (including suburbs, 25,526), Albany (3,980), Kalgoorlie and Boulder (over 16,000), Bunbury (4,478), Claremont (5,508), Geraldton (4,176), Midland Junction (4,935), and Northam (3,583).

Transmission of mails, approximate, 32 days.

PHYSIOGRAPHY.

The Dominion of New Zealand is distant about 1,200 miles south-east of the mainland of Australia, and consists of three main islands in the South Pacific Ocean, known as the North, South, and Stewart Islands, having a length of 1,100 miles, between 34° 22′ and 47° 18′ South latitude and 162° East longitude – 173° West longitude, with several groups of smaller islands lying at some distance from the principal group.

Geographical.—The two principal islands of New Zealand have a total length of 1,040 miles, the total coast-line reaching 4,330 miles. A large portion of the surface is mountainous in character. The principal range is that of the Southern Alps, having its culminating point in Mount Cook (12,349 ft.). The North Island mountains include several active and dormant volcanoes. Mt. Ruapehu (9,175 ft.) and Mt. Ngauruhoe (7,515 ft.) are the most important. Of the numerous glaciers, the Tasman (18 miles by 1¼) is the largest. The North Island in particular is noted for its hot springs and geysers. For the most part the rivers are too short and rapid for considerable use in navigation. The more important include the Waikato (220 miles in length), Wanganui (140) and Clutha (210). Lakes (Taupo, 238 sq. miles in area; Wakatipu, 112; and Te Anau 132) are abundant; many of them of great beauty.

Meteorological.—Owing chiefly to its great length, New Zealand's climate varies very considerably in its different divisions. In general it is mild with an abundant rainfall. Snow is rarely seen except upon the higher levels. Annual averages:—North Island, mean temperature 56° F., rainfall 48 in. (days with rain 159); South Island, mean temperature 52° F., rainfall 43 in. (days with rain 150).

GOVERNMENT.

The west coast of the South Island of New Zealand was discovered by Abel Jansen Tasman, the navigator (voyaging under the direction of the Netherlands' East India Company), on December 13, 1642. The islands were visited in 1769 by Captain Cook, who returned to them in 1773, 1774, and 1777. In 1793 the Government of New South Wales despatched H.M.S. *Daedalus* to the islands on a diplomatic mission. The first settlement of Europeans was made in 1814, but no colonisation took place until 1825. In 1840 British sovereignty was proclaimed, and on May 3, 1841, New Zealand was, by letters patent, erected into a separate colony distinct from New South Wales. On Sept. 26, 1907, the designation was changed to *The Dominion of New Zealand.* The Constitution rests upon the Act of 1852, under which the executive authority is entrusted to a Governor (now Governor-General) appointed by the Crown and aided by a Council of Ministers, with a Legislature of two houses.

GOVERNOR-GENERAL.

Governor-General and Commander-in-Chief of New Zealand, His Excellency Admiral of the Fleet Viscount Jellicoe, G.C.B., O.M., G.C.V.O., *born* 1859 (1923) £7,500

Private Sec., Capt. A. R. W. Curtis, M.C.

Official Secretary, A. Cecil Day, C.B.E.

Military Sec. and A.D.C., Capt. P. R. M. Mundy, D.S.O., M.C.

A.D.C., Capt. R. G. Southey, M.C.

Hon. A.D.C.'s, Col. C. W. Melville, C.B., C.M.G., D.S.O.; Col. H. Hart, C.B., C.M.G., D.S.O.; Col. R. Young, C.B., C.M.G., D.S.O.; Col. A. E. Stewart, C.M.G., D.S.O.; Col. Hugh Stewart, C.M.G., D.S.O., M.C.; Lieut.-Col. R. C. Allen, D.S.O.

Hon. Physician, Col. E. J. O'Neill, C.M.G., D.S.O., M.B.

Hon. Surgeon, Brig.-Gen. Sir Donald J. McGavin, C.M.G., D.S.O., M.D.

* EXECUTIVE COUNCIL, 1923.

His Excellency the GOVERNOR-GENERAL.

Prime Minister and Minister of Finance, Stamp Duties, and Minister in Charge of Land and Income Tax, State Advances, Valuation, Electoral, and Public Trust Depts., Rt. Hon. W. F. Massey, P.C. £1,800

HIGH COMMISSIONER IN LONDON.

High Commissioner in London, Col. Hon. Sir James Allen, K.C.B., New Zealand Government Offices, 415 Strand, W.C. 2	£2,000
Secretary, Alexander Crabb	874

THE LEGISLATURE.

Parliament consists of a General Legislative Council appointed by the Governor (prior to 1891 the appointments were for life; since that date for 7 years only), at present consisting of 42 members; and a House of Representatives consisting of 80 members elected for 3 years. Four of the members are Maoris elected by the natives. Women are entitled to vote and to be elected Members of the House of Representatives (Women's Parliamentary Rights Act, 1919). Members of the Upper House receive £315 *per annum* and of the Lower House £450 *per annum*, in each case with travelling expenses and deductions for non-attendance.

Speaker of the Legislative Council, Hon. Sir W. C. F. Carncross	£720
Speaker of the House of Representatives, Hon. C. E. Statham	990

THE JUDICATURE.

The judicial system is similar to that of England, with magistrates' courts and quarter sessions, and a supreme court with a Chief Justice and 8 puisne judges.

Chief Justice, Rt. Hon. Sir Robert Stout, P.C., K.C.M.G., LL.D.	£2,250
Puisne Judges, Hons. W. A. Sim, T. W. Stringer, J. H. Hosking, A. L. Herdman, Sir J. W. Salmond, J. R. Reed, C.B.E., K.C., A. S. Adams, F. V. Frazer (*President of Arbitration Court*), W. C. MacGregor, K.C. each	2,000

In 1922, 44,296 civil cases were tried in Magistrates' Courts, while summary convictions in criminal cases were 34,513. In 1922 convictions (or sentences) in Supreme Courts were 1,417. Civil cases to number of 523 were tried, judgment being entered for a total amount of £316,533.

POLICE.

On March 31, 1923, the strength of the Police Force was 1,003 of all ranks, equivalent to 1 for every 1,321 of the population. Average cost of police protection per inhabitant was, in 1922–23, 5s. 8¼d.

LOCAL GOVERNMENT.

For purposes of local government the Dominion is divided into counties and ridings, with incorporated boroughs, under elected county and municipal councils, town, road and harbour boards. Electors are adult ratepayers of both sexes.

Revenue of local bodies, 1921–22	£9,854,677
Net indebtedness, March 31, 1922	32,443,639

PASSPORTS.

With certain exceptions, no person over 15 years is permitted to land unless in possession of a passport issued by a competent British authority.

DEFENCE.

Army.

The New Zealand Defence Forces consist of the Permanent Force, the Territorial Force and the Senior Cadets.

Units of the N.Z. Permanent Forces are the New Zealand Staff Corps, the Royal New Zealand Artillery, the New Zealand Permanent Staff, the New Zealand Army Ordnance Corps and the New Zealand Army Pay Corps. These are responsible for the training of all branches of the New Zealand Forces and for all administrative matters connected therewith. The Territorial Force consists of 9 regiments of Mounted Rifles; 20 batteries of Artillery; 3 Depôts of Engineers (Field); 3 Depôts Corps of Signals; 3 Brigades of Infantry; 3 Depôts Army Service Corps; and 3 Depôts Medical Corps. The Dominion, for purposes of defence, is divided into 3 Commands, each of which produces one-third of the above Units. The Force is capable of producing, on mobilization, 1 Division and 3 Brigades of Mounted Rifles, and also produces the machinery for the duplication of this Force, and the provision of the necessary requirements to maintain it in the Field. The Senior Cadets are reorganised in Battalions and receive physical and elementary military training. There are a large number of Rifle Clubs in the Dominion established for the encouragement of rifle shooting. Military training is compulsory on all male citizens between the ages of 14 and 25; in the Senior Cadets from the age of 14 to 18, and in the Territorial Force from the age of 18 to 25, and in the Reserve from the age of 25 to 30.

During the South African War, New Zealand despatched 10 Contingents, totalling 6,500 men, to the assistance of the Imperial Forces in South Africa. On the outbreak of the Great War, the Dominion contributed a Force which captured and garrisoned German Samoa, and an Expeditionary Force for service in Europe. The latter force was engaged in Egypt and Gallipoli, and being subsequently expanded to a Division and a Brigade of Mounted Rifles, continued to operate on the Western Front and in Palestine until the termination of hostilities. During this period of service the Expeditionary Force absorbed 100,000 men, and 10,000 more were ready for embarkation or under training when the Armistice was signed. Seventeen thousand of the Dominion's soldiers lost their lives on service. The New Zealand Troops established a very high reputation for their gallantry and general behaviour under all circumstances. The tremendous amount of transport work involved in the conveyance of the Forces to Egypt, France, Britain, Gallipoli and Samoa was carried out with extraordinary success, not one New Zealand Transport having been lost while conveying troops.

Navy.

In 1909 New Zealand presented the battle-cruiser *New Zealand* to the Imperial Government.

The Naval Defence Act, 1913, provides for the establishment of a New Zealand Naval Force by voluntary enlistment for a prescribed period of not less than two years, members on discharge to be drafted into the New Zealand Royal Naval Reserve for such period as may be prescribed for service only in time of war: the ships and personnel forming the Force to pass under the control and to be at the disposition of the Imperial Government in time of war. A commencement was made with the formation of a New Zealand Division immediately prior to the war, when H.M.S. *Philomel* was commissioned with ranks and ratings lent from the Royal Navy to serve as a training ship for the formation of a small Naval Force. The *Philomel* was employed under the orders of the British Admiralty throughout the war and no opportunity was afforded for the commencement of a scheme of training. This vessel has been placed in commission again, and also carries out the duty of depôt ship at Auckland. In 1919 Admiral of the Fleet Viscount Jellicoe of Scapa, G.C.B., O.M., G.C.V.O., visited New Zealand in H.M.S. *New Zealand* and presented his report, making recommendations and suggestions for the Naval Defence of the Dominion. In 1920 H.M.S. *Chatham* was presented to New Zealand by the Imperial Government and was commissioned on 1st October with officers and men of the Royal Navy. A commencement was made in May, 1921, with the recruiting of New Zealand boys and youths for training as seamen and stokers. A Naval Board was constituted, charged with the control of all matters relating to the Naval Forces, upon the policy directed by the Minister, and vested with the executive command of the Naval Forces: the Board to be composed of the Minister of Defence (President) and the following members: the Commodore Commanding New Zealand Station (1st Naval Member); the Chief Staff Officer to the Commodore (temporarily, as 2nd Naval Member); the Secretary to the Commodore Commanding (Secretary to the Board). By Order-in-Council of the 20th June, 1921, it was provided that the ships and personnel comprising the New Zealand Naval Forces shall be described respectively as forming and belonging to "The New Zealand Division of the Royal Navy," which shall be the official designation of the Force. H.M.S. *Veronica* (Sloop), which had been on the New Zealand station since 1920, was recommissioned in March, 1922, for further service on the station. H.M.S. *Laburnum* arrived in New Zealand waters from England during the same month.

FINANCE.

Revenue and expenditure (Consolidated Fund) and debt of New Zealand for the 5 years ended March 31, 1923:—

Year.	Revenue.	Expenditure.	Gross Debt.
1919	£22,352,372	£18,673,599	£176,076,260
1920	26,081,340	23,781,924	201,170,755
1921	34,260,961	28,068,729	206,324,319
1922	28,127,007	28,466,837	219,054,385
1923	27,579,443	26,263,760	218,953,324

Taxation by General Government.—The total taxation for the year ended March 31, 1923, was £15,594,288, representing £12 7*s.* 11*d.* per head of population.

Customs and Excise Duties	£6,644,420
Land-tax	1,541,502
Income-tax	3,831,932
Death Duties	1,829,852
Other taxes	1,746,582

Land Valuation.—

	North Island.	South Island.
Unimproved value of land	£209,214,887	£119,959,450
Value of improvements	145,389,294	69,939,745
Capital value	£354,604,181	£189,899,195

Banking.—At the end of 1922 there were six banks of issue doing business, two of which were New Zealand banks. Total assets (average of four quarters of year), £61,779,569; liabilities, £53,868,834; value of notes in circulation, £7,019,220.

Post-office and private savings banks had, at the close of the year 1922–23, 800,867 depositors, having £49,024,094 to their credit.

EDUCATION.

The State system of education is free, secular, and compulsory. There were (December, 1922) 2,550 public primary schools, with 6,819 teachers and 213,097 scholars; there are also 263 registered private primary schools, with 24,861 scholars, and, in addition, 127 village schools for the Maoris with 6,161 scholars. The higher education of boys and girls in the cities and large towns is carried on in 36 endowed colleges and grammar schools, and in 13 technical high schools. The University of New Zealand (to which are affiliated Auckland University College, Victoria University College, Canterbury College, and the University of Otago, the four colleges having 3,683 students in 1922) has power to confer degrees.

PRODUCTION AND INDUSTRY.

Agriculture and Forestry.—The total area of the Dominion (excluding annexed and outlying islands) is 66,101,760 acres, and 43,653,163 acres of this were in occupation in 1923, this acreage representing 85,536 holdings. New Zealand is a pastoral rather than an agricultural country, but the quantity of wheat and oats grown is sufficient for the Dominion's requirements. The area under wheat in 1922–23 was 275,775 acres, giving a yield of 8,395,000 bushels. An area of 143,090 acres of oats was threshed, the yield totalling 5,688,000 bushels; while 302,216 acres were converted to chaff, hay, or ensilage. Other acreages were: barley, 17,473; rye-grass, 34,850; and potatoes, 20,197. An area of 492,974 acres was sown in turnips. Amongst the forest productions are the Kauri pine (found only at the northern extremity of the islands), much valued for shipbuilding and for its resin (Kauri gum). New Zealand flax is used for the manufacture of ropes and twine.

Live Stock.—The cattle in 1923 numbered 3,480,694; sheep, 23,081,439; pigs, 400,889; and horses, 330,818. The pastures of the South Island produce the celebrated sheep of the Canterbury Plain.

Minerals.—Coal-mining is one of the largest industries, the output in 1922 being 1,857,819 tons, the approximate total output to the end of 1922 being 55,551,307 tons. Gold-mining, both alluvial and quartz, is an important industry in many districts, and rich iron ore, in the form of ironsand, has been found in Taranaki, and in the form of brown hæmatite at Parapara, near Nelson.

EXTERNAL TRADE.

The total imports and exports of the Dominion are valued as follows, for the 5 years 1918–22:—

Year.	Imports.	Exports.	Total.
1918...	£24,234,007	£28,516,188	£52,750,195
1919...	30,671,698	53,970,075	84,641,773
1920...	61,595,828	46,441,946	108,037,774
1921...	42,942,443	44,828,827	87,771,270
1922...	35,012,561	42,726,249	77,738,810

The principal articles of import and export in 1922 were:—

	Imports.
Apparel	£1,982,915
Books and Music	454,264
Boots and Shoes	729,622
Coal	681,080
Drugs and Chemicals	1,098,024
Hosiery	641,589
Hardware and Ironmongery	428,709
Iron and Steel	1,683,981
Machinery and Machines	2,769,325
Manures	248,570
Motor Vehicles	1,527,326
Oils	2,234,666
Paper and Stationery	908,982
Spirits	623,033
Sugar	1,434,186
Tea	547,121
Textile Piece Goods	4,425,230
Tobacco, Cigars, &c.	1,328,746

	Exports.
Wool	£11,882,463
Frozen Meat	8,387,461
Butter and Cheese	13,728,404
Skins, Hides and Pelts	1,361,668
Gold	540,182
Phormium Fibre and Tow	295,530
Tallow	750,574
Timber	479,447
Preserved Milk	529,650
Sausage Skins	467,981
Kauri Gum	563,270

The external trade of 1922 was shared by the principal countries as under:—

Country.	Imports from.	Exports to.
United Kingdom	£19,416,476	£36,154,174
Australia	4,213,085	2,208,280
United States	4,948,778	2,672,775
Fiji	1,459,345	95,044
Canada	1,545,037	446,457
Japan	485,327	211,159
France	100,654	60,595
India and Ceylon	937,556	206,798

COMMUNICATIONS.

Railways.—In March, 1923, there were 3,037 miles of Government railway lines in working order, and more under construction; and 137 miles of private lines, together with an excellent coaching system. The number of passengers carried in 1922–23 was 28,221,362, while goods carried amounted to 6,618,588 tons. Revenue and expenditure were £6,727,802 and £5,502,497 respectively.

Shipping.—During 1922 the vessels entered inwards numbered 571 (tonnage, 1,782,987), and those entered outwards 569 (tonnage, 1,789,980), exclusive of coasting vessels.

Posts and Telegraphs.—The annual postal circulation was (1922) 246,274,509 letters and postcards, 35,635,219 newspapers, 67,578,435 books and packets, and 6,700,121 parcels, and the work is effected by 2,143 post-offices. There are 11,912 miles of telegraph line, with 48,616 miles of wire. The telephone service is highly efficient and universal in all centres. Telegrams transmitted during year, 13,513,208.

TOWNS.

CAPITAL, WELLINGTON, in the North Island.

The estimated population of the Urban Areas, at March 31, 1923, was as follows:—Wellington, 112,070; Auckland, 167,760; Dunedin, 75,050; Christchurch, 113,400; Invercargill, 20,180; Napier, 17,870; Gisborne, 15,120; Palmerston North, 17,810; Nelson, 11,240; Timaru, 16,450; Wanganui, 24,450; New Plymouth, 13,930; Hamilton, 15,350; and Hastings, 13,730.

THE ISLANDS OF NEW ZEALAND.

The following islands form part of the Dominion proper:—*North Island* and adjacent islets; *South Island* and adjacent islets; *Stewart Island* and adjacent islets, and *Chatham Islands*, between 43° 30′ S. lat. and 175° 40′–177° 15′ W. long. Chatham Islands have a population of 209 Europeans and 245 Maoris and half-castes. They support large flocks of sheep and some cattle.

The following are included in the geographical boundaries of New Zealand as proclaimed in 1847:—*The Three Kings* (discovered by Tasman on the Feast of the Epiphany), in 34° 9′ S. lat. and 172° 8′ 8″ E. long. (uninhabited). *Auckland Islands*, about 290 miles south of Bluff Harbour, in 50° 32′ S. lat., and 166° 13′ E. long. The islands contain several good harbours, but are uninhabited. *Campbell Island* (uninhabited). *Antipodes Group* (49° 41′ 15″ S. lat., and 178° 43′ E. long.) uninhabited, and *Bounty Islands* (47° 43′ S. lat., 179° 0′ 30″ E. long.) uninhabited.

The following islands have been annexed to New Zealand:—

The Kermadec Group, between 29° 10′ to 31° 30′ S. lat., and 177° 45′ to 179° W. long., includes Sunday, Macaulay, Curtis Islands, and L'Espérance, and some islets. The group is uninhabited.

Cook Islands, included in the boundaries of New Zealand since June, 1901, consist of the islands of Rarotonga, Aitutaki, Mangaia, Atiu, Mauke, Mitiaro, The Herveys (Manuae and Aoutu), Takutea, Palmerston, Penrhyn (or Tongareva), Maua Niki, Rakahanga, Pukapura (or Danger), Niue (or Savage), Suwarrow, and Nassau. The population at the Census of 1921 numbered 13,209, all except 360 being Natives. The chief products are bananas, oranges, and other tropical fruits, copra, coffee, pearl-shell, and hats (Niue). The trade is chiefly with New Zealand and the United States of America. The exports (1922) were valued at £150,924, and the imports at £132,144. Rarotonga is the chief island, with a native population of 3,287, and a population other than native of 216. The government is administered locally under the direction of New Zealand. The Island Council of the Cook Islands is under the direction of the Resident Commissioner at Rarotonga. The five Arikis of Rarotonga are of equal rank and are all members of the Council. Rarotonga is a place of call for the mail steamers between Sydney, N.S.W., and Wellington, N.Z., and San Francisco, U.S.A.

Resident Commissioner, Rarotonga, H. F. Ayson ....(and allowance £100) £920
Resident Comm., Niue, G. N. Morris 600

Ross Dependency—By Imperial Order in Council of July 30, 1923, the coasts of the Ross Sea, with adjacent island and territories, were proclaimed a British Settlement under the control of the Governor-General of New Zealand.

The Mandated Territories are:—

Western Samoa, consisting of the islands of Savaii, Manono, Apolima, Upolu, Fanuatapu, Namua, Nuutele and Nuulua (the remaining islands of the Samoan group belonging to the U.S.), have a total area of 1,050 square miles and a population at the Census of 1921 of 35,402. The largest islands are *Savaii* (660 square miles) and *Upolu* (340 square miles). Upolu contains the harbours of Apia and Saluafata, of which the former is the capital. In 1899 a disastrous tidal wave wrecked three U.S.A. warships and the "Eber" and "Adler" of the German Navy, *H.M.S. Calliope*, of the British Navy, effecting its escape. The disaster is recorded in "A Footnote to History," by R. L. Stevenson, whose home was at Vailima (near Apia), where also he is buried. The natives of the islands are Christians of different denominations, including a few adherents of the Latter Day Saints (Mormons). Coco-nuts (copra), and cocoa are the chief products of the islands.

Administrator, Brig.-Gen. G. S. Richardson, C.B., C.M.G., C.B.E.

Nauru Island, just South of the Equator, was captured by an Australian Expedition in 1914, and is administered by the United Kingdom, the Commonwealth of Australia and the Dominion of New Zealand. The island has a population of about 1,000. There are valuable deposits of phosphates on the island.

THE EMPIRE'S LONGEST TUNNEL.

The official opening of the Otira Tunnel took place on August 4, 1923, the Prime Minister declaring the tunnel open. The Otira (or Arthur's Pass) Tunnel is the longest in the British Empire and the seventh longest in the world. It will give direct rail communication between the East and West Coasts of the South Island, the respective terminals being Christchurch, and (on the other side of the Southern Alps) Greymouth. Time table trains have made the through trip as from August 6th. The tunnel, which is 5⅓ miles in length, cost £1,515,576, including the electrification of eight miles of track, electric locomotives being used in the tunnel.

NOTE.—"Facts concerning New Zealand," an article contributed by the Rt. Hon. W. F. Massey, P.C., Prime Minister, will be found on pp. 476 and 477.

AREA AND POPULATION.

Provinces and Capitals.	Area (English Sq. Miles).	Census of 1921.	
		White.	Total.
Cape of Good Hope (Cape Town)	276,966	650,609	2,782,719
Natal (Pietermaritzburg)	35,284	136,838	1,429,398
Transvaal (Pretoria)..............................	110,450	543.485	2,087,636
Orange Free State (Bloemfontein)	50,389	188,556	628,827
South-West Protectorate........................	322,200	19,432	227,739
Total	795,289	1,538,920	7,156,319

Of the total 5.973.394 persons (1911), 3,069.392 were males, and 2,904,002 females. The increase for the Union (1904–11) was 15·41 per cent. For the Provinces it was as follows:—Cape, 6·44 per cent.; Natal, 7·69 per cent.; Transvaal, 32·78 per cent.; Orange Free State, 36·37 per cent.

The increase for the Union (1911–21) was 15·99 per cent. For the Provinces it was as follows:—Cape, 8·49 per cent.; Natal, 19·71 per cent.; Transvaal, 23·81 per cent.; Orange Free State, 19·06d per cent.

* Increase due to influenza epidemic.

PHYSIOGRAPHY.

Boundaries.—The provinces of the Union extend from the southernmost point of the African Continent to the course of the Limpopo River, *i.e.*, from 34° 50′ – 22° South latitude, and include all the British territories within those limits, with the exception of Basutoland and the Swaziland and Bechuanaland Protectorates, while provision is made for the future inclusion within the Union of those territories and of the territories of the British South Africa Company.

Relief.—The southernmost province contains many parallel ranges, which rise in steps towards the interior. The south-western peninsula contains the famous *Table Mountain* (3,582 feet), while the *Great Zwarte Bergen* and *Lange Bergen* run in parallel lines from west to east of the Cape province. Between these two ranges and the *Roggeveld* and *Nieuweveld* to the north is the Great Karoo Plateau, which is bounded on the east by the *Sneeuwbergen*, containing the highest summit in the province (Compassberg, 7,800 feet). In the east are ranges which join the *Drakensbergen* (11,000 feet), between Natal and the Orange Free State.

The Orange Free State presents a succession of undulating grassy plains with good pasture-land, at a general elevation of some 3,800 feet, with occasional hills or kopjes. The Transvaal is also mainly an elevated plateau with parallel ridges in the *Magalies* and *Waterberg* ranges of no great height. The veld or plains of this northernmost province is divisible into the Hooge Veld of the south, the Banker Veld of the centre, and the Bush Veld of the north and east, the first and second forming the grazing and agricultural region of the Transvaal and the last a mimosa-covered waste. The eastern province of Natal has pastoral lowlands and rich agricultural land between the slopes of the Drakensberg and the coast, the interior rising in terraces as in the southern provinces.

Rivers.—The *Orange*, with its tributary the *Vaal*, is the principal river of the south, rising in the Drakensbergen and flowing into the Atlantic between the Protectorate of South-West Africa and the Cape of Good Hope. The *Limpopo*, or Crocodile River, in the north, rises in the Transvaal and flows into the Indian Ocean through Portuguese East Africa. Most of the remaining rivers are furious torrents after rain, with partially dry beds at other seasons.

HISTORICAL SKETCH.

The *Cape of Good Hope* was discovered in 1486 by Bartholomew Diaz, the commander of one of the many expeditions sent out by successive Kings of Portugal to discover an ocean route to India. Diaz merely doubled the Cape and returned home. Eleven years later, in 1497, Vasco da Gama not only doubled the Cape and landed in what is now Natal, but successfully accomplished the voyage to India. The Portuguese, however, did not make any permanent settlement at the Cape, although it was used by their vessels, and subsequently also by those of England and Holland, as a place of call in going to and from the East Indies. In 1652 the Netherlands' East India Company took possession of the shores of Table Bay, established a fort, and occupied the adjacent lands, in order to be always ready with supplies for their passing ships. In 1814 the Cape was formally ceded to the British Crown.

Natal derives its name from the fact of its discovery on Christmas Day, 1497, by the celebrated Portuguese navigator, Vasco da Gama. The first European settlement was formed (1824) by a small party of Englishmen, who came by sea and established themselves on the coast where Durban now stands. Natal was then a part of the great Zulu kingdom under T'Chaka. Between 1835 and 1837 another settlement was formed by a large body of Dutch Boers, who came with their waggons overland from the Cape Colony and settled in the northern districts, where to this day the Boers preponderate. In the year 1843 Natal was proclaimed as British and annexed to the Cape Colony. In 1856 it was erected into a separate colony, with representative institutions, and in 1893 acquired responsible government.

The *Transvaal* was formed as the *South African Republic* by parties of Dutch Boers from the English colonies who "trekked" into the interior of the continent and wrested the land across the Vaal river from the native chiefs. The discovery of the goldfields within its borders led to the settlement of large numbers of foreigners, and eventually to hostilities with the British Government. A war of nearly three years' duration was fought with great tenacity, and its close was marked by the inclusion of the South African Republic within the British Empire, "responsible government" being granted almost immediately.

The *Orange Free State* was founded, in much the same way as the Transvaal, by Boer emigrants from Cape Colony, and its independence was granted in 1854. Its subsequent history is identical with that of the Transvaal.

Delville Wood.—The title deeds of Delville Wood, containing the graves of South African troops who fell there during the battles on the Western Front in France during the Great War, are held by the Government of the Union of South Africa, and Delville Wood is part of South Africa.

GOVERNMENT.

The Union of South Africa is constituted under the South Africa Act, 1909 (9 Edw. VII., cap. 9), passed by the Parliament of the United Kingdom on September 20, 1909. In terms of that Act the self-governing Colonies of the Cape of Good Hope, Natal, the Transvaal, and the Orange River Colony became united on May 31, 1910, in a legislative Union under one Government under the name of the Union of South Africa, those Colonies becoming original Provinces of the Union under the names of the Cape of Good Hope, Natal, the Transvaal, and the Orange Free State respectively.

The Union Government is seised of all State property, and the Railways, Ports, Harbours, and Customs are administered by Union Commissioners for the benefit of a Consolidated Revenue Fund. The former debts of the Provinces are administered by and form a first charge upon the funds of the Union. Provision is made in the Act of 1909 for the admission to the Union of Rhodesia, and for the transfer to the Union Government of the administration of protected and other native territories. The Union was inaugurated by H.R.H. the Duke of Connaught, K.G., in 1910.

The Government publishes annually an "Official Year Book of the Union of South Africa," giving full statistics and descriptive information on all matters of public concern.

The seat of the Government is Pretoria; the seat of the Legislature is Cape Town.

The Executive is vested in a Governor-General appointed by the Sovereign, and aided by an Executive Council, with a Legislature of two Houses.

HIGH COMMISSIONER IN LONDON.

High Commissioner, Hon. Sir Edgar Walton, K.C.M.G., South Africa House, Trafalgar Square, W.C. 2.

Secretary, Sir R. A. Blankenberg, K.B.E.

Trade Commissioner, A. Canham.

Commissioner for Commerce on the Continent of Europe (at Rotterdam), K. A. Spilhaus.

THE LEGISLATURE.

The *Senate* consists of 40 members. For ten years after the establishment of Union eight are nominated by the Governor-General in Council and 32 are elected, eight for each Province. The first election was made prior to the establishment of the Union by the two Houses of each of the Colonial Legislatures sitting as one body, and a vacancy will be filled by the choice of the Provincial Council in respect of whose Province a vacancy occurs.

The *House of Assembly* consists of 135 elected members, 51 of whom represent the Cape of Good Hope, 17 Natal, 50 Transvaal, and 17 the Orange Free State. Members of both Houses must be British subjects of European descent.

President of the Senate, Hon. H. C. van Heerden	£1,200
Speaker of the House of Assembly, Hon. Christman Joel Krige	2,000

LOCAL GOVERNMENT.

A Provincial Council in each Province has power to legislate by ordinance on certain subjects specified in the Act, and on such other subjects as may be delegated to it. All ordinances passed by a Provincial Council are subjected to the veto of the Governor-General in Council. Members of the Provincial Council are elected on the same system as Members of Parliament, but the restriction as to European descent does not apply. Provincial administration is in the case of each Province vested in an Administrator, with an Executive Committee of four members. The Provincial Council in each case consists of the same number of elected members as there are electoral divisions of such Province for the House of Assembly, unless that number is less than 25 (as in the cases of Natal and the Orange Free State), when the number is 25. Each Council exists for a period of three years. Direct taxation is permitted for Provincial purposes, and legislation is authorised on certain specified subjects.

Administrators of the Provinces.

Cape	The Hon. Sir N. F. de Waal, K.C.M.G., LL.D.	£2,500
Natal	The Hon. Sir G. T. Plowman, K.C.M.G.	2,000

Staff employed in Government Service (excluding Railways), 1921-22, 35,671.

DEFENCE.

The South Africa Defence Act 1912, became law on June 14, 1912. This Act, as amended by the South Africa Defence Act Amendment Act of 1922, provides for the establishment of Defence Forces comprising :—

1. *The South Africa Permanent Force*, which consists of :—
   - (i) The South African Staff Corps.
   - (ii) The South African Instructional Corps.
   - (iii) The South African Naval Service.
   - (iv) The South African Field Artillery.
   - (v) The 1st Regiment, South African Mounted Riflemen.
   - (vi) The South African Permanent Garrison Artillery.
   - (vii) The South African Engineer Corps.
   - (viii) The South African Air Force.
   - (ix) The South African Service Corps.
   - (x) The South African Medical Corps.
   - (xi) The South African Ordnance Corps.
   - (xii) The South African Veterinary Corps.
   - (xiii) The South African Administrative, Pay, and Clerical Corps.

   The South African Naval Service includes the officers and men of the South African Division of the Royal Naval Volunteer Reserve engaged for whole-time service.
2. *The Coast Garrison Force.*
3. *The Citizen Force.*
4. *The Royal Naval Volunteer Reserve.*
5. *Special Reserves.*

Every citizen between the ages of 17 and 60 is liable to render personal service in time of war, and those between 17 and 25 are liable to undergo a prescribed peace training with the Active Citizen Force spread over a period of four consecutive years. The Act states, however, that only 50 per cent. of the total number liable to peace training shall actually undergo that training unless Parliament makes financial provision for the training of a greater number.

The establishment of Rifle Associations is a marked feature of the Act; citizens between the ages of 21 and 25 who are not entered for peace training with the Active Citizen Force are to be compelled to undergo training during these four years in a Rifle Association, thus ensuring that, in course of time, all citizens will at least know how to handle and use a rifle. Provision is also made in the Act for the cadet training of boys between 13 and 17 in urban and other populous areas, where facilities can conveniently be arranged.

The Union is divided into 15 military districts. To each military district has been allotted various units of different arms, to which the citizens entered for peace training in their 20th and 21st years are posted.

The object of the amending Act is to provide for a small standing army with an efficient Air Force and the nucleus of a Naval Service for coastal defence. Under the Act the Permanent Force is relieved of all Police duties in peace time for which they were liable under the Act of 1912, and becomes a purely military force. The provision of a Police Reserve to take the place of the South African Mounted Riflemen, when on active service, is no longer necessary, and has been expunged from the Act of 1912 accordingly.

EDUCATION.

In the South Africa Act, Section 85 (iii.), it is provided that "Education, other than higher education, for a period of five years and thereafter, until Parliament otherwise provides, shall be and remain under the jurisdiction of the respective Provincial Councils." For practical purposes it has been provisionally determined that all post-matriculation instruction shall be deemed to constitute higher education. The Department of Education, under the Minister, is therefore concerned with :—

(1) The University of South Africa, established April, 1918, as successor to the University of the Cape of Good Hope, with the following constituent Colleges—(*a*) Rhodes University

College, Grahamstown (1904). (*b*) Huguenot University College, Wellington (1907). (*c*) Grey University College, Bloemfontein (1910). (*d*) Transvaal University College, Pretoria (1910). (*f*) Natal University College, Pietermaritzburg (1909). (*g*) Potchefstroom University College (1921). (2) The University of Cape Town (1918—in succession to the South African College—1829). (3) The University of Stellenbosch (1918—in succession to the Victoria College). (4) The University of the Witwatersrand (1921—in succession to University College, Johannesburg—1910). The Department is further charged with the Teachers' First Class Certificate examinations.

The total number of students at these Colleges in 1922 was 3,804. The State expenditure on higher education in 1922 was £386,720.

Provision is made on the Vote of the Department of a grant-in-aid to the Potchefstroom University College (65 matriculated students in 1922) and to the South African Native College at Alice, Cape Province, an institution for the higher education of natives, which was formally opened in February, 1916, and has present accommodation for 55 students.

Primary Education and Education other than Higher Education.—The central direction of public education (other than higher education) is exercised by the Provincial Education Department in each of the four Provinces of the Union. Each Department is controlled by a Director or Superintendent of Education. In the Cape Province practically all the schools are State-aided. In Natal they are partly State-schools, and partly State-aided. In the Transvaal and Orange Free State they are in the main State-schools. In all Provinces primary education is free.

Number of Schools in the Union in 1921.—For white scholars, 5,038; for coloured scholars, 3,285; total, 8,323.

Number of Scholars and Teachers in 1921.—White scholars, 329,407; coloured scholars, 245,946; total, 575,353. Teachers, 20,632.

Expenditure from State Funds in 1921.—Cape, £2,450,629; Natal, £562,572; Transvaal, £2,677,316; Orange Free State, £922,317; total, £6,612,834.

In all Provinces Normal Colleges and other institutions for the training of teachers are maintained by the Education Departments.

Superintendent-General of Education, Cape, W. J. Viljoen, M.A., Ph.D.

Supt. of Education, Natal, H. Bryan, M.A.

Director of Education, Transvaal, J. E. Adamson, C.M.G., M.A.

Director of Education, Orange Free State, C. F. Schmidt, B.A.

UNION FINANCE.

The ordinary Revenue and Expenditure of the Union (exclusive of Railways and Harbour Administration) for the five years ended March 31, 1923, are stated as under:—

Year.	Revenue.	Expenditure.
	£	£
1918–1919	21,911,029	18,293,718
1919–1920	26,885,957	20,771,950
1920–1921	29,676,186	25,597,718
1921–1922	28,884,270	25,409,025
1922–1923	27,234,515	24,270,824

DEBT.

The Public Debt of the Union at March 31, 1923, was £199,685,868, composed as follows:—

Rate.	Funded Debt.	Floating Debt.
	£	£
Non-Interest Bearing	...	500,000
2¾%	...	4,000,000
3%	54,098,740	801,700
3½%	28,530,744	309,325
3¾%	3,000,000	...
4%	35,045,650	13,116,186
4½%	13,114,465	1,941,250
5%	21,491,983	3,735,825
6%	20,000,000	...
	£175,281,582	£24,404,286

At 31st March, 1922, the Funded Debt was £175,455,220 and the Floating Debt, £16,329,716.

PROVINCIAL FINANCE.

Prior to the passing of the Provincial Relations Act the four Provincial Administrations (Cape of Good Hope, Natal, Transvaal, and Orange Free State) received no revenues beyond the amount voted by Parliament by way of subsidies for the performance of the services and duties assigned to them. On the passing of the Act (April 1, 1913) certain revenues were transferred and assigned to the various provinces, and, in addition, subsidies were voted by Parliament equal to half the normal or recurrent expenditure. The Cape Province receives an additional amount equal to one-half the expenditure by local bodies; Natal and Orange Free State Provinces receive additional grants of £100,000 each; and Natal receives a special grant in lieu of trading and liquor licences payable to local authorities.

The ordinary Revenue and Expenditure for the six years ended March 31, 1922, were as follows:—

Financial Year.	Revenue transferred or assigned	Subsidies.	Total Ordinary Revenue.	Total Ordinary Expenditure.
	£	£	£	£
1915–16	1,134,566	2,069,628	3,204,194	3,365,705
1916–17	1,423,666	2,345,517	3,769,183	3,708,684
1917–18	1,723,049	2,611,435	4,334,484	4,255,051
1918–19	2,093,753	3,028,425	5,122,178	5,212,710
1919–20	3,405,134	3,653,581	7,058,715	6,388,052
1920–21	3,596,766	4,477,998	8,074,764	8,417,256
1921–22	3,738,150	4,681,998	8,819,282

Manufactures.—The development of local industries has been most marked during the last three years, the scarcity of oversea supplies, with the consequent increase in prices, having served as a very effective measure of protection, under which enterprise has flourished to a degree previously unknown. New industries have sprung up in the principal centres of trade, and existing industries have largely extended their operations. From the recently published returns of manufactures in the Union, the total output during the year 1917–18 was £60,806,910 sterling; 1918–19, £70,934,098; 1919–20, £92,913,844; 1920–21, £98,307,910; and 1921–22, £79,446,299. Amongst the new industries which have been established during the period of the War may be mentioned the following:—Wattle extract; industrial alcohol (motor fuel) from molasses; calcium carbide; sulphate of ammonia; bottle-making; starch from maize; iron smelting (still in the initial stage); arsenic production; de-tinning of scrap tin; copper manufacture, &c. As indicating the production during 1921–22 of certain specified industries, the following figures may be of interest:—

PARTICULARS OF CERTAIN MATERIALS USED OR TREATED AND OF ARTICLES PRODUCED IN SPECIFIED INDUSTRIES DURING 1921-22.

Industry.	Quantity.	Value.
Woolwasheries—		£
Wool scoured	33,570,308 lb.	—
Received for scouring	—	156,907
Tanneries—		
Value of leather produced	—	552,944
Wattle bark used	4,590 tons	28,379
Brush and Broom Factories—		
Value of brushes and brooms made	—	74,154
Bacon and Ham Factories—		
Bacon and ham produced	5,691,144 lb.	377,446
Lard produced	604,623 lb.	22,236
lbs. of Pigs, Cattle, and Sheep used	9,989,423 lb.	—
Value of Pigs, Cattle, and Sheep used	—	330,273
Butter and Cheese Factories—		
Butter Produced	12,508,504 lb.	1,094,555
Butter-fat used	10,683,742 lb.	739,172
Cheese produced	5,135,659 lb.	224,462
Milk used	5,507,270 lb.	156,739
Flour and Grain Mills—		
South African wheat treated	217,303 tons	3,119,407
Imported wheat treated	44,170 ,,	774,375
Maize treated	466,173 ,,	2,591,437
Other grain treated	12,166 ,,	159,415
Printing Works—		
Value of articles manufactured	—	3,874,661
Value of materials used	—	1,205,830
Tobacco, Cigar, and Cigarette Factories—		
Tobacco made	6,596,073 lb.	507,700
Cigars and cheroots made	2,326,484 lb.	9,599
Cigarettes made	1,441,348,484	1,499,814
South African leaf used	7,860,492 lb.	336,128
Imported leaf used	87,369 lb.	34,791
Rhodesian	2,130,785 lb.	198,677
Boot and Shoe Factories—		
Value of boots, shoes, veldschoens, &c., made	—	1,165,150
Coach and Wagon Works—		
Value of articles (including wagons, trollies, Cape carts, farm carts, &c.) made	—	189,327

Industry—*contd.*	Quantity.	Value.
Soap Factories—		£
Output of soap	39,691,138 lb.	1,230,233
Glycerine produced	866,132 lb.	17,863
Candle Factories—		
Output of Candles	16,785,465 lb.	604,119
Paraffin wax used	15,690,008 lb.	424,439
Stearine used	1,919,391 lb.	63,570
Breweries—		
Ale, Beer and Stout	6,989,837 gall.	1,478,655
Clothing Factories and Tailoring Establmts.—		
Total value of articles made and work done	—	1,790,027

Jam Factories, Fruit Preserving Works, & Sweet Factories—		
Total value of articles produced	—	1,483,685
Total value of materials used	—	953,593
Bakeries—		
Bread	177,431,499 lb.	2,566,924
Biscuits	7,945,336 lb.	332,172
Cakes	9,033,205 lb.	552,020
Total value of materials used	—	2,313,244

Mines and Minerals.—Gold mining still continues the chief source of the country's wealth. At the outbreak of war the diamond mines closed down. The value of the mineral output of the Union in 1922 was:—

	£		£
Gold	29,775,984	Lime	209,720
Diamonds	2,266,631	Silver	171,427
Coal	3,395,176	Salt	148,445
Copper	38,622	Asbestos	81,230
Tin	59,986	Soda	1,588

The mineral production for the Union of South Africa was as follows:—

Gold.

1918	8,418,379	fine oz.	£35,759,003
1919	8,331,651	,,	35,390,609
1920	8,158,455	,,	34,654,922
1921	8,128,710	,,	34,528,564
1922	7,009,859	,,	29,775,984

The labour employed in the gold industry in December, 1922, Transvaal, was 17,920 whites and 188,229 coloured. 21,574 whites and 187,932 coloured were working in the Transvaal in December, 1921.

Diamonds.

1912			£10,061,489
1913			11,389,807
1914			5,487,194
1915			399,810
1916	2,346,330	carats	5,728,391
1917	2,902,416	,,	7,713,810
1918	2,537,360	,,	7,114,867
1919	2,588,017	,,	11,734,495
1920	2,545,017	,,	14,762,899
1921	806,643	,,	3,103,448
1922	669,559	,,	2,266,631

The labour employed in diamond mining, including individual diamond digging, was in December, 1922: Transvaal, 4,261 whites, 10,094 coloured; Cape, 2,874 whites, 10,346 coloured; O.F.S., 345 whites, 1,942 coloured; a total of 7,480 whites and 22,382 coloured. The value of diamonds owned throughout the world was stated to be £600,000,000 in 1918, one half being owned by residents in U.S.A.

Coal.

(Tons of 2,000 lb.)

1922.

Transvaal	5,380,294	tons	£1,509,701
Cape	6,813	,,	5,191
O.F.S.	729,113	,,	209,980
Natal	3,618,093	,,	1,670,304
Totals	9,734,313	,,	£3,395,176

The labour employed in coal mining in December, 1922 was: Natal, 791 whites, 16,844 coloured; Transvaal, 684 whites, 14,615 coloured; Cape, 10 whites, 132 coloured; O.F.S., 105 whites, 2,082 coloured; a total of 1,590 whites and 33,673 coloured.

Silver.

There are no silver mines in the Union. The output, valued at £171,427, represents silver contained in gold bullion and base metal ores.

Copper.

(Tons of 2,000 lb.)

In 1922, 3,017 tons of concentrates were produced in the Transvaal, but treatment was not completed at the end of the year. 706 tons of matte and ore, valued at £38,662, were shipped from the Cape during 1922.

Tin.

(Tons of 2,000 lb.)

In 1921, 1,416 tons of tin concentrates, valued at £138,670, were shipped from the Transvaal, and 9 tons, valued at £1,018, from the Cape. The Union figures for 1922 are 612 tons, valued at £59,986, produced in the Transvaal.

Other Minerals.

The value of the total mineral production of the Union for 1922 was £40,527,401. The value of miscellaneous products (bricks, cement, &c.), £1,555,226; quarry products, £56,032; lime, £209,720; lead, £94,720; magnesite, £2,372; graphite, £1,250.

EXTERNAL TRADE.

The total value of the Imports and Exports in the seven years 1915–1922 (exclusive of specie) was as follows:—

Year.	Imports.	Exports.	Total Trade.
	£	£	£
1915	31,810,717	34,817,983	66,628,700
1916	40,399,945	65,683,381	106,083,326
1917	36,476,238	91,574,835	128,051,073
1918	49,487,168	70,632,924	120,120,092
1919	50,791,205	106,402,627	157,193,832
1920	101,827,104	98,896,483	200,723,587
1921	57,800,316	74,354,154	132,154,470

COMMUNICATIONS.

Railways.—The first railway in South Africa was commenced in April, 1859, the first sod being turned by the then Governor of the Cape of Good Hope, Sir George Grey. This was very shortly followed by Natal, who started the construction of a line running from Durban. Another two lines finally linked up at Heidelberg in 1895. The Cape line was opened for public traffic to Stellenbosch in 1862 and to Wellington in 1863, while a track to Wynberg was opened to traffic in 1864. Little progress was however made in succeeding years, and it became evident that the development of the country could not be left to private enterprise. The existing Cape lines were therefore purchased by the Government on Jan. 1, 1873, and in 1876 Natal followed by acquiring the railways in that colony. Increased working at once took place, and the construction of four lines was pushed inland from Cape Town, Durban, Port Elizabeth, and East London. Bloemfontein was reached in 1890, and two years later a line to Germiston linked up with the system already established in the Transvaal.

The total open mileage of Government-owned lines at the end of March, 1923, was 10,987 miles (comprising Cape 4,254, Orange Free State 1,342, Transvaal 2,644, Natal 1,416, and South-West Africa 1,331), of which 10,063 miles are 3 ft. 6 in. gauge and 924 miles 2 ft. gauge. The capital expenditure on Government railways up to March 31, 1922, amounted to £103,355,073. The gross earnings for the year ending March 31, 1922, were £20,807,359, and the net loss, after payment of interest, £1,392,731. Working expenditure (excluding depreciation) amounted to £15,546,602, or 74·7 per cent. of the gross revenue, as compared with £17,039,091, or 72·1 per cent. of the gross revenue for the previous year. The *Cape to Cairo Railway*, projected by Cecil Rhodes, had advanced to Buluwayo by 1902, 1,362 miles from Cape Town, and 3,600 miles from Cairo. In 1922 there were certain small links to be completed along the Congo River, where steamers filled the gaps; and a big link between Stanleyville and El Obeid. The *Trans Zambesi Railway*, from Dondo (on the Beira-Mashonaland line) to the Zambesi, was opened July 1, 1922, thus placing the Union in direct communication with Nyasaland.

Posts and Telegraphs.—On March 31, 1923, there were in the Union 2,805 post and telegraph offices open. 139,359,000 letters and cards, 88,817,000 newspapers, books, and circulars, 4,719,000 parcels, 2,877,000 registered articles, 14,764,000 official letters and other articles, and 5,520,000 telegrams were received and despatched during the year ended March 31, 1923. The number of money orders issued during the year ending March 31, 1923, was 420,429, while 359,582 were paid; 3,015,402 postal orders were issued, and 2,603,624 paid. The revenue of the Department of Posts, 1921–22, was £1,662,154; expenditure, £1,889,525. The revenue of the telegraph service was £495,936; that of the telephone service, £735,667, and the expenditure £1,313,060; 9,335 miles of telegraph line, carrying 41,932 miles of wire, and 4,160 miles of telephone route, carrying 168,610 miles of wire, were open in 1922–23. There are 4 wireless stations in the Union. During 1922–23, 14,288 messages, valued at £4,498, were sent, as compared with 11,420 messages in 1921–22, valued at £4,286. The number of depositors in the

Government Savings Bank on March 31, 1923, was 288,331, the amount to their credit being £6,335,310.

Shipping.—In 1922, 3,927 vessels (11,518,551 net tons) entered and 3,917 vessels (11,510,755 net tons) cleared at the ports of the Union of South Africa.

RAILWAYS AND HARBOURS BOARD.

The railways, ports, and harbours of the Union are administered and worked under the control and authority of the Governor-General in Council, exercised through a Minister of State, who is advised by a Board consisting of three Commissioners.

The management and working of the railways and harbours are subject to the control of the Minister of Railways and Harbours, carried on by the General Manager, who is governed by such regulations as the Minister may from time to time frame, after consultation with the Board. The constitution of the Board at date is as follows:—

Chairman, Hon. J. W. Jagger, Minister of Railways and Harbours.

Members, Hon. T. Orr, C.M.G., The Hon. J. F. B. Rissik.

Secretary, C. M. Hoffe (*acting*).

Chief Officers.

Gen. Manager, Johannesburg, Col. Sir William Wilson Hoy, K.C.B.

Asst. do., Johannesburg, R. B. Gettliffe.

Asst. do., Bloemfontein, P. E. Potter.

Asst. do., Cape Town, J. W. Carr, D.S.O.

Asst. do., Durban, J. R. More, M.I.C.E.

Chief Civil Engineer, Johannesburg, R. C. Wallace, M.I.C.E.

Chief Mechanical Engineer, Pretoria, F. R. Collins, D.S.O.

Chief Accountant, Johannesburg, G. A. Reid.

Chief Railway Storekeeper, Johannesburg, H. J. Lyddon.

Catering Manager, Johannesburg, A. H. Simmons.

South-West Africa.

Administered under Mandate as an integral part of the Union of South Africa.

Administrator, Gijsbert Reitz Hofmeyr, C.M.G.

Secretary, H. P. Smit.

SOUTH-WEST AFRICA lies between S. lat. 17° 23′ and the Orange River. There is in addition a narrow strip lying between 18°–18° 30′ S. lat. extending from 21° to 25° E. long. This is known as the Caprivi Zipfel, and gives access to the Zambesi river. The estimated area of the country is 322,440 square miles, and the population amounts to approximately 227,739, of whom 19,432 are Europeans. These figures include the estimated population of certain areas, which it was found impracticable to enumerate in connection with the recent census; viz., Ovamboland, 90,030; Kuring Kuru, 20,010; Kaokoveld, 10,970; Franzfontein, 300. Running more or less parallel to the coast, and roughly at a distance of 60 to 100 miles from it, is a broken range of mountains, from which there is a gradual slope to the sea. The country between these mountains and the coast is barren desert except towards the North, and is known as the Namib. Towards the East from these mountains the land slopes eastward and forms the western edge of the great Kalahari Plateau. The Northern and Southern boundaries are the Okavango and Cunene, and the Orange Rivers, all perennial streams of considerable volume, and on the Orange are the *Great Falls*, twice the height of Niagara. All the other rivers in the country are dry except occasionally in the rainy season, but in most of them water can always be obtained at suitable places by sinking a shallow well. Of these the most important are the Kuiseb, Swakop, Omaruru, Ugab, and Hoarusib in the West, Great and Little Fish Rivers in the South, the Elephant, Black and White Nosob in the South-East, and in the North are broad sandy beds named by the natives Omurambas. The townships are dependent almost entirely for their water on wells or springs. At such places as Windhoek and Grootfontein in the latter give a strong supply. Along the Auob River, in the Gibeon District, artesian water has been discovered in such quantity as to have converted what was formerly a dry river bed into a stream running for 70 miles before it disappears into the sand. Sink-hole lakes occur in the "Karst" region extending from Grootfontein to Outjo. The Etoscha Pan, which lies across Lat. 19 and its intersection with Long. 16, and is about 70 by 40 miles in extent, is a geographical feature of great interest. In the summer during the rainy season it sometimes becomes filled with water partly from the Cunene River, 100 miles away, which then overflows its banks. In the winter it is dry and is frequented by game of all kinds in large numbers. Except by means of pumping, the waters of the Orange River are not available for agricultural purposes so far as South-West Africa is concerned, as the stream flows in a deep valley with precipitous sides and can only be crossed at one or two places. In 1919, Professor E. H. L. Schwartz, F.G.S. (Professor of Geology at Rhodes University College, Grahamstown), propounded a scheme for making permanent use of the waters of the Cunene by building across it a small dam which would ensure that the Etoscha Pan was continuously filled. His scheme also embraced the Okavango, most of the waters of which at present drain away into the Zambesi, but which in former times ran into Lake N'gami and the Makalakari Lake, both situate in the Bechuanaland Protectorate. He advanced the theory that if these waters are turned to their original purpose the whole of South Africa will benefit by increased rainfall. Among the mountain features of the country, which is geologically of great interest, are the Chaukaib (3,520 ft.) near Luderitz, the Khomas Highlands (6,000) near Windhoek, the Onyati (7,198), 40 miles N.E. of Windhoek, the Auas (6,500), just south of Windhoek, the highest peak of which is the Moltebliek (8,148 ft.), the Omatako in the North (8,790 ft.), the Gansberg (7,662) in Great Namaqualand, the Erongo, the Waterberg, the Brandberg and many others, including the large extinct volcano near Berseba named Geitsi Gubib. The climate is dry. Rain falls only in the shape of thunderstorms and in the later summer months. The actual rainfall varies from ¼ inch at the coast to 4 inches in the southern portion of the interior and 20 in the northern. Very little agriculture is undertaken, and except at one or two places such as on the Auob river and in the Grootfontein neighbourhood, few cereals are grown. Several irrigation schemes are now being considered, and settlers are being encouraged to undertake water conservation. The soil is of a high fertility in the greater part of the territory, and an extensive dam-making programme is expected to give an appreciable fillip to agricultural production. Apart from mining the staple industry of the country is stock raising, and it is remarkably well suited for this; in the South for small stock and in the centre and North for cattle. Horse breeding is also undertaken successfully. Except in the desert the veld is for the most part of the thorn-bush type so prevalent in many parts of North, East and South Africa. After the annual rains grass of good food value grows plentifully, and when ripe retains its nutritive qualities as hay for some three years, even though remaining in the soil. In the far North palms and some useful trees are to be found. Though somewhat hot in summer, in winter the climate is magnificent. At Swakopmund, owing to the influence of the Benguella current, the temperature varies but little throughout the year, and this town compares not unfavourably with any other watering place in South Africa. The principal source of revenue lies in the diamond fields of Luderitz. The existence of diamonds in this area was discovered on April 11th, 1908, by a Cape coloured boy who had formerly worked in the Kimberley mines, and they are now worked in considerable quantities. In 1922 the output was 144,120 carats. About half of the value goes to the Administration as revenue. Recently all the important German companies were bought out by the Consolidated Diamond Mines, Limited, a company with its headquarters in Capetown, and in which various Johannesburg, British and American financiers are interested. The deposits lie on or near the surface, and working is easy, save for the absence of water and fuel. Electricity is furnished from a central station at Luderitz. An electric railway has been built to serve the fields and runs as far as Bogenfels, 70 miles to the South. Copper mining is also carried on to a considerable extent, the principal mine being at Tsumeb in the North, and producing about 5,000 long tons a month. This is by far the most productive metalliferous mine in the territory, and one of the most successful base mineral ventures in South Africa. Game abounds throughout the whole country. Guinea-fowl are to be found practically everywhere, and there are many other game birds, and every variety of small buck and also kudu and gemsbok exist throughout the land, while in certain places hartebeest, wildebeeste and eland run in considerable numbers. The species of lesser bustard known as Ruppell's korhaan is believed only to be found in this territory. In the less frequented parts of the northern portion of the country elephant, rhinoceros and giraffes exist, and on the Cunene and Okavango many varieties of game are met with. Lions abound in the Kaokoveld and the north-western portion of the country.

The native races are:—In the South, Hottentots. In the centre, Hereros and Bergdamaras, with the exception of the Rehoboth district which is occupied by a mixed race known as the Bastards; and in the North, Ovambos. To the North and East there are many small bushmen tribes, some pure bushmen, but the remainder a mixture of aboriginal native tribes and bushmen. The Kaokoveld (the North-Western area) is very scantily inhabited by Hottentots and Ovatyimbas, and contains no white inhabitants with the exception of a few trek Boers from the Boer Settlement in Angola. It is very mountainous, and in many places well supplied with water.

The Administration of the country is vested in the Government of the Union of South Africa by mandate, and is actually exercised by the Governor-General, who has, however, delegated most of his powers to an Administrator appointed by the Union Government. The seat of the Administration is Windhoek, which lies practically in the centre of the country and is 5,590 ft. above sea level. The Territory is divided into 17 Districts ruled over by Magistrates as the representatives of the Government. The Territory of Walvis Bay, which is actually part of the Cape Province of the Union, is administered so far as possible as a portion of South-West Africa, and its magnificent harbour will undoubtedly in the future prove of great benefit. The only other harbour which can be made use of is at Luderitz. A regular service of steamers from Capetown to these two ports has now been in existence for some time, as also a monthly service direct from Rotterdam of passenger and cargo boats. The power of Legislation is vested in the Administrator under the authority delegated to him by the Governor-General of the Union. There is no Parliamentary representation in the country, but an Advisory Council has been appointed to assist the Administrator in his task of governing the country. It consists of nine members, representatives of all classes and interests in the country, and one is specially appointed on behalf of the natives. Among other industries than those already referred to are the export of fish, sealskins, guano, horns, hides, wool, ostrich feathers, marble, lead and other ores. A brisk trade with the Union has sprung up in slaughter cattle, and a scheme for the establishment of Cold Storage with a view to creating an export trade with Europe in meat is under consideration. The country is sparsely inhabited by Europeans, and large tracts of Crown land are available on easy terms for settlement by persons of moderate capital as farmers. Enquiries in this connection should be addressed to the Senior Officer, Lands Branch, Windhoek, S.W.A.

The railway system in South-West Africa, now controlled and worked by the South African Railways and Harbours Administration, and connected with Union Lines (De Aar to Nakop Protectorate border 344 miles), comprises:—

Union Lines—	Miles.
Broad Gauge:	
Walvis Bay to Swakopmund Border......	20
De Aar to Nakob Border	344
South-West Territory Lines—	
Broad Gauge (3 feet 6 inches):	
Nakob (border) to Swakopmund............	770
Seeheim Junction to Luderitz...............	198
Narrow Gauge:	
Usakos to Tsumeb	250
Otavi to Grootfontein.........................	57
Otjiwarongo to Outjo	46
*Kalkfeld to Iron Mine	7

In addition, the Administration works 99 miles of privately owned lines.

The Capital of the Protectorate is Windhoek (white population, 1921, 3,460), other inland towns being Keetmanshoop (white population, 1921, 1,026), Aroab, Bethanie, Gibeon, Gobabis, Grootfontein, Karibib, Okahandja, Omaruru, Otjiwarongo, Outjo, Rehoboth, Warmbad and Maltahohe. The ports are Swakopmund (white population, 1921, 1078) and Lüderitz Bay (white population, 1921, 1,003).

---

* Private siding.

Provinces of the Union of South Africa.

CAPE OF GOOD HOPE.

The Province of the Cape of Good Hope reaches in S. lat. from 26° to 34° 50′, and in E. long. from 16°25′ to 30°. The extent of the country is, N.E. to S.W. 750 miles, and from N.W. to S.E. 800 miles, with a coast-line of nearly 1,300 miles.

Area and Population.

	Sq. miles.	Pop., 1911.	Pop., 1921.
The Colony...	208,661	1,553,630	1,698,817
East Griqualand.	6,602	243,222	264,827
Tembuland	3,339	227,432	234,988

Cape Province.	276,966	2,564,965	2,782,719

CAPE OF GOOD HOPE, 1921.

Race.	Males.	Females.	Total.
European	329,394	321,215	650,609
Non-European	1,019,195	1,112,915	2,132,110
Total	1,348,589	1,434,130	2,782,719

Of the non-European population in 1921, 7,696 were Asiatics, 1,640,162 were Bantu, and 484,252 were of mixed and other races. Of the European population in 1911, 24,245 were professional, 143,925 domestic, 37,796 commercial, 87,795 agricultural, 50.031 industrial, 232,730 were dependants, and 5,855 indefinite and unspecified. Of the coloured population, the great majority are engaged in agricultural or domestic employments.

Year.	Births.	Deaths.	Marriages.
1917	55,529	41,023	11,814
1918	55,862	88,024	11,512
1919	49,039	48,011	14,294
1920	54,029	44,790	14,783
1921	53,801	41,538	13,165
1922	58,029	35,982	13,005

Religion. — In 1921 there were 1,684,906 Christians—546.065 Dutch Churches, 358,827 Anglican Churches, 105,696 Presbyterians, 115,941 Congregationalists, 394,085 Methodists, 76,421 Lutherans, 47,293 Roman Catholics, 16,102 Baptists, and 24,476 other Christian sects. Mohammedans 24,513, Jews 21,244, Heathen 1,002,450, other 49,606.

Education.—The Province is divided into 122 school districts, each under the control of a School Board, two-thirds of the members being locally elected, and one-third nominated partly by Government and partly by Municipal or Divisional Councils. Education is compulsory for children of European extraction. The necessary grants are provided from Provincial Council revenues, primary education being free.

Aided Schools, Dec. 31, 1921, 4,687: enrolment 291,425, attendance 260,693. There are 135,708 European pupils and 157,887 non-European pupils. There are 10,216 teachers. Government expenditure on education, exclusive of Higher Education (for which see Union of S.A.), for 1913–14, £853,448; 1914–15, £919,485; 1915–16, £917,856; 1916–17, £976,294; 1917–18, £1,166,059; 1918–19, £1,435,385; 1919–20, £1,676,208; 1920–21, 2,003,567; 1921–22, 2,450,629.

Charitable Institutions, Hospitals, Pauperism.—In the hospitals 24,084 in-patients were treated during 1921, and there were 111,760 out-patient attendances at Government-Aided Hospitals.

Harbours and Works.—There are magnificent harbours at Table Bay (Cape Town), Port Elizabeth, East London, and Mossel Bay. There are electric tramways in Cape Town, Port Elizabeth, East London, and Kimberley.

Administration.—The Province is administered by an Administrator, appointed for five years by the Governor-General, aided by a Provincial Council of 51 members (elected for three years). There is an Executive Committee of four members in addition to the Administrator, who is Chairman of the Committee.

Local Government.—There are 129 municipalities, each governed by a Mayor or Chairman and Councillors, a certain number of whom are elected annually by the ratepayers. There are 78 Village Management Boards.

Administrator, Hon. Sir N. Frederic de Waal, K.C.M.G. £2,500
Executive Committee, Daniel Retief; S. A. Eddy; C. H. Geldenhuijs; L. J. Steytler.
Prov. Sec., A. Weisbecker.

CAPITAL, CAPE TOWN. Total population (1921), white and coloured (with suburbs), 207,404.

Capetown is 5,979 miles from Southampton; transit, 16 days.

NATAL.

The Province of Natal comprises an area of 35,284 square miles, (including Zululand, 10,427 square miles), with a seaboard of 360 miles.

	Census, 1921.		
Population.		Males.	Females.
Europeans	136,838	70,477	66,361
Indians and Asiatics.........	141,649	80,314	61,335
Natives and other coloured	1,150,911	556,809	594,102
Total	1,429,398	707,600	721,798

In 1922 the European births registered numbered 3,299, deaths 1,301, and marriages 1,141. The race question in Natal is complicated by the presence of large numbers of Indian subjects of the Crown, brought over during the latter half of the nineteenth century to supply the deficiency of local labour.

Education.—A University College has been founded at Pietermaritzburg, and there are 4 Government high schools, 2 preparatory schools, 346 primary schools for white children, 1 art school, 1 agricultural and trades school, There are also 2 Technical Institutes, 51 Asiatic schools, 507 native schools, and 21 other coloured schools, which receive Government aid, and a large number of private schools.

Administration.—The government is administered by an Administrator, aided by a Provincial Council of 25 members (elected for 3 years). There is an Executive Committee of 4 members.

Administrator, Hon. Sir G. T. Plowman, K.C.M.G.
Executive Committee, F. C. Hollander, J. Dyson, J. McAuslin, J. P. Whyte.
Provincial Secretary, John M. Hershensohnn.

Pietermaritzburg, the capital and seat of the Provincial Government, is situated about 54 miles inland from Port Natal. Total population (white and coloured), 36,023 in 1921.

In Durban (population, 1921, 146,310), or Port Natal, is the only harbour of any importance on the south-east coast. The entrance is now safe and navigable for any vessel at any time; the average low-water depth at the entrance, the bar being no longer existent, for 1908 being 33 ft. 7 in.

Natal, 6,800 miles; transit, 20 days.

ZULULAND.

Zululand, annexed in 1897, comprises about two-thirds of the country formerly under Zulu kings, and is bounded on the south and south-west by the Tugela River; on the south-east by the Indian Ocean; on the north by the Portuguese possessions; and on the west by the new territory (formerly Utrecht and Vrijheid districts of the Transvaal) and Swaziland. The *Amaputaland Protectorate*, created by proclamation of Nov. 22, 1897, was annexed to Zululand on Dec. 27, 1897, and now forms part of the Province. The *Northern Districts* territory (consisting of the Magisterial Divisions of Vrijheid, Utrecht, Paulpietersburg, and Babanango) was annexed to Natal on January 27, 1903.

THE TRANSVAAL.

TRANSVAAL, 1921.

Race.	Males.	Females.
European	284,388	259,097
Native	847,446	648,423
Other Coloured	27,596	20,686

The Province of the Transvaal has a total area of 110,450 square miles, about 20,000 square miles lying within the tropics. The Census of 1921 showed a population of 2,087,636, of whom 1,159,430 were males and 928,206 females; the population comprised 543,485 Europeans or whites, 1,495,869 natives, and 48,282 other coloured races. In 1922 there were 21,458 births (16,385 European), 14,004 deaths (5,463 European), and 6,228 marriages (4,341 European).

Religion.—The religious statistics for 1921 are:—

Churches.	Whites.	Others.
Dutch Churches	287,630	49,578
Anglican	98,849	94,543
Presbyterian	31,715	12,407
Methodists	37,921	143,441
Roman Catholics	23,419	14,490
Lutherans	4,583	136,335
Other Christians	19,542	64,437
Jews	33,515	4
Hindus, &c.	1,804	15,499
No Religion	4,507	1,013,417

Education.—There were 1,133 schools for white children in 1921, with an average enrolment of 113,789 and an average attendance of 104,006, 5 normal colleges, and 4 normal college preparatory classes. There were also 385 native schools, 3 Asiatic schools, and 22 coloured schools, with 33,541 pupils.

Administration.—The government is administered by an Administrator, aided by a Provincial Council of 50 members (elected for 3 years). There is an Executive Committee of 4 members.

Administrator, Hon. A. G. Robertson.

Executive Committee, B. D. G. Pienaar, G. H. Kretzschmar, Dr. H. Reitz, T. C. Stoffberg.

Provincial Secretary, D. E. van Velden.

The Capital is **Pretoria**, pop. 1921, 74,052 (white 45,361, coloured 28,691). Pretoria, which is also the seat of the Union Government, is pleasantly situated on the River Aapies, and has wide, shady streets and magnificent buildings. The principal town is **Johannesburg**, 5,500 feet above sea level, about 35 miles S.W. of the capital. Johannesburg is the centre of the Witwatersrand goldfields, and possesses magnificent buildings. Among its other industries are printing, brickmaking, brewing, tobacco manufactures and iron foundries. The population in 1921 was 288,131 (white 151,836, coloured 136,295).

Pretoria is distant from London 7,200 miles; transit, *viâ* Capetown, 19 days.

ORANGE FREE STATE.

The Province of the Orange Free State has a total area of 50,389 square miles, and is divided into 24 districts. The population at the last five censuses was:—

Year.	White.	Coloured.	Total.
1890	77,716	129,787	207,503
1904	142,679	244,636	387,315
1911	175,189	352,985	528,174
1918	181,678	...	...
1921	188,556	440,271	628,827

In 1921, of the whites, 97,776 were males and 90,780 females; and of the coloured races, 223,597 were males and 216,674 females.

The number of births registered in 1922 were 4,959, deaths 1,560, marriages 1,288 (white persons). The registration laws affecting births and deaths apply to white persons only.

Religion.—The Census of 1921 showed the following results:—Dutch Churches, 207,536; Anglican Churches, 50,807; Presbyterians, 13,562; Congregationalists, 2,763; Methodists, 135,778; Lutherans, 7,931; Roman Catholics, 9,879; Jews, 4,761; Heathen, 174,697; Others, 607,714.

Education.—Higher education is under the control of the Union Ministry. In 1921 there were 877 public and aided private schools, with an enrolment of 45,470 pupils, and, except when the parents object, both official languages are taught.

Administration.—The government is administered by an Administrator, aided by a Provincial Council of 25 members (elected for 3 years). There is an Executive Committee of 4 members.

Administrator, Hon. Sir Cornelis Hermanus Wessels.

Executive Committee, D. J. de Villiers, E. A. van der Walt, F. D. du Toit, D. J. Malan.

Provincial Secretary, A. M. N. de Villiers.

Bloemfontein, the Capital and seat of the Provincial Government, had a population of 39,034 (19,367 whites, 19,667 coloured) in 1921. A new sewerage system and an additional water supply are in successful operation. Six new bridges of masonry, 85 ft. span, have been built over the Bloem Spruit, which has been straightened to avoid a repetition of the serious flood of Jan., 1904.

Bloemfontein is distant from London 6,700 miles; transit, *viâ* Capetown, 19 days.

Imperial Crown Colonies and Protectorates.

NOTE.—*The Indian Empire, The Dominion of Canada, Newfoundland, The Commonwealth of Australia, The Dominion of New Zealand*, and *The Union of South Africa* are shown separately.

ASCENSION,

(*See* ST. HELENA.)

BAHAMAS.

The Bahamas (or Lucayos) are an archipelago of the British West Indies, lying between 21° 42′—27° 34′ N. lat. and 72° 40′—79° 5′ W. long., and extending from the coast of Florida on the north-west to Haiti on the south-east. The group consists of about twenty inhabited islands, and an immense number of islets and rocks, comprising an area of about 4,404 square miles, and a population in 1917 of 59,928, the most part being descendants of liberated Africans. The principal islands are: New Providence (containing the capital, Nassau), San Salvador, Abaco, Grand Bahama, Long Island, Eleuthera, Exuma, Harbour Island, Inagua, Andros Islands, Watlings Island, Rum Cay, Long Cay, Ragged Island, and Biminis. Originally settled by Englishmen, the Bahamas were, in 1781, surprised by the Spanish, but at the peace of Versailles were restored to the English. The climate is salubrious, and in the winter Nassau, which is outside the tropics, is frequented by many Americans. The chief industry is sponge-gathering; the exports of sponge in 1918 being valued at £107,622. The fruit trade is principally with the United States, bananas, coco-nuts, fruit and vegetables being exported. Tomatoes are being cultivated in large quantities for shipment to the United States. Mahogany, lignum-vitæ, mastic, ironwood, ebony, logwood, and satinwood are found throughout the islands. A fibre industry is largely established, the land under the fibre plant being about 20,000 acres, and the value of Bahamas hemp fibre exported in 1920, £148,488. The imports are chiefly food-stuffs, wines, spirits, cotton, silk and worsted fabrics, and hardware.

The Government is vested in a Governor, aided by an Executive Council of 9 members, a nominated Legislative Council of 9 members, and an elective Representative Assembly of 29 members.

Nassau is distant from Liverpool 4,000 miles; transit, 14 to 21 days, *viâ* New York.

BARBADOS,

the most windward of the West India Islands, is situated in 13° 4′ N., and longitude 59° 37′ W. It is nearly 21 English miles long by 14 broad at the widest part, and comprises an area of 106,470 acres (about 166 square miles), about 100,000 acres being cultivated. The population (Census of 1921), was 156,312. The principal exports are sugar, molasses, rum, and cotton, and the imports rice, salted meat, corn, salted fish, butter, flour, and Indian corn meal. Liberal provision is made for elementary education, and Harrison's College provides for higher education. Unlike most of the neighbouring islands, Barbados has always remained in the possession of Great Britain, by which it was settled in 1625. In 1885 it was constituted a distinct government, with a Governor, aided by an Executive Council and an Executive Committee, a Legislative Council of 9 members appointed by the Sovereign, and a House of Assembly of 24 members elected yearly on the basis of a moderate franchise.

The CAPITAL and port is Bridgetown (pop., 1921, 13,486), on the shores of an open roadstead (Carlisle Bay).

BERMUDA.

The Bermudas, or Somers Islands, are a cluster of about 100 small islands (15 or 16 only of which are inhabited, the rest being mere rocks) situated in the west of the Atlantic Ocean, in 32° 15′ N. lat. and 64° 51′ W. long, comprising an area of about 19 square miles, and containing a population (1922) of 20,410 (7,001 white, and 13,409 coloured). These islands derive their name from Bermudez, a Spaniard, who sighted them in 1527; but they were first colonised by Admiral Sir George Somers, who was shipwrecked here in 1609, on his way to Virginia. The nearest point of the mainland is Cape Hatteras, in North Carolina, 580 miles distant.

The Government is administered by a Governor, who is also commander-in-chief of the military forces. He is advised by an Executive Council of 6 members, appointed by the Crown. There is also a Legislative Council, composed of 9 members appointed by the Crown; and a representative House of Assembly consisting of 36 members.

The climate is mild and healthy. There are no streams or wells, and the inhabitants are dependent on the rainfall stored and preserved in tanks. Vegetation is prolific, the principal trees being the Bermuda cedar (juniper), formerly of great importance for shipbuilding. The islands produce large quantities of onions, potatoes, and green vegetables, which are largely exported, together with cut flowers and lily bulbs, to New York. Arrowroot and bananas are also grown, but meat, flour and other articles of consumption are imported from the U.S. and Canada. Fish are plentiful round the coasts. The islands are much frequented as a health resort by Americans and Canadians.

BORNEO.

Borneo is a large island in the Eastern Archipelago, extending from lat. 7° 4′ N. to 4° 10′ S., and from long. 108° 50′ to 119° 20′ E. It is about 850 miles in length and 600 in breadth, and contains an area of 284,000 square miles, divided by the equatorial line into two nearly equal portions. The population is probably about 1,846,000, consisting chiefly of Dyaks, Malays, Kyans, Papus or Negritos, Chinese, Bajaus, Dusuns, Muruts and Bugis (the aboriginal Celébes). The island was discovered by the Portuguese in 1521, and at the present time rather more than two-thirds of the island is included within "Netherlands' India." The remainder of the island is under British protection.

BRITISH NORTH BORNEO.

The territory of British North Borneo occupies the northern part of the island, with a total area of about 31,000 square miles, and a coast-line of about 900 miles. The population is 257,804, consisting mainly of Muhammadan settlers on the coast, aboriginal tribes inland, and a large number of Chinese traders, artisans, and agricultural labourers. The interior is mountainous (Mount Kinabalu, 13,455 feet) and is densely timbered.

The two chief towns are Sandakan, on the north-east coast, and Jesselton, on the west coast. All legislation is passed by the Legislative Council, which consists of 7 official and 5 unofficial members, who have the local title of Honourable. The appointment of the Governor is subject to the approval of the Secretary of State. For administrative purposes the whole State is divided into 5 Residencies. The laws are based on the Indian codes of criminal and civil procedure, amended and adapted by local ordinances. There is an Imam's Court for Muhammadan law.

	1920.	1921.	1922.
*Revenue	$3,611,803	$3,156,381	$3,078,436
Expenditure ...	1,844,774	2,021,249	1,928,244
Exports	12,049,471	7,908.136	8,205,709
Imports	11,009,471	7,720,013	6,865,144

The chief products are timber, tobacco, rubber, sago, rice, gums, gutta-percha, coco-nuts, rattans, and all varieties of jungle produce. The country is suitable for the cultivation of sugar, tapioca, rubber, pepper, and gambier on a large scale. Gold has been found. Coal of good quality is now being produced at the rate of 7,000 tons per mouth at Sebattik, in the south-eastern corner of the territory.

	1921.	1922.
Exports of Leaf Tobacco...	$1,227,183	$921,692
,, Rubber............	2,482,468	2,660,276
,, Timber	1,459,324	1,460,670

A railway runs from Jesselton, the chief port on the west coast, and down the coast to Beaufort, the centre of the rubber industry, where it turns inland to Melalap, in the interior; there is a branch from Beaufort to Weston (20 miles). There are wireless stations at Sandakan, Jesselton, Kudat, and Tawau. There is a State bank at Sandakan with a branch at Jesselton.

There is a native military force of 800 men under European officers, with six machine and four mountain guns. There is a Church of England and a Roman Catholic mission, and churches at Sandakan, Kudat, and Jesselton.

BRUNEI.

Sultan, H.H. Sir Mohamed Jemal-ul-alam, K.C.M.G., *suc.* May 11, 1906.

A native State on the north-west coast of the island of Borneo. The total area is about 4,000 square miles, the population being 25,454 (April, 1921), of whom 23,938 are Malays and Bornean races. The territory was placed under British protection in 1888, and on Jan. 1, 1906, the Sultan accepted by treaty a British Resident to assist and advise him in the administration. The chief town, Brunei, has a population of nearly 10,000. Native industries include fishing, cloth-weaving, brass foundries, and silversmiths' work. The chief imports are rice, cloth, tobacco, sugar, petroleum, and sundries; the exports are chiefly coal, cutch (mangrove extract), rubber, and sago. The revenue for 1922 was £23,800, and the expenditure £22,000; the debt (Dec. 31, 1922) is £51,860. Total imports 1922, £45,690; exports, £67,350.

High Commissioner, The Governor of the Straits Settlements.
British Resident, Brunei, E. E. F. Pretty.

Brunei is 5 hours by steamer from Labuan, and communication is now regularly maintained; there is a central wireless station at Brunei, with subsidiaries at Labuan and Temburong.

BRITISH GUIANA,

which includes the Counties of Demerara, Essequibo, and Berbice, is situated on the north-east coast of South America and has a total area of 89,480 square miles, with a seaboard of more than 300 miles. The population, Dec. 31, 1922, was estimated at 297,817, of whom 124,338 were East Indian immigrants. The colony is bounded on the south by Brazil, on the east by Dutch Guiana, on the west by Venezuela, and on the north and N.E. by the Atlantic Ocean. The climate, although hot, is pleasant and healthy. The cultivated portion of the country, amounting to about 172,000 acres (of which 63,420 acres are in sugar-cane and 55,911 in rice), is confined to the sea-coast and to a short distance from the rivers. The coastland is very like the Netherlands, being below the level of the sea, and intersected with canals constructed by its former Dutch owners. At the junction of the boundaries of British Guiana and Venezuela is Mt. Roraima, a flat-topped mountain 8,740 feet above sea level, and on the Potaro River (a tributary of the Essequibo) are the *Kaieteur Falls*, with a clear drop of 741 feet and a total fall of 822 feet. The seasons are divided into dry and wet, the two dry seasons lasting from the middle of February to the end of April, and from the middle of August to the end of November. The meteorological records taken on the coast-lands during a period of 76 years show, as regards temperature, that the climate is a very equable one. The mean temperature is 80·3°, its recorded extremes during this long period ranging between 68° and 92°, but these extreme temperatures are very rarely recorded, the usual extremes during a year being 72° and 89°. In the interior the mean temperature is higher—82·8°, its extremes ranging from 66° to 103°. The yearly rainfall is, on the contrary, subject to marked variation, its mean on the coast lands being 94·4 inches distributed over 195 days of the year, and its range from 44·9 to 132·2 inches per year. In the interior the average recorded rainfall is 50·8 inches per year ranging from 45·3 to 57·9 inches per year. The birth-rate in 1922 was 27·8, and the death-rate 29·1 per 1,000. The chief product is sugar, which forms 76 per cent. of the export trade. The leading exports are sugar (£2,104,144 in 1921), rum, diamonds, timber, balata, and rice. There are about 13,000 aboriginal Indians; they are occupied largely in fishing, hunting, and raising crops of cassava.

The Government consists of a Governor and a Court of Policy of 15 other members, 7 official and 8 elected, and a Combined Court including the members of the Court of Policy together with six elected Financial Representatives; with an Executive Council, consisting of the Governor, 5 official and 3 unofficial members nominated by the Crown. There are 2,750 miles of post-office telephone wire and 556 of telegraph lines, with 75 post-offices. There are 95 miles of railway.

BRITISH HONDURAS.

British Honduras, in Central America, lies within 18° 29′ 5″ to 15° 53′ 55″ N. latitude and 89° 9′ 22″ to 88° 10′ W. longitude. Its extreme length and breadth are approximately 174 m. and 68 m. respectively; it is bounded on the north and north-west by Yucatan (Mexico), on the west and south by Guatemala, and on the east by the Caribbean Sea. The total area is about 8,598 sq. miles, with a population (Census 1921) of 45,317—22,563 males and 22,754 females. The climate generally is damp and hot, but not unhealthy. The temperature ranges from 50° to 98°. The average lies between 75° and 80°, but this is considerably tempered by the prevailing sea-breezes. The country consists chiefly of primeval forest, with savannahs and so-called "pine-ridges," which are open sandy plains covered with a wiry grass and dotted with pine-trees, affording fair runs for cattle. The ground is level and swampy along the coast-line, and generally flat for about ten or twenty miles inland; after which hills from 500 ft. to 4,000 ft. high succeed each other to the western boundary.

The staple products are the natural woods of the colony, principally mahogany and logwood. Sugar, rubber and cacao grow readily. Fruit, including bananas, plantains, coconuts, pineapples, oranges, and mangoes also grow well, while inland there are extensive regions of good pasturage. About 60,000 acres are under cultivation. The best description of cacao trees grow wild in the bush. There are 59 primary schools in the colony, and 5 schools with secondary departments in Belize. The shipping entered and cleared at the port of Belize in 1922 was 515,850 tons. There is a radio-telegraph station at Belize.

British Honduras is governed as a Crown colony. There is an Executive Council of 3 official and 3 appointed members and a Legislative Council of 5 official and 7 appointed members. The Governor is President of both Councils.

CAMEROON.

(*Joint Franco-British Administration.*)

The German Protectorate of *Kamerun* on the west coast of Africa between (British) Nigeria and French Congo (the Spanish Muni River Settlements occupying a small intervening area), was obtained by conquest by Franco-British forces during the War of 1914–18, and at the conclusion of Peace its administration was confided by the Supreme Council of the Allied Powers to Great Britain and France jointly.

The approximate geographical limits are between 2°–12° N. lat. and 8° 48′–19° E. long., and the area is about 295,000 square miles, containing a population estimated at 3,500,000. The coast line extends from the Rio del Rey to the Muni River. The south-eastern boundary (as re-arranged in 1911) is the confluence of the Sanga with the Congo River; the extreme northern limit is the southern shore of Lake Chad, and the extreme eastern limit (1911) is the Ubangi River. The territory occupies the north-west corner of the Central African Plateau, with Cameroon Peak (13,370 feet) near the capital, on the coast, and the Chebchi and Mandara Mountains on the north-west frontier. Access was obtained to the Congo and Ubangi Rivers by the Agadir compensation treaty with France (1911), under which the area of the colony was increased by 102,300 square miles. The Sanaga is a considerable river flowing into the Atlantic opposite Fernando Po; the Sanga and Dscha (or Ngoko) are tributaries of the Congo, and the Logone-Shari flows into Lake Chad. The inhabitants are Bantus and Sudanese, with some Haussas and Fula tribes, of whom the latter are Muhammadans and the remainder pagans. Cocoa cultivation is a highly successful industry of recent origin, and the Protectorate is rich in forest produce. The exports (valued at 23,336,000 marks in 1912) are rubber, palm oil, palm kernels, cocoa and ivory; the imports (34,242,000 marks in 1912) are chiefly clothing and textile goods, meat, fish and provisions. There were 170 miles of railway open in 1912.

In 1920 the whole area was divided into a British Sphere and a French Sphere.

The *British Sphere* is a wedge-shaped strip, running with the Nigerian border, and containing an area of about 28,000 sq. miles. It is administered by the Nigerian Government, the capital being BUEA, on the slopes of the Cameroon Mountain. The principal port is Victoria (in Ambas Bay), which is connected by railway with the capital.

CAYMAN ISLANDS.

The Cayman Islands, forming a dependency of Jamaica, are situated between the meridians 79° 44′ and 81° 26′ W., parallels of 19° 15′ and 19° 46′ N., and consist of three islands, Grand Cayman, Cayman Brac, and Little Cayman, with a total area of 225 square miles. They are said to have been discovered by Christopher Columbus on his return voyage from Porto Bello to Haiti, and called "Las Tortugas." Population (1921) 5,253.

The principal town is Georgetown, in Grand Cayman, population (1921) 1,070.

Commissioner & Judge of the Grand Court, H. H. Hutchings (house and fees)	£600

CEYLON,

an island in the Indian Ocean, to the south-east of the peninsula of Hindustan, is situated between 5° 55′—9° 50′ N. lat. and 79° 42′—81° 53′ E. long. Its area is (with outlying islands) 25,332 square miles, or more than three-fourths of that of Ireland. Its greatest length is from north to south, 270 miles; and its greatest width 140 miles.

The climate varies with the altitude of the district; but on the whole, though tropical, it is healthy, except in the low-lying jungle. The coolest months are December and January; the hottest are April and May.

The population (Census of 1921) was 4,504,549 (including military and shipping), the most important element being the Sinhalese, descendants of colonists from the valley of the Ganges, who first settled in the island about B.C. 543. In 1505 the Portuguese landed in Ceylon and formed settlements along the coast; but about 150 years later they were dispossessed by the Dutch. In 1796 the British took possession of the Dutch settlements on the island, and annexed them to the Presidency of Madras; but six years after, in 1802, Ceylon was erected into a separate Crown colony. In 1815 the King of Kandy was deposed and banished; and his dominions, which had up to that time maintained their independence of European rule, were annexed to the British Crown.

The staple products of the islands are agricultural. The most important for home consumption is rice in its two forms of paddy and husked grain. The principal exports are tea, products of the coconut palm, rubber, plumbago, cacao, cinnamon, cardamoms, ebony, and a little vanilla.

About one-fifth of the island is under cultivation, and the leading areas in 1922, in acres, were:—Rice, 850,000; other grain, 120,000; tea, 418,000; coconuts, 900,000; rubber, 390,000; cinnamon, 25,000; cacao, 33,200; and tobacco, 13,000. The live stock in 1922 included 1,499,800 horned cattle, 56,200 sheep, 150,000 goats, 49,800 pigs, and 2,000 horses. Among the more important native industries are gold, silver, brass, ivory and tortoiseshell work, pottery, mats, fans, and wood-carving. Ceylon is famous for precious stones, especially catseyes, rubies, &c.; and for the pearl fishery in the Gulf of Mannar, off the N.W. of the island. The manufacture of salt is a Government monopoly.

There are 732 miles of railway open, 615 being 5 ft. 6 in. gauge and 117 miles 2 ft. 6 in.; and the post and telegraph offices numbered 590, there being 6,944 miles of telegraph wire.

The government of Ceylon is administered by a Governor, aided by an Executive Council of 7 members, and a Legislative Council of 37 members. The Legislative Council contains representatives of the various territorial divisions of the island, and special safeguards provide for the representation of minorities and unrepresented interests. Of the 23 unofficial members 16 are elected and 7 nominated by the Governor.

For administrative purposes the island is divided into 9 provinces, at the head of each of which is a Government agent. The larger towns have municipalities, Urban District Councils, or local boards; and in the country districts the natives retain their village councils and tribunals for matters of minor importance.

The MALDIVE ARCHIPELAGO lies to the S.W. of Ceylon, a few degrees north of the equator. Malé, the seat of government, is about 400 miles distant from Ceylon, to which the islands have always been nominally tributary. The Sultan acknowledges his allegiance by sending an annual embassy to Colombo. The natives are Muhammadans. The islands are unhealthy, and the main exports are dried fish, cowrie shells, coconut coir, and tortoiseshell.

Colombo, distant from London 6,300 miles; transit, 16 days.

CYPRUS

is an island in the Mediterranean Sea, between N. lat. 34° 33′ and 35° 41′, and E. long. 32° 17′ and 34° 35′. It is about 40 miles distant from the nearest point of Asia Minor; and 60 miles from Latakia, on the Syrian coast. The distance to Port Said, at the entrance of the Suez Canal, is 238 miles. The larger part of the island is an irregular parallelogram, 100 miles long and 60 to 30 broad; from which a narrow peninsula, 5 or 6 miles wide, runs out for 40 miles towards the north-east. The area is 3,584 square miles. The population at the census of 1921 was 310,709, of whom about 20 per cent. were Muhammadans, and the remainder mostly members of the autocephalous Church of Cyprus, which is a branch of the Orthodox Eastern Church. The principal productions are grain of various kinds, sesame, linseed, wine and spirits, silk, olives, locust-beans (carobs), cotton, wool, hides, grapes, oranges, pomegranates, asbestos, aniseed, sponges, sumac leaves, terra umbra, gypsum, salt, and pyrites. The fertility of the soil has for centuries been proverbial. In 1922 the wine export was 996,698 gals., and that of spirits 20,697 gals., the bulk of the wine and spirits going to Egypt and Syria. The climate varies in different localities. In the plains the summer heat is very great, and the British troops suffered when first stationed in the island. Excellent summer quarters were, however, found in the hills; and, owing to the enforcement of various sanitary measures, the death-rate of the whole island is nearly as low as that of any European country.

Cyprus was formally annexed to the British Empire in 1914. The inhabitants have been granted a political franchise, every man paying direct taxes having a vote. The government is administered, under the Colonial Office, by a High Commissioner, assisted by a Legislative Council composed of 18 members, 6 being official and 12 elected. The island is divided into three electoral districts, each returning one Muhammadan and three Christian members.

For administrative and legal purposes it is divided into six districts. In each district the executive government is represented by a commissioner; and each has a Court of Law presided over by an English judge, who is assisted by two native judges, one being a Christian and the other a Muhammadan. There is also a Supreme Court for the whole island, consisting of two English judges.

The capital is Nicosia (Lefkosia), near the centre of the island, with a population of 191,98 in 1921; the other principal towns are Larnaca (population 9,768), Limassol (13,291), Famagusta (7,276), Kyrenia (1,913), Paphos (4,119), and Morphow (3,500).

Important works at Famagusta have rendered the inner harbour accessible to steamers, and a narrow-gauge railway connecting the harbour with the capital (36 miles) was opened in 1905, and was extended to Morphou, 25 miles, in 1907, and to Evrykhou, 15 miles, in 1915. There is a regular service of steamers from Egypt, and from Italy (*viá* Trieste).

DOMINICA. *See* LEEWARD ISLANDS.

EAST AFRICA PROTECTORATE. *See* KENYA.

FALKLAND ISLANDS.

These, the only considerable cluster in the South Atlantic, lie about 300 miles east of the Straits of Magellan, between 51° 15′—53° S. lat. and 57° 40′—62° W. long. They consist of East Falkland (area 3,000 sq. miles), West Falkland (2,300 sq. miles), and upwards of 100 small islands (islets, rocks, and sandbanks), comprising in the aggregate 6,500 sq. miles, and a population in 1921 of 2,094. Mount Adam, the loftiest peak in the colony, rises 2,315 feet above the level of the sea. The Falklands were discovered by Davis in 1592, and visited by Hawkins in 1594. A settlement was made by France in 1764; this was subsequently handed over to Spain, but the latter country recognised Great Britain's title to a part at least of the group in 1771. In 1820 the Argentine Republic established a settlement, which was destroyed by the Americans in 1831. In 1833 the islands were again taken possession of by the English for the protection of the whale-fishery, and colonised, being the most southerly organised colony of the British Empire. On Dec. 8, 1914, a British squadron under Adm. Sir Doveton Sturdee defeated a German squadron (von Spee) off the Falkland Islands. The climate, though somewhat bleak, is usually considered healthy, and the temperature is on the whole equable, the thermometer ranging in winter from 20° to 50°, and in summer from 40° to 65°. The islands are chiefly bog-land, and have proved suitable for sheep, 670,000 being carried; the output of wool is about five million lb. annually. The population is mainly British, and is principally engaged in sheep-farming and seafaring industries. The chief exports are whale-oil and guano, wool, tallow, hides and sheepskins. The only important settlement is Port Stanley, at the head of Port William, on the coast of East Falkland.

Dependencies.—The total area of the dependencies of the Falklands is over 3,000,000 square miles. The whaling industry carried out from these dependencies is greater than that of the rest of the world combined. Thirteen companies (2 British, 11 Norwegian) caught 5,247 whales in the 1920–1 season, the landed value of the oil being £1,250,000. *South Georgia*, an island 800 miles east-south-east of the Falkland Group, with an area of 1,000 square miles, is one of the dependencies. Among others are the *South Shetlands*; the *South Orkneys* (on which the Argentine Government have, with the permission of H.M. Government, established a meteorological station, in connexion with a discovery that a cold winter in the Weddell Sea is a precursor of drought in the maize and cereal area of Argentina 3½ years later); the *Sandwich Group*; and a part of the mainland of the *Antarctic*, known as *Graham's Land.*

The government of the Falkland Islands is vested in a Governor, aided by an Executive Council of 4 members, and a Legislative Council, the members of both being appointed by the Crown.

FIJI.

This is a group of 200 to 250 islands (of which some are, however, mere uninhabited islets and rocks) in the South Pacific Ocean, about 1,100 miles north of New Zealand, which extend 300 miles from east to west, and 300 north to south, between 15° 45′—21° 10′ S. lat. and 176° E.—178° W. long. The gross area of the group is about 7,083 square miles. The islands are of volcanic origin, with lofty mountains, and well wooded. The principal are Viti Levu (Great Fiji) and Vanua Levu (Great Land). The climate is equable and remarkably healthy for Europeans; the average temperature in the shade in the cool season is 72°, rising to 84° in the hot season, extremes lying between 60° and 94°. Vegetation is remarkably luxuriant, the chief productions being the bread-fruit tree, banana, plantain, pea-nuts, yams, and dalo (taro), coco-nut, sugar-cane, rice, maize, and cotton. The principal exports are sugar, copra, bananas, trocas shell, molasses, rubber, maize, hides and pelts, and bêche-de-mer. The Governor is appointed by the Crown, and is assisted by an Executive Council consisting of 6 members. Laws are passed by a Legislative Council (of which the Governor is president) containing 12 nominated members (one specially representing Indian interests), 7 elected members, and 2 native members, appointed by the Governor. Native administration is carried on through the chiefs under the Governor's supervision. The population (1921 Census) was 157,266 (84,475 native Fijians, 60,634 Indians, 3,878 Europeans, and some Polynesians and others).

Suva is 11,000 miles from London; transit from London, *viâ* Vancouver, about 30 days; and *viâ* Sydney, about 50 days.

GAMBIA.

The West African river Gambia, which is navigable for some 300 miles from its mouth, was discovered by the Portuguese in 1447; and in 1588, the year of the Spanish Armada, Queen Elizabeth, being then at war with Spain and Portugal, gave a charter to a British Company to trade with the Gambia, and as early as 1618 an effort to do so was made, but it was not successful. In 1686 a fort was built upon a rocky island, and, in honour of the new King, was named Fort James; but the English merchants had formidable rivals in the Portuguese and French, and it was not until 1783 that the river was recognised, by the *Treaty of Versailles*, as British. The Colony had no regular political institutions until 1807, when it was put under the Government of Sierra Leone. The Colony of the Gambia was created in 1843, and was constituted a separate government in 1888. It now consists of the Island of St. Mary, British Kombo, Albreda, the Ceded Mile, MacCarthy Island, and various other islands and territories on the banks of the river. The total area is estimated at 4,132 sq. miles. The population of the Island of St. Mary, at the Census of April 24, 1921, was 9,227, and that of the Protectorate 201,303. The climate is unhealthy during the rainy season, viz., from June to October; but during the rest of the year it is less unhealthy. The chief export is ground nuts, which form seventy per cent. of the total exports. They were sent chiefly to Marseilles, where the oil is extracted and used for the same purpose as olive oil, but, since the outbreak of war, the export trade has been mainly with the U.K. Beeswax, palm kernels, hides, and calabashes are also exported; and rice, cotton, maize, and a kind of millet called *kous* are produced in the countries bordering the Gambia, but not in sufficient quantities to meet local requirements. The chief imports are cotton goods, kola nuts, rice, soap, spirits, hardware, sugar, wine, and tobacco. A Company of the W.A.F.F. (4 officers and 120 non-commissioned officers and men) is stationed in the Colony, and there is an armed police force in the settlement (numbering 92 men), which performs both civil and military duties. There are Government wireless stations at Georgetown (MacCarthy Island) and at Bathurst. The Government, which is that of a Crown Colony, is vested in a Governor, assisted by an Executive Council consisting of 3 official members (besides the Governor), and by a Legislative Council of 5 official members and 3 unofficial members, nominated by the Crown.

GIBRALTAR,

a rocky promontory, 2¾ miles in length and ¾ of a mile in breadth, and 1,396 feet high at its greatest elevation, near the southern extremity of Spain, with which it is connected by a low isthmus. It is about 14 miles distant from the opposite coast of Africa. Gibraltar was captured in 1704, during the war of the Spanish Succession, by a combined Dutch and English force, under Sir George Rooke, and ceded by the Treaty of Utrecht, 1713. Since that time it has remained continuously in possession of the British. Of the many attempts to retake it, the most celebrated was the great siege in 1779–83, when General Elliott, afterwards *Lord Heathfield*, held it for 3 years and 7 months against a combined French and Spanish force. The town stands at the foot of the promontory on the N.W. side. Gibraltar is a free port, and enjoys the advantages of an extensive shipping trade. During the year 1922 4,876 vessels entered, with a total tonnage of 6,010,314. The chief sources of revenue are the port dues, the rent of the Crown estate in the town, and duties on wine, spirits, tobacco, and beer. There is an enclosed harbour with an area of about 400 acres, three graving docks, and docking accommodation for the largest battleships in the British Navy. The estimated civilian population (1922) was 17,327.

The Governor is in command of the garrison, and is aided in the administration by an Executive Council of 7 members; there is no Legislative Council.

	1920.	1921.	1922.

GOLD COAST.

The Gold Coast comprises a portion of the coast of the Gulf of Guinea from about 3° 7′ W. to 1° 14 E. of Greenwich. It is divided into three parts:—Gold Coast Colony, 23,490 sq. miles; Ashanti, 24,560 sq. miles; and the Northern Territories, 30,600 sq. miles—a total area of 78,650 sq. miles. It extends along the coast line about 334 miles and inland to an average distance of 440 miles, or to the 11° of N. latitude. It is bounded on the west and north by the French colonies of the Ivory Coast and French Soudan, and on the east by Togoland. The population (Census of 1921) was: *Gold Coast Colony*, 1,171,913; *Ashanti*, 406,193; *Northern Territories*, 530,355; total, 2,108,461, excluding 2,033 Europeans. The natives are almost all Pagans, but there are 60,000 Muhammadans, and the number of Christians is steadily increasing.

The trade is principally with the United Kingdom. Gold is found in considerable quantities, and diamonds were discovered in 1919; there are also large deposits of high-grade manganese. The principal product is cocoa, more than half the world's supply being produced in the Colony; rice plantations have been started and steps have been taken to improve the coco-nut industry, and to develop the kola and sisal hemp plantations. The principal exports in 1922 were: cocoa, £5,840,743; gold and gold dust, £889,204; kola nuts, £311,026; lumber, £254,384 and manganese, £106,031. The chief imports are textiles, building materials, cotton goods, provisions, kerosine, and hardware. The climate, generally, is hot and moist, but is becoming annually less unhealthy by the aid of medical science and sanitation. The Government assists the missionaries in educational matters, and has established schools of its own. Great efforts are being made to improve the sanitary condition of the coast towns. The principal towns are lighted and policed. The total tonnage of shipping entered and cleared in 1922 was 2,775,638 (British 1,797,877). 2,600 miles of telegraphs have been established in the colony, of which 290 miles are in Ashanti and 203 miles in the Northern Territories. There is a wireless telegraph station at Accra. A Government railway runs from Sekondi through Tarquah, the centre of the gold-mining industry, to Kumasi (168 miles). Another line runs from Accra to Coomassie (192 miles).

The seat of government is Accra (population (38,049). The other principal towns are: Cape Coast (14,921), Addah (1,620), Elmina (5,262), Seccondee (9,500), Tarkquah (2,671), Quittah (9,839), Axim (3,781), Coomassie (20,268), Saltpond (6,342), and Winnebah (6,980). The government of the Colony is administered by a Governor, aided by a nominated Executive Council. There is a Legislative Council of 12 official and 9 unofficial members, for the Colony, excluding Ashanti and the Northern Territories.

	1921-22.	1922-23.
Total revenue	£3,016,520	£3,357,196

Inspector-Gen. of Police, D. R. A. Bettington	1,200
Director of Education, D. J. Oman	1,200
Conservator of Forests, L. A. King-Church	1,200
Director of Agriculture, W. S. D. Tudhope	1,200
Director of Geological Survey, A. E. Kitson, C.M.G., C.B.E.	1,200

ASHANTI.

Ashanti was placed under British protection on Aug. 7, 1896, and a English Resident was appointed to Coomassie. Under Orders in Council of Sept. 26, 1901, the country was definitely annexed by Great Britain, the Governor of the Gold Coast being appointed Governor of Ashanti, though the laws and Ordinances of the Gold Coast do not apply to the annexed territory. It is divided into two provinces under Provincial Commissioners—the Eastern Province, headquarters Coomassie, and the Western Province, headquarters Sunyani. The population (census 1921) was 406,193. Coomassie, the chief town, has about 20,000 inhabitants. There are Government schools at Coomassie, Sunyani and Juaso, and a number of mission schools. Agriculture is extending, cocoa and rubber plantations are being formed. Gold output (1918) £421,731. In the Western parts of the Gold Coast Colony and especially of Ashanti are rich forests with excellent timber trees (mahogany, cedar, &c.), trees yielding fruits, rich in oil, rubber-bearing plants, and species yielding gum copal. The country is well watered, and with proper restraints on wasteful native farming and on over-exploitation, would contain inexhaustible supplies of valuable forest products. On the Eastern side the forests are sparser, though timber and oil trees are common and game plentiful; the products there are chiefly maize, kokoyams, bananas, ground-nuts, and cocoa, the plantations of which are rapidly extending.

Chief Commissioner, John Maxwell, C.M.G.	£1,600
Deputy do., Lt.-Col. C. E. D. O. Rew, O.B.E.	
Provincial Commissioners, L. H. Wheatley; H. J. Hobbs each	1,200

NORTHERN TERRITORIES.

In 1901 the Northern Territories lying to the north of the parallel of 8° N lat., bounded on the west and north by the French possessions and on the east by Togoland, were placed under British protection. They are administered, under the Governor, by a Chief Commissioner with his headquarters at Tamale. The country is divided into two provinces under Commissioners; the Southern Province, with headquarters at Tamale, and the Northern Province, with headquarters at Navarro. By the census taken in 1921 the population was about 530,360. The Mohammedans have substantial mosques; there is a Roman Catholic mission. Government schools have been established at Tamale, Gambaga, Lorha, and Wa. Good permanent roads are being made. The Northern Territories are capable of producing various agricultural crops (cereals, shea-butter, ground-nuts, indigo, tobacco), and are said to contain wide auriferous areas.

Chief Commissioner, Arthur James Philbrick, C.B.E., LL.B.	£1,600
Deputy do., Maj. A. H. C. Walker-Leigh	
Provincial Commissioners, L. Castellain; H. C. Branch each	1,200
Commandant of Constabulary, Lt.-Col. H. W. M. Bamford, O.B.E., M.C.	

Accra is distant from Liverpool, 3,920 miles; transit 14 to 30 days.

HONG KONG.

The Crown Colony of Hong Kong consists of a number of islands situated off the south-eastern coast of China, at the mouth of the Canton River, in 22° 10′—22° 34′ N. lat. and 113° 52′—114° 30′ E long., and of a portion of the mainland.

Hong Kong is an island about 10 miles long and from 2 to 6½ miles broad, with a total area of 32 square miles; it lies close to the mainland, being separated at one point by a narrow strait (Lyeemoon) not more than a quarter-mile wide, and was first occupied by Great Britain in January, 1841, and was formally ceded by the Treaty of Nankin in 1842; *British Kowloon* was subsequently acquired by the Peking Convention of 1860; and the *New Territories*, being a peninsula in the southern part of the Kwangtung province, by a lease signed June 9, 1898. The whole colony comprises an area of about 391 square miles, with a population (1921) of 662,200. The non-Chinese residents, excluding naval and military, numbered about 15,200.

The capital of the colony is Victoria, which lies along the northern shore of the island, facing the mainland; and between the mainland and the city is the harbour, which is one of the finest in the world, with a water area of some 10 square miles. With the exception of liquor and tobacco the port is free, and is fortified. It possesses excellent docks, capable of holding the largest vessels for the purposes of repair. There is a considerable ship repairing and construction industry. Shipping entered, (1921) 21,710,485 tons; (1922) 23,283,382 tons. A railway, of which 23 miles belong to the Government, runs from Kowloon to Canton; the length north of the Sham Chun River (which is the boundary of the British territory) is controlled by the Chinese Government. A light railway runs through the fertile valleys of the north-east portion of the New Territories from Fanling to Sha-Tau-kok, a distance of 7 miles. Good roads connect the principal districts with the railway.

The island is broken in shape and mountainous, the highest point being Victoria Peak, which is about 1,820 feet high. The Peak District is a favourite place of residence, and is reserved for Europeans. The New Territories contain peaks from 1,800 to 3,000 feet. The hot season lasts from May to October. During the winter months, from November to March, the climate is cooler, drier, and more invigorating. The average daily maximum temperature ranges from 87° in July to 63° in February, and the average daily minimum temperature from 78° in July to 55° in February. The average annual rainfall is 84 in., of which no less than 75 per cent. falls between May and September, when the S.W. monsoon prevails.

Hong Kong is the centre of a vast trade in many kinds of produce, chiefly camphor, coal, cottons, flour, gunnies, hides, iron and steel goods, leather, matches, oils, rice, silks, sugar, tea and tin.

Much encouragement is given by the Government to education in the colony. In 1922 there were 715 schools subject to Government supervision, attended by 39,214 pupils. The University (opened in 1912) includes faculties of medicine, engineering, and arts.

Hong Kong is a Crown colony, and its government is administered by a Governor, aided by an Executive Council of 9 members, together with a Legislative Council of 14 members, including himself, a representative from the Chamber of Commerce, and a representative of the Justices of the Peace. There is also a Sanitary Board, partly elected, which controls all sanitary measures.

CAPITAL, Victoria; population (1923), 450,000.

	1921.	1922.

JAMAICA,*

aboriginally Xaymaca, or Land of Wood and Water—an island situate in the Caribbean Sea, about 90 miles to the south of Cuba, within 17° 43′—18° 32′ North lat. and 76° 11′—78° 21′ W. long. It is the largest and most valuable of the British West Indian Islands, being 144 miles in length and 49 in extreme breadth, containing an area of 4,450 square miles, and a population, in April, 1921, of 858,118 (males, 401,973; females, 456,145); whites, 14,476; coloured, 157,223; blacks, 660,420; East Indians, 18,610; Chinese, 3,696; not specified, 3,693.

Jamaica was discovered on May 3, 1494, by Columbus, who called it St. Jago. It was taken possession of by the Spaniards in 1509; but in 1655 a British expedition, sent out by Oliver Cromwell, under Penn and Venables, attacked the island, which capitulated after a trifling resistance. In 1670 it was formally ceded to England by the *Treaty of Madrid.*

From the sea-level on all sides of Jamaica a series of ridges gradually ascend towards the central ranges, dividing the large rivers, and attaining, in the culminating Peak of the Blue Mountains, in the eastern part of the island, an elevation of 7,388 feet. From these mountains at least 70 streams descend to the north and south shores, but none are navigable except the Black River, and that only for small craft. There are several excellent harbours, and the island is intersected by good roads. There are 200 miles of railway open. Telegraph stations and post offices are established in every town and in very many villages; the number of accounts open in the Govt. savings banks was 60,084 (1922). Most of the staple products of tropical climates are raised. Sugar and rum are manufactured and exported; the latter is still counted the best in the world; and the coffee raised in certain districts of the Blue Mountains fetches the highest price that is given in the London market. There is an extensive trade in fruits, chiefly bananas and oranges, with the U.S.A. and U.K. Maize and Indian corn grow luxuriantly. The Guinea grass, from four to six feet in height, grows wild, and is superior to any other for pasturage, while the woods furnish an abundance of rich dye-stuffs, drugs, and spices, and the forests abound in the rarest of cabinet woods. The Governor is assisted by a Privy Council not to exceed 8 members; the Legislative Council consists of the Governor, the Senior Military Officer, the Colonial Secretary, the Attorney-General, the Director of Public Works, and the Collector-General (all *ex officio*), and of such other persons, not exceeding 10, as the King or the Governor may appoint, called Nominated Members, and 14 elected by the people, being one for each parish of the island. The island is divided into three counties, Surrey in the east, Middlesex in the centre, and Cornwall in the west. The principal city is Kingston, the seat of government and the largest port and town, pop. (Census, 1921) 62,707; the next in importance are Spanish Town, pop. 8,694; Montego Bay, 6,580; and Port Antonio, 6,272. Chief exports (1922): sugar, £911,812; fruit, £2,131,555; coffee, £203,883; cocoa, £138,315.

---

* The Government publishes annually a *Handbook of Jamaica*, full of information respecting the history and *personnel* of the island.

Kingston is distant from London 4,000 miles; transit, 14 days.

KENYA.

Kenya Colony and the *East Africa Protectorate* include the whole of the coast from the Umba to the Juba River, as also the vast territories in the interior bounded in part by international conventional lines. The eastern boundary was defined along the Juba and north-east by an agreement with Italy (1891), and on the north by an agreement with Abyssinia in 1908. On the west the Colony adjoins Uganda, and on the south the mandated Tanganyika Territory. The population of the Colony at the census of 1921 was 2,529,133. Its area is approximately 200,000 square miles.

A great portion of this vast region consists of pasture lands or barren wastes, but there are not lacking extensive districts of great natural fertility on the coast, as well as in the interior. The Colony is divided for administrative purposes into eight provinces, which are subdivided into districts and sub-districts.

The districts most suitable for settlement by Europeans are those of Kyambu, Nyeri, Nakuru, Naivasha, Lumbwa, and Uasin Gishu. There is also a considerable region still undeveloped, and not yet included in any administrative district.

Kenya also includes the *Witu Protectorate*, a small tract of country at the mouth of the river Tana. Witu is regarded for administrative purposes as part of *Tanaland*.

Mombasa, which is connected with Europe by telegraph, possesses perhaps the finest harbour on the east coast of Africa (population, about 32,330, of whom 653 are Europeans). There is also telegraphic communication along the coast between Mombasa and Lamu, and between Mombasa and Entebbe, the capital of the Uganda Protectorate. There are also extensions radiating from the main Uganda Railway telegraph system to Taveta, Fort Hall, West Kenia, Archers Post, Southern Masai Reserve, Eldama Ravine, Kericho, Uasin Gishu, Machakos, Kisii and Mumias; also telegraph connexion between Mombasa and Tanga. Radio-telegraph stations exist at Mombasa and Kismayu. The Uganda Railway has its terminus at Mombasa, which is connected with the mainland by a railway bridge 1,732 feet in length. There are also about 40 miles (under Uganda Railway management) from Nairobi to the Fort Hall District, and about 90 miles from the main line at Uganda junction to the Magada Soda Lake. Nairobi, the capital of the Colony, and central station of the Uganda Railway, has a population of 24,378, of whom 2,929 are Europeans. There are also some 600 European farmers in the immediate neighbourhood of Nairobi.

The principal exports are coffee, fibre, carbonate of soda, grain, and hides and skins; the principal imports are piece-goods, rice, grain and flour, building materials, European provisions, petroleum, &c.

The importation of arms and ammunition is prohibited, except under the most stringent regulations, and the introduction and local manufacture of spirits is also heavily checked.

The problem of admitting or excluding immigrants from British India has exercised the attention of the Government, and discussions have taken place at the Colonial Office in London on the subject. Delegates from Kenya and from British India have stated their views, which are in direct conflict one with the other.

LEEWARD ISLANDS.

The Leeward Islands of the West Indies under British authority consist of the 5 presidencies of (1) Antigua, with Barbuda and Redonda; (2) St. Christopher and Nevis, with Anguilla; (3) Dominica; (4) Montserrat; and (5) the Virgin Islands, with Sombrero, under Commissioners, all, except the latter, having their own local Legislature. These 5 presidencies are administered by a Governor, to whom the Administrators and Commissioners are subordinate, and there is also a General Legislative Council, possessing concurrent legislative powers with the local Legislatures on certain subjects. The population of the federal colony at the Census of 1921 was 122,242. The General Legislative Council consists of 8 *ex-officio* and 8 elective members, with the Governor as President.

(1) ANTIGUA (AND BARBUDA).

Antigua is the seat of government and residence of the Governor-in-Chief. It lies in 17° 6′ N. lat. and 61° 45′ W. long., and is about 70 miles in circumference. Its area is nearly 108 square miles, equal to 68,980 acres, of which nearly 17,000 are under cultivation. The population (with Barbuda) in 1921 was 29,767, including 12,542 males and 17,225 females. Settled by the English in 1632, and granted to Lord Willoughby by Charles II., the island has always been more distinctively English. It is much less hilly and wooded than the other Leeward Islands, and is largely given up to the cultivation of sugar, for which two central sugar factories have been erected. Cotton is being planted, and the island also exports molasses, tamarinds, and arrowroot. In March, 1898, the Crown Colony system of government was instituted.

	1919–20.	1920–21.	1921–22.
Revenue	£70,158	£106,711	£89,149

CAPITAL, St. John's, populatio (1911), 7,910.

President & Island Sec. (the Colonial Secretary of the Leeward Islands).

Treasurer, Hon. F. W. Griffith (*see* Leeward Islands).

Magistrate, R. H. K. Dyett	£600
Supt. of Public Works, Capt. R. G. Wright-Nooth, M.C.	450–500

Barbuda is situated 30 miles N. of Antigua, of which it is a dependency, in lat. 17° 35′ N., long. 61° 42′ W. Area, 62 square miles. Population, 1,000. The island is flat and fertile in parts, producing cotton, corn, pepper, tobacco, and vegetables, and was formerly a possession of the Codrington family. Wild deer are plentiful and afford excellent sport, and there is good tarpon and other fishing.

Magistrate, Capt. G. Downing.

Redonda, is a small island with a phosphate industry.

(2) ST. KITTS-NEVIS (WITH ANGUILLA).

The islands of St. Kitts, Nevis, and Anguilla were united in 1882 to form one Presidency, and taken together they had a population at the Census of 1921 of 38,214 and a total area of about 150 square miles. The climate is decidedly healthy for the tropics, the temperature being from 78° to 85°.

St. Kitts, the principal island of the Presidency, and the oldest colony in the West Indies, is situated in lat. 17° 18′ N. and long. 62° 48′ W., and comprises an area of 68 square miles, its greatest length being 28 miles, and greatest breadth about 5 miles. It is one of the most effectively cultivated sugar islands in the West Indies, a continuous line of green estates sweeping up all round the coast from the sea towards the central cone, which rises to a height of 3,711 feet (Mount Misery). The capital, Basseterre, pop. (1922) 7,837, is a port of registry, and had 57 vessels of 957 tons in 1922.

Nevis (separated from St. Kitts by a strait some 3 miles wide) has an area of 50 square miles, with a population in 1922 of 11,569. Sugar-cane and cotton are grown. Its greatest elevation is 3,596 feet. Chief town, Charlestown. Pop. (1922), 1,308.

Anguilla is about 60 miles N.W. of St. Kitts, 16 miles in length, and varies in breadth from 1 to 3 miles, containing an area of 35 square miles. Population (1922), 4,275. Cotton is the principal product, and small stock are raised.

Supt. of Public Works, J. Landreth Smith ... 510

(3) DOMINICA,

the largest island of the colony, and the loftiest of the Lesser Antilles, is situate between 15° 20′—15° 45′ N. lat. and 61° 13′—61° 30′ W. long., 95 miles S. of Antigua, and is about 29 miles long and 15 broad, comprising an area of 291 sq. miles, or 186,240 acres, of which about 70,000 acres are under cultivation. The island is of volcanic origin and very mountainous and picturesque, abounding in streams fairly well stocked with fish, and the soil is very fertile. The temperature varies, according to the altitude, from 55° to 85°. The cultivation of sugar has been practically replaced by cocoa, limes, coco-nuts, and fruit. The population was estimated at 38,000, on June 12, 1922; included in this total are 400 Caribs, of whom 100 are of pure blood. The climate is healthy, and during the winter months very pleasant. Yellow fever is unknown, and from November to June the island is suitable as a health resort for pulmonary and rheumatic invalids. There is an Executive Council composed of official and unofficial members, and a Legislative Council consisting of the Administrator, who sits as President, and 6 official and 6 non-official members nominated by the Governor. The principal towns are Roseau, on the south-west coast, population about 7,000, and Portsmouth, population about 1,000.

(4) MONTSERRAT

is situated in 16° 41′ N. lat. and 62° W. long., 26 miles S.W. of Antigua. It is about 11 miles in length and 7 in breadth, comprising an area of 32½ square miles, with a population (Census 1921) of 12,120. Discovered by Columbus in 1493, it was settled by Englishmen, conquered and held by the French for some time, and finally assigned to Great Britain in 1784. It is justly considered one of the most healthy and beautiful of the Antilles; it contains three active soufrières and several hot springs, while the scenery is charmingly diversified. About two-thirds of the island are mountainous, the rest well cultivated. The chief exports during the year 1920 were cotton, cotton seed, limes and its products, sugar, papaine and animals of all kinds. The chief town is Plymouth, with a population (1921) of 1,709.

Inspector of Works, R. C. Otway 300

(5) THE VIRGIN ISLANDS,

a group of islands belonging chiefly to Great Britain and the U.S.A., form a connecting link between the Greater and Lesser Antilles. Such of the islands as are British became so in 1666; the principal are—Tortola (the largest), situate in 18° 27′ N. lat. and 64° 40′ W. long., Virgin Gorda, and Anegada. The area of the British possessions is 58 square miles, and the population in 1921 was 5,082. There is good pasturage for cows, sheep, and goats. Sugar, cotton and coconuts are grown in increasing quantity; fishing and poultry-rearing are also carried on. A valuable mine of copper has been worked at Virgin Gorda. The capital of the group is Road Town, on the south-east of Tortola; population (1921), 463.

	1920-21.	1921-22.	1922-23.

MALAYA.

The whole of the Malay Peninsula, from the southern boundary of Siam to the Strait of Singapore, is within the British sphere, the administrative groups being the *Straits Settlements* (Singapore, Penang, Malacca, Labuan, Cocos Islands, and Christmas Island), the *Federated Malay States* (Perak, Selangor, Negri Sembilan, and Pahang), the *Non-Federated Malay States* (Kelantan, Trengganu, Kedah, Perlis or Palit, and Brunei), and the Protected *State of Johore.* The total estimated population of BRITISH MALAYA (1922) was 3,437,841 (as compared with 2,672,754 in 1911). Of the 1922 total, 2,110,606 were males and 1,327,235 females, the disparity being principally due to the large number of Chinese male immigrants. The total European population at the Census of 1921 was 14,954 (Straits Settlements 8,149, Federated Malay States 5,686, Non-Federated Malay States 1,119).

(1) THE STRAITS SETTLEMENTS.

The Settlements forming what is known as the Colony of the Straits Settlements consist of the island of Singapore (with its dependencies), Penang (including Province Wellesley and the Dindings), Malacca, the Cocos or Keeling Islands, Christmas Island, and Labuan. These Settlements have an entire area of about 1,600 square miles, with an estimated population (1922) of 908,809.

The Government consists of a Governor, assisted by an Executive Council of 10 members, and a Legislative Council of 13 official and 13 unofficial members, appointed by the Crown. Of the unofficial members 11 are nominated by the Crown and 2 are selected by the Chambers of Commerce at Singapore and Penang. The law of the colony is the common and statute law of England as it was in 1826, qualified by local ordinances. The Supreme Court consists of the Chief Justice and four puisne judges, and constitutes also a court of appeal, from which there is yet another appeal in certain cases, viz., to the Privy Council. The jurisdiction of the Supreme Court includes that of a Colonial Court of Admiralty. There are also in each Settlement district courts with limited civil and criminal jurisdiction, and the usual police magistrates' and coroners' courts.

The climate of the colony is almost uniform throughout the year, and foliage is perennial. The rainfall in 1914 amounted in Singapore to 85·84 inches, in Penang to 89·54 inches, and in Malacca to 84·17 inches.

The railway from Singapore to Bankok was opened for passenger traffic in July, 1918.

The principal exports are Para rubber, tin, preserved pineapples, tapioca, gambier, copra, pepper, sago, coco-nut oil, tanned hides, raw hides, rattans, coffee, spices, gums and dye-stuffs (cutch, mangrove, bark, &c.). The rubber exports amounted to 145,960 tons in 1919, 128,155 tons in 1920, 146,781 tons in 1921, and 206,889 tons in 1922. The chief imports are dried fish, rice, milk, sugar, cigarettes and tobacco, coal, cotton piece-goods, machinery, ironware, opium, petroleum, sarongs, slendangs and kains.

SINGAPORE is an island situated off the southern extremity of the Malay Peninsula, from which it is separated by a narrow strait about three-quarters of a mile in width; its length is about 27 miles, and its breadth 14 miles; it comprises, with the adjoining islets, an area of 217 square miles, and an estimated population (1922) of 437,268. It was first occupied, in 1819, and formally ceded to the British Government by the Sultan of Johore in 1824. The seat of government for all the settlements is the town of Singapore, situated on the south side of the island in lat. 1° 16′ N. and long. 103° 53′ E., with 350,355 inhabitants in 1921. The climate is fairly healthy for Europeans, except for the absence of any marked change of temperature throughout the year. The railway from Singapore to Bangkok was open for passenger traffic on July 1, 1918.

The number of merchant vessels entered and cleared in 1922, exclusive of native craft, was

11,738, with a tonnage of 18,280,279. The total for the whole colony was 17,424, with a tonnage of 26,913,256. The total native craft entered and cleared at all four ports, Singapore, Penang, Malacca, Labuan, during the same year was 51,882 (tonnage, 2,014,983). The harbour, in the extent of its shipping, is one of the greatest ports in the world, being a port of call for vessels trading between Europe or India and the Far East, the North of Australia, and Netherlands Indies, and is strongly defended. The Tanjong Pagar docks and wharves were taken over by Government in 1905 at a cost (fixed by arbitration) of $29,000,000. The King's Dock (opened in 1913) is the largest east of Suez, being 879 feet long, 100 feet wide, and 34 feet deep; its cost was $3,500,000.

Singapore is a free port; no duties are levied upon anything except opium, tobacco, spirits, wines, beer, and petroleum consumed in the colony. The trade returns aggregate for 1922 (including inter-settlement trade), amounted to $897,203,464 (including the value of bullion and specie), the value of exported tin being $44,721,065.

Labuan is an island of the Malayan Archipelago, situated about 6 miles off the north-west coast of Borneo, in 5° 16′ N. lat. and 155° 15′ E. long., and forms part of the Settlement of Singapore. Its area is about 28 square miles; and its estimated population is 5,851. It was ceded to Great Britain by the Sultan of Brunei in 1846, being at that time uninhabited. The island has a fine harbour. The exports consist of coal, cloth, rice, sago, earthenware, brassware, &c. Victoria Harbour, in the south-east, is the principal inlet, and affords good anchorage. There is a cable station of the Eastern Extension Telegraph Company on the island. Imports (1922), $1,634,016; exports, $1,651,137.

Resident, H. S. Eley (*actg.*).

The Cocos-Keeling Islands are a group of about 20 small islands about 700 miles south-west of Sumatra, and form part of the Settlement of Singapore. The estimated population is 876, and the island exports about 800 tons of copra. There is a station of the Eastern Extension Telegraph Company on Direction Island.

CHRISTMAS ISLAND, in the Indian Ocean, about 200 miles south-west of Java, and 700 miles east of the Cocos-Keeling Islands, has an area of about 56 square miles and an estimated population of 750. A District Officer is stationed on the island, which contains enormous phosphate deposits worked by the Christmas Island Phosphate Company. The amount exported in 1922 was 99,352 tons.

PENANG is the northernmost of the Settlements. It includes Penang or Prince of Wales's Island (est. pop., 1922, 163,879), on the eastern side of which is Georgetown, the port and capital, and the strip of mainland opposite, known as Province Wellesley (est. pop., 1922, 130,478), and the Dindings. Penang Island, about 15 miles long and 9 broad, is situated off the west coast of the Malay Peninsula, in lat. 5° 18′ N., long. 100° 21′ E., and was ceded to the Government of India in 1786 by the Raja of the neighbouring territory, Kêdah. Area, 108 square miles. At the time it was founded, Penang was the only British settlement in further India; now it is the emporium for all the trade of the northern and more prosperous parts of Sumatra and the Malay Peninsula. Its aggregate trade for 1922 (including intersettlement trade) amounted to $274,137,881; the export of tin from the port being $45,879,709 in 1922.

Province Wellesley is a strip of coast about 45 miles in length with an area of 288 square miles, ceded by the Raja of Kêdah in 1798, with some land S. of the Krian River acquired more recently. The province is in a high state of cultivation as compared with the neighbouring territory, containing rice, spices, tapioca, and rubber plantations.

The Dindings Territory (area 183 square miles, est. pop., 1922, 12,546) is at present little developed; but it contains what is considered the best natural port on the western side of the peninsula. The headquarters are at Lumut, where a District Officer is stationed, and steamers call regularly at Pangkor and Lumut. The territory comprises a group of islands (of which Pangkor is the largest); and a strip of the mainland on the west coast of the peninsula, cut out of the State of Pêrak, and measuring about 22 miles long by about 10 miles in width.

MALACCA, the largest of the Settlements, situated on the western coast of the peninsula, between Singapore and Penang, and about 110 miles to the N. W. of Singapore, comprises an area of about 720 square miles. It is one of the oldest European settlements in the East, having been taken possession of by the Portuguese in 1511, and held by them till 1640, when the Dutch drove them out. In 1795 it was captured by the British, and retained till 1818, when it was restored to the Dutch; it finally became a British possession, in pursuance of the treaty with Holland, March 17, 1824, being exchanged for the British settlements in Sumatra. The estimated population in 1922 was 157,161.

Aggregate trade, 1922........................$40,504,508

(Including para rubber, $23,004,869, exported in 1922.)

Singapore, distant 8,700 miles; transit, 22 days. Penang, 20 days; and Malacca, 23 days.

(2) THE FEDERATED MALAY STATES.

These States are situated on the mainland of the Malay Peninsula, and are closely connected with the Straits Settlements; they consist of the States of Pêrak, Sĕlángor, Negri Sembilan, and Pahang, which have by treaty (1895) renewed their engagements with the British Government, and are administered under the advice of a Chief Secretary to Government, with Residents in each State, subject to the instructions of the High Commissioner, who is also Governor of the Straits Settlements. The total area of the Federation is 27,648 square miles, with a population in 1921 of 1,324,890. The principal towns are Kuala Lumpur (Sel.), pop. 80,424; Ipoh (Pk.), 36,860; Taiping (Pk.), 21,111; Kampar (Pk.), 12,325; Seremban (N.S.), 17,272; Klang (Sel.), 11,655; and Teluk Anson (Pk.), 10,859.

The first three States are on the west coast, and extend from the border of Province Wellesley to that of the independent State of Johore. Pahang is on the east coast. All are governed by their native rulers under the above-mentioned control.

There are 1,022 miles of railway, practically all of which have been constructed from revenue. This mileage includes the Johore State Railway (120½ miles), which is leased from the Johore Government. The line is of metre gauge throughout, and extends from Singapore (in the South) to Padang Besar (on the Siamese frontier), where it is connected with the Siamese State Railways, affording direct communication with Bangkok. The journey between Singapore and Penang occupies 24 hours, and that between Prai (Penang) and Bangkok 34 hours (compared with a sea journey of 6 days). At Gemas there is a branch from the main Singapore-Penang line running northwards through Negri Sembilan and Pahang as far as Padang Tungku. This line will eventually connect with another running South through Kelantan, now under construction. Through communication between F.M.S. and Kelantan *viâ* the Siamese State Railways is in operation. There are 2,456 miles of metalled road, and 1,935 miles of unmetalled roads and bridle-paths, while the principal rivers are navigable for small boats.

One of the regions contributing largely to the raw products of the British Empire is the Malay Peninsula, and the most productive portion of the peninsula is that embraced by the four Federated Malay States. The territory is greatly endowed by having tin and plantation rubber as its two richest products, but the figures given below show that it has other exports of great value.

With the growth of the rubber industry, there has been a tendency to neglect some of the older products of the country, such as indigo, coffee, sugar, and pepper; gold has always been found in small quantities, chiefly in Pahang, and the export in 1921 amounted to 14,681 oz.

The following table shows the relative importance of the exports from the Federated Malay States over a period of three years:—

	1920. tons.	1921. tons.	1922. tons.
Rubber	101,330	94,510	128,462
Tin and tin ore	47,081	46,238	35,286
Copra	24,999	36,211	55,275
Rice and padi	12,062	8,415	6,387
Tapioca	429	787	891
Areca nuts	640	710	1,027
Gambier	343	289	309
Wolfram and scheelite	288	110	95

The climate is very uniform, and may be described as hot and moist. There is no well-marked dry season, and the rainfall in the low country is about 95 inches. The average maximum shade temperature is 91°, and the minimum 68°.

The States are policed by a mixed force of Indians and Malays, officered by Europeans.

	1921.	1922.
Public revenue	$54,449,568	$52,494,110

Secretary for Chinese Affairs, W. T. Chapman	14,400

Kuala Lumpur is distant 8,500 miles from London; transit, 21 days (*viâ* Penang).

(3) THE NON-FEDERATED MALAY STATES.

The Malay States not included in the Federation consist of Johore, Kedah, Perlis, Kelantan, and Trengganu. The relations of Johore with Great Britain are defined in the Treaty of Dec. 11, 1885, as amended by an agreement dated May 12, 1914, whereby the Sultan accepts, and acts upon, the advice of a British officer called the General Adviser. In respect of the other four States, the rights of Suzerainty, protection, administration and control were transferred by Siam to Great Britain by the Anglo-Siamese Treaty of March 10, 1909.

In all these States the trade is almost entirely carried on with the Straits Settlements. Currency, weights and measures are the same. The religion is Muhammadism.

JOHORE, with an area of 7,678 square miles and a population (Census, 1921) of 282,234, occupies the southern extremity of the Malay Peninsula. Capital: Johore Bahru, population, 15,312. The rubber estates and tin mines are important.

	1921.	1922.

Exports	34,051,796	37,861,597

Sultan, H.H. Ibrahim, G.C.M.G., K.B.E.; *born*, 1873; succeeded his father, 1895.
General Adviser, H. Marriott.
Chief Min., Dato Abdullah bin Jaafar.
Deputy State Secretary, Dato Ismail bin Bachok.
Judge, A. V. Brown.

---

* Inclusive of coin and bullion.
† All salaries are exclusive of allowances.

KEDAH, between 5° 5′ – 6° 35′ N., lies on the west coast of the peninsula, and includes the Langkawi group of islands. The population in 1921 was 338,544, and the approximate area 3,800 sq. miles. Rice is the principal crop in North Kedah, while coco- and betel-nut and rubber are cultivated in South Kedah. The capital is Alor Star, 8 miles inland on the Kedah River, with a population of about 12,000. The powers of the Sultan have, owing to illness, been vested in a Regent; who is assisted by a Council. There are 40 British officials, employed in the Public Works, Survey, Police, and Medical departments.

	1921.	1922.
Revenue	$5,235,450	$4,966,904
Expenditure	5,348,756	5,290,239
Public Debt	2,720,953	1,500,000

Sultan, H.H. Tunku Abdulhamid, K.C.M.G.
Regent, H.H. Tunku Ibrahim, C.M.G.
British Adviser, W. Peel.

PERLIS, the most northerly State, is on the west coast of the Malay Peninsula. The area is about 300 sq. miles, and the population is 40,090. The capital is Kangar, a few miles up the Perlis River. Rice is the principal crop.

	1921.	1922.
Revenue	$332,508	$372,483
Expenditure	336,728	333,058
Public Debt	495,394	400,000

Raja, H.H. Syed Alwi, C.B.E.
British Adviser, J. W. W. Hughes (*acting*).

KELANTAN lies between 4° 38′ – 6° 15′ N. and 101° 26′ – 102° 45′ E. on the east coast of the peninsula, with a total length of about 120 miles and a breadth of 50 miles. The northern portion is flat and fertile, producing rice, coco-nut and betel-nut and affording pasturage for large quantities of live stock. Agriculture, fishing, and the production and weaving of silk are the principal industries. The southern and larger portion is mountainous and barren. The capital, Kota Bharu, 8 miles from the mouth of the Kelantan River, has a population of 10,833.

	1921.	1922.
Revenue	$1,160,262	$1,310,020
Expenditure	1,678,432	1,536,318
Public Debt	3,342,615	3,567,895

Sultan, H.H. Ismail, K.C.M.G.
British Adviser, A. F. Worthington.

TRENGGANU, between 4° 30′ – 5° 45′ N. and 102° 15′ – 103° 30′ E., lies south of Kelantan on the east coast of the peninsula. Area, about 5,000 square miles. Population (1921), 153,092. Industries of agriculture (mainly rice), fishing and fish-curing, silk weaving, shipbuilding, and tin mining. The principal exports in 1922 were dried fish ($887,050), tin ore and copra. The capital, Trengganu, on the river of that name, contains 12,000 inhabitants.

	1921.	1922.
Revenue	$547,619	$669,763
Expenditure	759,054	858,303
Public Debt	*Nil*	*Nil.*

Sultan, H.H. Suleiman, K.C.M.G.
British Adviser, J. L. Humphreys.

MALTA,

an island in the Mediterranean Sea, 58 miles from Sicily and about 180 from the African coast, about 17 miles in length and 9 in breadth, and having an area of 91½ square miles. The colony includes also the adjoining island of GOZO, with an area of 24¾ square miles; COMINO—the site of the *Sultan's* disaster in 1889 and now a sanitary station—and several islets. The civil population of the whole group, on Dec. 31, 1922, was 218,510. In religion the Maltese are Roman Catholics. The lower orders are mainly Punic in race. The Maltese dialect, which is generally spoken, is of Semitic origin, and is held by some to be derived from the Carthaginian and Arabic tongues. The upper classes are mostly descendants of those who sought the protection of the Order of St. John during the Middle Ages, from all parts of Southern Europe. They speak English and Italian. There is a Maltese order of nobility, recognised by the Crown, consisting of 29 families.

The climate, although not tropical, is very hot in summer. The mean temperature for the summer months in 1921 (June, July, August and September) was 76·7°. In winter the mean temperature was 55·6°.

The islands are highly cultivated. The chief products are corn, oranges, melons, grapes, forage, cummin seed, onions, and potatoes; figs and honey are plentiful. The principal occupation of the people is in connexion with shipping, about 8,000 females being occupied in making lace.

The principal harbour is one of the finest in the world; it is very deep, and large vessels can anchor alongside the shore. It is an important port of call for vessels passing to and from the East and the Suez Canal, being about half-way between Gibraltar and Port Said. There is an extensive arsenal and important dockyard, Malta being the headquarters of the Mediterranean Fleet.

Citta Vecchia, the former capital of the island, contains the ancient palace of the courts of justice, the Cathedral, and the Seminary; its population has now dwindled to about 500, but its suburb, Rabato, had about 10,000 inhabitants in 1921–22. Citta Vecchia has been entirely eclipsed in importance by the modern capital of Valletta, which was founded in 1566.

Malta possesses a University and Lyceum; 101 elementary and infant schools, 2 secondary schools, and 40 night schools, maintained at a total cost to the Government of £56,405 in 1921–22: in addition there are garrison schools, a Dockyard school, and 59 private schools which receive no grants-in-aid from the Government.

The island of Malta is said to have been converted to Christianity on the occasion of the shipwreck of St. Paul in 58 A.D. In the Dark Ages it was taken by the Moors, its commerce was destroyed, and it was used mainly as a base for piratical expeditions. In 1090 it was again brought under Christian rule, being conquered by the Norman Count Roger of Sicily. For 440 years it followed the fortunes of that kingdom, but was in 1530 handed over to the Knights of St. John, who made of it a stronghold of Christianity. In 1565 it sustained the famous siege, when the last great effort of the Turks was successfully withstood by Grand Master La Vallette. The Knights expended large sums in fortifying the island and carrying out many magnificent works, until they were expelled by Napoleon in 1798. The Maltese rose against the French garrison soon afterwards, and with the assistance of some British and Neapolitan troops, compelled the French to capitulate in 1800. The islands were then ceded to Great Britain, the cession being confirmed by the Treaty of Paris of 1814.

Under the Constitution of 1921 the Legislature consists of a Senate and a Legislative Assembly.

The Senate is composed of 17 members, 10 of whom are special members representing the Clergy, the Nobility, the Graduates, the Chamber of Commerce and the Trade Union Council, the other 7 being elected by a special electorate. The Legislative Assembly consists of 32, returned by 8 electoral districts, each represented by 4 members. The method of voting is that of Proportional Representation under the system of the single transferable vote. The Governor is assisted by two Councils—an Executive Council consisting of such of the Ministers as he selects and a Nominated Council consisting of the Lieutenant-Governor, the Legal Adviser and three officers chosen from the Navy, Army and Air Force. The Governor may summon these two Councils to sit together as the Privy Council of Malta. When any legislative or administrative act is done which, in the Governor's opinion, affects a reserved matter, he may submit the consideration of it to a Joint Committee consisting of three members of the Nominated Council appointed by himself and three members of the Executive Council appointed by the Head of the Ministry.

In 1922 the Port of Valletta was entered by 1,626 vessels (tonnage, 2,746,220).

Malta is 2,280 miles by sea, and *vià* Naples about 1,995; transit, 3 days.

MAURITIUS.

Mauritius is an island lying in the Indian Ocean, 550 miles east of Madagascar, between 57° 17′–57° 46′ E. long. and S. lat. 19° 58′—20° 33′, and comprising an area of 720 square miles. The permanent population at the Census of 1921 was 376,474, of whom 265,455 were Indians, the majority born in the Colony, and the remainder mainly of French or mixed descent.

Mauritius was discovered between the years 1507 and 1528 by the Portuguese, but they never formed any settlement on it. The Dutch visited it in 1598, and named it Mauritius, in honour of the Stadtholder, Prince Maurice of Nassau. In 1644 they established a small colony on the shore, but in 1710 they abandoned the island, and in 1715 the French took possession of it and changed the name to Ile de France. Under the French it became a great centre of trade, but in 1789 the seat of French Government in the East was removed to it from Pondicherry, and it was taken by a British force in 1810. The French language and French law have been preserved under British rule when the ancient name, Mauritius, was restored.

Of the total cultivated area of 206,419 acres, 173,519 are under sugar, 20,000 under fibre, and 12,900 under other crops; the necessaries of life have all to be imported from abroad. Rice and grain are obtained from India, flour and frozen meat from Australia, oxen from Madagascar, and minor imports from South Africa and elsewhere. The chief trade of the island is with India. Being just within the tropics it has a hot climate; but, except in Port Louis and some of the low-lying districts, it is not unhealthy. The island is subject to cyclonic disturbances, and a hurricane in 1892 was particularly severe.

There is an excellent harbour on the N.W. coast, on which the capital, Port Louis, stands, and the annual trade of the island passes almost entirely through Port Louis. The shipping entered and cleared, in 1922, amounted to 908,977 tons, of which 67 per cent. was British. In 1922 there were 143½ miles of railway (119½ of 4 ft. 8½ in. gauge and 24 of 2 ft. 6 in.), 61 post-offices and 54 telegraph offices in the island, with 673 miles of telegraph, including block telegraph for the railway, and 162 miles telephone wires (Government).

---

* Including Imperial Grant, £250,000.
† Including Bread Subsidy, £238,918.

The Government is administered by a Governor, aided by an Executive Council of four official members, and of such other persons in the service of the Government as the Governor, through instructions of the Secretary of State, may from time to time appoint, and a Legislative Council of 27 members, eight being *ex-officio*, nine nominated by the Governor, and 10 elected by a moderate franchise. Port Louis has two members, and each of the country districts one.

The inhabitants of European descent are mostly Roman Catholic. Education has two branches:—(1) *Superior or Secondary Instruction*, to which is attached the Government Royal College and the Associated Schools; (2) *Primary Instruction*, consisting of the Government schools and the grant-in-aid schools. The total expenditure on education in 1921–22 amounted to Rs.1,095,734. Of the pupils in the Government and aided schools, 59 per cent. are Roman Catholics, 2 per cent. Church of England, 1 per cent. other Christian denominations, 11 per cent. Muhammadans, and 27 per cent. Hindus and others.

DEPENDENCIES OF MAURITIUS.

(1) RODRIGUES, 350 miles almost due east of Mauritius. Population (Census 1921), 6,584. Area, 40 square miles. Cattle, beans, salt fish, and goats are the principal exports. The island is under the administration of a magistrate from Mauritius, who takes his orders from the Governor of Mauritius.

Magistrate, W. J. Hanning (*Acting*) Rs.9,000 to 12,000

(2) OTHER DEPENDENCIES. Most of the scattered groups of coral islands belonging to Great Britain in the Indian Ocean are administered by the Mauritius Government, being visited periodically by two magistrates, whose duty it is to inquire into the condition of the labourers, and settle any disputes which may be referred to them. The chief product is coco-nut oil. The most important is Diego Garcia (pop. 1921, 445), one of the Chagos Archipelago, which lies on the direct route from the Red Sea to Australia, and, as it possesses a good harbour, has been much used of late years as a coaling station. The total population of the "Other Dependencies" (1921) is 1,365.

Transit from London to Mauritius, 28 to 30 days.

MESOPOTAMIA (IRAQ).

King of Iraq, Feisal, elected King of Iraq, Aug. 10, 1921, *acceded* Aug. 23, 1921.

President, Council of State, the Naquib of Baghdad, G.B.E.

Iraq, or *Mesopotamia*, "the land between the rivers" (Euphrates and Tigris), extends from Kurdistan on N. and N.E. to the Persian Gulf on the S. and S.E., and from Persia on E. to Syria and the Arabian Desert on W. the approximate position being between 37½° to 48½° E. long., and from 37½° to 30° N. lat. The territory was freed from Turkish rule during the War of 1914–18 by Anglo-Indian and British Dominion troops under Generals Nixon, Maude, and Marshall (Gen. Maude succumbing to cholera after the capture of Baghdad). Under the Treaty of Peace with the Allies (1920) Turkey renounced the sovereignty over Mesopotamia and its future administration has been entrusted to Great Britain by the Supreme Council of the Allies. A provisional Arab Government was set-up by the High Commissioner in Nov., 1920, and in Aug., 1921, the Emir Feisal (son of the King of the Hedjaz) was elected King of Iraq, to be enthroned on Aug. 23, 1921. By Treaty between Great Britain and Iraq (Oct. 10, 1922) the former undertakes to exercise its good offices to secure the admission of Iraq to the League of Nations, and as soon as that admission has been accomplished all the responsibilites of Great Britain as the mandatory power will be terminated.

The total area of the districts comprised within the British Mandatory Sphere is about 150,000 sq. miles, the distance from Basra in the south to Mosul in the north being approximately 500 miles. The sphere comprises the former Turkish vilayet of *Mosul*, *Baghdad* and *Basra*. At the Census of 1920 the population was ascertained to be 2,849,282, as under:—

Baghdad vilayet	1,360,304
Basra vilayet	785,600
Mosul vilayet	703,378
Total	2,849,282

The *Baghdad* vilayet include the Baghdad, Samarra, Diyalah, Kut, Diwaniyah, Shamiyah, Hillah and Dulaim Divisions; *Basra* vilayet include Basra, Amara and Muntafik; and *Mosul* include Mosul, Arbil, Kirkuk and Suleimani. (Mosul covers a great part of the ancient kingdom of *Assyria*, the ruins of the Assyrian capital being visible on the banks of the Tigris, opposite Mosul.)

Of the total population there were in 1920 1,146,685 Sunni Muhammadans, 1,494,015 Shiite Muhammadans, 87,488 Jews, 78,792 Christians, and 43,302 other religions.

Mesopotamia is capable of supporting a population many times in excess of its present inhabitants if irrigation is developed and extended. In 1908 certain works were undertaken, following on the report of Sir W. Willcocks, and since the British occupation notable improvements have been effected; the Irrigation Department is at present confining itself to small and immediately remunerative schemes. The wealth of the country depends entirely upon agricultural development, and two harvests can be gathered in the year, the chief crops being wheat, barley and beans, and rice, peas and Indian corn; wheat averages 464lb. per acre, barley 612lb., and rice over 1,000lb. In 1918–19 there were 1,547,000 acres (deriving their water from the Tigris and Euphrates) under general cultivation, an increase of 64 per cent. on the previous year. Cotton growing is a developing industry and it is estimated that Mesopotamia could yield 300,000 bales annually if sufficient labour is forthcoming. The country is being opened up and existing communications improved and secured. Schools, hospitals and dispensaries have been established under British auspices. Basra was equipped with wharves, railway sidings, &c., for military purposes, and is thus suited for commerce. The chief imports are textiles, sugar, and tea, and the chief exports are dates and piece goods.

The following table shows the approximate annual net revenue obtained by the Iraq Customs Administration during the years of British occupation:—

Financial Year.	Rupees.	£ sterling converted at 1s.4*d*.
1915–1916	17,22,599	114,839
1916–1917	53,78,600	358,573
1917–1918	61,57,650	410,510
1918–1919	58,25,000	388,333
1919–1920	2,08,23,494	1,388,233
1920–1921	2,13,94,320	1,426,288
1921–1922	2,43,33,483	1,622,232

The *Euphrates* (which has a total length of 1,800 miles from its source to its outflow in the Persian Gulf) is formed by two arms, of which the Murad Su (415 miles) rises in the slopes of the Ala Dagh, a mountain of Eastern Erzerum, and flows westwards to a junction with the Kara Su, or Frat Su (275 miles), the latter rising in the north-west of Erzeroum in the Dumlu Dagh. The *Tigris* has a total length of 1,150 miles from its source to its junction with the Euphrates at Garmat Ali, 70 miles from the Persian Gulf, and rises in two arms south of the Taurus mountains, in Kurdistan, uniting at Til, where the boundaries of the vilayets of Diarbekir, Van and Bitlis conjoin.

The Baghdad Railway.—In 1899 the Anatolian Railway Company obtained a concession from the Sultan of Turkey for the construction of a railway from Konieh (the eastern terminus of the Anatolian Railway), to the Persian Gulf at Koweit, *via* Baghdad, a total length of 1,550 miles, with a single track of 4 ft. 8½ in. gauge. Its projected course was from Konieh to Adana, thence S.E. to Aleppo, Jerablus (where it would cross the Euphrates and enter Mesopotamia), and Mosul, and thence S. down the right bank of the Tigris to Baghdad and the Persian Gulf. The section Konieh-Eregli-Bulgurlu (124 miles), was opened in Oct. 1904, and at the outbreak of the Great War about 1,200 miles (out of the total of 1,550 miles) were in operation, with gaps in important sections (notably in the hills N.W. of Aleppo, and in the Mesopotamian desert W. & S. of Mosul). The line crosses the Euphrates on a wooden bridge at Jerablus. At Aleppo there is a connexion with the Pilgrims' line from Medina (through Damascus and Homs to Aleppo) and, if it is completed, the railway will be served by the port of Alexandretta (Iskanderun) in Cilicia. The first through train from Basra to Baghdad left Basra on Jan. 13, 1920. The total length of line open at that date was 945 miles compared with 1,113 miles during the War, some unimportant lines having been disused since the cessation of hostilities with Turkey.

The chief city is Baghdad, the former capital of the Abbasside dynasty, one of the Caliphs of that dynasty being Haroun al Rashid of "the Arabian Nights." Baghdad has an estimated population of 170,000, other towns being Basra, 85,000, and Mosul (opposite the site of Nineveh), 90,000.

High Commissioner and Commander-in-Chief, Sir Henry Robert Conway Dobbs, K.C.S.I., K.C.I.E.
Private Secretary,
Civil Secretary, C. C. Garbett, C.I.E.
Military Sec., Col. Gilbert R. Frith, C.B., C.M.G., D.S.O.
Oriental Secretary, Miss G. L. Bell, C.B.E.
Judicial Adviser, E. Drower, C.B.E.
Financial Adviser, S. H. Slater, C.M.G., C.I.E.
President, Court of Appeal, B. H. Bell, C.B.E.

General Officer Commanding, Maj.-Gen. Sir Theodore Fraser, K.C.B., C.S.I., C.M.G.

CAPITAL, Baghdad.

Baghdad is 840 miles by air from Cairo, Egypt. Official Mails between London and Baghdad are sent by fortnightly Air Mail Service *viâ* Cairo—Heliopolis—Ramleh—Amman—Kasr Asrak—Ramadie, with a saving of about 14 days in transit over the normal service.

NIGERIA.

The Colony and Protectorate of Nigeria includes the territories situated on the Bight of Benin, between Dahomey on the west and the Kameruns on the east. The Protectorate is in two main divisions, the Northern Provinces and the Southern Provinces, of which the northern group coincides with the former Protectorate of Northern Nigeria, and the southern group with the former Protectorate of Southern Nigeria. The headquarters of Government is at Lagos. The area of the whole territory is 336,000 sq. miles, and the population roughly 18,500,000.

By Order in Council of Nov. 1922 there is a Legislative Council for the Colony and the Southern Provinces of the Protectorate. The Legislative Council consists of the Governor as President, 26 official members, 3 elected members representing the municipal area of Lagos (J. Egerton Shyngle, Eric C. Moore and Dr. C. C. Adenini Jones), 1 elected member representing Calabar (Atu Amonu) and 12 nominated unofficial members. The Governor continues to legislate for the Northern Provinces.

The chief industry is agriculture, and crops consist of cotton, cocoa, ground-nuts, maize, guinea-corn, millet, rice, coffee, yams, cassava, and tobacco. The natural products exported are palm oil and kernels, gum copal, rubber, mahogany, shea-nuts, hides and skins, and the export of ground-nuts is steadily increasing. A considerable industry has arisen in connexion with tin-mining in the Northern Provinces. The Udi coalfields are of great extent and the coal is of excellent quality. A railway is in operation between Lagos and Kano, a distance of 705 miles. Branch lines run from Minna to Baro (on the Niger), and from Zaria to Bukuru. Another railway line runs from Port Harcourt, at the head of the Bonny estuary, to the coal fields at Udi (150 miles) and further railway extensions are in progress. Centres of trade are Lagos, Abeokuta, Ibadan, Oshogbo, Illorin, Zaria, Kano, Onitsha, Lokoja, Warri, Bonny, Sapele, Calabar, Opobo, Forcados, and Port Harcourt.

The principal imports are cotton goods, provisions, spirits, hardware, cutlery, cycles, kerosene, tobacco, building material, soap, and haberdashery.

Postmaster-General, H. M. Woolley	1,200

Transit to Lagos from Liverpool, 16 days. Cable communication to Lagos and Bonny. Inland telegraphs to all important places.

NYASALAND PROTECTORATE.

This country was proclaimed a British Protectorate on May 14, 1891. The Protectorate comprises the western shore of Lake Nyasa and the country southwards nearly to the Zambesi.

The population of the Protectorate is 1,200,000, including about 1,500 Europeans and 600 Asiatics, and it has a total area of 40,000 square miles.

The principal exports are cotton, tobacco, chillies, coffee, ground-nuts, fibre, and tea. The cultivation and export of cotton and tobacco are considerable. Ivory and rubber are also exported in small quantities. The principal imports are soft goods, provisions, and hardware. On Lake Nyasa there are seven steamers. A railway from Port Herald (the "inland port" of the Protectorate) to Blantyre (113 miles) is open for traffic. An extension from Port Herald to Chindio (the terminus of the Central Africa Railway) on the Zambesi (61 miles) was opened in 1915. The Trans-Zambesia Railway, from Beira to Muraça (on the southern bank of the Zambesi River) was opened in April, 1922; the terminus is opposite to Chindio, and the line (174 miles) thus establishes direct railway communication between Beira and Blantyre. A further extension to Fort Johnston, on Lake Nyasa, is projected. Main roads and "carrier" roads are open all over the Protectorate, the total mileage being 3,500.

Mails to and from England are despatched every week *viâ* Cape Town and Beira. Between Beira and Europe the means of communication are the Union-Castle Mail S.S. Co., Messrs. Rennie's Line *viâ* Natal, the British India Steam Navigation Co., and other lines. The Protectorate is connected by telegraph overland with the Cape *viâ* Salisbury, and, with the Portuguese wires, to Chinde and Quilimane. The African Trans-Continental Telegraph Company's line has now been extended northwards as far as Ujiji on Lake Tanganyika.

The chief towns are Blantyre (population about 300 Europeans and 7,000 natives) and Zomba, the headquarters of the Government.

	1921-22.	1922-23.
Revenue	£259,117	£247,348

PACIFIC ISLANDS.

High Commissioner, His Excellency Sir Cecil Hunter Rodwell, K.C.M.G. £1,200
(In addition to £3,000 as Governor of Fiji, and allowance of £300 as Consul-General for Western Pacific.)

Secretary to High Commission and Registrar of the Court, Roger Greene £700

Chief Judicial Commissioner, Sir A. K. Young 350
(In addition to £1,000 as C.J. of Fiji.)

(1) *The British Solomon Islands*, protected since 1893, consist of Guadalcanar, Malaita, San Cristoval, New Georgia, Choiseul, Ysabel, and other islands situated east of New Guinea, with a total area of about 11,000 square miles, and a population, 1919, of 675 Europeans, 75 Asiatics, and about 150,000 natives. The *Santa Cruz Group* and several other islands were incorporated in the Protectorate in 1898 and 1899; and in 1900 Choiseul and Ysabel, with the islands in Bougainville Straits and Lord Howe's group, were transferred by treaty from Germany. The revenue in 1920–21 was £52,315, and the expenditure £41,662; exports, 1919–20, £212,542; imports, £181,162. The seat of government is Tulagi.

Resident Commissioner, R. R. Kane, M.C.
(and £150 allowances) £800 to 1,000

(2) *The Gilbert and Ellice Islands*, formerly a Protectorate, were formally annexed to the Empire in November, 1915. The Gilbert Group, situated between 4° N. and 3° S. latitude and 172° and 177° W. longitude, consists of 16 islands, with several small islands or islets depending upon them; and the Ellice Group, between 5° S. and 10½° S. latitude and 176° E. and 179·58° W. longitude, consists of nine islands. Ocean Island (or Paanopa), in lat. 0° 52′ S. and long. 169° 35′ E., which is the seat of government, was proclaimed British in 1900. Total area, 180 square miles; population (1919), 200 Europeans, 300 Asiatics, and 33,500 natives. Revenue (1920–21), £54,079; expenditure, £45,379; imports (1919–20), £129,788; exports, £213,042. The Union or Tokelau Group, Fakaafo, Nukunono and Atafu, were included in the Protectorate in 1909, and annexed to H.M. Dominions in Feb. 1916 as part of the Gilbert and Ellice Islands colony, including Christmas Island.

Fanning Island, in lat. 3° 30′ N., long. 159° 13′ W., and Washington Island, 66 miles N.W. by W. of Fanning Island. Pop., 21 Europeans in connexion with Pacific cable station, and about 400 Gilbert Islanders in copra industry. The islands were included in the Gilbert and Ellice Colony by an Order in Council of Jan. 27, 1916.

Resident Commissioner, H. R. McClure ...
(and £100 allowance) £700 to 800

(3) *The Tonga or Friendly Islands.*—A protectorate over the Tonga Islands Kingdom was proclaimed May 19, 1900. These islands are situated in the Southern Pacific to the E.S.E. of Fiji, and 390 miles therefrom, with an area of 385 square miles, and a population (1919) of 376 Europeans, 250 half-castes, 22,689 Tongans, and 247 others—total 23,562. The limits of the group are between 15° and 23° 30′ S. and 173° and 177° W. Nukualofa, on the Island of Tongatabu, is the seat of government. The present queen (Salote) succeeded the late King George Tubou II. in 1918. Soil generally is fertile; the principal export is copra. Two of the smaller islands disappeared owing to a tidal wave, in June, 1919. Revenue, 1920–21, £90,764; expenditure £66,511; imports (1918), £177,151; exports, £169,757. The total shipping entered and cleared in 1917 was 47,180 tons, all of which was British.

Agent and Consul, Islay McOwan £806
(and entertainment allowance £100)

(4) *The Phœnix Islands* (McKean, Gardner Birnie, Hull, Enderbury, Phœnix, Canton, and Sidney), between 2° 30′ and 4° 30′ S. and 171° and 174° W.

(5) *Pitcairn Island*, situate in lat. 25° 3′ 30″ S., long. 130° 8′ 30″ W. Pop. (April, 1907), 144, descendants of the mutineers of H.M.S. *Bounty*. Arrowroot is manufactured and exported.

Deputy Commissioner, Dr. W. J. Williams (*H.M. acting Consul for the Society Islands*).
Chief Magistrate, Fred Christian.

(6) *The New Hebrides Group* lies roughly 500 miles west of Fiji and 250 miles north-east of New Caledonia. In 1906 a Convention was signed under which the administration of the group was assumed by Great Britain and France. British and French Resident Commissioners were appointed in 1902. Nat. pop. about 58,700, European 946. Principal exports, maize, copra, cotton, and coffee. A British steamer runs regularly between Sydney and the group, and French steamers from Sydney and New Caledonia.

French High Commissioner, J. Repiquet (Governor of New Caledonia).
British Resident Commissioner, M. King, C.M.G. £940
Ass. to do., R. L. L. Browne 400
French Resident Commissioner, M. d'Arboussier.
President of Joint Court, Count de Buena Esperanza £1,200
British Judge, R. S. de Vere.
French Judge, M. Sachon.

(7) There are also a large number of scattered groups and isolated islands.

PALESTINE.

Palestine, extending from the Mediterranean on W. to an eastern boundary formed by the Wady Arabah, Dead Sea, River Jordan and Sea of Tiberias, and from the Egyptian frontier on S. to the French Mandatory Sphere of the Great Lebanon on N., includes, in addition, a large area E. of the Jordan and S. of the Yarmuk.

Palestine is under British administration since the conquest of the country by the forces of General Allenby in 1918. The Administration is conducted under a Mandate from the League of Nations which entered officially into force on Sept. 29, 1923. The country consists of a W. maritime lowland, the mountain region of Judah (which forms the backbone of the district) and, on the E., the depression through which the

Jordan wends its way from the Sea of Galilee (Tiberias) to the Dead Sea. The *Dead Sea*, 1,292 feet *below* the level of the Mediterranean, is 46 miles long and has an average width of 8½ miles; it receives the waters of the Jordan and of six other rivers, and has no outlet, the surplus being carried off by evaporation. Its water is intensely salt and has a specific gravity one-sixth greater than water, with 24 per cent. of salt. (The Great Salt Lake of Utah, U.S.A., is 80 miles long and 30 miles wide, at 4,218 feet *above* mean sea level, and contains 25 per cent. of salt.) The area of Palestine W. of the Jordan is about 9,000 square miles, with a population (Oct. 3, 1922), of 757,182, of whom 590,890 are Muhammadans, 73,024 Christians, 83,794 Jews, and 9,474 members of other faiths. Since 1919 about 30,000 immigrants (mostly Jews) have settled in the country; in 1922 the Jewish immigrants came principally from Poland (41 per cent), Ukraine (14 per cent), Rumania (12 per cent), and Russia (9 per cent).

Palestine is divided into 7 administrative districts, under District Governors. English, Arabic and Hebrew are the official languages of the country. The chief town, *Jerusalem*, had been in Moslem hands since 1244, and under Turkish rule since 1517, until it surrendered to General Allenby on Dec. 9, 1917, to be entered the next day by British troops. The city, which occupies so prominent a place in the affections of the Jewish, Christian and Muhammadan peoples, had a population in Oct., 1922, of 62,578. The Church of the Holy Sepulchre at Jerusalem is visited annually by large bands of Christian pilgrims, principally of the Orthodox and Coptic churches. The site of Solomon's Temple is occupied by the Dome of the Rock, sometimes erroneously called the Mosque of Omar, which contains a relic of Mahomet and the "Holy Rock," the sacrificial altar of Abraham. *Bethlehem*, the scene of Christ's Nativity, is 5 miles S. of Jerusalem. The Church of the Nativity, at the E. end of the present village, is reputed to be the oldest Christian church in existence. King David was also born in Bethlehem. *Nazareth*, about 25 miles S.W. of the Sea of Galilee, had a population of 7,424 in 1922. Other large towns are Jaffa (47,709), Gaza (17,480), Acre (6,420), and Haifa (24,634).

The railway system of Palestine consists of five sections: *Rafa-Haifa*, continuing southward to Kantara to join up with the railways of Egypt, passengers and freight being transported across the Suez Canal at Kantara; *Haifa-Acre-Samakh*, continuing beyond Samakh to Damascus in the French mandatory territory of Syria; *Jaffa-Ludd-Jerusalem*; *Rafa-Beersheba*; and *Nablus-Afule-Tulkeram*. The main junction of the Government Railways is at Ludd, the general offices being at Haifa.

The chief ports are Jaffa, Haifa and Acre. There are branches of the Anglo-Egyptian, Anglo-Palestine, Banco di Roma Crédit Lyonnais, and Imperial Ottoman Bank in the main towns.

Although economic conditions are still primitive, modern methods are making headway, and there are good prospects of development and progress. The country is generally fertile, and cereals, wine, olives and various fruits are produced, while sheep and goats thrive in the lowlands, and in the mountains in time of drought. The imports in the year ending March 31, 1923, were valued at £E5,428,146 and the exports at £E1,376,649. In 1922 there were 309 government schools and 2 training colleges, with a total of 635 teachers and 19,629 pupils.

CAPITAL, Jerusalem.

British High Commissioner, Rt. Hon. Sir Herbert Samuel, P.C., G.B.E. (*b.* 1870) 1920 ......£4,000

ST. HELENA,

probably the best known of all the solitary islands in the world, is situated in the South Atlantic Ocean, 955 miles S. of the Equator, 760 S.E. of Ascension, 1,140 from the nearest point of the African Continent, 1,800 from the coast of S. America and 4,477 from Southampton, in 15° 55′ S. lat. and 5° 42′ W. long. It is 10½ miles long, 6½ broad, and encloses an area of 47 square miles, with a population (Census 1911) of 3,520. St. Helena is of volcanic origin, and consists of numerous rugged mountains, the highest rising to 2,700 feet, interspersed with picturesque ravines. The climate vies with that of Madeira in point of salubrity and evenness of temperature. Although within the tropics, the south-east "trades" keep the temperature mild and equable. The thermometer goes up to 84° in the town at the sea-level; but in the country, 1,800 feet above the sea, the maximum is about 74°, and the mean temperature ranges from 57° in September to 66° in March, there being very little difference between night and day; the lowest temperature in winter is 51°, and the total rainfall (1922) 42·8 inches. St. Helena was discovered by the Portuguese navigator, Juan de Nova Castella, on May 21, 1502 (St. Helena's Day), and remained unknown to other European nations until 1588. It remained uninhabited until the Dutch colonised it *circ.* 1645. The English East India Company seized it in 1651; but it was retaken by the Dutch in 1672. In 1673 it was again taken from the Dutch and was held by the Company, who had obtained a charter for its possession from

Charles II., until 1834 (with the exception of the period 1815 to 1821, during which the British Government held it as a residence for the Emperor Napoleon, who died there May 5, 1821), when it was ceded by them to the Crown. It was formerly an important station on the route to India, but its prosperity decreased after the cutting of the Suez Canal. A phormium (flax fibre) and lace-making industry have been established. St. James's Bay, on the north-west of the island, possesses a good anchorage.

Ascension, an isolated Island in the South Atlantic (3,417 miles from Plymouth, 760 from St. Helena, and 900 from Cape Palmas on the African Coast), is of volcanic origin, the peak rising to the height of 2,820 feet, situated 7° 55′ 55″ S. lat., and 14° 25′ 5″ W. long. It is said to have been discovered by a Portuguese named João de Nova Gallego, on Ascension Day, 1501, and two years later was visited by Alphonse d'Albuquerque, who gave the island its present name. Its extreme length is 7½ miles, and extreme breadth 6 miles, with an area of about 38 square miles, and being situated in the heart of the S.E. trade winds, its climate is dry and salubrious up to 1,800 feet, but above that height to its limit it is damp and foggy. It remained uninhabited till 1815, when the English took possession of it. The island was administered by the Board of Admiralty until Oct. 27, 1922, when by Royal Letters Patent it became a Dependency of St. Helena, it was transferred to the Colonial Office. Georgetown, the capital, is situated in a small bay on the N.W. coast. Ascension is visited by the sea-turtle from January to May, which lay their eggs in the sand; the sooty tern, or "wide-awake," use the island as a nesting-place about every eighth month. *Resident Magistrate*, W. Haining.

The government of St. Helena is administered by a Governor, with the aid of an Executive Council of 4 members, the Governor alone making all ordinances.

Sarawak is a state on the north-west coast of the island of Borneo, with a seaboard of 400 miles, an area of about 42,000 square miles, and a population of about 600,000, composed of various races. The territory of the Raja of Sarawak extends from Cape Datu in the south to the Lawas District, where it touches the boundary of British North Borneo. The southern boundary is formed by three ranges, the Serang, Kelingkang, and Batang-Lupar mountains; the eastern boundary is a broken range of mountains with peaks rising to 10,000 feet. The principal rivers are the Rejang (navigable for about 160 miles), the Baram (navigable for about 100 miles), the Batang-Lupar, and the Limbang. Kuching, the capital, stands on a small river (the Sarawak) which is navigable from its mouth to Kuching (20 miles). The government consists of a hereditary sovereign and a Supreme Council of 9 (4 Europeans and 5 Malay magistrates), and a General Council of 50, composed of European and Malay officials and native chiefs, meeting every 3 years. The civil service is composed of English officials to the number of 50, appointed by the sovereign. The government of Sarawak was obtained in 1842 from the Sultan of Borneo by the late Sir James Brooke, who became well known as Rajah Brooke of Sarawak. Other concessions have been made in 1861, 1882, 1884, and 1890, when the Limbang River was obtained. The Lawas River was added in 1904. The country produces sago, gutta-percha, india-rubber, beeswax, birds'-nests, oil, gold, silver, diamonds, antimony, quicksilver, tobacco, rice, rattans, coal, gambier, and pepper. A large petroleum field has been discovered at Miri and Bakong, in the Baram district, and is now a valuable asset. Oil exports (1922) 323,156 tons.

	1920.	1921.	1922.
Revenue	$2,645,265	$2,840,171	$2,733,85

CHIEF TOWN, Kuching. Population (1911), 30,000. Distance from London, 8,700 miles; transit, 25 to 30 days. Kuching, Sadong, Sibu, and Miri are in wireless communication with Singapore. Steamer leaves Singapore for Kuching and Kuching for Singapore every Tuesday in normal times, a temporary service being now maintained 3 times a month. There is also direct communication with Sibu and Miri.

SEYCHELLES

The Seychelles Islands, in the Indian Ocean, which number altogether 90, were occupied by the French about 1742, captured by a British ship in 1794, and were finally assigned to Great Britain in 1814. By letters patent of Sept. 1903 they were erected into a separate colony. The principal islands of the group are Mahé, Praslin, Silhouette, Curieuse, and La Digue, and the total area of the islands, with dependencies, is estimated at 156 square miles, of which Mahé occupies nearly 56 square miles. The population was estimated (Dec. 31, 1922) at 25,176, an increase of 653 since the Census of 1921, when the total was 24,523 (Mahé 19,426, Praslin 1,999, La Digue 1,303, other islands 1,795). Victoria, the capital, on the N.E. side of Mahé, has an excellent harbour; it is an Admiralty coaling station. Although only 4° S. of the Equator, the islands are very healthy, the death-rate in 1922 being 13·92 per 1,000. There are 19 Roman Catholic and Church of England primary schools; there are also 2 secondary schools.

The principal exports are copra, vanilla, coconuts, coconut oil, tortoise-shell, cinnamon, essential oils, soap, and guano. Aldabra, one of the dependencies of the Seychelles, and about 680 miles from Mahé, is famous for the gigantic land tortoises, whilst the unique double coco-nut, *Coco de Mer*, is found in Mahé, and, in larger quantities, in Praslin, where there is a famous valley. The Governor is assisted by an Executive Council of 3 members (2 *ex-officio* and 1 nominated), and by a Legislative Council of 3 official and 3 unofficial members.

SIERRA LEONE.

The peninsula of Sierra Leone, situated on the West Coast of Africa, was ceded to Great Britain in 1787 by the native chiefs for the purpose of being used as an asylum for the many destitute negroes then in England. At a somewhat later date the Colony was used as a settlement for Africans from North America and the West Indies, and great numbers of Africans rescued from slave ships have from time to time been liberated and settled there. The Colony has a coast-line of 210 miles, with an estimated area of 4,000 square miles. In 1921 its population was 85,163, of whom 1,161 were resident Europeans. Of the rest, more than half are the descendants of liberated Africans, while the remainder belong to the neighbouring tribes. A babel of tongues is thus to be heard in the streets of Freetown. In 1896 a Protectorate was declared over the territory adjoining the Colony to the northward and eastward. The extreme depth of the Protectorate from north to south is about 210 miles, lying between 7° and 10° N. lat., and the extreme breadth from east to west is 180 miles, between 10° 40′ and 13° 21′ of W. long. Its estimated area is 27,000 sq. miles, and its population about 1,456,148. For administrative purposes it is divided into 3 Provinces, under Provincial Commissioners, assisted by 14 District (and 10 Assistant District) Commissioners. The principal peoples are the Limbas and Korankos in the north, the Temnes in the centre, and the Mendis in the south.

The principal exports are palm kernels, kola nuts, and palm oil; but ginger, piassava, hides, and rice are also exported. The value of the palm kernels exported in 1922 reached £722,403. The chief imports are cotton goods, coal, apparel, hardware, provisions, and tobacco. Freetown, the capital, possesses the finest and most important harbour in West Africa.

A railway runs inland from Freetown to Pendembu, a distance of 227½ miles, and a branch line 104 miles in length extends in a north-easterly direction from Boia to Kamabai. By the extension of the railway and the development of a system of roads in the Protectorate, it is estimated that the output of Sierra Leone products into the European market is capable of being more than doubled. There are 827 miles of combined telegraph and telephone service.

Sierra Leone is a Crown Colony, possessing a Legislative Council nominated by the Crown, and having full power to legislate for the Protectorate as well as for the Colony. The Governor is advised by an Executive Council.

SOMALILAND.

(*The Somaliland Protectorate.*)

In 1884 a Protectorate was declared over part of Somaliland, a region where the coast is divided between Great Britain, France and Italy, while the interior is subject to Abyssinia, and forming the north-eastern horn of the African continent. The British Protectorate contains about 68,000 sq. miles. The population, mainly consisting of Somalis, a Muhammadan people, is estimated at 300,000. The boundaries are defined by treaties with Abyssinia, France and Italy; the northern coast as far as 49° E. and the 8th parallel of N. latitude are the limits on the north and south. The Protectorate garrison is now confined to a Camel Corps, 400 strong, the Dervish power having been finally broken in 1920. The chief products of Somaliland are cattle, sheep, goats, hides, skins and gum. There is wireless communication with Aden. The Protectorate was transferred to the administration of the Colonial Office on April 1, 1905.

SOUTH AFRICAN HIGH COMMISSION.

High Commissioner for South Africa, The Earl of Athlone, G.C.B., G.C.M.G., G.C.V.O., D.S.O., A.D.C. (also receives £10,000 as Governor-General of the Union of South Africa)	£3,000
Imperial Secretary and Accountant, H. J. Stanley, C.M.G.	1,700
Asst. Imperial Secretary, C. L. O'B. Dutton	900
Chief Clerk, Shirley Eales	830
Resident Commissioner, Southern and Northern Rhodesia, C. D. Douglas-Jones, C.M.G.	1,800
Private Secretary, F. J. Rosselli.	

The High Commission.—The office of High Commissioner, which was formerly combined with the Governorship of Cape Colony, was by a Commission issued in 1900 vested in Lord Milner; by a similar Commission issued in 1905 in Lord Selborne; since 1910 it has been vested by a separate commission in the successive holders of the office of Governor-General of the Union of South Africa. The High Commissioner is Governor of Basutoland, and supervises the affairs of the Bechuanaland Protectorate and of Swaziland, and he exercises the control provided by Order in Council over the Administration of the British South Africa Company in Southern and Northern Rhodesia. The Southern Rhodesia Order in Council, 1898, and the Northern Rhodesia Order in Council, 1911, provide respectively for a control by the High Commissioner over legislation, important appointments, and Native Affairs in Southern and Northern Rhodesia, and for the appointment of a Resident Commissioner, who is paid from Imperial funds and acts as the local representative of the High Commissioner and the Imperial Government.

BASUTOLAND.

(*The Territory of Basutoland.*)

Basutoland is an inland Native Territory of South Africa, bounded North and West by Orange Free State, East by Natal, and South by Cape Colony, with an area of 11,716 square miles. The Census of 1921 showed 495,937 natives and 1,603 whites, 1,069 coloured and 172 Asiatics.

The territory is well watered, and enjoys a good climate. It is one of the finest grain producing districts in South Africa, and the abundant grass enables the Basuto to rear immense herds of cattle. The Maluti Mountains, forming a part of the great Drakensberg chain, occupy most of the country, which is elevated, broken, and rugged.

The territory is governed by a Resident Commissioner under the direction of the High Commissioner for South Africa, the latter possessing the legislative authority which is exercised by proclamation. The chiefs adjudicate on cases between natives, with a right of appeal to the magistrates' courts, where all cases between Europeans and natives are brought. The revenue is derived from Customs, native tax, income tax on Europeans, Post-office, and licences. Telegraph offices have been opened at Leribe, Maseru, Teyateyaneng, Morija, Mafeteng, Mohale's Hoek, Quthing and Qacha's Nek. There are 451 native schools, with over 31,511 native scholars on the roll, a large proportion being in the schools of the French Protestant Mission; there are also

6 white schools, with 121 pupils. The amount spent on education in 1921–22 was £35,301. The chief articles of export are grain, wool, cattle, and horses, the imports being chiefly blankets, hardware, and groceries.

	1919-20.	1920-21.	1921-22.

Maseru is distant from London 7,668 miles; transit, through the Cape, about 20 days.

BECHUANALAND.

(*The Bechuanaland Protectorate.*)

The Bechuanaland Protectorate is a country of British South Africa, in the centre of the vast tableland stretching north to the Zambesi.

The Protectorate is bounded on the south and east by the Cape and Transvaal Provinces of the Union, on the north and north-east by Rhodesia, Southern Rhodesia, the Zambesi and Chobe (Linyanti) Rivers, and on the west by South-West Africa. It is about 500 miles long and 550 miles broad, with a total area of about 275,000 square miles; the *Caprivi Zipfel* was attached to the Protectorate for administrative purposes by Proclamation (1922). The population at the Census of May, 1921, was 152,983, of whom 1,743 were Whites, 52 Indians, 1,003 Coloured and 150,185 Natives.

The climate is healthy during part of the year, but malarial fever is prevalent during February, March, and April. The country is essentially pastoral, although Kaffir corn, mealies, beans, pumpkins and melons are sown, and when the rainfall is adequate crops are reaped. Cattle thrive, and numbered 426,344 at the Census of 1921. Much of the country is thick bush. The High Commissioner for South Africa has the power of making laws by proclamation for the Protectorate, where he is represented by a Resident Commissioner. The population is almost entirely a native one, the principal tribes being those of Khama (Bamangwato), of Linchwe (Bakgatla), of Sebele II. (Bakwena), of Tshosa (Bangwaketsi), of Seboko Mokgosi (Bamalete), and of Mathibe (Batawana).

The railway from Kimberley to Vryburg and Mafeking traverses the Protectorate on its way to Rhodesia. There is a telegraph line from Cape Province through from Mafeking, *viâ* Gaberones and Francistown, to Bulawayo and Salisbury. The chief European centres are Lobatsi, Gaberones, Francistown, and Serowe, whither the Chief (Khama) and all his people moved in 1901 from Palapye. The headquarters of the Protectorate Administration are at Mafeking, Cape Province.

Emigration and Information Office, 138 Strand, W.C. 2.

Capetown Agency, Local Secretary, F. B. Philip, M.B.E., Rhodes Buildings, Cape Town.

General Manager in South Africa (*Salisbury*), Maj. P. S. Inskipp, O.B.E.

Acting Administrator, Northern Rhodesia, R. A. J. Goode, C.B.E.

	Sq. m.	Pop.
Southern Rhodesia (*see* p. 723-4)	149,000	899,187
Northern Rhodesia (Livingstone)	291,000	983,539

The total area of Rhodesia is about 440,000 square miles and the total population is 1,882,726 (1921). The territory is named after *Cecil Rhodes*, the founder of the British South Africa Company, and extends from Lake Tanganyika and the Congo watershed in the north, to the Limpopo River in the south. Southern Rhodesia has been granted "Responsible Government" (*see* p. 723-4). The British South Africa Company will be relieved of the Administration of Northern Rhodesia as from April 1, 1924.

NORTHERN RHODESIA.

Northern Rhodesia lies to the N. of the Zambesi, its political neighbours being Tanganyika and the Belgian Congo on the N.; Portuguese E. Africa, Southern Rhodesia and South-West Africa on the S.; Nyasaland on the E.; and Portuguese West Africa on the W. A large portion of this territory was first opened to British influence by David Livingstone, and it is partly occupied bv the native tribes living under their own chiefs, but large tracts are being opened up for European settlement. Over 1,000,000 acres of land are under settlement by white farmers, whose operations are chiefly stock-raising; over 65,000 head of cattle are being grazed by them. Extensive mineral deposits, copper in particular, have been discovered. Indigenous rubber is found in large areas. The country is well timbered, and well watered by the Zambesi and Kafue rivers and their affluents. The Rhodesian railway crosses the Zambesi at the Victoria Falls, traverses Northern Rhodesia, and, crossing the border, extends a further 450 miles *viâ* Kambove to Bukama, in the Belgian Congo State. There are large herds of native cattle (257,000 in 1921). Game is also abundant.

The total area is about 291,000 sq. miles, and the population in 1921 was 983,539, of whom 3,634 were Europeans.

Administrative revenue, 1922-23	£258,154
Administrative expenditure, 1922-23	345,388

SWAZILAND.

(The Swaziland Protectorate.)

Swaziland (called by the natives Kwa Ngwane) lies between the Drakensberg and Lebombo Mountains in British South Africa. The Transvaal Province forms a boundary on the south, west and north, the eastern boundary being Zululand (Province of Natal) and the Portuguese province of Mozambique (Delagoa Bay). The total area is 6,678 square miles, and the population (1921) 112,951, of whom 2,205 are whites, the remainder being Ama-Swazi Bantus (or Swazis). Swaziland is divisible into three longitudinal regions: the mountainous regions of the west, with an approximate altitude exceeding 4,000 feet; the Middle Veld, about 2,000 feet lower; and the Low Veld, bounded on the east by the Lebombo Mountains, with an average altitude not exceeding 1,000 feet. Except in the Low Veld the country is well watered and healthy.

A Special Court having the full jurisdiction of a Supreme Court, and Courts of Assistant Commissioners having a restricted jurisdiction, have been established. Native chiefs continue to exercise jurisdiction according to native law and custom in civil disputes between natives, subject to a final appeal to the Resident Commissioner. The Paramount Chief s Sobhuza, son of the late Paramount Chief Bunu.

The soil is generally fertile, particularly so in the Low and Middle Veld. The whole of the Territory forms excellent grazing for cattle, and cattle-ranching on a large scale has been commenced by several companies. There were about 230,000 head of cattle in the Territory at the end of March, 1922.

In the winter season between 250,000 and 300,000 sheep are brought to Swaziland for grazing from the high table-lands of the Eastern Transvaal. The agricultural products are tobacco, maize (the staple product), millet, pumpkins, ground-nuts, beans, and sweet potatoes, grown in insufficient quantities to meet local requirements. Most of the subtropical fruits can be grown with success. Large areas of land are suitable for growing cotton, coffee, and tea. The country possesses considerable mineral wealth, including gold, tin, coal, and copper. During the year ended Dec. 31, 1921, 391 tons of cassiterite tin, valued at £29,767, were exported; a few gold mines were being worked on a small scale.

Mbabane, the headquarters of the Administration, is situated on the hills at an altitude of 4,000 feet. At each of the district headquarters—Hlatikulu, Stegi, and Pigg's Peak—there is a small number of Europeans in the vicinity of the station, likewise at Bremersdorp, the old headquarters of the Territory. There are eleven schools for Europeans at various centres; and the Government has established a school for natives at Zombode, at which, until recently, the young Paramount Chief (Sobhuza) attended. There is also a school for coloured children. Grants are also made to the various native missions for educational purposes.

There is a tri-weekly communication by motor-car between Mbabane and Carolina (82 miles) and between Mbabane and Bremersdorp (23 miles). Elsewhere the communication is by cart or runners. There are 14 post offices, and a telegraph office at Mbabane, Pigg's Peak, Bremersdorp, and Ezulweni.

	1919-20.	1920-21.	1921-22.
Revenue	£91,801	£88,372	£87,104
Expenditure	87,097	111,139	94,793

CAPITAL, Mbabane.

Resident Commissioner, De S. M. G. Honey, C.M.G.
Deputy Resident Commissioner and Government Secretary, B. Nicholson, D.S.O., M.C.

SOUTHERN RHODESIA.

Southern Rhodesia is that part of the territory named after Cecil Rhodes lying south of the Zambesi River, the political neighbours being Northern Rhodesia and Portuguese East Africa on the N.; the Transvaal and Bechuanaland on the S. and W.; and Portuguese East Africa on the E. The total area is 149,000 square miles, and the population (1921) 899,187, of whom 33,620 are Europeans. The native population is 862,319, with 3,248 Asiatics and other coloured persons, including those of mixed race.

Responsible Government was instituted in Southern Rhodesia on Oct. 1, 1923. The Government is administered by a Governor, appointed by the Crown, with an Executive responsible to the Legislature, which consists of two Houses.

The laws in force in the Cape Colony up to June 10, 1891, were adopted for Southern Rhodesia, so far as they are applicable. Subsequent legislation has been by proclamation of the High Commissioner, by ordinances passed by the Legislative Council, and by Acts of the Legislature. Municipal self-government has been established in Salisbury, Bulawayo, Gwelo, Umtali, and Gatooma.

The main arteries of communication are the Rhodesia and the Mashonaland Railways. The former is a continuation of the line from Cape Town to Vryburg, *viâ* Kimberley, and was opened to Bulawayo in November, 1897, the distance from Cape Town being 1,362 miles.

A line connecting Bulawayo with Salisbury (301 miles) was completed in Oct. 1902. From Salisbury the Mashonaland Railway runs eastwards to Umtali and is continued by the Beira Railway Companies to the port of Beira (Portuguese), a total distance of 374 miles. The section from Bulawayo *viâ* the Wankie coalfields to the Victoria Falls (282 miles) was completed in June, 1904. A branch line of standard gauge (3 ft. 6 in.) runs from Salisbury to the Eldorado mine (78 miles), and has been extended to Sinoia (4 miles). A standard-gauge line leaves the Eldorado branch at Mt. Hampden Junction (13 miles from Salisbury) for the Shamva mines (73 miles). A line connects Gwelo with Selukwe (24 miles); another runs from Bulawayo *viâ* Gwanda to West Nicholson (104 miles), opening up the mining district to the south-east; another connects Bulawayo with the Matopo Hills, where the founder of Rhodesia and Sir Starr Jameson are buried, and a branch line from Gwelo to Umvuma has been extended to Fort Victoria (123 miles). *The African Transcontinental Telegraph Line* ("Cape to Cairo") has been constructed as far as Ujiji in East Africa, about 3,250 miles from the Cape.

Southern Rhodesia is rich in mineral deposits, and it abounds in traces of the ancient gold-workers. The first regular crushing returns began in September, 1898, and the gold produced to December 31, 1922, was of the value of £54,613,083. The output for the year ended December 31, 1922, was valued at £3,111,468. Silver, copper, coal, diamonds, lead, chrome iron, asbestos, and other minerals have also been produced in considerable quantities. Though the climate is sub-tropical, the average altitude makes it well suited for European occupation, and for the cultivation of European fruit-trees, cereals, and vegetables, in addition to tobacco, cotton, and the indigenous products of the country. The local breeds of cattle are constantly being improved by importation of pedigree stock.

On Dec. 31, 1922, there were 81 public schools and 45 other schools, with 5,938 pupils, in addition to 1002 native schools with 60,335 native pupils. The expenditure on education in 1922 was £197,471.

Administrative revenue, 1922–23	£1,326,469
Administrative expenditure, 1922–23	1,357,442
Imports, 1922	3,879,111
Exports, 1922	4,627,693
Imports from U.K., 1922	1,819,714
Exports to U.K., 1922	2,984,955

Governor and Commander-in-Chief, Lt.-Col. Sir J. R. Chancellor, G.C.M.G., D.S.O. (and allowances £2,000)	£4,000
A.D.C., Capt. Hon. Arthur Lowther.	

Ministry (Oct. 1, 1923).

Prime Minister and Minister of Native Affairs, Sir Charles P. J. Coghlan	£2,500
Treasurer, P. D. L. Fynn	2,000
Attorney-Gen. and Minister of Defence, Major R. J. Hudson	2,000
Minister of Agriculture and Lands, W. M. Leggate	2,000
Minister of Mines and Public Works, H. U. Moffat	2,000
Colonial Secretary, Sir Francis Newton, K.C.M.G.	2,000

SALISBURY, the seat of government, is situated on the Mashonaland plateau, 4,880 ft. above sea-level (white population, census, 1921, 5,134). BULAWAYO, the largest town in Matabeleland, 4,460 ft. above the sea-level, had a white population of 7,462 (1921). Other centres are Victoria, Umtali, Gwelo, Enkeldoorn, Melsetten, Hartley, Selukwe, Gwanda and Gatooma.

THE SUDAN.

The Sudan extends from the southern boundary of Egypt, 22° N. lat., to the northern shore of the Albert Nyanza, 2° 19′ N. lat., and reaches from the French Sahara about 18° 15′ E. (at 22° N.) to the north-west boundary of Eritrea (Italian) in 38° 30′ E, (at 18° N.). The greatest length from north to south is approximately 1,400 miles, and from east to west 1,200 miles. The northern boundary is the 22nd parallel of North latitude; on the east lie the Red Sea, Eritrea and Abyssinia; on the south lie the British Protectorate of Uganda and the Belgian Congo; and on the west the French Congo. The total area is about 1,014,600 sq. miles, with a population of about 4,000,000, partly Arabs, partly Negroes, and partly Nubian of mixed Arab-Negro blood, with a small foreign element, including some 3,000 Europeans. The Arabs and Nubians are all Muhammadans, as are some of the Negroes, but the latter are generally pagans. Before 1894 the population was believed to be between 8,000,000 and 10,000,000, but by 1898 they had been reduced to about 1,500,000 by war, repression, and disease.

Northern Region.—The greater portion of the region between 16° N. and 22° N. consists of the Nubian Desert on the east and the Libyan Desert on the west, divided by the fertile valley of the Nile, which is nowhere of great width. The Nubian Desert is bounded on the south by the rivers Atbara and Gash, the latter of which looses its annual flood in a fertile delta north of the town of Kassala. It is traversed from south to north by the continuation of the Abyssinian highlands, which constitutes the Nile-Red Sea water parting, and forms a series of parallel rocky ranges rising to a height of 5,000 feet, the lower slopes and valleys of which are clothed in vegetation and comparatively well watered. The maritime plain lying between these mountains and the Red Sea is covered with low bush, and at *Tokar* the Baraka (a mountain torrent) waters sufficient of it to produce excellent cotton.

The Central Region, between 16° N. and 10° N., contains on the east the so-called "Island of Meroë," the ancient seat of civilisation in the Sudan, situated between the Atbara and the Blue Nile Rivers. It is now almost uninhabited save for the natives who visit it with their herds, and to raise a precarious crop after the annual rains. The districts bordering on the upper reaches of the Blue Nile are covered with forests of large trees.

Southern Region.—From 10° N. to the southern boundaries are extensive tracts of cultivable lands enclosed by a semi-circle of forests and swamps, through which a multitude of streams flow into the main river.

Darfur is mainly an elevated plateau about 3,000 feet above sea level, with occasional summits in the Jebel Marra and Jebel Medob of 6,000 feet, one peak (Jebel Marra) rising to a height of approximately 10,000 feet, with summer torrents in the *khors*, which flood much of the southern districts and vanish in the winter. The *Lado*

clave, which had been leased to Leopold II.,
ng of the Belgians, reverted at his death to
e Sudan administration, and now forms part
Mongalla. The total area of the *enclave* is
timated at 15,000 sq. miles, with a Negro popu-
tion of about 250,000. The *Gambela enclave*
ithin the boundaries of Abyssinia) is leased
om the Abyssinian Government as a trading post.

Hydrography.—The Nile basin covers a total
ea of nearly 1,100,000 sq. miles, and while part
the basin lies in Abyssinia and Eritrea, its
urse from the Central African Lakes to the
editerranean is within the British Protectorates
Uganda and Central Africa, and the Egyptian
d Sudanese dominions. The main stream
ues from the Victoria Nyanza at the Ripon
lls and flows through Lake Choga, whence it
verges to the Albert Nyanza and enters the
ains of Lado, in the Mongalla Province of the
dan, as the *Bahr el Jebel.* At Lake No the
ream effects a confluence with the *Bahr el*
azal, from the South-west, and further east
th the *Sobat*, from the south-western highlands
Abyssinia. From the Junction with the Bahr
Ghazal the stream is known as the Bahr el
biad or *White Nile.* At Khartoum, 535 miles
ove the Sobat confluence, the river is reinforced
the Bahr el Azrak, or *Blue Nile*, from the
uth-east, and near El Damer, 200 miles further
rth, by a confluence with the *Atbara*, from
byssinia. Thence the river flows north-west to
ou Hamed, and makes a great south-westerly
nd, across the Nubian Desert, before resuming
s northward course through the Dongolas to
e northern frontier at Wadi Halfa. From the
tbara confluence to the Mediterranean the Nile
s a course of close on 1,600 miles, and from its
urces to the confluence its length may be
ckoned at 2,400 miles, giving a total waterway
4,000 miles. From the Ripon Falls (on the
rthern shore of Victoria Nyanza) to Rosetta
n the Mediterranean) the length of the water-
y is stated to be 3,475 miles. Between
hartoum and Wadi-Halfa occur five of the six
taracts, the remaining (first) cataract being in
gypt at Assuan. The sixth occurs at the
abluka Gorge, below Khartoum; the fifth
low Berber, at El Solimanieh; the fourth in the
ubian bend, between Monastir and Merowé;
e third between New Dongola and the 20° N.
t.; the second ends just above Wadi Halfa;
e first (in Upper Egypt) has been greatly dimin-
hed in vehemence by the construction of the
m and locks at Assuan.

Government.—After the reconquest of the
dan an Agreement, signed on Jan. 19, 1899,
tween Egypt and Great Britain, defined the
undary between Egypt and the Sudan, and
ovided for its administration. The Sudan is
ministered by a Governor-General, aided, since
10, by a Council nominated from amongst the
ficials of the Government. All Ordinances and
ws are made by the Governor-General in Coun-
. The Civil and Criminal Codes are based on
ose of India and Egypt. No duties may be
vied on imports from Egypt and duties on im-
rts *viâ* the Red Sea ports may not exceed those
vied in Egypt. The import and export of
aves is prohibited.

Local Administrative and Judicial System.—
e Sudan is divided into 15 provinces (*mudirias*)
der governors (*mudirs*), under whom are
itish District Commissioners in charge of two
more districts (*mamurias*); a Soudanese or
yptian official is in charge of each *mamurias*.

Many native chiefs have considerable powers, but no general rule can be laid down in such cases. The legal system outside Khartoum comprises Governors and Province Judges, the former often combining both functions; District Commissioners and District Judges, who are magistrates of the first and second class; Native Officials and Chiefs, who are magistrates of the third class. Certain nomad chiefs have also independent power in their own tribes, subject to a revision of sentences.

Defence.—A small garrison of British troops is quartered at Khartoum, under the command of the Governor-General, and there are also some units of the Egyptian Army stationed in the Sudan. The police and the locally recruited irregulars (*jehadia*) are under provincial administration.

Education.—In addition to *kuttabs* (vernacular schools) there are 6 *primary schools* at Khartoum, Omdurman, Wad Medani, El Obeid, Suakin and Atbara, where instruction is given in English as well as Arabic, attended by about 1,100 pupils; a *secondary school* at Khartoum (Gordon College), and a *training college* (also at Gordon College); and *technical* or *trade schools* at Khartum and Omdurman. The central authority is the Education Department.

Production.—The Sudan is the chief source of the world's supply of gum arabic and ivory. The Gezira Irrigation Project (by means of a dam on the Blue Nile at Makwar, about 170 miles south of Khartoum) will enable 100,000 acres to be put under cotton in a few years' time with unlimited scope for extension. Cotton area 1920, 59,026 Feddans; Crop 1920–1921 estimated at 93,000 Kantars. Other products include sesame, senna leaves and pods, groundnuts, dates, hides and skins and gold. The principal grain crops are dura, a kind of millet used for making bread, and dukhn. Estimated yield of dura 1920, 472,000 tons. The Cattle Trade in the Sudan shows remarkable growth in recent years and the number exported is increasing yearly. For some years Egypt has depended very largely on the Sudan for its meat supply. The forests which line the river bank, rich in fibres and tanning material, extend to the frontiers of Abyssinia. On the White Nile the forests contain valuable trees—the ebony tree, the gum acacia, the bamboo, and the rubber creeper. The finest gum forests are in Kordofan, and the best rubber in the Bahr el Ghazal. Gold is the only mineral at present being successfully exploited in the Sudan, a mine being worked at Gabait.

Railways, &c.—In 1915 about 1,500 miles of railways were open for traffic. A bridge has been constructed over the Blue Nile at Khartoum, and the railway now runs to El Obeid, the chief town of Kordofan Province, crossing the White Nile by another bridge near Hillet Abbas. Since the opening of the eastern railway the Red Sea ports of Port Sudan and Suakin receive much of the trade which formerly passed northwards. South of Khartoum communication is established by steamers and boats on the Blue and White Niles, Sobat and Bahr-el-Ghazal, and inland chiefly by camels and donkeys. All the principal towns are in direct telegraphic communication with Khartoum, the total mileage of telegraph lines being 4,353 miles in 1920. There are 65 stationary and 11 travelling Post and Telegraph offices, and 11 wireless telegraphy offices.

Finance.—The revenue is derived mainly from land tax, animal tax, royalties on gum and ivory, customs and railways, posts, telegraphs and steamboat services.

CAPITAL, KHARTOUM, at the junction of the White and Blue Niles. The town has been rebuilt and now contains a large mosque for Muhammadans, a cathedral, and the Gordon College, with extensive government buildings. Population about 23,000. Opposite Khartoum, on the Blue Nile is Khartoum North (16,000), and on the White Nile is Omdurman (60,000), the former Mahdist capital. Other towns are Berber, El Damer, Atbara, Abu Hamed, Merowé, Dongola, Wadi Halfa, Port Sudan, Suakin, Sinkat, Kassala, Kamlin, Sennar, Singa, Makwar, Wad Medani, Roseires, Gallabat, Gedaref, El Obeid, El Dueim, El Fasher (Darfur), Kodok, Mongalla, Kosti and Rejaf.

TANGANYIKA TERRITORY.

TANGANYIKA TERRITORY, formerly "German East Africa," was attacked by British and South African forces and conquered in 1918, the German forces surrendering near Abercorn in North-east Rhodesia on Nov. 23, 1918. Civil Administration was established *pari passu* with the conquest of the territory, and the whole Colony passed under the effective control of the present Administration at the beginning of 1919.

Tanganyika Territory has a coast-line of about 500 miles and an estimated area of 365,000 square miles. The Sultan of Zanzibar's rights over the narrow strip of coast territory were acquired by Germany in 1890 for a payment of 4,000,000 marks. The coast-line extends from the mouth of the Umba to the mouth of the Rovuma River.

The native population consists mostly of tribes of mixed Bantu race, and was enumerated for the whole area (Jan. 1, 1913) at 7,659,898, the coloured population (other than native) being 14,898. The thickly populated provinces of *Ruanda* and *Urundi* are now under Belgian administration, so that the native population of Tanganyika Territory is about 4,107,000. The total white population is 2,447. According to German law every native born after 1905 is free, but a mild serfdom was continued under German rule. Legislation for the abolition of the status of slavery was enacted on June 9, 1922.

Education is not compulsory. In 1921 there were 58 Government schools, with 71 native teachers and 4,200 pupils. Protestant and Roman Catholic missionary societies are working in the Territory.

The total area under forests is about 2,700,000 acres, of which about 2,170,000 are included in the Government Forest Reserves. There are a number of plantations of coco-palms, coffee (on the higher lands), caoutchouc, sugar, cotton, cardamom and cinchona, while fibre plants (especially sisal) are successfully cultivated. In 1921 there were 3,147,442 cattle, and 3,405,103 sheep and goats in the Territory. Minerals known to exist within the Protectorate are coal, iron, lead, copper, mica, and salt. Agates, topaz, moon-stones, tourmalin, and quartz crystals are found, and garnets in large quantities.

The chief exports in 1921 were: Sisal, cotton, hides, skins, copra, coffee, ground nuts, ghee and grain; the chief imports in 1921 were cotton piece goods, foodstuffs, kerosene, cigarettes, tobacco, spirits, wines and beer.

Estimated Revenue, 1922-23		£1,209,474
Estimated Expenditure, 1922-23		2,009,474
	1921.	1922.
Imports	£1,426,125	£1,386,212
Exports	1,015,443	1,441,584

The chief seaports are Dar-es-Salaam, Tanga, Bagamoyo, Pangani, Kilwa, Lindi and Mikindani, but few of these are accessible to ocean-going vessels, though gradual improvements are being introduced. There are two railway lines in the Protectorate—the Usambara railway from Tanga to New Moshi (220 miles), commenced in 1905 and completed in Feb., 1912, and the Central railway (780 miles), from Dar-es-Salaam to igoma, completed in Feb., 1914. Dar-es-Salaam in telegraphic communication with the coast owns, Zanzibar, Mombasa, and many inland entres. There are 75 post offices and telegraph ations. Three Battalions of the King's African ifles are stationed in Tanganyika Territory.

In 1922, 518 steamers (exclusive of coastal oats) of 750,777 tons and 3,578 vessels (dhows) 74,116 tons entered the various ports from aces beyond the territory.

TOGOLAND.

(*Joint Franco-British Administration.*)

The former German colony of *Togoland* was onquered by Franco-British forces during the ar of 1914–18, and its administration has been ntrusted to France and Great Britain jointly y the Supreme Council of the Allied Powers.

Togoland is situated on the Gulf of Guinea etween the Gold Coast (British) and Dahomey French), and is bounded on the south by the tlantic and on the north by (French) Upper enegal-Niger, and lies between 0° 15′ W.–2° E. ong. and 6°–11° N. lat. at its extreme limits, he coast line being only 28 miles in extent ° 14′–1° 38′ E. long.). The coast is fringed with goons, but for some 50 miles inland are undu- ating plains, which end in a plateau, about 1,000 eet in mean level, with Mount Agu (3,135 feet) nd Mount Avaklu (3,250 feet) in the south- est. The country is watered by the Oti, which ffects a confluence with the Volta at the estern boundary of Togoland. The area is 33,659 nglish square miles, with a population of about 000,000. The Christian element is small. offee, cocoa, cotton, maize, kola and other ropical products are abundantly cultivated; alm oil, palm kernels, rubber, cotton, maize, round nuts, vegetable butter, fibre, indigo, ola nuts, ebony, and other forest products are xported (exports, 1919, £850,744). The imports (valued at £665,322 in 1919) are textiles, metals, hardware and spirits. The revenue exceeds the expenditure, and the colony is in a very flourishing condition. About 210 miles of railway are open, lines running from the capital to Anecho and to Misahöhe and Atakpame.

In 1920 the whole territory was divided into a *British Sphere* and a *French Sphere.*

The British Sphere consists of an area of about 13,040 sq. miles with an estimated population of 187,940. No portion of the coast is included in the British area. The sphere is administered by the Government of the Gold Coast.

TRINIDAD and TOBAGO.

TRINIDAD is the most southerly of the West India Islands. It is close to the north coast of the continent of S. America, the nearest point of Venezuela being 7 miles distant. It lies between 10° 3′—10° 50′ N. lat. and 60° 55′—61° 56′ W. long., and is about 69 miles in length by 54 in breadth, with an area of 1,862 square miles (531,146 acres cultivated), and a population at the Census of 1921 of 365,913 (including Tobago). The island was discovered by Columbus in 1498, was colonised in 1588 by the Spaniards, and capitulated to the British under Abercromby in 1797. The chief town and port of entry, Port of Spain (pop. 61,580), is one of the finest towns in the West Indies, with sewerage, electric lighting, tram and telephone services. Other towns of importance are San Fernando (pop. 10,610), about 30 miles south of the capital; Princestown (pop. 4,983), and Arima (pop. 4,210). A remarkable phenomenon is the asphalt lake near the village of La Brea, 110 acres in extent, containing an apparently inexhaustible supply; in 1922, 139,433 tons (£339,824) were exported. The soil is rich and productive, the most important products being sugar, cocoa, mineral oil, molasses, rum, copra, limes, and coco-nuts, and various kinds of timber and fruits. The chief exports (1922) were cocoa £1,342,331; sugar £1,145,278; petroleum £764,847; and coconuts £77,420. Coal is found in Manzanilla, and is indicated in other parts of the island. The petroleum industry has made considerable advance, boring operations being carried on by 16 different companies. There are 124 miles of railway open, electric lighting and tramway service, and waterworks and sewage operations have been established. The island is crossed by the telegraph wire of the West India and Panama Company, by Government telegraph and private telephone wires. There is also wireless telegraphic communication between Trinidad and Tobago and between Trinidad and Demerara, Curaçao, Martinique, St. Thomas, &c. The Government is vested in a Governor, an Executive Council, and a Legislative Council, all of whom are nominated by the Crown.

	1920.	1921.	1922.
Revenue	£1,917,743	£1,867,944	£1,661,607

Public debt	3,207,763	3,205,901	3,432,424
Imports	9,498,166	7,413,682	4,604,880
Exports	9,416,545	5,193,976	4,229,403

Tobago was annexed in 1889 to the Government of Trinidad, and on Jan. 1, 1899, it was constituted a ward of that island. It is between 11° 9′ N. lat. and 60° 43′ W. long., about 75 miles south-east of Grenada, 18 miles north-east of Trinidad, and 120 miles S.S.W. of Barbados; is

26 miles long, and from 6 to 7½ broad, and has an area of 114 square miles, with a population (Census 1921) of 23,390. It is one of the most healthy of the West Indies; the temperature varies from 81° to 88°. There are two towns in the island, viz., Scarborough (pop. 1,463) and Plymouth (pop. 430).

Governor, His Excellency Brig.-Gen. Sir Samuel H. Wilson, K.C.M.G., K.B.E., C.B., R.E. (1921)	£5,500

CAPITAL, Port of Spain (pop. 61,580); transit, 14 days to U.K.: 8 days to U.S.A.

TRISTAN DA CUNHA

is the chief of a group of islands of volcanic origin lying in lat. 37° 6′ S. and long. 12° 2′ W., discovered in 1506 by a Portuguese admiral (Trisão da Cunha), after whom they are named. The population numbers 127, and the inhabitants are said to be very long-lived. The principal settlement (Edinburgh) is in the north-west of the island. In spite of periods of distress the inhabitants refuse to leave the island for the Cape of Good Hope, to which they are attracted by offers of land.

Resident Chaplain, Rev. H. M. Rogers, M.A.

INACCESSIBLE ISLAND is a lofty mass of rock with sides 2 miles in length; the island is the resort of penguins and sea-fowl.

THE NIGHTINGALE ISLANDS are three in number, of which the largest is 1 mile long and ¾ m. wide, and rises in two peaks, 960 and 1,105 ft. above the sea-level respectively. The smaller islands, Stoltenhoff and Middle Isle, are little more than huge rocks. Numbers of seals and sea-elephants visit these islands.

GOUGH ISLAND (or Diego Alvarez), in 40° 20′ and 9° 44′ W., lies about 250 miles S.S.E. of Tristan da Cunha. The island is about 8 miles long and 4 miles broad, with a total area of 40 square miles, and has been a British possession since 1816. The island is the resort of penguins and has valuable guano deposits. There is no permanent population.

TURKS AND CAICOS ISLANDS.

These West India islands geographically form a sort of annexe of the Bahama group, from which Government they were separated in 1848. In 1873 they were annexed to Jamaica, from the north-east of which they are distant about 450 miles. They have an area of about 170 square miles. The population in 1921 was 5,612, of which the principal island, Grand Turk, contains 1,568. Salt is the principal industry of the islands, and Sisal hemp and sponges are exported.

A Commissioner administers the government of the Dependency, assisted by a Legislative Board. This Board has control of local finance, and passes local ordinances, subject to the assent of the Governor of Jamaica, who is also the medium of communication between the Commissioner and the Colonial Office. The Legislature of Jamaica has the power to pass laws applying to the Turks and Caicos Islands, and the jurisdiction of the Supreme Court of Jamaica extends to the Islands in matters of divorce and matrimonial causes, and is also a Court of Appeal.

UGANDA.

(The Uganda Protectorate.)

The territories now comprised within this Protectorate came under British influence in 1890, and a portion of them was for a time administered by the Imperial British East Africa Company. In 1894 a British Protectorate was declared over the kingdom of Uganda and some of the adjoining territories. The present limits are approximately as follows:—On the north, the Uganda-Sudan boundary; on the east, a line drawn down the middle of Lake Rudolf, and along the west boundary of the Colony of Kenya and the eastern shores of Lake Victoria; on the south, by Tanganyika Territory (late German East Africa); and on the west, by the eastern boundary of the Belgian Congo. Within these boundaries lie part of the Victoria Nyanza, part of Lake Edward, the whole of Lake George, half of Lake Albert, the whole of Lake Kioga, the whole of Lake Salisbury, part of Lake Rudolf, and the course of the Nile from its exit from Lake Victoria to Nimule, where the Egyptian Sudan commences. Total area, 110,300 square miles, including 16,377 square miles of water.

For administrative purposes, the Protectorate is divided into 5 Provinces:—

(1) *Eastern Province*, comprising the districts of Busoga, Bugweri, Bugisha, Budama, Teso, Lango, and Karamoja.

(2) *Rudolf Province*, comprising the districts of Turkwel, Turkana, and Dabossa (the last named being, at present, under military occupation).

(3) *Northern Province*, comprising the districts of Bunyoro, Gulu, Chua, and West Nile.

(4) *Western Province*, comprising the districts of Toro, Ankole, and Kigezi.

(5) *Buganda Province* (with islands in Lake Victoria) comprising the districts of Mengo, Masaka, Mubendi, and Entebbe. Owing to sleeping sickness, the islands of Lake Victoria were entirely depopulated, and the inhabitants (about 20,000) settled on the mainland in fly-free districts; but the work of repopulating these islands has been taken in hand as a result of experiments, and natives and their cattle are being repatriated.

With the exception of the Rudolf Province the whole Protectorate is now under direct administration; but the native kings or chiefs, whose rights are in some cases regulated by treaties, are encouraged to conduct the government of their own subjects. The province of *Buganda* is recognised as a native kingdom under a *Kabaka* (H.H. Daudi Chwa, grandson of the celebrated Mutesa). He is assisted in the government by three native ministers and a *Lukiko*, or native assembly. In Buganda (and in *Bunyoro*, *Ankole* and *Toro*, also ruled over by native "Kings"), purely native matters are dealt with by the various *Lukikos*, but in serious cases there is an appeal to higher courts. For Europeans and non-natives justice is administered by His Majesty's Courts. The principal British representative is the Governor who (with the assistance of the Executive and Legislative Councils), makes Ordinances for the administration of justice, the raising of revenue, and other purposes. There are local and special courts of justice, and a High Court with civil and criminal jurisdiction. The Appeal Court consists of the judges of the High Courts of Kenya, Uganda, Nyassaland and Zanzibar. In 1922 there were 3,066 criminal cases tried. There is an armed constabulary force, under a British Commissioner of Police and British officers. There is also a volunteer reserve of Europeans.

In 1920 Executive and Legislative Councils were constituted, and these came into being in Jan. 1921. The former consists of 4 appointed members and the latter includes the former, with 2 unofficial members, and is presided over by the Governor.

The total population of Uganda (December 1922) is given as 3,132,312, composed as follows: Natives, 3,125,522; Asiatics, 5,529; Europeans, 1,261 (including 402 females). Among the natives approximately 640,000 belong to the intelligent, civilised Baganda, a race converted to Christianity by British and French missionaries. Educational work is undertaken by the various Missionary Societies, who receive grants amounting to £9,575 towards scholarships, &c., for students and teachers. About 1,700,000 natives speak Bantu languages; there are a few Congo pygmies living near the Semliki river; the rest of the natives belong to the Masai, Nilotic, and Sudanese groups.

In 1922 total exports, £1,215,793; the import figures are now merged in those of Kenya. The export trade is mainly in cotton (£877,625), coffee, chillies, oil-seeds, rubber, ivory, and hides and skins. The trade is chiefly with Great Britain, the United States, and India.

	1921.	1922.
Revenue	£803,347	£820,365
Expenditure (excl. loans)	786,375	920,228

In 1922 the poll-tax amounted to £346,481 and Customs to £190,056.

The headquarters of the British administration is at ENTEBBE; the native capital of Buganda is at MENGO (Kampala). Nile steamers ply to Rejaf, which is about eight day's march from Nimule, the Sudan port of the Lake Albert Marine Service. A regular steamer service is maintained by the *Uganda Railway Administration* between Kisumu, the railway terminus, and Entebbe, Port Bell, and Jinja, the principal Uganda ports on Lake Victoria. The *Busoga Railway Marine*, which, with the Busoga Railway, is controlled by the Uganda Railway, deals with the traffic on Lake Kioga. There are two steamers and a large number of lighters on that waterway. An additional steamer and subsidiary craft ply on Lake Albert and the Nile between Butiaba, Nimule and Belgian port of Kasenye at the south of Lake Albert. The *Busoga Railway*, of the same gauge as the Uganda Railway, 62 miles in length, runs from Jinga (on Lake Victoria) to Namasagali, a point on the Nile below the rapids, and deals with the cotton output in the regions round Lake Kioga, connecting that lake with Lake Victoria. There is a railway from Port Bell to Kampala, 7¾ miles in length. There is a fleet of Government motor vans. The length of telegraph line in the Protectorate is (1922) 1,187 miles, with 26 telegraph offices.

Governor and Commander-in-Chief, His Excellency Sir Geoffrey Francis Archer, K.C.M.G. (1922) ......(and £1,000 *duty*)	£3,000

CAPITAL (Administrative Headquarters), Entebbe

WEIHAIWEI.

The territory of Weihaiwei was leased to Great Britain by China by a convention made on July 1, 1898, and lies in latitude 37°30 N., longitude 122°10 E. It is situated in the

---

* Members of Executive Council.

Chinese province of Shantung, and comprises the island of Liu Kung, all the islands in the Bay of Weihaiwei, and a belt of land 10 English miles wide along the entire coast-line, with a total area of about 285 square miles, and a population in 1911 of 147,177, in which are included 3,000 resident on the island of Liu Kung. In addition to the leased territory there is a zone which comprises that portion of the province of Shantung lying east of the meridian 121°40—an area of 1,500 square miles—within which Great Britain has the right to erect fortifications, station troops, or take any other measures necessary for defensive purposes. The winter is cold, but dry and bracing. The summer heat is not excessive, and the rainfall is, as a rule, small.

The government is administered by a Commissioner. Weihaiwei is a port of call for steamers running to and from the North of China, and there is regular steam communication with the ports of Shanghai, Hong Kong, Chefoo, and Tientsin.

Administrator, A. P. Blunt, C.M.G.
Judge of the High Court, Hiram Parkes Wilkinson.
Crown Advocate, Allan G. Mossop.
Senior District Officer and Magistrate, H. Jowett.
Junior District Officer and Magistrate, S. L. Burdett.
Senior Medical Officer, W. M. Muat, C.B.E., M.B.
Financial Assistant & Chief Clerk (vacant).
Inspectors of Police, A. Whittaker, F. Forcey, G. H. Jennings, A. G. Gunn.

WINDWARD ISLANDS.

The Government of the Windward Islands is made up of the three colonies of Grenada (the seat of government), St. Vincent, and St. Lucia, with their dependencies, the Grenadines being divided between Grenada and St. Vincent. The total area is 508 square miles, with a population (1921) of 162,254. There is one Governor for the three islands; but there is no General Legislative Council as in the Leeward Islands, and no common tariff or treasury. Each island retains its own institutions, and in the Governor's absence is governed by an Administrator subordinate to him.

Governor and Commander-in-Chief, Sir G. B. Haddon-Smith, K.C.M.G. £3,000
Private Secretary & A.D.C. (vacant) 300
Auditor, M. J. Flanagan..................£440 to 550
Staff Officer (vacant) ....

GRENADA

(AND THE GRENADINES).

Grenada is situated between the parallels of 12° 30′–11° 58′ N. lat. and 61° 20′–61° 35′ W. long., and is about 21 miles in length and 12 miles in breadth; it is about 96 miles north of Trinidad, 68 miles S.S.W. of St. Vincent, and 100 miles S.W. of Barbados. Area, about 85,120 acres; population (including some of the Grenadines), 66,302 (Census of 1921). The country is mountainous and very picturesque, and the climate is healthy. Grenada was discovered by Columbus in 1498, and named Conception. It was originally colonised by the French, and was definitely ceded to Great Britain by the Treaty of Versailles in 1783.

The soil is very fertile, and cocoa, spices, rubber, cotton, coffee, and fruit are grown. The forests are rich in timbers. The imports chiefly comprise dry goods, bread-stuffs, hardware, &c. The Legislative Council consists of 14 members, seven of whom are officials.

St. George's, on the south-west coast, is the chief town, and possesses a good harbour.

Chief of Police, Maj. O. C. Heidenstam (and quarters) £385 to 440

The GRENADINES are a chain of small islands lying between Grenada and St. Vincent (within which Governments they are included), comprising an area of 8,462 acres. The largest island is Carriacou, attached to the Government of Grenada, pop. (1921) 7,104.

ST. LUCIA,

the largest and most picturesque of the Windward group, situated in 13° 50′ N. lat. and 60° 58′ W. long., at a distance of about 90 miles W.N.W. of Barbados, 21 miles N. of St. Vincent, and 21 miles S.E. of Martinique, is 24 miles in length, with an extreme breadth of 12 miles. It comprises an area of 233 square miles, with a population (Dec. 31, 1922) of 53,221. It possibly possesses the most interesting history of all the smaller islands. Fights raged hotly around it, and it constantly changed hands as between the English and the French. It is mountainous, its highest point being 3,145 feet above the sea, and for the most part it is covered with forest and tropical vegetation. The principal exports (1922) are sugar, cocoa, coco-nuts, copra, limes, lime-juice, molasses and syrup. The chief places are Castries, the capital (pop. 1921, 5,899), and Soufrière (pop. 2,480).

Port Castries, one of the finest in the W.I., is a coaling depôt. In 1922, 197 steamers (tonnage 415,611) entered Port Castries.

ST. VINCENT,

an island about 95 miles west of Barbados, situate in 13° 10′ N. lat. and 60° 57′ W. long., is 18 miles in length and 11 in breadth, comprising an area, with its dependencies, of 150 sq. miles, and a population (Census of 1921) of 44,447. In 1846 a large number of Portuguese labourers, amounting to 2,400, entered the island, and proved a valuable acquisition. St. Vincent is more thoroughly English than the two other islands of the group, though it has been the scene of warfare. In 1783 it was secured to Great Britain.

The chief products are arrowroot, cotton, sugar, molasses, rum, cassava, cocoa, coffee, and spices. Its chief imports are linen, cotton and woollen manufactures, Canadian flour, fish, lumber, &c. Steps have been taken to settle the labouring classes on lands acquired for the purpose.

Attorney-General, L. C. Levy	500

WRANGEL ISLAND.

Wrangel Island (or Long's Island), in the Arctic Ocean off the N.E. coast of Siberia, was discovered by James Long in 1849, and was occupied by shipwrecked members of Stefansson's Arctic expedition in 1914. On Sept. 21, 1921, the British flag was hoisted on the island by an expedition despatched to the island by Stefansson, the annexation being notified to the Government of the Dominion of Canada on March 17, 1922. A relief expedition was despatched to the island in 1923, but the party left on the island is assumed to have perished. The island is the resort of polar bears, and its highest point is Berry Peak (2,300 ft.), in the centre of an arctic plain.

ZANZIBAR.

(*The Zanzibar Protectorate.*)

Sultan, H.H. Seyyid Khalifa bin Harub, K.C.M.G., K.B.E., *succeeded* his brother-in-law, Dec. 9, 1911.

The Zanzibar dominions became independent in 1856 under the rule of Seyyid Majid, a son of Seyyid Said, Sultan of Muscat and Zanzibar. They formerly extended along the mainland as far south as Tunghi Bay and north as Warsheikh; but since the cession of the coast-line from Ruvuma to Wanga, including the island of Mafia, to Germany in 1890, and of the Benadir coast to Italy in 1904, they are now confined to the islands of Zanzibar and Pemba, a ten-mile coast-line from Wanga to Kipini, the islands of Lamu, Manda, Patta, and Siwa, together with the port of Kismayu, with a radius of 10 miles. As far as the mouth of the Juba, the Zanzibar dominions on the mainland are under the administration of H.M. Government through the Governor and Commander-in-Chief in the Kenya Colony and Protectorate (*q.v.*). Zanzibar has been a British Protectorate since November, 1890. On July 1, 1913, the Protectorate was transferred from the Foreign to the Colonial Office.

By a decree of Sultan Hamoud (1897) the legal status of slavery ceased to be recognised in the islands of Zanzibar and Pemba.

As the centre of the Arab power, Zanzibar, from the beginning of the 19th century until quite recently, dominated the trade of East Africa. The islands possess practically a monopoly in cloves (the export of which was valued at £788,000 in 1922) and produce quantities of copra (exports in 1922 £273,000). In addition, Zanzibar serves as a storehouse for the East African coast, where both imports and exports are received and distributed.

Of late years the importance of Zanzibar as a port of transhipment and distributing centre has largely decreased, owing to the development of the mainland, to the opening up of the coast ports to direct steamship service with Europe, and to the transfer to Aden of the seat of trade with the Benadir coast. Recent figures, however, tend to indicate that the island, in spite of losing the main transhipment trade, will continue, from the very fact of its geographical position, to retain control of the local traffic—of that portion of the trade which goes to small towns up and down the adjacent mainland coast.

The principal imports are rice, grains, groceries, sugar, tobacco, copra, hardware, petroleum and piece-goods; the exports are cloves and copra, in addition to re-exports of previously imported rice, grain, copra and piece-goods.

The city of Zanzibar, on the island of the same name, is the largest in East Africa, and possesses a magnificent harbour, which presents great facilities for shipping and trade generally. The population of Zanzibar and Pemba (Census of 1910) was 198,914, the area of the former 640 square miles, and of the latter 380 square miles.

The number of ocean-going steamers which entered the port in 1922 was—British 312, Italian 31, Portuguese 4, French 37, Netherlands 14, Norwegian 7, others 13, the total tonnage being 777,357; and 4,772 dhows (93,040 tons) entered the port in 1922.

Trade of the *Port of Zanzibar* in 1922:—

Country.	Imports from.	Exports to.
	£	£
British India	546,000	453,000

BIRTHS AND DEATHS.

The annual compilation of mortality statistics for that part of the United States known as the "Registration Area" began with the calendar year 1900. This area at that time included 40·5 per cent. of the total population, and in 1921 82·2 per cent. The birth registration area was established in 1915. It included at that time 31·1 per cent. of the total population, and in 1921, 65·3 per cent. The following table shows the number of births and deaths in the respective Registration Areas, with rates per 1,000 of the estimated population, for the calendar years 1915 to 1921:—

Calendar Year.	Births.*		Deaths.*	
	Number.	Rate per 1,000.	Number.	Rate per 1,000.
1915	776,304	25·1	909,155	13·6
1916	818,983	25·0	1,001,921	14·0
1917	1,353,792	24·7	1,068,932	14·3

1919	1,373,438	22·3	1,096,436	12·9
1920	1,508,874	23·7	1,142,558	13·1
1921	1,714,261	24·3	1,032,009	11·6

* Exclusive of still-births.

IMMIGRATION.

From 1820 to 1920, 33,630,104 alien immigrants landed in the United States, the arrivals in 1913 being 1,197,892, and those from 1918 onward being (1918) 116,618, (1919) 141 132, (1920) 430,001.

MARRIAGE AND DIVORCE.

The Law of Divorce differs in many of the States, while South Carolina has no Divorce Law. In addition to adultery and cruelty of the husband or adultery of the wife, abandonment (desertion), habitual drunkenness, and imprisonment for felony are qualifying offences.

Year.	Marriages.	Divorces Granted.		
	Total.	To Wife.	To Husband.	Total.
1905	804,787	45,756	22,220	67,976

PHYSIOGRAPHY.

The Republic occupies the southern portion of the North American Continent, between the Atlantic and Pacific Oceans, in latitude 25°-49° North and longitude 67°-124° 30′ West, its northern boundary being Canada and the southern boundary Mexico.

Its coast-line on both oceans has an estimated length of about 15,610 miles, besides 3,620 miles on the great lakes and 5,744 on the Gulf of Mexico. The principal river is the mighty Mississippi-Missouri, traversing the whole country from north to south, and having a course of 4,500 miles to its mouth in the Gulf of Mexico, with many large affluents, the chief of which are the Yellowstone, Nebraska, Arkansas, Ohio, and Red Rivers. The rivers flowing into the Atlantic and Pacific Oceans are comparatively small; among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, and Savannah; of the latter, the Columbia, Sacramento, and Colorado. The Mobile and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande, a large river partly forming the boundary with Mexico. The areas of the water-basins have been estimated as follows:—Rivers flowing to the Pacific, 644,040 square miles; to the Atlantic, 488,877; and to the Gulf of Mexico, 1,683,325 square miles, of which 1,257,547 are drained by the Mississippi-Missouri. The chain of the Rocky Mountains separates the western portion of the territory from the remainder, all communication being carried on over certain elevated passes, several of which are now traversed by railroads; west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high table-land, consisting in great part of stony and sandy desert, and in which occurs the Great Salt Lake, extending to the Rocky Mountains. Eastward the country is a vast, gently undulating plain, with a general slope southwards towards the marshy flats of the Gulf of Mexico, extending to the Atlantic, interrupted only by the Alleghany Mountains, of inferior elevation, in the Eastern States. Nearly the whole of this plain, from the Rocky Mountains to some distance beyond the Mississippi, consists of immense treeless savannahs and prairies of luxuriant grass. In the Eastern States (which form the more settled and most thickly inhabited portion of the territory) large forests of valuable timber, as beech, birch, maple, oak, pine, spruce, elm, ash, walnut; and in the south, live-oak, water-oak, magnolia, palmetto, tulip-tree, cypress, &c., still exist, the remnants of the wooded region which formerly extended over all the Atlantic slope, but into which great inroads have been made by the advance of civilisation. The Mississippi valley is eminently fertile. The mineral kingdom produces in great abundance iron copper, lead, zinc, and aluminium; the non-metallic minerals including immense quantities of coal, anthracite, petroleum, stone, cement, phosphite rock, and salt. Precious metals include gold and silver, raised mainly in Colorado, California, and Alaska (gold), and Colorado, Montana, Utah, and Idaho (silver); while precious stones are worked in great variety, including the turquoise, sapphire, tourmaline, and garnet.

HISTORY.

Early Colonisation.—A natural factor, the great expanse of ocean which divides the American continent from Asia, has saved America from *Asiatic* domination, and it required many centuries of progress before the *European* adventurer dared to attempt the passage of the narrower Atlantic. The aboriginal inhabitants were comparatively few in number, and being generally backward in development, except in Mexico, have left few permanent traces of their presence.

Although *Columbus* discovered America in the 15th century (Oct. 12, 1492), American history may be said to commence with the colonising expeditions from Europe in the 16th and 17th centuries. No definite European settlement was attempted until the last quarter of the 16th century, when England, Holland, Sweden, France, and Spain made determined efforts to bring into account the potential wealth of the newly discovered continent. Of these nationalities the English secured a paramount influence, through their natural aptitude for colonisation, which continues to distinguish that race (and in a greater degree the Scots) amongst the nations of Europe. In the 17th century a chartered company founded *Jamestown* (1607), and many Royalist settlements were established in the district which had been named *Virginia*, after Queen Elizabeth, in the previous century. But step by step with the Church and Royalist foundations in the South a similar series of Puritan and Separatist centres was established in the North. The small band of "Pilgrim Fathers" in their 180-ton *Mayflower*, from Southampton, England, to Plymouth, Massachusetts (1620), was soon followed by a stream of well-to-do merchants from Boston, Lincolnshire and other east coast English towns, and *New England* became rapidly prosperous. Between these two settlements the Dutch had established themselves in *New Netherlands* (1621), and the Swedes in *New Sweden* (1638). Other English foundations were *Maryland* (1632), *Carolina* (1663), *New York* (1664), *New Jersey* (1665), and *Pennsylvania* (1681). From that date Continental enterprise may be said to have ceased for half a century, and *Georgia* (1732) was the last of the English settlements.

Anglo-French Wars.—A continuous struggle was waged between the English and French settlements in America, but until the *War* of 1754–1763 little part was taken by Great Britain in the actual campaigns. The issue of this war decided the fate of America. It secured the possession of the Pacific coast for the inhabitants of the Atlantic slope, and roused the interests of the British Government in the possibilities of its American colonies. The Home Government endeavoured to recover from the colonies part of the cost of the war by which their existence had been secured, but "taxation without representation" was bitterly resented. In December, 1773, some English ships laden with tea arrived in the harbour of Boston, where a non-importation agreement was strictly enforced. A band of colonists, disguised as Indians, boarded the vessels and threw their contents into the sea. This *Boston Tea Party* of December 16, 1773, remains as an outstanding incident in the quarrel between America and Great Britain.

The War of Independence.—In spite of the counsels of Chatham, the King persisted in repressive measures. The colonists resisted in arms, and bloodshed ensued at the first engagement at *Lexington*, April 19, 1775, and continued until the *Capitulation of Yorktown*, October 19, 1781, when *Lord Cornwallis* surrendered with the whole of his forces to *General Washington*. When peace was concluded between America and Great Britain (Sept. 3, 1783), no vestige of territory over which the dispute had raged remained under British rule.

The Declaration of Independence.—On July 4, 1776, the delegates of the various American colonies adopted the Declaration of Independence.[*] "*We, the representatives of the United States of America, in Congress assembled, appealing to the Supreme Judge of the world for the rectitude of our intentions, solemnly publish and declare that these United Colonies are, and of right ought to be, Free and Independent States.*" This Declaration was at length acknowledged by Great Britain, and the United States of America from this beginning has become one of the greatest Powers of the world. The Declaration of Independence was followed by the framing of a *Constitution*, which was ratified in 1787 to 1790 by the 13 *Original States* (Delaware, Pennsylvania, New Jersey, Georgia, Connecticut, Massachusetts, Maryland, South Carolina, New Hampshire, Virginia, New York, North Carolina, and Rhode Island). This Constitution established a legislature of two houses, and vested the executive power in an elective President, and on April 30, 1789, *George Washington* entered office as the first of a line of Presidents of the United States of America.

War of 1812.—The maritime war of Britain and France led to the outbreak of hostilities between the former and the United States, owing mainly to the rival interpretation of the law of allegiance in connexion with impressment of British subjects from American ships to serve in the British Navy. On June 18, 1812, the United States declared war against Britain, in which the latter was generally successful on land and the United States almost invariably victorious on the sea. A land engagement at *Chateauguay* on October 26, 1813, gained lasting glory for the troops of Canada, and earlier in the same year—June 1, 1813—a duel at sea between the *Chesapeake* and the *Shannon* did much to restore the prestige of the British Navy. Peace was concluded by the *Treaty of Ghent* on December 24, 1814, after a purposeless war, which Canada alone has reason to remember with satisfaction.

---

[*] On April 30, 1819, the Raleigh (N.C.) Register published the following document, said to have been adopted by the Committee of Mecklenburg County, North Carolina, on May 20, 1775, the day after the receipt of the news of the battle of Lexington. "In the third session of the Second Continental Congress, Richard Henry Lee proposed, and John Adams, of Massachusetts, seconded, a resolution declaring the United Colonies free and independent States; and Thomas Jefferson, John Adams, Roger Sherman, and Robert Livingston were appointed a committee to draw up a Declaration of Independence. This famous document, composed almost entirely by Jefferson, was adopted unanimously on July 4, 1776."

The Gold Rush.—In 1846 a dispute arose between the United States and Mexico in connexion with the boundaries of *Texas*, recently (1845) admitted as a State of the Union, and after hostilities of several months the war ended in the *Treaty of Guadalupe Hidalgo* (1847). Under this treaty Mexico surrendered the disputed portions of Texas and New Mexico, part of Arizona, and *California*. In 1848 a great rush of goldseekers entered the newly acquired territory, which remains the principal gold-producing State of the Union.

The Civil War.—Among the industrial classes of America in 1860 nearly 4,000,000 were negro slaves, descendants of those planted in the Colonies by Britain. The question of their emancipation led to a bitter dispute between the Northern and Southern States of America, the latter seceding from the Union in 1861. Two years earlier *John Brown*, an advocate of emancipation, had embittered the relations between the North and South by a raid upon the Government arsenal of *Harper's Ferry*, which he captured and held until forced to surrender; and although he was hanged by the State of Virginia his object was eventually achieved by President Lincoln's *Emancipation Proclamation* of January 1, 1863. The *Secession of the Southern States* was followed by hostilities, which included many pitched battles, fought with astounding tenacity and prolific slaughter on both sides. Hostilities ceased soon after the surrender of *General Lee* at *Appomattox* on April 9, 1865, and the bitterness engendered by the war was buried in a lasting peace. By a careless observance of the Foreign Enlistment Act, Britain permitted the departure from Liverpool of the *Alabama*, which committed depredations upon United States shipping, and was also guilty of other acts of negligence, for which, under the *Treaty of Washington*, May 8, 1871, Britain was called upon to pay £3,250,000 damages to the United States. In the four years' war the Confederate (Southern) States lost over 200,000 men by death and disease, while the victorious Federal (Northern) States lost close on 350,000 from the same causes.

War with Spain.—The continuous misgovernment of the neighbouring island of *Cuba* brought America into conflict with Spain in 1898. A succession of revolts, which the Spanish forces were unable to suppress, left Cuba the prey to anarchy, and induced the United States to despatch to Havana the warship *Maine*. By accident or design that vessel was destroyed by an explosion (Feb. 15), and the United States declared war against Spain on April 25, 1898. The outcome of the hostilities was the freedom of Cuba and the acquisition by the United States of the Spanish possessions in the *Philippine Islands*, in addition to *Guam* (Pacific) and *Porto Rico* in the West Indies.

The Panama Canal.—On June 28, 1902, Congress appropriated the sum of $40,000,000 for the purchase of all outstanding rights in the work inaugurated on the *Panama Canal*, and on April 28, 1904, a further sum was granted for the purchase of a strip of territory on each side of the proposed waterway from the Republic of Panama. Operations were immediately undertaken, and the Canal was completed in 1913, and was opened to traffic with no inaugural ceremony on August 1, 1914.

Anglo-American Arbitration.—A Treaty of Arbitration between the United Kingdom and the United States was signed at Washington, August 3, 1911. The Treaty contained seven Articles (*see* 1912 Edition of WHITAKER'S ALMANACK). An Anglo-American Peace Commission Treaty was signed by Mr. Bryan and the British Ambassador on Sept. 15, 1914.

The World War.—On April 6, 1917, the United States, after fruitless endeavours to obtain guarantees from Germany that the rights of neutrals on land and sea would be observed, entered the World War on the side of France, Great Britain and the Allied and Associated Powers. The first shot by U.S. troops (Oct. 27, 1917) was followed by a full participation in the campaigns of the Allies, and the Armies of the United States contributed very largely to the defeat of the Central Powers. At the date of the *Armistice* (Nov. 11, 1918) 3,670,888 troops had been placed under arms, and 77,459 were numbered amongst the killed or died of disease, accident or other causes. U.S. troops also figured amongst the armies sent to the assistance of Russia against the Bolshevik *régime*, but these were withdrawn, in accordance with the plans of the Allies, in 1919.

GOVERNMENT.

The United States of America is a Federal Republic consisting of 48 States and 1 Federal District (of which 13 are Original States, 7 were admitted without previous organisation as Territories, and 28 were admitted after such organisation), and of 2 organised Territories.

THE CONSTITUTION.—By the Constitution of Sept. 17, 1787 (to which ten amendments were added on Dec. 15, 1791, and eleventh to nineteenth Jan. 8, 1798, Sept. 25, 1804, Dec. 18, 1865, July 28, 1868, March 30, 1870, Feb. 25, 1913, May 31, 1913, Jan. 29, 1919, and Aug. 26, 1920), the government of the United States is entrusted to three separate authorities—the Executive, the Legislative, and the Judicial.

THE EXECUTIVE.

The *Executive* power is vested in a President, who is elected every four years, and is eligible for re-election. The mode of electing the President is as follows:—Each State appoints, in such manner as the Legislature thereof directs (they are now elected by popular vote on the *first Tuesday after the first Monday in November* of the year preceding the year in which the Presidential term expires), a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative, or anyone holding office under Government, shall be appointed an elector. The electors for each State meet at their respective State Capitals on the *second Monday of the January* following, and there vote for a President by ballot. The ballots are then sent to Washington, and opened on the *second Wednesday of February* by the President of Senate in presence of Congress, and the candidate who has received a majority of the whole number of electoral votes cast is declared President for the ensuing term. If no one has a majority, then from the three highest on the list the House of Representatives elects a President, the votes being taken by States, the representation from each State having one vote. There is also a Vice-President, who, on the death of the President, becomes *ex officio* President for the remainder of the term. In case of the removal or death of both President and Vice-President, a statute provides for the succession of the Secretary of State, Secretary of the Treasury, Secretary of War, Attorney-General, Postmaster-General, Secretary of Navy, and Secretary of the Interior, so that the State can never be without a Head or Ruler.

The President must be 35 years of age and a native citizen of the United States. He receives a salary of $75,000, with a travelling allowance of $25,000. Executive duties:—

(1) He is Commander-in-Chief of the Army and of the Navy (and of the Militias when they are in Federal service), and he commissions all officers therein.

(2) With the consent of the Senate, he appoints the Cabinet officers and all the chief (and many minor) officials.

(3) He exercises a general supervision over the whole Federal Administration and sees that the Federal Laws are duly carried out. Should disorder arise in any State which the authorities thereof are unable to suppress, the aid of the President may be invoked.

(4) He conducts the Foreign Policy of the Republic, and, with the approval of the Senate, negotiates Treaties with Foreign Powers. The Declaration of War rests with Congress.

(5) He makes recommendations of a general nature to Congress, and when laws are passed by Congress he may return them to Congress with a veto. But if a measure so vetoed is again passed by both Houses of Congress by a two-thirds majority in each House, it becomes law, notwithstanding the objections of the President.

THE PRESIDENT.

President of the United States, Calvin Coolidge, of Massachusetts, *born* at Plymouth, Vermont, July 4, 1872; graduated from Amherst College in 1895; practiced law at Northampton, Mass.; councilman; city solicitor; clerk of courts; chairman Republican City Committee; member General Court of Massachusetts; Mayor of Northampton; member Massachusetts Senate; Lieutenant-Governor of Massachusetts 1916-18; Governor of Massachusetts 1919-20; elected Vice-President Nov. 2, 1920; became President (on the death of Warren G. Harding) Aug. 3, 1923. *Republican.*

BOARD OF INDIAN COMMISSIONERS,

Washington, D.C.

The Board of Indian Commissioners is appointed by the President, and its members serve without salary. The Board inspects all branches of the Indian Service and makes recommendations to the Secretary of the Interior as to policies and needs of administration of Indian Affairs. In 1922 the Indian population of the U.S., exclusive of Alaska, was 314,930 by blood (Oklahoma containing 93,171, Arizona 43,327 New Mexico 21,569, S. Dakota 23,448, California 17,725, Montana 12,648, North Carolina 11,853, Washington 10,920, and Wisconsin 10,498, and the 38 remaining States less than 10,000 each). Total disbursements authorised for the fiscal year ended 30 June, 1924, for Indian Service were $11,317,655. In addition to this the sum of $22,700,000 is to be paid over to the Indians from receipts for oil and other leases, interest on trust funds, &c. The total wealth of U.S. Indians under the nominal control of the Indian Bureau on June 30, 1922, amounted to $727,746,397, of which $198,065,171 was tribal, and $529,681,226 individual.

Members, George Vaux, jr., *Pa* (*Chairman*); Warren K. Moorehead, *Mass.*; Samuel A. Eliot, *Mass.*; Frank Knox, *N.H.*; Daniel Smiley, *N.Y.*; Hugh L. Scott, *N.J.*; Clement S. Ucker, *Ga.*; Flora Warren Seymour, *Ill.*; Walter George Smith, *Pa.*; Malcolm McDowell, *Ill.* (*Secretary*).

CIVIL SERVICE COMMISSION,

Washington, D.C.

The Civil Service Commission holds frequent examinations for the general public service in various parts of the country for more than 60 per cent. of the 560,000 positions in the Executive Civil Service.

Commissioners, George R. Wales, *Vt.*; Helen H. Gardener, *Va.*...............each	5,000
Chief Examiner, Herbert A. Filer, *Md.*.......	3,500
Secretary, John T. Doyle, *N.Y.*....................	2,500

NATIONAL COMMISSION OF FINE ARTS,

Interior Dept. Building, Washington, D.C.

The Commission of Fine Arts was created by Congress 17 May, 1910, to advise generally upon the location, selection, and erection of statues, fountains, and monuments in the District of Columbia, and also to advise generally upon questions of art when required to do so by the President or by any committee of either House of Congress. Under this latter provision its functions have been enlarged by Executive Order to cover all works of Art with which the Federal Government is concerned, including designs of public buildings, public parks, within the D.C. An expenditure not exceeding $10,000 in any one year is authorised by Congress for travelling and other expenses. The members serve without remuneration.

Chairman, Charles Moore, *Detroit, Mich.*
Vice-Chairman, James L. Greenleaf, *N.Y.*
Members, James E. Fraser, *N.Y.*; Henry Bacon, *N.Y.*; Louis Ayres, *N.Y.*; H. Siddons Mowbray, *Conn.*; Milton B. Medary, jr., *Pa.*
Secretary and Executive Officer, H. P. Caemmerer.

UNITED STATES GEOGRAPHIC BOARD.

Washington, D.C.

By Executive order of August 10, 1906, the official title of the United States Board on Geographic Names was changed to United States Geographic Board and its duties enlarged. The Board passes on all unsettled questions concerning geographic names which arise in the departments, as well as determines, changes, and fixes place names within the United States and its insular possessions, and all names suggested by any officer of the Government shall be referred to the board before publication. The decisions of the board are to be accepted by all the departments of the Government as standard authority.

Chairman, Dr. C. Hart Merriam.
Secretary, Charles S. Sloane.

BUREAU OF RECLAMATION.

Commissioner, David W. Davis, Interior Dept. Building, 19th and F, N.W., Washington, D.C. Employees: Washington Office, 77; Field, 3,000 to 5,000. Expenditure per year about $10,000,000.

The Bureau of Reclamation was organised as a bureau of the Interior Department, under the Reclamation Act of June 17, 1902. It is engaged in the investigation, construction and operation of irrigation works in the 17 arid and semi-arid States of the far West. Twenty-five primary projects, comprising about 3,000,000 acres, and three Indian projects (384,000 acres) are under construction or operation, and the major works aid in serving an additional 1,100,000 acres under private canals that generally get stored water from the government reservoirs. The funds for this work have come chiefly from the sale of public lands, from repayments by the water users, and more recently from royalties from oil and gas-leasing and other mineral operations and Federal power permits, and the money expended is returned to the fund by easy payments of settlers, usually in twenty annual instalments without interest, in accordance with the Reclamation Extension Act of August 13, 1914.

The Service has built about 14.400 miles of canals, ditches and drains (including 125,500 canal structures), involving the excavation of 216,000,000 cubic yards of materials. In connexion with this work there have been constructed 100 storage and diversion dams with an aggregate volume of 15,500,000 cubic yards, including the *Arrowrock Dam* (349 feet high), Idaho, on the Boise River, and the *Elephant Butte Dam* (306 feet high), New Mexico, on the Rio Grande. The Bureau has built 103 tunnels, 1,000 miles of road, 83 miles of railroad, 3,280 miles of telephone line, 30 power plants and 1,150 miles of transmission lines. It is mining coal, and has manufactured over 1½ million barrels of cement and sand cement. The net construction cost to June 30, 1923, was $135,000,000.

Over 450,000 persons are living on the 33,000 farms irrigated by the Bureau, and in the project towns and cities. Of the 3,000,000 acres above referred to, water was furnished in 1922 to 1,227,900 acres, and of this area 1,169,100 acres were harvested in 1922, producing crops worth over $50,000,000, or an average of about $43 per acre. The additional lands using stored water yielded crops worth $33,000,000 more.

Public land farm units on the several projects are opened for settlement from time to time as canals are extended to make irrigation water available. Under present law, soldiers of the World War have a preference right to enter these farms, and at recent openings such soldiers have taken practically all units.

Information in regard to farms available for settlement may be obtained by addressing, Commissioner, Bureau of Reclamation Dept. of the Interior, Washington, D.C.

The Bureau issues the "Reclamation Record," an illustrated monthly publication, containing articles of interest to irrigation farmers and engineers. An annual report is also issued.

An engineering library of about 5,000 manuscript and printed volumes on the subject of irrigation is maintained in the Washington office of the Bureau. This library contains descriptions of the construction and operation of the projects, with numerous photographs and maps, plans, specifications, cost data and results of original experimental investigations, and is available for consultation by those interested.

GOVERNMENT PRINTING OFFICE,

North Capitol Street, Washington, D.C.

The Government Printing Office of the United States was established by Congress in 1860 and has been in continuous operation since that time. The present buildings, having a floor space of 15 acres, together with the machinery and equipment which they contain, represent an expenditure of approximately $8,000,000. The annual cost of operation and maintenance is about $10,000,000. There are about 4,000 persons annually employed in the various divisions of the office at a total yearly compensation of $7,000,000. In addition to doing all of the printing and binding ordered for Congress, the office executes all the printing and binding required by the various executive departments and independent establishments of the U.S. Government. The office has the largest battery of type-setting machines in the world, including 100 linotype machines, 100 monotype key-boards and 126 monotype casting machines, which produced about 2,000,000,000 ems of type in fiscal year 1923. The 165 presses of the office are credited with 2,151,000,000 chargeable impressions, not including 180,000,000 on money order forms and 1,181,000,000 on postal cards. During the year the office handled approximately 80,000 separate jobs. In addition to the execution of all kinds of printing and binding, this office produced 11,353,000 square inches of electrotypes and stereotypes, and manufactured its own printing and writing inks, rollers, glue, type and type metal. It also has one of the largest industrial cafeterias and recreational rooms in the United States.

Public Printer, George H. Carter, *Iowa* .	$6,000

Chief Clerk and Purchasing Agent T. Leo Haden.	

LIBRARY OF CONGRESS

(National Library),

Capitol Hill, Washington, D.C.

The Library of Congress was established in 1800 and destroyed by fire in 1814. In 1815, purchase of Jefferson collection formed basis for a new collection. Partially destroyed by fire, 1851, and replenished in 1851-2. Since that date increased (1) by regular annual appropriations by Congress (now $100,000); (2) by deposits under the copyright law; (3) by gifts and exchanges; (4) by the exchanges of the Smithsonian Institution, the library of which (40,000 volumes) was, in 1866, deposited in the Library of Congress, with the stipulation that future accessions should follow it. The collection is now the largest in the Western Hemisphere and third in the world; it comprises 3,089,841 volumes (gain in 1922-23, 88,933). The floor space of the building (erected at the cost of $6,347,000, and first occupied in 1897) is 430,255 square feet, or nearly 10 acres. The book stacks, including the new stack built over the southeast interior court, contain about 103 miles of shelving, affording space for 3,540,000 octavo volumes and 84,000 volumes of newspapers. The library is maintained by Congress, the appropriation in 1923 being $928,790.

Librarian of Congress, Herbert Putnam, LL.D.	$7,500
Chief Assistant Librarian, Appleton P. C. Griffin	4,500
Chief Clerk, Allen R. Boyd	2,500
Secretary, Jessica L. Farnum	1,800

U.S. MILITARY ACADEMY,
West Point, N.Y.

The United States Military Academy for training cadets for commissions in the U.S. Army was founded at West Point, on the west bank of the Hudson River, in 1802.

Superintendent, Brig.-Gen. Fred W. Sladen, U.S. Army.

U.S. NAVAL ACADEMY,
Annapolis, Maryland.

The United States Naval Academy was founded in 1845 for the education of officers for the Navy. Students are called midshipmen, and must be citizens of the U.S. The course of instruction comprises four years at the Academy.

Superintendent, Rear-Adm. Henry B. Wilson, U.S. Navy.

THE LEGISLATURE.

The Legislative power is vested in two Houses, the Senate and the House of Representatives, the President having a *veto* power, which may be overcome by a two-thirds vote of each House. The Senate is composed of two Senators from each State, elected by the people thereof for the term of six years, and each Senator has one vote; and Representatives are chosen in each State, by popular vote, for two years. The number of Representatives for each State is allotted in proportion to its population—at present 1 for 211,877. The *Senate* consists of 96 members. The salary of a Senator is $7,500 per annum, with mileage at 20 cents per mile, coming and returning, for each regular session. The *House of Representatives* consists of 435 representatives and territorial delegates. The salary of a Representative is $7,500 per annum, with mileage as for Senators.

THE SIXTY-SEVENTH CONGRESS.

President (pro tempore), Albert B. Cummins, Senator from *Iowa*	
Speaker of the House of Representatives, Frederick H. Gillett, *Mass.*	$12,000

THE JUDICATURE.

The *Federal Judiciary* consists of three sets of Federal Courts: (1) The *Supreme Court* at Washington, D.C., consisting of a Chief Justice and eight Puisne Judges, with original jurisdiction in cases affecting Ambassadors, &c., or where a State is a party to the suit, and with appellate jurisdiction from inferior Federal Courts. (2) The *Circuit Courts of Appeal*, dealing with appeals from District Courts, and consisting of the Justice of the Supreme Court for the Circuit and all the Circuit and District Judges within the circuit. (3) The *District Courts*, eighty-seven in number, each served by a District Court Judge.

THE SUPREME COURT
(The Capitol, Washington, D.C.).

Chief Justice, William Howard Taft, *Conn.*, *born* 1857, *apptd.* 1921 .... $15,000

Associate Justices (each $14,500).

DEFENCE.

The President is Commander-in-Chief of both Navy and Army, the former being controlled by a Secretary of the Navy, and the latter by a Secretary of War.

THE ARMY OF THE U.S.

Under the provisions of the Act of Congress, approved June 4, 1920, the enlisted strength of the Regular Army, including the Philippine Scouts, must not exceed 280,000, except in time of war or similar emergency, when the public safety demands it; the commissioned strength being placed at 17,726; however, recent legislation (Act of Congress of June 30, 1922) has limited the authorised enlisted strength, exclusive of the Philippine Scouts, to 125,000, and requires that the number of commissioned officers on the active list of the Regular Army and the emergency officers of the late war who are still in service undergoing treatment for physical reconstruction shall be restricted after Jan. 1, 1923, to 12,000. The actual strength of the Army of the United States on September 30, 1923, included 11,520 commissioned officers, 1,084 warrant officers, and approximately, 116,000 enlisted men, including the Philippine Scouts. The Army is made up entirely of volunteers.

PRINCIPAL WARS OF THE U.S.

Name of War.	Troops Engaged.
War of Independence, 1775–1784	300,000
North Western Indian, 1790–1795	8,983
War with France, 1798–1800	4,593
War with Tripoli, 1801–1805	3,330
War with Britain, 1812–1815	528,274
Creek Indian, 1813–1814	13,781

Name of War.	Troops Engaged.
Seminole Indian, 1817–1818	6,911
Black Hawk Indian, 1832	6,465
Cherokee Indian, 1833–1839	9,494

World War, 1917–1918	4,060,000

U.S. WAR PENSIONS.

Year.	Number of Pensioners on Roll.			Total Payments.
	Invalids.	Widows, &c.	Total.	$
1900	752,510	241,019	993,529	138,462,130
1918	340,318	306,582	646,895	179,835,329
1919	313,140	311,287	624,427	222,159,292
1920	285,110	307,080	592,190	213,295,314
1921	267,629	298,424	566,053	258,715,843
1922	256,918	290,098	547,016	253,807,583
1923	253,686	286,070	539,756	263,012,500

The total disbursement in pensions since the War of Independence is $6,606,356,621, of which $6,224,106,631 has been paid on account of the Civil War. The cost of maintenance and expenses of administration in the fiscal year 1923, including the cost of medical examinations and special field examinations, amounted to $2,663,626.

World War Pensions.

Disbursements in claims arising out of service in the World War subsequent to Oct. 6, 1917, are not included in the above totals, as such claims are adjudicated in the U.S. Veterans' Bureau, which has jurisdiction over such matters. (*See* "Ordinary Expenditures" under "Finance," *post*.)

THE NAVY OF THE U.S.

No new construction has been authorised for the U.S. Navy since 1918. The three-year building programme initiated in the Act of August 29, 1916, provided for the following construction:—

	1916	1917.	1918.	Totals.
Battleships	4	3	3	10
Battle Cruisers	4	1	1	6
Scout Cruisers	4	3	3	10
Destroyers	20	15	15	50
Fleet Submarines	—	—	9	9
Coast Submarines	30	18	10	58
Fuel Ships	1	—	2	3
Repair ship	—	—	1	1
Transport	—	—	1	1
Hospital ship	1	—	—	1
Destroyer Tenders	—	1	1	2
Submarine Tender	—	1	—	1
Ammunition ships	1	—	1	2
Gunboats	1	—	1	2

Of the "all big gun" battleships the *Colorado* was completed during 1923. These ships carry eight 16-in. guns (with secondary batteries of 12 5-in. and eight 3-in. anti-aircraft guns), and are 624 ft. long, 97 ft. wide, and displace 32,600 tons; they are driven by four electric-drive turbines of 28,900 h.p. This leaves the *West Virginia* as the only remaining battleship under construction, as the other seven battleships will be disposed of in accordance with the terms of the *Washington Treaty* limiting naval armaments.

Of the vessels which were authorised in the 3-year programme, the following remain not ordered:—12 destroyers, 6 fleet submarines, and 1 auxiliary. Under the terms of the Naval Act of July 1, 1922, no part of the funds available may now be used toward the construction of these vessels. On July 1, 1922, the following vessels were under construction:—9 battleships, 6 battle cruisers, 10 light cruisers, 3 fleet submarines, 34 submarines, 1 gunboat, and 4 auxiliaries. Under the terms of the *Washington Treaty* limiting naval armaments work has been suspended on 7 of the battleships and 4 of the battle cruisers; the remaining 2 battle cruisers are being converted into aircraft carriers. The following were completed during the fiscal year ended July 1, 1923:—3 light cruisers, 13 submarines. Since July 1, 1923, 1 battleship, 1 light cruiser and 4 submarines have been completed. The following vessels, therefore, now remain under construction:—1 battleship, 2 aircraft-carriers, 6 light cruisers, 3 fleet submarines, 17 submarines, 1 gunboat, and 4 auxiliaries.

Information as to characteristics, costs, &c., available for publication concerning naval vessels, may be found in the *Ships' Data Book*.

EDUCATION.

State School Systems, 1919–1920.

In 1919–20 the total number of children in the United States 5 to 18 years of age was 27,728,788, of whom 21,578,316 (10,774,511 boys and 10,803,805 girls) were enrolled in public elementary and secondary schools, and 2,034,642 were estimated to be enrolled in private elementary and secondary schools, and in private commercial and business schools. The average daily attendance in the public schools was 16,150,035, the average length of school term was 161·9 days, and the average number of days attended by each pupil enrolled was 121·2 days. In 1919–20, 679,533 teachers (95,666 men and 583,867 women) were employed. The average annual salary of all teachers was $871. The total number of buildings used as school houses was 271,319, and the estimated value of all public school property was $2,409,719,120.

The total money received for school purposes, excluding balances on hand, was $1,155,506,640. Of this amount, $26,036,098 was received from permanent school funds and from the rent of school lands, $134,278,753 from State taxes or State appropriation, $758,896,551 from local tax or appropriation, $2,474,717 from the Federal Government, and $233,820,521 from all other sources, State and local. The total payments, excluding payments of bonds, were $1,036,151,209. This amount includes expenditures for general professional and business control aggregating $36,752,316; salaries of teachers, supervisors and principals, $590,119,516; text-books and other instruction supplies, $42,435,820; instruction in evening schools, $3,276,593; miscellaneous current expenses, $210,024,112 (composed of operation of school plant, $115,707,229; maintenance of school plant, $30,432,039; auxiliary agencies, $36,387,302; fixed charges, $9,285,711; and interest on indebtedness, $18,211,831); and outlays—sites, new buildings and equipment, $153,542,852.

Compulsory Attendance Laws, 1922.

Every State in the Union has a compulsory school attendance law. In general, children are obliged to attend school from 7 to 14 years of age, and those from 14 to 16 must attend school or secure employment certificates. The required attendance each year varies from eighty days in two States to the full term in thirty-six States. In all States there are, connected with the local administrative units, officers charged with enforcing the compulsory attendance law, known in the majority of States as the truant or attendance officers.

Universities, Colleges and Professional Schools, 1919–20.

Of the 670 universities, colleges, and professional schools, 153 were for men, 117 for women, and 400 were co-educational. There were 109 public institutions and 561 under private control or management. The total number of instructors in both private and public institutions was 42,882 (34,111 men and 8,771 women). The public institutions enrolled 156,626 undergraduate and graduate students (102,711 men and 53,915 women). The private institutions enrolled 200,068 undergraduate and graduate students (119,531 men and 80,537 women). In general engineering, 10,231 students were enrolled; in chemical engineering, 5,743; in civil engineering, 8,859; in electrical engineering, 9,469; in mechanical engineering, 11,789; and in mining engineering, 3,048.

The total number of baccalaureate degrees conferred in 1919–20 was 38,552 (23,272 men and 15,280 women); altogether 4,853 graduate degrees were conferred (3,457 men and 1,396 women); 989 honorary degrees were conferred.

The schools of theology enrolled 7,216 students and reported 588 graduates; law schools, 20,992 students and 3,273 graduates; schools of medicine, 14,242 students and 2,806 graduates; schools of dentistry, 8,809 students and 865 graduates; schools of pharmacy, 5,026 students and 1,023 graduates; and schools of veterinary medicine, 908 students and 219 graduates.

Teachers' Colleges and Normal Schools, 1919–20.

In 1919–20, 371 teachers' colleges and normal schools reported to the United States Bureau of Education. These schools are chiefly concerned with the training of elementary teachers. Of this number 138 are State institutions; 45 are teachers' colleges (schools granting a degree after four years' work beyond high school); 33 are city normal schools; 95 are county normal schools; and 60 are private normal schools. The 45 teachers' colleges were separated from the State normal schools, which accounts for the number of State normal schools in 1920, smaller than in 1918 when they were included. The total number of instructors in all teachers' colleges and normal schools was 9,587. The total number of students enrolled was 162,796 (29,149 men and 133,647 women). Of this total enrolment, 135,418 students are in normal training courses. The number of graduates from the normal training courses was 2,151 men and 18,861 women, making a total of 21,012. Practice or model schools are usually operated in connexion with these normal schools, or the public schools are used for this purpose. The total enrolment in these model schools, so far as reported, was 92,446. The total receipts for normal schools were $31,395,389. The total number of volumes in the libraries was 2,385,238.

Nurse Training Schools, 1919–20.

The number of nurse training schools has increased very rapidly since 1900. At that time 432 schools reported to the Bureau of Education. In 1920 the number of such schools reporting was 1,775. The number of pupils enrolled in these schools in 1920 was 54,953, and the number graduated 14,980. Of the schools reporting, 88 are in hospitals for the insane. The capacity of the hospitals in which all nurse training schools reporting are located, is 321,619 beds, and the average daily number of patients is 252,823. In 1920 a large majority of schools required a minimum age requirement for admission of only 18 or 19 years. In general hospitals 539 schools required 8 hours of duty daily, 474 schools required 9 hours of duty, and 439 schools required 10 hours of duty. In hospitals for the insane, the number of hours of duty required was usually 10 or more. Twenty-two schools required 12 hours of duty, and 9 required more than 12 hours.

The remuneration granted the pupils in general hospitals is usually less than $200. In the first year 54 per cent. of the schools pay under $100, and 41 per cent. pay from $100 to $199; in the second year 35 per cent. of the schools pay under $100, and 56 per cent. pay from $100 to $199; in the third year of the course 29 per cent. pay under $100, and 60 per cent. pay from $100 to $199. In the schools in hospitals for the insane the remuneration usually exceeds $400. In the first year of the course 76 per cent. of the schools pay $400 or more; in the second year of the course 79 per cent. of the schools pay $400 or over; in the third year of the course 81 per cent. of the schools pay $400 or more.

More than 85 per cent. of all the nurse training schools in general hospitals offer a three-year course. About 10 per cent. offer a two-year or two-and-one-half year course. In hospitals for the insane, more than 70 per cent. of the schools offer a three-year course, and the remaining schools offer a two-year course. Almost 43 per cent. of the general nurse training schools require one year of high school work for admission, 21 per cent. require two years of high school work for admission, 26 per cent. require a full high school course, and 10 per cent. require only the completion of the elementary grades for admission.

Of the nurse training schools reporting, 180 are affiliated with colleges or universities. By this co-operation an excellent opportunity is afforded to the training schools to secure for their pupils a high type of instruction in technical and academic subjects.

Public High Schools, 1919–20.

In 1919–20, 14,326 public high schools reported to the Bureau. The total number of teachers in these secondary schools was 97,654 (34,396 men and 63,258 women). The total number of pupils enrolled in these schools was 1,999,106 (891,469 boys and 1,107,637 girls). The total number of coloured pupils included in the preceding figures is 30,223. In the first year of the course 742,320 pupils were enrolled, in the second year 498,796, in the third year 346,684, and in the fourth year 269,355 pupils, including post-graduate and special pupils. In the 7th and 8th elementary grades organised as a part of junior high schools, 141,951 pupils were enrolled. The number of graduates reported by 12,326 schools was 230,902 (90,516 boys and 140,386 girls).

There were 10,821 high schools that reported a four-year curriculum. In these four-year high schools there are 80,864 teachers, and 1,678,823 pupils are enrolled (745,477 boys and 933,346 girls). In addition, in 402 three-year senior high schools, there are 3,651 teachers and 63,630 pupils (27,802 boys and 35,828 girls).

Private High Schools and Academies, 1919–20.

The number of pupils in private high schools and academies, in general, has increased slowly but steadily. The increase has been about proportional to the increase in population. In 1900 the number of students enrolled in these schools was 110,797. In 1919–20 the number enrolled was 184,153. The number of schools reporting in 1900 was 1,978, and the number reporting in 1920 was 2,093. The total number of instructors in these private high schools in 1920 was 14,946 (5,698 men and 9,248 women). In this group of schools more than any other, there is a tendency for the schools to be either for boys or girls exclusively, rather than co-educational. Of the 2,093 schools reporting in 1920, 385 were for boys only, 728 were for girls only, and 980 were co-educational. Altogether, about one-tenth of the schools had military drill in 1920, enrolling 24,056 students. Of this number 3,823 were girls. In 1916 the number of boys taking this work was 10,324. Within the past four years the enrolment in military drill in these schools has been doubled. The number of coloured students enrolled in these schools in 1920 was 9,526. The total number of graduates from private high schools and academies was 24,166. The average size of the faculty was 7·1. The average number of students to a school was 88·0. The average number of students to a teacher was 12·3.

The number of students enrolled in the first year of these private high schools was 36·1 per cent. of the total number; in the second year, 26·8 per cent.; in the third year, 20·5 per cent.; and in the fourth year, 16·6 per cent.

566 of these private schools were non-sectarian, and 1,527 were denominational (976 Roman Catholic).

Of the total number of students enrolled, 45·7 per cent. were boys and 54·3 per cent. were girls.

The number of Negro girls enrolled in these schools was about twice as large as the number of Negro boys; 6,341 coloured girls were enrolled, and 3,185 coloured boys.

Private Commercial Schools, 1919–1920.

In 1920 reports were received from 902 private commercial and business schools. These schools are of two types: (1) those which are non-denominational, and which are run on a commercial basis; (2) those which are maintained by certain denominations and by Young Men's Christian Associations. The private non-denominational schools reporting were 841, the denominational and Young Men's Christian Association schools reporting were 61. The total number of instructors in these 902 schools was 6,165 (2,976 men and 3,189 women). The number of students enrolled was 336,032 (139,551 men and 196,481 women). The average daily attendance in these schools was 164,662. Altogether 902 schools reported 214,606 students enrolled in day courses. In night courses 121,426 students were enrolled in the 675 schools which reported such courses. In the commercial or bookkeeping course 106,852 students were enrolled; stenographic, 126,055; combined courses, 53,430; telegraphic (wire), 2,804; (wireless), 2,384; accountancy, 11,889; secretarial, 23,073; and in the salesmanship course, 15,167.

In 755 schools in which shorthand was taught 130,927 students or 56 per cent. of the shorthand students reported studied the Gregg system of shorthand; 35 per cent. of the shorthand students, or 81,618 students, studied some Pitmanic system of shorthand.

Schools for Feeble-minded and Sub-Normal Children, 1917–18.

Nearly all States provide schools for feeble-minded children; 43 schools of this type reported in 1918; 32 private schools also submitted a report. Altogether 131 cities have organised classes for the teaching of sub-normal and backward children. The children in these schools are not usually feeble-minded, but are retarded in their school work. The number of instructors in State institutions was 425, in private institutions 121, and in public day school classes of city schools 1,134. The total number of inmates in State institutions was 35,968 (18,353 boys and 17,615 girls); in private institutions, 983 (467 boys and 516 girls); in public day school classes of city schools, 18,133 (11,937 boys and 6,196 girls).

In State institutions 11 per cent. of the pupils take music, 26 per cent. home economics, 19 per cent. manual training, 11 per cent. agriculture, and 13 per cent. trade training courses. In city day school classes, 90 per cent. of the pupils take music, 27 per cent. home economics, 86 per cent. manual training, 10 per cent. agriculture, and 12 per cent. trade training courses. In private schools 43 per cent. take music, 24 per cent. home economics, 34 per cent. manual training, 14 per cent. agricultural courses, and 4 per cent. trade training courses.

PUBLIC DEBT.

The total interest-bearing Debt of the U.S. from 1916–1922 was as follows:

June 30.	Interest-bearing debt.	Interest paid during fiscal year (on basis of daily Statements of Treasury).
1916	$971,562,590	$22,900,869
1917	2,712,549,477	24,742,702
1918	11,985,882,436	189,743,277
1919	25,234,496,274	619,215,569
1920	24,061,095,361	1,020,251,622
1921	23,737,352,080	999,144,731
1922	22,711,035,587	991,000,759
1923	22,007,590,754	1,055,923,690

The Public Debt on June 30, 1923, was as follows:—

Bonds:—	
2 per cent. (1930)	$599,724,050
4 per cent. (1925)	118,489,900
2 per cent. Canal (1916–36)	48,954,180
2 per cent. do. (1918–38)	25,947,400
3 per cent. do. (1961)	49,800,000
3 per cent. Conversion (1946–47)	28,894,500
2½ per cent. Postal (1st to 24th)	11,860,200
1st Liberty Loan (1932–47)	1,951,764,200
2nd do. (1927–42)	3,199,036,800
3rd do. (1928)	3,407,787,250
4th do. (1933–38)	6,328,565,650
4¼ per cent. Treasury Bonds (1947–52)	763,954,300
Notes	4,104,195,150
Certificates	1,031,418,500

Matured Interest	176,085,461
	22,525,773,219
Less Cash in Treasury	369,886,816
Net Debt of U.S.A.	$22,155,886,403

---

[*] During the fiscal year 1923 to date, allotments for veterans' relief have been made to the Treasury Department in the amount of $3,164,425·11, to the War Department in the amount of $4,889,241·91, and to the Navy Department in the amount of $2,652,303. Similar allotments in the fiscal year 1922 to the Treasury Department were $26,350,668·66, to the War Department $4,866,383·40, and to the Navy Department $529,237·84. Expenditures under these allotments, however, appear as expenditures of the respective departments and not of the Veterans' Bureau. In the fiscal year 1922, payments on account of veterans' relief made prior to August 11, 1921, by the War Risk Insurance Bureau are included under Treasury Department, while similar payments made prior to that date by the Federal Board for Vocational Education are included under other independent offices and commissions.

a Add.

b Deduct, excess of credits.

NOTE.—The analysis of expenditures for the fiscal year 1923 is on the same basis as the Budget, with necessary adjustments to cover receipts credited to appropriations, including particularly proceeds of railroad securities. The analysis for the fiscal year 1922 is on the Budget basis, without adjustment. The figures given for operations in special accounts are net figures, and make allowance for receipts and deposits credited to the account concerned.

OBLIGATIONS OF FOREIGN GOVERNMENTS HELD BY THE UNITED STATES TREASURY. INTEREST ACCRUED AND UNPAID THEREON UP TO AND INCLUDING THE LAST INTEREST PERIOD PRIOR TO AUGUST 24, 1923, AND INTEREST HERETOFORE PAID.

NOTES.—Agreements have been concluded for the funding of the obligations of Great Britain and Finland into long-time Bonds in the amounts of $4,600,000,000, and $9,000,000, respectively. The Funded Bonds of Great Britain have been delivered to the Treasury. The remaining $30,500,000, due from Great Britain, represents balance due on obligations regarded as having been given for Pittman Silver advances which is to be paid in the spring of 1924.

Cuba has paid its indebtedness in full.

No interest due on Nicaraguan notes until maturity, as is also the case with certain Belgian obligations aggregating $2,284,151·40.

Payment of principal and interest on obligation of Austria extended for 20 years from June 1, 1923.

UNITED STATES MONEY.

On Sept. 1, 1923, the Stock of Money amounted to $8,707,407,229, made up as follows:—

Gold Coin and Bullion	$4,109,052,543
Gold Certificates	*826,369,469
Standard Silver Dollars	495,464,404
Silver Certificates	*408,876,947
Treasury Notes of 1890	*1,455,623
Subsidiary Silver	269,510,124
United States Notes	346,681,016
Federal Reserve Notes	2,698,808,330
Federal Reserve Bank Notes	18,946,000
National Bank Notes	768,944,812
Total (Sept 1, 1923)	$8,707.407,229
Total (Sept. 1, 1922)	$8.303.549.241
Total (April 1, 1917)	$5.3[illegible]2,109,272
Total (July 1, 1914	$3.738.288,871
Total (Jan. 1, 1879)	$1,007.084,483

Of the total Gold Coin and Bullion on Sept. 1, 1893, the United States Treasury held $3,424,847,782, the Federal Banks and Agents held $286,862,849, and $397,341,912 (or $3·56 *per capita*) was in circulation. Of the total money $3,885,524,249 was held in the Treasury, $1,280,678,208 by the Federal Reserve Banks and Agents, and $4,777,906,811 (or $42·85 *per capita*) was in circulation. Gold certificates are secured dollar for dollar by gold held in the Treasury for their redemption; silver certificates are secured dollar for dollar by standard silver dollars held in the Treasury for their redemption; United States notes are secured by a gold reserve of $152,979,025.63 held in the Treasury. This reserve fund may also be used for the redemption of Treasury notes of 1890, which are also secured dollar for dollar by standard silver dollars, held in the Treasury. Federal reserve notes are obligations of the United States and a first lien on all the assets of the issuing Federal reserve bank. Federal reserve notes are secured by the deposit with Federal reserve agents of a like amount of gold or of gold and such discounted or purchased paper as is eligible under the terms of the Federal Reserve Act. Federal reserve banks must maintain a gold reserve of at least 40 per cent., including the gold redemption fund which must be deposited with the United States Treasurer, against Federal reserve notes in actual circulation. Federal reserve bank notes and National bank notes are secured by United Government obligations, and a 5 per cent. fund for their redemption is required to be maintained with the Treasurer of the United States in gold or lawful money.

---

* Not included in the total, as the money held in trust against them is included under Gold Coin and Bullion.

PRODUCTION AND INDUSTRY.

Agriculture.—The total land surface, excluding Island possessions and Alaska, is 1,903,215,360* acres, of which in 1920 955,883,715 were farms (503,073,007 acres improved). The total number of farms in 1920 was 6,448,343, of which 2,456,107 are between 100 and 500 acres, 1,474,745 between 50 and 100 acres, and 1,503,732 between 20 and 50 acres. The gross value of farm products of the United States in 1919 was $21,425,623,614, as compared with $8,494.230.307 in 1909. Crops in 1919 were valued at $14,755,364,894, live-stock products (including animals sold or slaughtered) at $6,178,122,273, and miscellaneous products at $492.136,447.

Wool.—The total number of animals shorn in 1919 was 31,591,840, producing 228,795,354 lb.

Minerals.—The total value of metallic minerals produced in 1922 was estimated at $985,800,000 (pig iron, $608,144,858; copper, $127,443,000; gold, $49,096,000, and silver, $55,510,859), and of non-metallic minerals the total value was $3,662,500,000 (bituminous coal, $1,294,000,000; Pennsylvania anthracite, $273,700,125; petroleum, $900,200,000); in 1922 the production of oil was 551,197,000 barrels, as against 472,183,000 barrels in 1921; clay products (1921), $270,397,754; stone, $118,500,000; natural gas, $196,000,000; cement, $208,464,028; and mineral paints (lead and zinc pigments), $22,205,400. The exports of bituminous coal sent to Europe in 1921 amounted to 4,924,472 tons (of 2,240 lb.) while 11,961,405 tons went to Canada.

Manufactures.—The manufacturing establishments enumerated at the biennial Census of 1921 numbered 196,267, the value of their products being $43,653,282,833, as compared with a value in 1919 of $62,418,078,773. The figures for 1921 do not include data for 53,999 establishments with products valued at $136,926,075, each establishment reporting products under $5,000 in value, but such data were included in 1919. The leading manufacturing States are New York, Pennsylvania, Illinois, Ohio, and Massachusetts. The principal industrial centres are New York (clothing, printing and publishing, bread and other bakery products, millinery and lace goods, tobacco, slaughtering and meat packing, sugar-refining); Chicago (slaughtering and meat packing, printing and publishing, clothing); Philadelphia (textiles, printing and publishing, clothing, sugar refining, petroleum refining); Boston (printing and publishing, sugar refining, clothing, confectionery and ice-cream, foundry and machine-shop products, boots and shoes); Pittsburg (iron and steel, slaughtering and meat packing); Detroit (automobiles, automobile bodies and parts, printing and publishing); St. Louis (slaughtering and meat packing, boots and shoes, tobacco); Cleveland (automobiles, iron and steel, electrical machinery, apparatus and supplies); Baltimore (clothing, smelting and refining copper, slaughtering and meat packing, printing and publishing, fertilizers); Cincinnati (slaughtering and meat packing, clothing, printing and publishing); Buffalo (flour-mill and grist-mill products, automobiles, slaughtering and meat packing); Minneapolis (flour-mill and grist-mill products, automobiles, printing and publishing); San Francisco (printing and publishing, automobiles, coffee and spice).

---

* Decrease in land area due to building of Pathfinder and Shoshone Reservoirs in Wyoming and several reservoirs in connexion with irrigation projects in Montana.

Automobile Industry.—The value of the cars and lorries manufactured in 1921 was $1,671,386,976, of parts and accessories, $408,016,532, and of tyres and tubes, $446,075,960. The number of cars produced was 1,406,257, of lorries, 106,988, while 27,884,034 tyres were also manufactured in 1921. The automobile factories gave employment to 248,027 persons, who received $406,491,414 in 1921. The number of automobile vehicles registered in 1921 in the U.S.A. was 10,465,995. The petrol produced in 1920 amounted to 4,882,546,699 gallons, and that consumed to 4,256,428,005 gallons. The taxes levied on the motor industry amounted to $316,720,000. The number of motor vehicles exported in 1921 was 30,776.

FEDERAL EMPLOYMENT BUREAUS.

PUBLIC ROADS.—On Dec. 31, 1922, the total length of public roads was 2,930,000 miles, approximately 415,000 miles of which were surfaced roads. In 1922 the total expenditures for construction and maintenance were approximately $900,000,000.

SHIPPING.—On June 30, 1923, the mercantile marine of the U.S. consisted of 818 sailing vessels of 1,029,049 gross tons; 2,826 steam vessels of 12,322,247 gross tons, a total of 3,644 vessels of 13,351,296 gross tons. In the year ended June 30, 1923, sailing and steam vessels of 66,888,096 tons entered at the various ports of the U.S.; of this total 30,702,396 tons were American and 36,185,700 tons foreign. The tonnage cleared from the various seaports was 66,601,435, of which 30,591,002 tons were American and 36,010,433 tons foreign.

POSTS AND TELEGRAPHS.—On July 1, 1923, there were 51,613 post offices in the U.S. dealing (in 1922) with 22,578,894,140 "pieces" of mail matter of all kinds (letters, postcards, newspapers, packets, &c.). The telegraphs and telephones are not operated by the U.S. Government.

WEIGHTS, MEASURES, AND CURRENCY.

The *Weights and Measures* in common use are shown on page 429. The Metric System of Weights and Measures is permissive, but is little used. The unit of *currency* is the *dollar* of 100 *cents*. The rate of exchange on certain dates in 1922 will be found on p. 426.

Dependencies of the U.S.A.

THE PHILIPPINE ISLANDS

are situated between 4° 40′–21° 10′ N. lat. and 116° 40′–126° 34′ E. long., and are distant about 500 miles from the south-east coast of the continent of Asia. Their total land area is 115,026 square miles, of which total 94,946 square miles are contained in the eight largest islands, the 3,130 other islands having a combined area of 14,572 square miles. At the Census of 1918 the population was ascertained to be 10,314,310, almost all of Malayan stock, of whom 7,790,937 are Roman Catholic, 1,417,448 are Aglipayan, 124,575 are Protestant, 443,037 are Muhammadan, 508,596 are Pagan, 24,263 are Buddhists, and all others 5,454. Of the foreign-born residents about three-quarters are Chinese, and of the white population over one-half are from the United States (6,931 in 1921).

The Philippine Islands were discovered in 1521 by the Portuguese navigator Magellan, who was slain by the natives of Mactan. In 1542 Spain undertook the conquest of the islands, which were named "Filipinas," after the son of the King of Spain, and in 1571 the city of Manila was founded by the conquistador Legaspi, who subdued the inhabitants of almost all the islands, their conversion from barbarism and paganism being undertaken by the Augustinian friars in Legaspi's train. In 1762 the capital of the Spanish colony was occupied by a British force, but in 1764 the newly-acquired territory was restored to Spain. In the nineteenth century there were frequent disturbances in the islands, and at the outbreak of the Spanish-American War of 1898 a rebellion under Aguinaldo, a native leader, had just died down. Aguinaldo was deported, but on his return his assistance was accepted by Admiral Dewey, the commander of the American Pacific fleet, after the annihilation of the Spanish vessels in Manila Bay on May 1, 1898. Manila was captured by the American troops under General Wesley Merritt on Aug. 13, 1898, and the Islands were ceded to the United States by the *Treaty of Paris* of Dec. 10, 1898.

Sept. 1, 1923, the Philippine Scouts, which form a part of the United States regular Army, consisted of 104 officers (28 being citizens of the Philippine Islands), and 7,010 enlisted men. On the same date the regular Army in the Philippines (oher than the scouts), consisted of 500 officers and 4,071 enlisted men, many of these officers being on duty with the scouts. The Philippine constabulary, which is under the Philippine Government, in Sept., 1923, consisted of 376 officers and 5,642 enlisted men. All enlisted men in the scouts and constabulary are natives of the Islands, while almost all the constabulary commissioned personnel are Filipinos.

In 1921 the income of the Philippine Government was $34,001,101 and the bonded indebtedness $34,750,000. The expenditure on education in 1921 amounted to $7,058,502.64; the University had an enrolment of 4,718 students, and there were 943,364 pupils enrolled in the public schools. The principal exports are hemp, coconut oil, sugar and tobacco; the imports being cotton manufactures, and iron and steel manufactures. During 1922 the trade was valued at $95,583,298 for exports, and at $80,197,645 for imports, 56 per cent. of the imports being from U.S. and 67 per cent. of the exports being taken by the U.S. Sugar was the principal article of export in 1921, being valued at $25,013,310, Manila hemp $19,540,915, coconut oil $15,734,186, and leaf tobacco $2,273,117.

Towns.—Capital, Manila, in the island of Luzon; population (Dec. 31, 1918), 283,613. The next largest towns are Cebú (63,500), Albay (53,105), and Iloilo (49,808); there are several others with populations from 25,000 to 40,000.

GUAM.

Guam, the largest of the Ladrone or Marianne Islands in the North Pacific Ocean, lies in 13° 26′ N. lat. and 144° 39′ E. long., at a distance of about 1,506 miles east of Manila, the capital of the Philippine Islands, and forms a naval station between that dependency and the United States. The area of the island is estimated at 225 square miles, with a population on July 1, 1923, of 16,224, of whom 14,911 are classed as native, 811 of the naval station, and 502 other than native. The natives are of Chamorro stock, mingled with Filipino and Spanish blood. The language is a Malay dialect containing many Spanish words, but English is fast becoming the language of the island.

CAPITAL, Agaña. Port of entry, Apra.

Governor, Capt. H. B. Price, U.S.N.

PUERTO RICO.

Puerto Rico (Rich Harbour) is an island of the Greater Antilles group in the West Indies, and lies between 17° 50′–18° 30′ N. lat. and 65° 30′–67° 15′ W. long., with a total area of 3.435 square miles and a population of 1,299,809 at the census of 1920. Almost all the inhabitants are Roman Catholics. The island is about 100 miles from west to east, and 40 miles from north to south at the western end, narrowing towards the eastern extremity. The capital is 1,400 miles distant from New York, and 982 miles from Key West. Sugar is grown in the low-lying districts, and tobacco and coffee on the slopes of the hills; fruits, cotton, maize, sweet potatoes, rice, and yams are also grown. The trade is principally with the U.S. About 460 miles of railroad were in operation in June, 1922, and there are good harbours at San Juan and Ponce. The capital, San Juan, had 71,443 inhabitants in 1920, other towns being Ponce (41,912), Mayaguez (19,124), Arecibo (10,039), Bayamon (10,411), and Caguas (12,149). The legislative functions are vested in a legislature which consists of 2 elective houses; the Senate, composed of 19 members (2 from each of the 7 senatorial districts and 5 senators at large), and the House of Representatives, composed of 39 members (1 from each of the 35 representative districts and 4 elected at large). The term of the Legislature is 4 years.

Governor, Horace M. Towner..............$10,000

TUTUILA, AMERICAN SAMOA.

Under an agreement between Great Britain, the United States and Germany* (proclaimed Feb. 19, 1900), the first-named Power abandoned all claims to the islands of the Samoan Archipelago, which were then divided between the United States and Germany, the islands east of 171° W. long. being taken over by the U.S. The territory thus acquired consists of the island of Tutuila, Aunuu, Ofu, Olosega, Tau, and Rose Islands, with a total area of about 56 square miles and a population of 8,058 in 1920.

Tutuila, the largest of the group, has an area of about 40 square miles and a population of 6,185, and contains a magnificent harbour at Pago Pago, the capital and seat of government. The remaining islands have an area of about 16 square miles and a population of about 2,000, Rose Island being uninhabited. Copra is the only export of importance.

Governor, Captain E. S. Kellogg, U.S.N.

WAKE AND JOHNSTON ISLANDS.

The flag of the U.S. was hoisted on Wake Island in 1899, and three other islands in the Pacific have been annexed (Johnston, Palmyra, and Medway).

ALEUTIAN ISLANDS.

The *Aleutian Islands*, or Catherine Archipelago (also known as the Santa Barbara group), lie westward of the district of Alaska, and consist of four groups of islands (Fox, Andreanof, Rat, and Near Islands) between 52°–53° N. lat. and 172° E.–163° W. long. They have a population estimated at 2,000. The principal settlement is at Iliuliuk, on Unalaska Island. The group forms a part of the district of Alaska, and was transferred to the U.S. by Russia in 1867.

VIRGIN ISLANDS.

The three islands, St. Thomas, St. John, and St. Croix, in the Virgin Island group, West Indies, formerly the possessions of Denmark, were purchased by the United States from Denmark for the sum of $25,000,000, and proclaimed, January 25, 1917. The total area of the islands is 132 sq. miles, with a population in 1917 of 26,051. *St. Thomas* (28 sq. miles) has a population of 10,191; *St. Croix* (84 sq. miles) has a population of 14,901, the capital being Christianstäd (or Bassin): *St. John* (20 sq. miles) has a population of 960, the capital being Cruz Bay. St. Croix exports sugar and cotton.

---

* Under the *Treaty of Versailles*, 1919, the German Samoan Islands were allocated to New Zealand.

The revenue is derived from customs, income tax, ground and building tax, trade tax, &c. The estimated revenue for year ending June 30, 1924, Francs 1,370,000. There is a regular weekly service from New York to St. Thomas, and from Porto Rico to St. Thomas and St. Croix. The islands of St. Thomas and St. Croix possess wireless installations.

CAPITAL, St. Thomas, contains one of the finest harbours in the West Indies, accommodating vessels of large draught, and has a large coaling and oil refueling station.

Governor of the Virgin Islands, Capt. Philip Williams, U.S.N.

THE PANAMA CANAL.

The first suggestion for a canal across the Isthmus of Panama was made by a Spanish engineer in 1530, and surveys were actively engaged upon by various private companies between the years 1825 and 1890. In 1876 a concession for the construction of a canal was granted to a French promotion corporation, which conducted surveys during a period of two years, and reported to an international congress held at Paris in May, 1879, over which Ferdinand de Lesseps presided. This congress advised the construction of a canal at sea-level, and in 1881 the work was undertaken by the Universal Interoceanic Panama Canal Company, of which de Lesseps was nominal head. After two years of preparatory work, the first excavation was made on January 20, 1882. The amount of work to be accomplished proved to be greater than was estimated, and the conditions under which it was carried on more embarrassing. Sickness, interference of local officials, and mismanagement by the administration in Paris, resulted in the failure of the company, and a receiver was appointed in 1889. Under direction of the French courts a new company was formed to carry on the work, and, after a period of surveys, excavation was resumed in 1894. This was continued until May 4, 1904, when the United States Government took possession of the effects of the French company in Panama.

The interest of the United States in a canal across the Isthmus dates from 1825, and surveys under the auspices of that Government, or of companies organised in the United States, have been made at every available point between the Isthmus of Tehuantepec and the Atrato River. Actual construction, by an American company, of a canal across Nicaragua was begun in 1890, and abandoned in 1893, when the company failed for lack of funds. The failure of this company influenced the United States Government to take an active interest, and a commission was appointed in 1895 to make further studies and investigations. As a result of these investigations, the Congress of the United States authorised the President in 1902 to purchase the effects of the French company in Panama for $40,000,000. Meanwhile, a treaty was negotiated with the Government of Colombia for the cession, upon payment of $10,000,000, of the territory through which the canal was to be constructed. The failure of the Colombian Government to ratify this treaty led to the secession of Panama on November 3, 1903. The new Government was immediately recognised by the United States, and a treaty was signed on February 26, 1904, in which rights of sovereignty over a strip of land ten miles in width, extending across the Isthmus, were ceded to the United States. The canal is built through the centre of this territory. In 1922 a treaty between Colombia and the U.S. provided for the payment to Colombia of $25,000,000 in satisfaction of all claims arising out of the Canal controversy. The independence of Panama was recognised by this treaty.

Two years were spent by the United States Government in sanitation, the assembling of plant, and organisation and housing of a labour force; after which operations on a large scale were begun on all parts of the canal.

Including the purchase of rights, payments to Panama, and construction and operation of the canal and its adjuncts, the total appropriations by Congress to June 30, 1923, were $458,992,097. Tolls and other revenues, from its opening until June 30, 1923, amounted to $75,063,503. During the past two years they have averaged approximately $14,353,015 a year, or about $1,196,084 a month.

The canal is fifty statute miles long (43·84 nautical miles), and the channel is from 300 to 1,000 feet wide at bottom. The least width is in Culebra Cut, and the greatest in Gatun Lake, where the channel can be made much broader at any time by the cutting down of trees and a small amount of dredging. The water depth when the surface of Gatun Lake is at 85 feet above sea-level varies from 85 feet in some parts of Gatun Lake to 41 feet in the Atlantic entrance. The depth through Culebra Cut is 45 feet.

There are three essential parts: a lake formed by damming the Chagres River, and two channels leading from the Atlantic and Pacific Oceans to this lake. The surface of the lake is normally at 85 feet above sea-level, and the channels connecting it with the sea are at sea-level. Ships are lifted from the sea-level channels to the lake, or lowered from the lake to sea-level in locks. These locks have a usable length of 1,000 feet, width of 110 feet; least depth of water over the sills when lake is at normal level, 41⅓ feet. These dimensions limit the size of ships using the canal. The dam which forms the lake is situated at Gatun, about seven miles inland from the Atlantic. It is built of earth, with an impermeable core of fine sand and clay, and is 1½ miles long, half a mile wide at bottom, and 100 feet at the top, which is 105 feet above sea-level. The lake is known as Gatun Lake, and is 164 square miles in area. At its southern end is Culebra Cut, the channel through the continental divide. This is the most extensive excavation ever made. The French canal builders dug about 18,600,000 cubic yards out of this section of the canal, and the Americans have completed an excavation that amounts to over 130,000,000 yards. The total excavation from the canal prism is about 262,000,000 cubic yards, about 130,000,000 yards of which have been excavated in the dry and the balance by dredges. The amount of concrete used in the locks is 4,500,000 cubic yards.

The administrative organisation for the canal is known as "The Panama Canal," with the Governor of the Panama Canal (Col. Jay J. Morrow, U.S.A., retired) at its head. The Governor reports to the President, who has delegated the Secretary of War to have supervision over the canal for him. The Governor of the Panama Canal is President of the Panama Railroad.

In connexion with the construction and operation of the canal, extensive terminal and supply facilities have been constructed at both the Atlantic and Pacific entrances. These include marine and general repair shops, foundries, dry docks, five 1,000-foot steel and concrete piers, and a number of wharves, slaughter-houses, cold storage plants, ice plants, laundries, hospitals, coaling plants, fuel oil tanks and delivery plants, waterworks, commissary stores, storehouses of spare materials and ships' chandlery stores, and other accessories of great modern ports. An extensive transfer of cargo goes on at the Atlantic terminus of the canal, between ships plying the Atlantic and the Caribbean and ships which pass through the canal to or from Pacific ports. The 1,000-foot dry dock, with adjacent repair shops, at Balboa is an important assistance to shipping throughout the American tropics as well as a base for repairs for vessels of the Navy.

Health conditions are excellent, while the scenery is varied and attractive, with ruins of old Spanish towns and fortifications. Gatun Lake is studded with islands and surrounded by mountains. Shooting and tarpon fishing are excellent. The U.S. Government operates hotels at Colon and Ancon.

The number of commercial vessels passing through the canal in both directions in the fiscal year ending June 30, 1923, was 3,967, with a cargo tonnage of 19,567,875 tons, of 2,240 pounds. The total of commercial ships passing through the canal in the first seven years of its operation, from August 15, 1914, to June 30, 1923, was 19,802, of 74,671,519 net tons, Panama Canal measurement, carrying 80,916,281 tons of cargo.

SHAKESPEARE AND STRATFORD-ON-AVON.

OVER 200,000 visitors, from all climes and countries, yearly visit Stratford-on-Avon. High street still appears mediæval, and many oak-timbered houses attest the town's great age and dignity.

Shakespeare's Birthplace (April 23, 1564), at Stratford on-Avon, has been for over 200 years the goal of pilgrims. It was bought for £3,100 in 1847 and given to the nation. (Restored in 1857.) Managed by 26 Trustees (16 *ex-officio*). Holds library of rare editions, pictures, and relics. In the garden are many trees and plants named by the poet.

Clopton Bridge, built of stone, on 19 arches, about 1490 by Sir Hugh Clopton, Stratford native, and Lord Mayor of London.

Guild Chapel and Guildhall.—Built A.D. 1296. In the old hall young Shakespeare could witness strolling companies performing (mentioned in Records). In chapel were discovered beneath whitewash, 1804, mural allegorical paintings, done by mediæval priests.

Hall's Croft.—Unaltered old-timbered residence of Susanna, poet's daughter, wife of Dr. John Hall, churchwarden and poet's executor.

Harvard House. — Built 1596 by Alderman Thomas Rogers, whose descendant (John Harvard) founded Harvard University, U.S.A.

Hathaway Cottage.—At Shottery, one mile from Stratford, is the little thatched farmstead, the undisturbed birthplace of Anne Shakespeare, poet's wife, who bore him three children, Susanna, Hamnet, and Judith. Contains curious Tudor and Jacobean furniture. National property, controlled by Birthplace Trustees.

King Edward VI. School.—Founded by Thomas Jollyffe, priest, in Henry VI. reign; incorporated by Edward VI. Here Shakespeare acquired his "little Latin, less Greek," and matchless English.

The Shakespeare Memorial.—Mainly due to munificence of C. E. Flower (1830–92) and his wife. Group comprises *Library*, with 10,000 volumes of Shakespeare editions and ana including rare Wm. Jaggard collection. *Gallery* of pictures (including unique "Droeshout" portrait). *Museum* of antiques and relics (including Irving collection). *Lecture rooms*. Tower, affording views of 50 miles. *Gardens*, and *Statuary* (Lord Ronald Gower's gift). *Theatre* (800 seats) holding recurring festivals of the poet's dramas with varying programme daily. Recently nine different plays were given in six days. Special celebrations and performances, with floral procession to tomb, mark the birthday, April 23, each year.

New Place.—Site of the poet's retirement. Shakespeare bought this estate in 1597; retired to it about 1610; died there April 23, 1616. House was rebuilt about 1700, and demolished by Francis Gastrell, the iconoclast, 1759.

The Cage.—For 36 years the home of Judith, poet's younger daughter, who married Thomas Quiney, vintner.

Town Hall.—Erected 1633; rebuilt 1768. Contains details of the unbroken sequence of Bailiffs and Mayors since A.D. 1292 (including the poet's father, John Shakespeare). Exhibits: Gainsborough portrait of Garrick; four Corporation Maces, gilt silver of 15–16th Century, and ancient Corporate Sword.

Trinity Church.—Dates from A.D. 692. Of cathedral-like proportions. Shelters remains of poet and family.

The following Articles have been revised under the direction of the various Governments or of the British Representatives at Foreign Courts, to whom the Editor desires to express his warmest thanks. The Editor is also greatly indebted to the Embassies, Legations, and Consulates-General in London for various corrections and additions.

The Salaries and Allowances of Officers of H.M. Diplomatic, Commercial and Consular Services are fixed in accordance with the scale shown below:—

Vice-Consuls	300–600	100–150	100–200

ABYSSINIA or ETHIOPIA.

Empress, Waizeru Zauditu (daughter of late Emperor Menelek), *born* 1876; *elected* Sept. 27th, 1916.

Heir, H.H. Ras Taffari Makonnen, G.C.M.G. (Cousin of the Empress), *born* 1891.

The area of Abyssinia and its dependencies is estimated at 350,000 square miles, with an estimated population of 10 to 11 millions, of whom about one-half are Abyssinians and the remainder Gallas, negro tribes on the west and south frontiers, and Danakils and Somalis on the east. The political neighbours are the Sudan, the Italian colony of Massowah (Eritrea), the French colony of Djibuti, British Somaliland, Italian Somaliland, Kenya Colony and the Uganda Protectorate.

Abyssinia is volcanic and mountainous. It contains some mineral wealth; iron and coal are not uncommon, and gold is washed in various streams, while salt, saltpetre, and sulphur are also procurable. The lower country and deep valley gorges are very hot; the higher plateaus are well watered, with a genial climate. In the hotter regions, sugar-cane, cotton, coffee, rubber, &c., flourish; in the middle zone maize, wheat, barley, wild oranges and other fruit trees, tobacco, potatoes, &c., are cultivated; and above 6,000 feet are excellent pastures with some corn cultivation. There are two seasons in the year, a dry winter and a rainy summer from June to September. The chief river is the Blue Nile, issuing from the Tsana lake; the Atbara and many other tributaries of the Nile also have their rise in the Abyssinian highlands. Horses, mules, donkeys, oxen, goats, and sheep, and camels in the lowlands, form a large portion of the wealth of the people. Domestic slavery is general and has legal recognition.

The Abyssinians are Christian (a branch of the Coptic Church), and their rulers claim descent from Menelek, the son of Solomon by the Queen of Sheba. The form of government is a feudal despotism. There is no popular literature, and little education. The potential army numbers at least 300,000, armed with rifles. The principal pursuits are agriculture and cattle breeding. The chief exports are coffee, civet, wax, hides, rubber, ivory, and gold. The total trade is valued at about £2,000,000 for imports and exports, but it continues to suffer severely from the prevalent depression. The import duty on all goods at Gambela is 10 per cent. *ad valorem*, and at Dire-Dawa and Harrar 8 per cent. *ad valorem*; in the interior the duty is variable, and 3 per cent. addition is imposed on goods brought to the capital. A railway (495 miles) has been built under French auspices from Jibuti to the capital, *viâ* Dire Dawa. The posts and telegraphs are under French management. The principal towns besides Addis Ababa, are Adwa (the capital of Tigré), Gondar, Debra-Markos, Saiyu, Aksum, Antalo, Ankober, Goré, Dembecha, Ijubé, Jimma, and Harrar. There are ancient architectural remains at Aksum, Gondar, and Ankober; modern architecture is very poor.

Capital, Addis Ababa (population fluctuates, but is ordinarily about 50,000). Harrar, in Eastern Abyssinia, has a population of about 45,000.

Imports from U.K. (1921)	£54,207
Exports to U.K. (1921)	4,800

Flag: Green, red, yellow.

British Legation.

Envoy Extraordinary, Minister Plenipotentiary and Consul-General, C. F. W. Russell (1920) £3,150

Oriental Secretary, Ph. P C. Zaphiro, C.M.G.

Secretary to Minister, E. W. Thomas.

British Consular Officers.

Addis Ababa—Consul, G. H. Bullock.

Jibuti—Vice-Consul, Glen Billing.

Harar—Consul, C. H. F. Plowman.

N.W. Ethiopia (Dangila)—Consul, A. D. Home.

Southern Ethiopia (Mega)—Consul, Maj. A. T. Miles, D.S.O.

Western Ethiopia (Gore)—Consul, Craven H. Walker, O.B.E.

S.W. Ethiopia (Magi)—Consul, Arnold W. Hodson, C.M.G.

Adis Ababa is 500 miles from Zaila, *viâ* Harar; letters from London are from 20 to 24 days in transit if the mail connects with steamer service from Aden; train from Djibouti takes 3 days; caravans take from 35 to 45 days.

AFGHANISTAN (*see* p. 634).

ALBANIA.

(Shkiperia.)

Regents, Refik Toptani; Sotir Peci; Djafer Ypi; G. Tchoba.

President of the Council of Ministers (Dec. 4, 1922), Ahmed Zogu.

Minister of Foreign Affairs, Pandeli Evangheli.

Minister in London, H.E. Mehmed Konitza, 8 Onslow Gardens, S.W. 7.

Consul-General, Capt. H. Lyon Thomson, 34, St. James's Street, S.W. 1.

Albania (the former Turkish Province of Scutari and parts of Kossovo and Yanina,) lies on the west of the Balkan peninsula of south-eastern Europe, the western boundary being the Adriatic; total area about 20,000 sq. miles; total population estimated (1922) at 1,000,000. The political neighbours are, on the north and east Yugo-Slavia, and on the south-east and south Greece. Albania was declared independent by a National Assembly at Valona, Nov. 28, 1912, and its independence was confirmed by the *Treaty of London* of Dec. 20, 1912. The first King of Albania (Prince William of Wied) abandoned the throne in Sept. 1914, and during the Great War the country was invaded by troops of the Central Powers and of the Allies. After the Armistice (Nov. 11, 1918) a National Council at Durazzo established a provisional government. The independence of the country was guaranteed by the Supreme Council of the Allies. The government is exercised by Regents, representative of the various religious bodies, the executive being entrusted to a council of Ministers, responsible to the elected diet. Cattle rearing and agriculture (grain and tobacco) are the principal industries and there is some mineral wealth.

CAPITAL, Tirana (pop. 12,000); other centres are Scutari (pop. 32,000); Elbasan (pop. 13,000); Berat (pop. 8,500); Korytza (pop. 18,000); Durazzo (pop. 5,000); and Valona (pop. 7,000).

British Envoy Extraordinary, Minister Plenipotentiary and Consul-General, Harry Charles Augustus Eyres (1922), Durazzo. (*And local allowance*, £600) .... £1,200.

Durazzo—Vice-Consul, Robert Parr (*acting*).

ANDORRA.

A miniature Republic in the Pyrenees, with an area of 175 sq. miles, and a population of 5,500; it is under the joint suzerainty of France and Spain. There is a Council of Twenty-four, elected by certain of the inhabitants, a judge, and two lay vicars appointed by France and the Spanish Bishop of Urgel.

ARABIA.

Arabia is a peninsula in the south-west of the Asiatic continent, forming the connecting link between Asia and Africa, and lies between 30° 30′—60° E. long. and 12° 45′—34° 50′ N. lat. The north-western limit is generally taken from Akaba, at the head of the Gulf of Akaba, to a point in the Syrian Desert about 150 miles north-east, and thence northwards to a point about 50 miles due east of Damascus. The remaining land boundaries are in the form of a horse-shoe, encompassing the Syrian Desert, and descending in a south-easterly direction to the head of the Persian Gulf, and thus excluding the whole of Mesopotamia and the Euphrates Valley. The other boundaries of Arabia are the Red Sea and Gulf of Aden, the Arabian Sea, and the Persian Gulf and Gulf of Oman. Generally speaking, the peninsula consists of a plateau sloping from south-west to north-east towards the Euphrates Valley, except that the broad south-eastern promontory, which encloses the Persian Gulf, contains a coastal range in the Sultanate of Oman.

The total area is estimated at 1,200,000 sq. miles (of which nearly one-half is occupied by the Syrian, Nafud, and Dahna deserts), and the total population is believed to be about 5,000,000.

The organisation of the Native States of Arabia is to be developed under British auspices, the principal rulers (the King of the Hejaz and the Imam of Yemen) being subsidised under certain conditions (control of foreign relations by British advisers and maintenance of internal peace by native rulers). The various Arab States are shown below:—

THE KINGDOM OF THE HEJAZ.

King of the Hejaz, El Hussein ibn Ali.

On June 5, 1916, the Grand Sherif of Mecca (hereditary Keeper of the Holy Places) threw off the Turkish allegiance and declared the independence of the former vilayet of Hejaz. In concert with the British Imperial forces under General Allenby, the armies of the King of the Hejaz (under the leadership of the Emir Feisal) penetrated northward, through the districts E. of the Jordan, to Damascus, and the territories of the new kingdom extend from Asir (*see* below) in S. to Palestine and Syria in N., and from the Red Sea, the Gulf of Akaba, and Palestine in the W. to the ill-defined boundaries of Central Arabia.

Parallel with the Red Sea coast runs the Tehama range (Jebel Shar, or Mount Seir, 7,000 feet, and Jebel Radhwa, 6,000 feet). On the coast are the small ports of Muwela, Damgha el Wijh, Yambo, Rabigu and Jeddah (the chief port of the country and the pilgrims' port), which contains the reputed "tomb of Eve, the mother of mankind"; and inland are many settlements through which runs the Hejaz Railway. The *Oasis of Khaibar*, east of the railway, contains a considerable population, descendants of former negro slaves, with a Jewish centre at Kasr el Yahudi. The importance of the Kingdom of the Hejaz depends upon the pilgrimages to the holy cities of Medina and Mecca. *Medina* (*Al Medina*, "The City"), 820 miles by rail from Damascus, and the present terminus of the Hejaz Railway, has a permanent population of about 20,000, and is celebrated as the burial place of Muhammad, who died in the city on June 7, 632 (12 Rabia, A.H. 11). The Mosque of the Prophet (500 feet in length and over 300 in breadth) contains the sacred tomb of Muhammad. *Mecca*, the birthplace of the Prophet, is 55 miles east of the seaport of Jeddah, by road, and about 200 miles south of Medina, and has a fixed population estimated at 60,000. The city contains the great mosque surrounding the *Kaaba*, or sacred shrine of the Muhammadan religion, in which is the black stone "given by Gabriel to Abraham," placed in the south-east wall of the Kaaba at such a height that it may be kissed by the devout pilgrim. *Jeddah*, the principal port, has a considerable trade in hides, mother-of-pearl, coffee and carpets.

The *Hejaz Railway* runs from Medina in S. through the Syrian Desert to Damascus and Beirut, and is connected with the projected Baghdad Railway at Aleppo. The total area under the rule of the King of the Hejaz is about 112,500 sq. miles, with a population of from 350,000 to 400,000, including many nomad tribes.

CAPITAL, Mecca (pop. 60,000).

THE EMIRATE OF NEJD AND HASA.

Emir, Abd-el-Aziz es Saud, K.C.I.E.

This former vilayet was in the 18th century an independent Empire of the Wahabites, and has reasserted its autonomy under a representative of the former dynasty. It is known as "the true home of the Arab," and extends across the oases of Central Arabia, from the eastern boundary of Hejaz to the Persian Gulf. During military operations in 1913, the Emir of Nejd captured Hufuf (the capital of El Hasa), and extended his rule over the former Turkish province of El Hasa. The capital, Riyadh, is a station on the Pilgrims' trans-Arabian caravan route from El Hasa to Mecca, and contains a large mosque, the "Westminster Abbey" of the Wahabi Moslems. The principal trading centre is Anaiza in the central province of Qasim (Nedj). The principal port on the Persian Gulf is El Katif, on Bahrein Bay (El Hasa).

THE PRINCIPALITY OF KUWEIT.

Ruler, Sheikh Ahmad al-Jabir as-Subah, C.I.E.

Kuwait (or Koweit) has been semi-independent for many years, and is in treaty relation with British India. It extends along the shore of the Persian Gulf from Mesopotamia to Nejd (El Hasa). The important harbour and gulf port of Kuweit, the capital (pop. 50,000), is an entrepôt for goods for the interior, and for the export of horses, pearls, wool, &c. It was designated as the terminus of the Berlin–Constantinople–Baghdad railway as originally projected in 1903.

Political Agent, Major J. C. More, D.S.O.

THE SULTANATE OF OMĀN.

Sultan, Seyyid Taimur bin Faisal, *born* 1886, *suc.* 1913.

Omān (area 82,000 sq. miles, estimated pop. 550,000) is a Muhammadan State in S.E. Arabia with a coast-line of about 1,500 miles along the Persian Gulf, the Gulf of Omān, and the Arabian Sea from El-Katar to Ras Sair. The country, much of which is arid and desert, attains in Jebel Akhdhar an elevation of 10,000 feet. The population is chiefly Arab, but includes also a considerable foreign element—Indians, Persians, Baluchis and Swahili negroes. The Sultan is in treaty relations with, and subsidised by, the Government of India, who have a political agent at his capital. In 1913, at the end of the reign of the last Sultan, the tribes of the Interior rose in rebellion, and, having elected their own Iman or Spiritual Ruler, have since administered the whole of Omān proper, the efforts of the Sultan to establish his control having been, up to date, unsuccessful. This rebellion has, with the war, interfered with the prosperity of the country. The Sultan is pledged not to cede territory to any Power but the British Government. Muscat has a considerable trade, amounting in 1916–17 to £408,046, and in 1917–18 to £323,915, a decrease owing to interior disturbances due to the war. Dates are the chief export, and rice, wheat, coffee, cotton and silk goods the chief imports. The capital, Muscat, has an estimated population of 24,000.

Muscat—British Consul and Political Agent, R. E. L. Wingate............*per mensem* Rs. 2,250

THE EMIRATE OF JEBEL SHAMMAR.

Emir, Abdullah ibn Mitab er Rashid.

Jebel Shammar is a Bedouin community of Central Arabia, extending across the oases from Hejaz on the west to Kuweit on the east, with Nejd as a southern neighbour. Its boundaries are indeterminate, and the total population in allegiance to the Emir is believed to be about 200,000. The capital is Hail, between the two Shammar ranges (Jebel Aja and Jebel Salma) with a population of about 12,000.

THE IMAMATE OF ASIR.

Imam, Ali ben Muhammad, *succeeded* March 21, 1923.

The territory of the Idrisi (who claims the Imamate of Asir and part of Yemen), extends along the Red Sea littoral, approximately from Hali Point to Loheia. It includes part of Asir, part of Yemen and the Farsan Islands, and extends inland to the Dahna Desert. The maritime lowland is interspersed with fertile areas near the wadis, which afford pasturage and bear grain. The capital is Sabia, a small inland town.

THE IMAMATE OF YEMEN.

Imam of Sana'a, Yahya Muhammad Hamid ed-Din.

Yemen occupies the S.W. corner of the Arabian peninsula, between the Imamate of Asir and the British dependency of Aden, with an estimated area of 74,000 sq. miles and a population of 600,000 to 700,000. It was formerly divided into the vilayets of Sana'a, Taiz, Asir and Hodeida, and it extends inland to the Dahna Desert and to the tribal territories of Hadramut. Part of Yemen is now included in the territories of the Idrisi (Imam of Asir), and of the remainder the greater part is under the rule of the Imam of Sana'a. On the plateau between the coast and the Dahna Desert (a district known as *El Jebel*) are the most fertile parts of Arabia, where wheat, barley, millet and coffee are extensively grown. The sea port of *Mocha* has become associated with the coffee export trade, but in this trade (and in all others) it is of secondary importance to *Hodeida*. The trade of Yemen probably exceeds that of the remainder of Arabia. The capital is the walled city of Sana'a (pop. 20,000), and about 70 miles to the S. of the capital is Dhamar, an ancient seat of learning, and the headquarters of the Zaidi sect of the Muhammadans.

THE HADRAMUT TRIBES.

The coastal region of Southern Arabia, between Yemen and Aden on the west and Oman on the east, and extending inland (northwards) to the Dahna Desert, contains a coastal strip of some 550 miles. Parallel with the coast (at a distance of 50 miles from the Arabian Sea) is an extensive plateau inhabited by the Hadarim, an ancient people of Arabian stock (Hadoram was the son of Joktan, *Genesis* x., 27). There are many settlements on the coast and in the interior, but the latter are being steadily enveloped by the sand of the northern desert. There are sacred shrines near Kasm (Kabr Hud) and Shibām (Kabr Sālih). The eastern districts, known as Mahra and Gara, are very sparsely populated. The estimated area of Hadramut is 82,000 sq. miles, and its Muhammadan population, of independent Arab tribes, is estimated at 150,000. The most important Coastal Chief is the *Sultan of Shakr and Mokalla*, K.C.I.E., who is in treaty relations with Great Britain. Inland, the most important tribe is the Kathiri, whose chief towns are Sey yem and Terim. The Kathiri are noted as travellers and traders, and many of them are settled and carry on commerce at Singapore and Java. A long-standing feud between the Kathiri and the Ka'iti (by whom the former were expelled from the coast) was settled by treaty in 1919 on the initiative of the Aden Government. Under this Treaty the Ka'iti *Sultan of Mokalla* permits access to the port of Mokalla on the part of Kathiri traders. Agriculture and cattle raising are the principal industries, together with the cultivation of dates, indigo and tobacco.

ARGENTINE REPUBLIC.

(República Argentina.)

President (1922–28), Dr. Marcelo T. de Alvear, *assumed office*, Oct. 12, 1922......$96,000
Vice-Pres. (1922–28), Dr. Elpidio Gonzalez 36,000

Minister of the Interior, Dr. José Nicolás Matienzo.
Foreign Affairs, Dr. Angel Gallardo.
Finance, Dr. Rafael Herrera Vegas.
Justice and Public Instruc., Dr. Celestino Marco.
Agriculture, Dr. Tomás A. Le Breton.
War, Col. Agustin P. Justo.
Marine, Adm. M. Domecq-García.
Public Works, Dr. Eufrasio S. Loza.

Minister in London, Señor Dr. J. Evaristo Uriburu, 26 Park Lane, W. 1.
First Secretary and Counsellor of Legation (and Chargé d'Affaires ad interim), Señor Don Paulino Llambi Campbell.
First Secretary and Counsellor of Legation, Señor Don Luis Dominguez.
Second Secretary, Señor Don Carlos Miguens.
Naval Attaché, Capt. Diego G. Garcia.
Military Attaché, Lt.-Col. Mones Ruiz.
Financial Secretary, Señor Don Carlos Dominguez.
Consul-General, Dr. Sergio Garcia Uriburu, 7 Gower Street, W.C. 1.
Asst. Consul, Don Horacio Fernandez Beschtedt.

There is a Consulate-General at *Dublin*, and there are also Consulates at *Liverpool*, *Southampton*, *Cardiff*, *Manchester*, *Newcastle-upon-Tyne*, *Newport*, and *Glasgow*; and Vice-Consulates at *Aberdeen*, *Belfast*, *Bristol*, *Hull*, and *Swansea*.

Argentina is a wedge-shaped country, occupying the greater portion of the southern part of the South American Continent, and extending from Bolivia to Cape Horn, a total distance of nearly 2,300 miles; its greatest breadth is about 930 miles. It is bounded on the north by Bolivia, on the north-east by Paraguay, Brazil, and Uruguay, on the south-east and south by the Atlantic, and on the west by Chile, from which Republic it is separated by the Cordillera de los Andes. On the west the mountainous Cordilleras, with their plateaus, extend from the northern to the southern boundaries; on the east are the great plains, those in the north are thickly wooded and are known as *El Gran Chaco*, and further south lie the treeless pampas, which together constitute *La Plata*, extending from the Bolivian boundary in the north to the Rio Negro; and south of the Rio Negro are the vast plains of Patagonia. Argentina thus contains a succession of level plains, broken only in Cordoba by the San Luis and Cordoba ranges, and in the north-western states by the eastern spurs of the Andes. The Paraná River, formed by the junction of the Upper Paraná with the Paraguay River, flows through the north-eastern states into the Atlantic, and is navigable throughout its course; the Pilcomayo, Bermejo, and Salado del Norte are also navigable for some distance from their confluence with the Paraná. In the Province of Buenos Aires the Salado del Sud flows south-east for some 300 miles into Samborombon Bay (Atlantic). In the south the Colorado and Rio Negro rise in the extreme west and flow across the pampas into the Atlantic, many similar streams in Patagonia (notably the Chubut and Santa Cruz) traversing the country from the Andes to the Atlantic.

The Republic is composed of 14 provinces and 10 territories, comprising in all about 1,132,000 square miles, with a population of 8,698,516 in 1921. Immigration is encouraged, and comes principally from Spain and Italy, but legislation, introduced in 1919, requires intending immigrants to produce certificates of good character and ability to work. In 1920 the immigrants numbered 155,322 and the emigrants 104,711, a net influx of 50,611. The climate is moderate and healthy. Spanish is the language of the country.

Government.—The estuary of La Plata was discovered in 1515 by Juan Diaz de Solis, but it was not until 1534 that Pedro de Mendoza founded Buenos Aires. In 1810 Spanish rule was overthrown, and in 1818 the independence of Argentina was complete, although not acknowledged by Spain until 1842. In 1853, after more than thirty years of disturbances and civil wars, the country settled down, and is now a well-governed and progressive Republic. The constitution dates from 1853 (revised 1859) and is modelled on that of the U.S. of America, but each province enjoys practically complete autonomy. The executive is in the hands of the President, who selects his Cabinet. The National Congress consists of a Senate of 30 members and of a House of Deputies of 160 members. Members of Congress receive $9,000 *per annum*.

Production.—Of the total area about one-third is suitable for agriculture and cattle raising, and vast tracts are held by the Federal Government for sale or lease to colonists. The principal productions are wheat, maize, oats, linseed, sugar, wine, wool, hides, cattle, sheep, and horses. The yield of the harvest of 1921–22 was 4,600,000 tons of wheat, 910,000 tons of linseed, and 478,600 tons of oats; there were in 1920 27,392,126 cattle, 45,303,419 sheep, 9,366,455 horses, 600,000 mules, 4,670,130 goats and 3,227,346 pigs. The export of frozen beef and mutton is an important industry. The exports are made up entirely of pastoral and agricultural products, with the exception of quebracho, copper, manganese, and wolfram. In 1920, there were 4,500 registered wine presses, handling about 600,000 tons of grapes, the output in 1919 being over 4,000,000 hectolitres (88,212,000 gallons). The export of wine to neighbouring South American States is increasing annually, and the importation of wine has almost ceased.

Communications.—There were (1922) 21,935 miles of railroad open. The railroads are almost entirely in the hands of British companies, and absorb about £234,000,000* of British capital. Telegraphs about 43,153 miles, mostly Government lines. There are 22 wireless stations, of which one is reserved for communication between England and the Argentine. There are several aeroplane services between Argentine centres, and an air mail service between Buenos Aires and Monte Video, Uruguay. The principal ports are Buenos Aires, Rosario, La Plata, and Bahia Blanca. The number of steam and sailing merchant vessels from oversea ports which entered Argentine ports in 1921 was 1,308 of a total tonnage of 4,381,200.

Defence.—The Navy consists of 2 super-Dreadnought battleships, 2 river monitors, 4 armoured cruisers, 3 cruisers (old), 4 torpedo gunboats, 7 destroyers, and 2 first class and 6 second class torpedo boats. Strength about 5,000 men. There is a naval post at Bahia Blanca. The National Militia has a peace footing of about 30,000, with reserves of 250,000; on a war footing the Army would comprise 5 divisions of 20,000 each.

---

* A total of about £400,000,000 British capital is invested in the Argentine.

Education.—Primary Education is secular, free and nominally compulsory from the ages of 6 to 14, but only some 45 per cent. of attendances are secured. *Secondary* Education is controlled by the Federal Government in lyceums and normal schools, with an average attendance of 6,000. There are also *Special Government Schools*—1 naval, 1 military, 1 mining, and 1 agricultural. There are *National Universities* at Cordoba and Buenos Aires, and *Provincial Universities* at La Plata, Santa Fé, and Paraná.

ARMENIA. *See* Russia.

AUSTRIA.

(Oesterreich.)

President of the Federation, (Nov. 20, 1920), Dr. Michael Hainisch.
Federal Chancellor, Monsignore Dr. Ignaz Seipel.
Foreign Affairs, Dr. Alfred Grünberger.
Vice-Chancellor and Interior, Dr. Felix Frank.
Education, Dr. Emil Schneider.
Finance, Dr. Victor Kienböck.
Justice, Dr. Leopold Waber.
Agriculture and Forestry, Rudolf Buchinger.
Social Welfare, Richard Schmitz.
Commerce and Communications, Dr. Hans Schürff.
War, Karl Vaugoin.

Minister in London, Baron George Franckenstein, 18 Belgrave Square, S.W. 1.
Counsellor, Adolph Kunz
Attaché, Walter Bräunl.
For Debt Clearing, Dr. Felix Weiser.

Prior to the War the Austrian Empire, joined to the Kingdom of Hungary by the identity of sovereigns, was the largest Empire, next to Russia, on the continent of Europe, situated between 42°–51° N. lat. and 9° 30′—26° 20′ E. long. It embraced an area of 240,456 sq. miles, and a population (1914) of nearly 53,000,000, and included Upper and Lower Austria; Bohemia; Bukovina; Carinthia, Carniola, Dalmatia, Görz and Gradiska, Istria, Moravia, Salzburg, Silesia, Styria, Trieste, Tyrol and Vovarlburg; with Bosnia and Herzegovina as administered territories. At the conclusion of the War, the territories of the Austrian Republic comprised an area of 31,756 square miles, with a population (1920) of 6,067,000.

On June 28, 1914, the assassination of the Austrian Archduke Francis at Serajevo (Bosnia) was presumed to be the outcome of a plot fostered by Serbia, and after negotiations an ultimatum was presented by the Empire to the Serbian Government (July 23), and non-compliance with its terms led to the European War of 1914–18. Before the armistice of Nov 11, 1918, Hungary had seceded from the "Dual Monarchy," and a Republic was declared Nov. 12, 1918, the throne being abdicated by the Emperor Karl (Nov. 28, 1918).

Under the *Treaty of St. Germain* (Sept. 10, 1919) the political neighbours of the Austrian Republic are the Republics of Germany and Czecho-Slovakia on the N.; the Kingdom of Italy, and the Yugo-Slav Kingdom on the S.; Switzerland on the W., and Hungary on the E.

Under the new Constitution (Nov., 1920), Austria became a Republican Federation of eight Provinces:—Lower Austria and Vienna, Upper Austria, Carinthia, Styria, Salzburg, Tyrol, Vorarlberg and Burgenland (West Hungary); the Bundesrat and Nationalrat were constituted; a government formed, and a President elected. The elections resulted in a majority for the *Christian Socialists* over the *Social Democrats*, the *Pan-Germans* coming next in order. In June, 1921, the Ministry resigned in favour of a non-party Government, which gave way (May, 1922) to a Christian Socialist Pan-German

---

* There is also a debt of some £50,000,000 consisting of short-term loans, &c.

Coalition Government under Doctor Seipel (a priest). There is a considerable body of opinion in favour of the inclusion of Austria in the German Reich and, on the other side, for a close alliance with Hungary.

Complete religious liberty is one of the fundamental laws of the new Republic. In 1915 the prevailing religion of the German-speaking people was Roman Catholic.

Finance.—The finances of Austria went from bad to worse for four years after the Armistice, owing to heavy deficits and incessant inflation. The deficit on the State Budget was estimated in July, 1922, at considerably more than one billion crowns, and by Oct., 1922, the exchange value of the crown had sunk to about one-fifteen-thousandth of its nominal value, £1 being equal to 325,000 crowns (in place of 24·22). The circulation on Sept. 30, 1922, was over two billion crowns. In September and October, 1922, the League of Nations worked out a scheme for the restoration of the Austrian finances within two years under the control of a High Commissioner appointed by the League, the Governments of Great Britain, France, Italy, and Czecho-Slovakia agreeing to guarantee four-fifths of a loan of 520,000,000 gold crowns (about £25,000,000) in order to fill the deficit in the Budget during the two years. The guarantees for the remainder were given by other powers and a short term loan of £3,500,000 was issued in March, 1922. In the following June the big League of Nations loan was successfully floated, nearly one-half in London, about £5,000,000 in New York, and the rest in various continental capitals. The sum actually received amounted to over £26,500,000. About £11,000,000 was used to repay the previous short term loans made in 1922 and 1923. The remainder of the big loan will, it is expected, be sufficient to cover the diminishing deficit until the end of 1924. The High Commissioner, Dr. Zimmermann, appointed by the League of Nations to supervise the carrying out of their scheme for the reconstruction of Austria, entered on his office in Dec., 1922. Great progress has been made since in reducing Government expenditure and increasing the revenue. Thus nearly 50,000 superfluous officials were dismissed or pensioned off by the end of June, 1923. The issue of uncovered bank-notes was stopped on Nov. 18, 1922, and the Austrian crown has been stabilised at about Crs. 320,000 = £1. Since the Armistice (Nov. 11, 1918), the British Government has advanced about £10,000,000 to the Republic.

The following apportionment of the pre-War Debts of the Austro-Hungarian Monarchy has been suggested :—

To.	Austrian Debt.	Hungarian Debt.
Austria	36·5	1·5
Czecho-Slovakia	41·5	16·6
Fiume	...	0·7
Hungary	...	45·6
Italy	4·7	...
Poland	13·5	...
Rumania	1·5	21·5
Serbia	2·3	14·1
Total	100·0	100·0

Industries.—The principal industry is agriculture, the chief products being wheat, barley, oats, rye, maize, and potatoes. Forestry and stock raising are important. The forests are principally coniferous trees. The live-stock includes horses, cattle, sheep, pigs, and goats. The vine is extensively cultivated. The most important mineral production is that of iron ore, magnesite, and salt; there are also lead, zinc, copper, common and brown coal, and graphite. The principal manufactures are woollens, cottons, steel, wood-work, brewing, and machinery.

Communications.—In Sept., 1919, there were about 3,800 miles of railway (exclusive of narrow gauge lines). The mercantile marine was considerable in 1914 but the new Republic is land-locked.

Defence.—During the War of 1914–18 about 5,000,000, all ranks, were passed into the common Army of Austria-Hungary. The total casualties exceeded 2,500,000, of whom over 700,000 were returned as killed. Under the *Treaty of St. Germain* the military, naval and air forces were demobilised and reduced to minimum requirements and all warships were surrendered to the Allies, those under construction being broken up. Service in the Republican Army is by voluntary enlistment for twelve years.

	1922.
Total Imports	£66,344,000
Total Exports	£43,950,000
Imports from U. K.	£1,450,000
Exports to U. K.	£1,582,000

CAPITAL, Vienna, on the River Danube. Pop. (1920) 1,841,326; other large towns are Gratz (160,000), Linz (93,000), and Innsbruck (60,000).

Consul, Glasgow, P. S. Dunn, C.B.E.

A Kingdom of Central Europe, with a total area (1920) of 11,392 square miles and a population (Census of 1919) of 7,577,027. Belgium is bounded on the N. by the Kingdom of the Netherlands, on the S. by France, on the E. by Germany and Luxemburg, and on the W. by the North Sea. The kingdom formed part of the "Low Countries" (Netherlands) from 1815 until Oct. 14, 1830, when a National Congress proclaimed its independence, and on June 4, 1831, Prince Leopold of Coburg was chosen hereditary king. The separation from the Netherlands and the neutrality and inviolability of Belgium were guaranteed by a Conference of the European Powers, and by the *Treaty of London* (April 19, 1839), the famous "Scrap of Paper," signed by Austria, France, Great Britain, Prussia, The Netherlands, and Russia. On Aug. 2, 1914, the Germans invaded Belgium and ultimately overcame the resistance of the fortresses and overran almost the whole country. In revenge for the heroism of its defenders the Germans sacked and destroyed many cities, burning Louvain (with its library), Termonde, and other places, and established a reign of terror. They levied a war contribution on Belgium of close on £100,000,000, apart from enormous fines on localities, firms, and private persons. On Friday, Nov. 15, 1918, at the great turn of the tide, Antwerp was reoccupied by the victorious Belgian army, and Brussels and the remainder of Belgian soil a few days later. About 10,000 persons were added in 1919 by the cession of Moresnet and part of Malmédy by Germany, and the district of Eupen, with the remainder of the district of Malmédy, were ceded by Germany and annexed by Belgium (Sept. 20, 1920) after a plebiscite, thus adding a further 50,000 to the inhabitants.

French and Flemish are the joint official languages, but while French is the language of the upper classes, Flemish is spoken by the majority, preponderating in Flanders, Limburg, and Brabant, including Antwerp. Nearly all the inhabitants are, at least nominally, Roman Catholics.

Belgium has a frontier of 831 miles, and a seaboard of 42 miles. The Meuse and its tributary the Sambre divide it into two distinct regions, that in the west being generally level and fertile, whilst the table-land of the Ardennes, in the east, has for the most part a poor soil. The "polders" near the coast, which are protected by dikes against floods, cover an area of 193 sq. miles. The highest hill, Baraque Michel, rises to a height of 2,230 feet, but the mean elevation of the whole country does not exceed 536 feet. The principal rivers are the Schelde (Escaut) and the Maas (Meuse). Brussels has a mean temperature of 50° F. (summer 65°, winter 37°).

GOVERNMENT.—The constitution jointly vests the legislative power in the King, the Senate, and the Chamber of Representatives. The 120 senators (with the exception of 27 elected by the provincial councils) and 186 representatives are elected by the people, the former for eight, the latter for four years. Universal male suffrage, with plural voting up to three votes by property and educational qualifications, was introduced by the Electoral Law of 1894, proportional representation being secured by an Act of 1900. In April, 1919, the Belgian Parliament decided as an emergency measure to hold 1919 elections on a "one man one vote" basis for Senate and Chamber. (Unmarried widows of soldiers killed before Jan. 1, 1919, or failing widows, the mothers; widows or mothers of civilians shot by enemy; women imprisoned by enemy for patriotic acts, also voted.)

This Parliament, anomalous, and unconstitutionally elected, was required to make constitutional the machinery by which it was elected; *i.e.*, to revise article 47 of the Constitution. This has not yet been done (Oct. 1920), but it is unlikely that the outworn method of plural voting will ever again be resorted to.

Deputies receive 4,000 francs a year and a free pass over the railways. There are in addition representative Provincial and Communal Councils, elected on a somewhat more liberal franchise.

PRODUCTION.—Agriculture and forestry are important industries, the chief crops being oats, rye, wheat, potatoes, barley and sugar-beet. Under Annex IV. of the *Treaty of Versailles* Germany undertook to deliver to Belgium certain live stock to replace the animals seized or destroyed during the War of 1914–1918. Belgium is essentially a manufacturing country, and it is largely dependent upon foreign supplies for its food. The mineral kingdom yields coal, iron, zinc, lead, and copper. The leading industries are collieries, quarries, and metallurgic (Mons, Charleroi, Liège, Namur, Hainaut, and Brabant), glass, textiles (Verviers), lace (Brussels, Mechlin, Bruges, &c.), flour and starch mills, sugar, distilleries, breweries, &c.

DEFENCE.—In 1914 the *Army* on a peace footing consisted of about 50,000, all ranks. In the War of 1914–1918 over 500,000 passed into the armies, which were reorganised on French territory during the defensive period of the campaigns. An organised force of 200,000 co-operated with the Allies during the decisive offensive of the autumn of 1918. Those returned as dead or missing, during the War, numbered 102,382. Belgium has no *Navy*.

EDUCATION.—Schools are maintained by communal taxation, with provincial and State grants, while many are under ecclesiastical control, Roman Catholic largely predominating. There are 134 State high schools, including 44 for girls, and numerous private institutions. Special schools abound. The Universities of Ghent and Liège are maintained by the State; those of Brussels and Louvain are free institutions. Louvain University is to be rebuilt. A Flemish University was opened at Ghent in 1923, after considerable opposition.

	1922.
Revenue	*Francs* 2,573,178,913
Expenditure	3,468,143,961
Debt (Dec. 31, 1922)	37,790,665,862
Imports (1921)	402,057,000
Exports (1921)	285,593,000
Imports from U.K. (1922)	£24,831,350
Exports to U.K. (1922)	23,657,000

The imports in 1921 were: manufactured articles (2,725,367,000 francs), raw materials (4,003,102,000), foodstuffs and beverages (3,185,293,000), and live animals (137,673,000); the exports were: raw materials (3,153,803,000 francs), manufactured articles (3,002,709,000), and foodstuffs and beverages (932,825,000).

COMMUNICATIONS.—In 1919 there were 4,649 kilometres of railway, almost the whole length destroyed during the War having been repaired or relaid. In 1919 there were 15,160 miles of telegraph wire and 2,295 offices. The navigable rivers and canals have a length of 1,231 miles (1919), and there are 6,177 miles of roads. Most of the maritime trade of Belgium is carried on in foreign bottoms, the mercantile marine only consisting (1920) of 193 vessels (335,201 tons), in addition to which there were 453 fishing boats. In 1920, 7,698 foreign vessels entered at Belgian ports (tonnage 10,852,341). The principal port and commercial entrepôt is Antwerp, on the River Scheldt. Other ports are Ostend, Ghent, Bruges, Nieuport, Blankenburg and Zeebrugge (blocked by the British Fleet April 23, 1918, and since reopened for traffic). The vexed question of the Scheldt, of which the right bank is in Netherlands territory and the left in Belgium, appears likely to be settled by negotiation between the respective Governments. The navigation is to be free to both countries, from the mouth to Antwerp, and the Netherlands war vessels are to be removed from the river.

The Capital, BRUSSELS, had a population in 1921 of 775,039 (with suburbs). Other towns with over 100,000 inhabitants are Antwerp, the chief port (304,124); Ghent (165,910), which has large cotton and flax spinning mills, and is the second port of importance after Antwerp, while its flower shows are famous; and Liège (165,117) the centre of the iron industry. Brussels is 224 miles from London; transit, 8 hrs.

FLAG: 3 vertical bands, black, yellow, red.

THE BELGIAN CONGO.

Governor-General, His Excellency Maurice Lippens, G.C.V.O.

The Independent State of the Congo became a Belgian Colony by a law of Oct. 18, 1908.

The total area amounts to 909,654 sq. miles, with a native population estimated at 5,000,000 to 7,000,000. The total European population (Jan. 1920) was 6,971, of whom 3,588 were Belgians, 818 were British, 239 Americans, 298 Italians, 657 Portuguese, 87 Swedes, 53 Russians, 153 French, 183 Dutch, 75 Swiss, 308 Greeks, 22 Luxemburgers, 21 Danes, 14 Norwegians, and 11 Spaniards.

The Congo River is navigable for large vessels from its mouth at Banana to Matadi (95 miles), where the European steamers discharge and recharge their cargo; but between that place and Leopoldville, on Stanley Pool, there occur rapids and falls which have been avoided by a railroad 249 miles in length. A narrow-gauge line runs from Lukula to Boma, the cocoa planting district of Mayumbe. Above Leopoldville the river and its numerous affluents are navigable by steamer for about 5,000 miles, the falls on the Upper River being avoided by a metre-gauge line from Stanleyville to Ponthierville (125 kilometres), and another from Kindu to Kongolo (355 kilometres). Another line from Kabalo to Albertville on Lake Tanganyika (273 kilometres) was completed in 1916, connecting the West Coast of Africa with Belgian East Africa and the East Coast. The Katanga Railway reached Bukama in May, 1918, thus linking up the Rhodesian Railway system with the steamers plying on the Upper Congo River, connecting with both the East and the West Coast. Within eight years, 450 miles of railway have been constructed, 200 of which have been laid during the war. It is now possible to travel by train direct from Cape Town to the river Congo, a distance of 2,650 miles. Work has been started on the Stanleyville-Lake Albert Railway, which will run between the Congo River and the Nile, providing the last link to direct river and rail communication between the Cape and Cairo. Two new lines will run from the copper mining district of Katanga towards the West Coast, one of them reaching Lobito Bay (Portuguese Angola), the other linking the Katanga Railway with the Matadi-Leopoldville Railway. A telegraph line connects Banana to Coquilhatville (895 miles); Boma with Tshela (85 miles); Stanleyville with Ponthierville (79 miles); Kasongo with Uvira (265 miles); Kindu with Kongolo (219 miles); Kabolo with Albertville (169 miles); and Sakania with Bukama (448 miles), a total length of 2,160 miles. There is telegraphic communication with Europe. Fifteen wireless stations connect the West Coast with the principal Government stations throughout the Colony. A great inter-Continental wireless station is being erected at Kanga to communicate direct with Brussels. The West Coast District has a rather scanty rainfall (40 inches), but on the Maiumbe Hills and in the whole interior the rainfall averages between 60 and 80 inches, and the country is very fertile and productive. Sleeping sickness, once very prevalent and destructive, is now decreasing. Extensive forests cover the central districts; oil palms are plentiful everywhere, and supply an ever-increasing trade in palm-oil and palm-kernels. Wild rubber and wild coffee are common; coffee, cocoa, Pará and Ceara rubber and cotton are successfully planted. Mines are very extensive. The copper district of Katanga has enormous deposits of copper ore, and the melters at the Lubumbashi produced about 23,000 tons of copper in 1919. A rich tin-belt extends from Bukama towards Lake Tanganyika. The gold-bearing districts of North-eastern Congo are being prospected by the Government, and contain both alluvial and reef gold. Diamond-bearing gravels are worked in the south. The total imports during the year 1919 were valued at 85,681,000 francs: the exports (204,146,254 francs in 1919) are mostly palm-kernels and palm-oil, ivory, rubber, gum-copal, cocoa, copper, gold and diamonds. Capital, Leopoldville (Leopoldsville-Kinshasa). Principal towns, Boma (pop. 500 whites, 2,000 natives); Elisabethville (Katanga) (pop. 1,000 whites, 6,000 natives); Stanleyville (200 whites, 8,000 natives); Coquilhatville.

Revenue (1921)	£2,700,425
Expenditure (1921)	3,304,422
Debt (1919)	14,000,000
Imports (1920)	9,501,390
Exports (1920)	12,609,820
Imports from U.K. (1920)	1,006,487
Exports to U.K. (1920)	724,155

By the *Anglo-Belgian Agreement* of July, 1919, the districts of Ruanda and Urundi, portions of the former territory of German East Africa (*see* "Tanganyika Territory"), which adjoin the Belgian Congo on the E., were assigned by Great Britain to Belgium. *Ruanda* and *Urundi* formed the N.W. corner of German East Africa from 5° S. lat. to the S. borders of (British) Uganda and have an area of about 15,000 square miles, with an estimated population of 3,000,000. They lie W. of the Victoria Nyanza and N.E. of Lake Tanganyika, through which are their respective outlets. The soil is poor, and the only exports are live stock and hides. The administrative capitals are Niansa (Ruanda) and Kitega (Urundi), the commercial capitals being Kigali (Ruanda) and Usumbura (Urundi).

Interior and Justice, Dr. Francisco Iraizós.
Finance, Dr. Carlos Zálles.
War and Colonization, Dr. Juan M. Sainz.
Development, Posts and Telegraphs, Dr. A. Flores.
Education and Agriculture, Dr. Gabino Villanueva.

Envoy Extraordinary, Minister Plenipotentiary in London, Señor Don Albert Gutierrez, 54 Holland Park, W. 11.
Secretary of Legation, Señor Don Mamerto Urriolagoitia.
Consul-General, 20 Copthall Avenue, E.C. 2.

The Republic of Bolivia extends between lat. 8° and 23° S. and long. 57° 30′ and 73° W., and its area is about 597,460 square miles[*], with an estimated population of 2,825,439. The Republic was formerly comprised in the Spanish Vice-Royalty of *Alto-Peru*, and derives its present name from its liberator, Simon Bolivar, (born 1783, died 1830).

The chief topographical feature is the great central plateau (6,500 square miles) over 500 miles in length, at an average altitude of 12,000 feet above sea level, between the two great chains of the Andes, which traverse the country from south to north, and contain, in Illampu (Sorata), and Illimani, two of the highest peaks of the western hemisphere. The total length of the navigable streams is about 12,000 miles, the principal rivers being the Itenes, Beni, Mamoré, and Madre de Dios.

Mining and agriculture are the principal industries, the mineral productions being very valuable. The ancient silver mines of Potosi are now worked only for tin, but gold, partly dug and partly washed, is obtained on the Eastern Cordillera of the Andes; the tin output is, after that of the Straits Settlements, the largest in the world, while copper, antimony, wolfram, bismuth, salt, and sulphur are also found. Its agricultural produce consists chiefly of rice, barley, oats, maize, cotton, coca, indigo, india-rubber, cacao, potatoes, cinchona bark, medicinal herbs, &c. Manufactures are in a very undeveloped state. The principal exports are tin and silver ores, crude rubber, copper ores, bismuth, lead ores, wolfram, wool, coca, hides, and antimony; the chief imports are iron and steel products, textiles, machinery, sugar, flour, and coal. There are about 1,175 miles of trunk lines of railways in operation, and 205 miles under construction; and 4,000 miles of telegraph wire. There are wireless services between Riberalta, La Paz, Cobija, Capitandi (Chaco). There is direct railway communication to the sea at Antofagasta (2 days), Arica (1 day), and Mollendo (2 days), and also (with a gap of 125 miles) to Buenos Aires (5 days); branch lines run from Oruro to Cochabamba, and from Rio Mulato to Potosi. Construction on the railway between La Quiaca (on the Argentine frontier) and Atocha (in Bolivia), which, when completed, will allow through railway communication with Buenos Aires, is, after many delays, now being pushed forward by an American corporation. The gap between Tupiza and La Quiaca is crossed by an automobile service, taking six hours. Communication with Peru is effected by rail to Guaqui and thence by steamer across Lake Titicaca to the railroad at Puno. The principal line is the Antofagasta and Bolivia railroad (719 miles), and a line from La Paz to the province of Yungas (the first section of which is open) may eventually connect with the steamers on the rivers Beni, Mamoré, and other tributaries. A line from Potosi to Sucre, the legal capital, is under construction, and trains run to Betanzos.

Bolivia is without a sea-coast, having been deprived of the ports of Tocopilla, Cobija,

---

[*] The country has not been completely surveyed, and the area is officially estimated at 594.460 square miles; other estimates give an area of 708,195 square miles.

Mejillones, and Antofagasta by the "Pacific War" of 1879-1882 (*see* Chile). The Peace Army amounts to about 5,000, all ranks, the War Effective being about 105,000.

1st Secretary, Senhor L. A. Gurgel do Amaral.
Secretaries of Embassy, A. Camillo Filho; Hector Lyra.
Naval Attaché, Commr. Americo de Aranjo Pimentel.
Commercial Attaché, J. Barboza Carneiro.
Consul-General in London, Augusto Sarmento Pereira Brandão, Coventry House, 20 South Place, Finsbury, E.C. 2.
Consul-Gen. in Liverpool, Dario Freire.

Brazil, the most extensive State of South America, discovered in 1500 by Pedro Alvares Cabral, Portuguese navigator, is bounded on the north by the Atlantic Ocean, the Guianas, Colombia and Venezuela; on the west by Peru, Bolivia, Paraguay, and Argentina; on the south by Uruguay; and on the east by the Atlantic Ocean; and extends between lat. 5° 10′ N. and 33° 45′ S. and long. 34° 40′ and 73° 15′ W., being 2,600 miles from north to south, and 2,500 from west to east; with a coast-line on the Atlantic of 3,700 miles. The Republic comprises an area of 3,298,870 square miles, with a population (Census 1920) of 30,635,605.

The northern States of Amazonas and Pará are mainly wide, low-lying, forest-clad plains. The central state of the Matto Grosso is principally plateau land and the eastern and southern States are traversed by successive mountain ranges interspersed with fertile valleys. In the extreme south, towards the interior, the land rises by gentle gradations to the height of 2,000 to 5,000 feet above sea level. The principal ranges are *Serra do Mar* in Sao Paulo; the *Serra do Mantiqueira* (Itatiaiassu, 9,000), and the *Serra do Espinhaço* (Itacolumi, 6,000 feet), in the south-east of Minas Geraes; the *Serra do Paranán*, between Goyaz and Minas Geraes, the *Serra dos Aymores*, which divide Espirito Santo from Minas Geraes; and the *Serra da Gurgueia, Branca* and *Araripe*, which envelop Piauhý.

Brazil is unequalled for the number and extent of its rivers. The *Amazon*, the largest river in the world, has tributaries which are themselves great rivers, and flows from the Peruvian Andes to the Atlantic, with a total length of some 4,000 miles. Its northern tributaries are the *Rio Branco*, *Rio Negro*, and *Japurá*; its southern tributaries are the *Juruá*, *Purus*, *Madeira* and *Tapajos*, while the *Xingu* meets it within 100 miles of its outflow into the Atlantic. The *Tocantins* and *Araguaya* flow northwards from the Plateau of Matto Grosso and the mountains of Goyaz to the Gulf of Pará. The *Parnahyba* flows from the encircling mountains of Piauhý into the Atlantic. The *São Francisco* rises in the South of Minas Geraes and traverses Bahia on its way to the Eastern coast, between Alagoas and Sergipe. The *Paraguay*, rising in the south-west of Matto Grosso, forms a boundary with Bolivia on its way through Paraguay to its confluence with the *Paraná*, which rises in the mountains of that name and divides Brazil from Paraguay. On the Iguassu, which unites with the Uruguay at the Argentine boundary, are the majestic *Falls of the Iguassu*, and on the Sao Francisco are the no less famous falls of *Paulo Affonso*.

GOVERNMENT.—Brazil was colonised by Portugal in the early part of the sixteenth century, and in 1822 became an independent empire under Dom Pedro, son of the refugee King João VI. of Portugal, the centenary of Brazilian independence being celebrated by an International Exhibition at the capital (Sept. 7, 1922, to July 2, 1923). On Nov. 15, 1889, Dom Pedro II., second of the line, was dethroned and a republic was proclaimed. The constitution rests on the fundamental law of Feb. 24, 1891, which established a federal republic under the name of *Estados Unidos do Brazil*. The President and Vice-President are elected for 4 years by the direct votes of all male Brazilians over 21 years who can read and write; they are ineligible for the succeeding term. They are aided, as an executive, by a Council of Ministers, who are responsible to the President and not to the legislature. Congress consists of a Senate of 63 members and of a Chamber of Deputies of 212 members; members of both houses are paid. The language of the country is Portuguese, foreign languages being read and spoken in the following order :—French, Italian, English, German and Spanish.

PRODUCTION.—The minerals are very considerable and valuable, comprising gold, silver, iron, diamonds, topazes, and other precious stones. The immense iron deposits have been scarcely touched. Manganese is exported, and there are important deposits of monozite sand. Low-grade coal deposits are in the south. Its agricultural produce is abundant and its forests are immense. Cattle-raising is an important industry, the number being 34,270,324 (Census of 1920). The chief products of the country are coffee, sugar, raw cotton, hides and skins, cocoa, oleaginous fruits, herva maté, rubber and tobacco: the rubber comes from the more northern provinces, especially the valley of the Amazon, and is shipped from Pará and Manáos; coffee coming chiefly from São Paulo. Tobacco and cocoa are grown largely, especially in Bahia. Cotton is being largely cultivated. Sugar-cane is grown in large and increasing quantities in the northern provinces, Pernambuco being the centre of the sugar-producing zone. The exports include also meat, hides, maize, beans, and *Herva-maté* (tea). The imports consist principally of every description of manufactured articles, but the annual production of home industries is estimated at £45,000,000, of which about half were textiles (1922). Foreign capital to the amount of £200,000,000 has been invested in Brazilian undertakings in the ten years 1908-1917. The protective duties were again increased in 1887, 1893, 1896, 1906, and 1916. In 1922 the exported merchandise was classified: (1) animals and their products, £5,398,269; (2) minerals and their products, £1,060,076; (3) vegetables and their products, £62,119,265.

In 1921 the foreign trade of Brazil was shared as under:

Exports to:	
Europe—	
France	£7,572,000
U.K.	6,812,000
Italy	3,744,000
Belgium	1,936,000

Exports to:	
America—	
U.S.A.	£26,457,000
Uruguay	2,447,000
Argentina....	4,694 000
All countries	£68,577,610

DEFENCE.—The peace effective of the Army is about 50,000 all ranks. The Navy consists of 2 Dreadnoughts, 2 old battleships, 5 protected cruisers, 2 scouts, torpedo boats, and some small vessels and aircraft.

EDUCATION.—*Primary* education is carried out by private initiative and at the cost of municipalities and States, in some cases with a Federal subsidy; there were over 1,000,000 pupils in 1920. *Secondary and Technical* education is carried out by Federal, State and Municipal authorities, with 42,000 pupils in Federal schools and 40,000 in State and Municipal institutions in 1920. Higher education (12,000 students in 1920) is carried out by Federal and State governments at the State *University* of Rio de Janeiro, and at the University colleges at Manáos (Amazones) and Curityba (Paraná) and other private colleges.

COMMUNICATIONS.—In December, 1921, there were 28,828 kilometres of railway open, and 2,273 under construction. Length of telegraph wires, 79,791 kilometres. In 1921 steam and sailing vessels of 23,113,156 tons (of which 5,852,595 were under the British flag) entered Brazilian ports, the principal harbours being Manáos, Pará, Maranhão, Pernambuco, Maceio, Bahia, Victoria, Rio de Janeiro, Santos, and Rio Grande.

BULGARIA.

(Blgariya.)

Tsar, Boris III., *born* Jan. 30, 1894, *succeeded* (on the abdication of his father) Oct. 4, 1918.

MINISTRY (Sept. 30, 1923).

Prime Minister & Education (*ad interim*), M. Tsankoff.
Foreign Affairs, M. Kalfoff.
War, General Vulkoff.
Interior, General Rousseff.
Finance, M. Todoroff.
Commerce & Labour, M. Bobochevski.
Railways, M. Dimo Kazassoff.
Agriculture, M. Molloff.
Justice, (vacant).
Public Works, M. Stoentcheff.

Minister in London M. D. Stancioff; 51 Queen's Gate, S.W. 7.
1st Sec. of Legation, M. Petroff-Tchomakoff.

The Kingdom of Bulgaria is bounded on the north by Rumania, on the west by Yugo-Slavia and Greece, on the east by the Black Sea, and on the south by Greece. The total area is stated at 40,000 square miles, with a population (1922) of 4,861,439. The prevailing religion of the Bulgarians is the Orthodox Greek Church, with a Gregorian (Western) Calendar (since 1916).

A Principality of Bulgaria was created by the *Treaty of Berlin* (July 13, 1878), and in 1885 Eastern Roumelia was added to the newly-created principality. In 1908 the country was declared to be an independent kingdom, the area at that date being 37,202 square miles, with a population of 4,337,500. In 1912–13 a successful war of the *Balkan League* against Turkey increased the size of the kingdom, but in August, 1913, a short campaign against the remaining members of the League reduced the acquired area, and led to the surrender of about 2,000 square miles to Rumania. On Oct. 12, 1915, Bulgaria entered the War on the side of the Central Powers by declaring war on Serbia. She thus became involved in the defeats of 1918, and on Sept. 29, 1918, made an unconditional surrender to the Allied Powers. On Nov. 29, 1919, she signed the *Treaty of Neuilly*, which ceded the S. Dobrud to Rumania and E. and W. Thrace to Greece.

GOVERNMENT.—The executive power is vested in the Tsar, and is exercised by a Council of Ministers, appointed by him. The legislature is a single chamber National Assembly or *Sobranyé* of 246 representatives, elected for a maximum term of four years by adult manhood suffrage. Metropolitan members receive 15 *leva*, and others 20 *leva*, a day and travelling expenses.

PRODUCTION.—Agriculture is the principal industry of the people and employs over half the population, the principal crops being wheat, rye, barley, oats, tobacco and fruit. The live stock includes sheep, goats, cattle, pigs, horses, asses and mules. Coal of good quality is mined at Pernik and Trevna, and stone, iron, gold, silver, lead, manganese and copper are worked, but the mineral development is in its infancy. The chief manufactures are woollens, cottons and cigarettes. The exports consist principally of cereals (especially wheat), live stock, essence of roses, woollens, skins, cheese, eggs, timber, cocoons, and tobacco; the principal imports being textiles, metal goods and machinery, colonial wares, leather, building materials, petroleum and other oils, paper, salt fish, rice, and coal.

DEFENCE.—Before the War of 1914–1918 service in the Army was universal and compulsory, and on a peace footing it numbered about 58,000, all ranks. During the War (Oct. 1915-Sept. 1918) about 560,000 passed into the ranks of the Army, and of those over 250,000 became casualties. By the *Treaty of Neuilly* the Bulgarian Army is limited to 20,000 all ranks.

EDUCATION is free and compulsory and the proportion of attendances is good; the number of illiterates in Bulgaria is very small. There are few technical schools. Sofia has a University.

COMMUNICATIONS.—There were 1,845 miles of railway open in 1919 and about 250 miles under construction; 4,000 miles of telegraph line and 1,254 of telephone line. In 1914 there were 2,515 post offices and 438 telegraph offices. The principal Black Sea ports are Varna and Bourgas; and Rustchuk, Sistor and Vidin on the Danube. In 1913, 11,755 vessels (3,132,481 tons) entered and 11,710 vessels (3,108,505 tons) cleared at Bulgarian ports.

Consul, Vicente Echeverria L., 94 Gracechurch Street, E.C. 3.

A State of South America, of Spanish origin, lying between the Andes and the shores of the South Pacific, extending coastwise from the Rio Sama to Cape Horn south, between lat. 17° 15′ and 55° 59′ S., and long. 66° 30′ and 75° 48′ W. Extreme length of coast-line about 2,485 miles. Its extreme length is about 2,800 miles, with an average breadth, north of 41°, of 100 miles. The great chain of the Andes runs along its eastern limit, with a general elevation of 5,000 to 15,000 feet above the level of the sea; but numerous summits attain a great height—the highest being, in Aconcagua Provincia, 7,019 metres (23,025 feet) with many others over 20,000 feet. The chain, however, lowers considerably towards its southern extremity. There are no rivers of great size, and none of them are of much service as navigable highways. In the north the country is arid. Chile is divided into 23 provinces and 1 territory, the aggregate area of which is estimated at 289,798 square miles.

The population (June, 1923) was 3,843,951. Included in the population are four distinct racial divisions; (*a*) the Spanish settlers and their descendants; (*b*) the indigenous Araucanian Indians, Fuegians, and Changos; (*c*) mixed Spanish-Indians; and (*d*) European immigrants, who were represented in 1910 by 20,000 Spaniards, 15,000 Italians, 14,000 British and Irish, 11,000 Germans, and 10.000 French. In 1922, the births numbered 150,797 (39·4 per 1000); marriages, 25,392 (6·6 per 1000); and deaths, 116,205 (30·4 per 1000).

GOVERNMENT.—Chile was discovered by Spanish adventurers in the 16th century, and remained under Spanish rule until 1810, when a revolutionary war, culminating in the *Battle of Maypu* (April 5, 1818) achieved the independence of the nation. The present constitution bears the date of May 25, 1853. The President is chosen by indirect vote. The National Congress consists of a Senate of 37 members and a Chamber of Deputies of 118 members, elected by direct vote every three years. There is universal adult male suffrage for those who can read and write. From 1879 1882 Chile was at war with Peru and Bolivia, and Peru renewed her application for the return of the provinces of Tacna and Arica which were taken from her by Chile in the "Pacific War." Bolivia also demands an outlet to the Pacific. In 1922 Chile and Peru signed a treaty to submit the Tacna-Arica question to arbitration.

PRODUCTION, &C.—Agriculture and mining are the principal occupations. Wheat, maize, barley, oats, beans, peas, lentils, wines, tobacco, flax, hemp, Chile pepper, and potatoes are grown extensively; the vine and all European fruit-trees flourish; the exportation of fruit to the United States is still in the experimental stage. The live stock includes (1919) 2,163.140 cattle, 4,500,190 sheep, 450,000 horses, 290,000 goats, and 292,431 pigs. The mineral wealth is considerable, the country being extremely rich in copper-ore and iron-ore; the production of copper in 1922 was 128,596 metric tons, or 17 per cent. of the world production. The rainless north yields more especially nitrate of soda, iodine, borate of soda, gold and silver, a large number of mines yielding both being in actual work in Tarapacá, Guanaco, and Cachinal in Atacama, and Caracoles in Antofagasta; the centre, copper and silver; and the south, iron and coal (1,046,378 metric tons of coal were mined in 1922, and 202,351 tons of foreign coal were imported). In 1922 the production of nitrate was 1,035,000 metric tons; sales for 1923 are expected to amount to over 2,000,000 metric tons. There are smelting-works for copper and silver, tanneries, corn and saw mills, starch, soap, biscuit, rope, glassware, paints, mineral waters, boot and shoe, hosiery, hat, cloth, cheese, furniture, candle, match, brush, cordage and paper factories, breweries and distilleries; and the domestic industry furnishes cloth, embroideries, baskets, and pottery. The many ports favour commerce, and 13 lines of steamers connect the country with Panama and the Magellan Strait direct with Europe, a passage to Liverpool occupying from 30 days. The staple articles of export are nitrate of soda, iodine, &c., copper bars and ores, silver ores, corn, flour, hides, wool, barley, honey and beans. The imports include silks, woollens and other textiles, food, and agricultural and mining machinery.

INDUSTRIAL STATISTICS.—Official statistics are—No. of industrial establishments 8 148, employing 81,991 persons, wage bill $1,035,564, capital invested $955,718,840, industrial production $1,035,564,048, consumption of raw materials $1,640,177,402 (including fuel), wealth created $395,386,646, of which 40 per cent. went in salaries and wages, and 60 per cent. in expenses and profits.

COMMUNICATIONS.—There were (1921) about 5,600 miles of railway, of which 1,383 miles are British controlled. In April, 1922, a convention was signed by Chile and the Argentine for the construction of two more Trans-Andine lines. In 1922 there were 30,174 kilometres of telegraph, 986 post-offices, and 79,305 kilometres of telephone, some worked by English companies, with 4 public wireless stations. The commercial marine numbers (1922) 101 steamers (66,790 tons) and 26 sailing vessels (9,252 tons). In 1922, 3.019 vessels (9,512,903 tons) entered Chilean ports from abroad, and 14,000 coasting vessels (6,609,365 tons); legislation was passed in February, 1922, reserving the coasting traffic to vessels of the Chilean mercantile marine.

DEFENCE.—All able-bodied male citizens from 20th to 45th year must serve in the militia. The peace effective of the active army is 24,962. The Air Force has a peace strength of 2 squadrons, with 60 pilots and 200 mechanics. The navy consists of 1 battleship, 1 ironclad, 6 cruisers, 12 destroyers, 5 torpedo-boats, and 6 submarines, with a complement of 6,560, all ranks.

EDUCATION is free, and in July, 1920, elementary education was made compulsory, and 77 per cent. of the children attended the 3,084 schools in 1923. There is a State University at Santiago. The National Library contains 293,085 volumes. The language of the country is Spanish and the State religion is Roman Catholic.

Talcahuano—Vice-Consul, C. S. Coke.
Temuco—Cons. Agent,
Valdivia & Corral—Cons.-Agent, Henry Allen.

BRITISH CHAMBER OF COMMERCE IN THE REPUBLIC OF CHILE, Valparaiso.

Valparaiso is distant 9,000 miles *viâ* Panama, and 11,000 *viâ* the Strait; transit 34 to 39 days. *Viâ* Buenos Aires and Andes, transit 19 to 25 days.

CHINA.

(Chung-Hua Min-Kuo.)

President of the Chinese Republic, Tsao Kun, *assumed office* Oct. 10, 1923.

CABINET MINISTERS:—

Foreign Affairs, Dr. Vi K. Wellington Koo.
Interior, Kao Ling-lei.
Finance, Chang Hu.
Navy, Adm. Li Ting-Hsin.
Justice, Ch'êng K'o.
Communications, Wu Yü-lin.
Agriculture and Commerce, Yuan Ni-Kuan.
Education, Huang Fu.

Envoy Extraordinary & Minister Plenipotentiary in London (not yet appointed).
49 Portland Place, W. 1.
Counsellor and Chargé d'Affaires (*with rank of Min. Plen.*), Chao-Hsin Chu.
Counsellor, Sir John M'Leavy Brown, C.M.G.
2nd Secretary, Wei Wen Ping.
3rd Secretaries, T. L. Sun; T. Hsu.
Attachés, K. V. Dzung; Y. C. Tsao; K. S. Fu.
Consul-General, London, Wu Huang, 31 Eaton Square, S.W. 1.

AREA AND POPULATION.

Territory.	Square miles.	Population.
China Proper	1,501,000	402,000,000
Manchuria	360,000	11,000,000
Mongolia..................	1,076,000	3,000,000
Tibet	750,000	3,000,000
Eastern Turkestan ...	600,000	2,000,000
Total	4,287,000	421,000,000

China proper (or the Eighteen Provinces) contains an area of over 1,500,000 square miles. Its length from north to south is 1,860 miles, and its breadth 1,520 miles, and its population, according to Chinese estimates for 1923 (*exclusive* of Mongolia, Tibet and special areas), exceeds 442,800,000.

China became a Republic on Feb. 12, 1912, with a President and Vice-President and an Executive Ministry, and a Legislature of a Senate (*Tsan Yi Yuan*) of 264 members and a House of Representatives (*Chung Yi Yuan*) of 596 members. The government of the 18 provinces is entrusted to civil and military governors, the latter (*Tuchun*) ranking first and holding practically all the powers of government; under them each province is subdivided into circuits superintended by *Taoyins* or intendants, and again into districts. All the territorial officials are appointed by the central Government, and the provincial governors, though free to act independently in many matters of local detail and finance, are responsible to the central Government at Peking in all important questions, and especially so in foreign affairs. The *Treaty of Kiakhta*, 1915, between China, Russia, and Outer Mongolia recognises the Hutukhta Khan as Ruler of Outer Mongolia, while China, as the Suzerain Power, appoints Residents at Urga and three other towns. *Mongolia* has since developed into an independent self-governing republic, and is in alliance with the *Soviet* Government at Moscow. The civil government of the three Manchurian provinces and of Turkestan is now similar to that of the province of China proper. The exact status of Tibet is still unsettled.

FOREIGN RELATIONS with the Chinese Empire have existed for many centuries. In the 13th century the Venetian merchant-adventurer Marco Polo resided in Cambaluc (the present Peking), and was employed by the Mongol Emperor Kublai Khan as adviser. In the 17th century Jesuit missionaries had attained considerable influence, but their power aroused jealousy, and they were expelled. The Dutch and Portuguese traders had for centuries maintained commercial dealings with the port of Canton, but towards the end of the 18th century they were largely displaced by the British East India Company, and when the Company's monopoly was withdrawn, in 1833, the position of British merchants in Canton became a national question, and contributed towards the first Chinese War of 1840. A treaty was signed at Nanking, as the result of these operations, ceding Hong Kong to Great Britain and opening five ports to foreign trade and residence; but the principle of extra-territoriality was maintained, and foreigners remained amenable only to the laws of their own countries. The continued exclusiveness of the Chinese Government led by a long chain of events to the war of 1860, when British and French troops captured Peking and burnt the Summer Palace. From this date the development of foreign trade began to be most important. In 1894 China fought a disastrous war with Japan, resulting in the loss of Formosa and the establishment of Corea as an independent state. An abortive attempt was made, in 1898, by the Emperor to introduce administrative reforms, but his reactionary ministers persuaded the Dowager Empress (his aunt) to reassume the reins of government. Under her rule a plot was hatched to rid the country of foreigners; and in the summer of 1900 the Legations in Peking and the foreign settlements in Tientsin were fiercely attacked and bombarded for many weeks. The situation was relieved at its most critical moment by the arrival of an allied army despatched by nearly all the Treaty Powers, and Tientsin and Peking were captured. The Imperial Court fled, and remained in voluntary exile until early in 1902. Meanwhile, a Peace Protocol was signed between the Envoys of the Treaty Powers and the Chinese Plenipotentiaries, Prince Ch'ing and the late Li Hung Chang. This provides for an indemnity of $325,000,000, to be paid within the next 39 years. Subsequent negotiations resulted in 3 new commercial treaties—(1) between the U.K. and China (5 Sept., 1902); (2) U.S. and China (8 Oct., 1903); and (3) Japan and China (9 Oct., 1903). Under the two last Mukden, Tatungkow, Chang-sha, and Antung in Manchuria, were made Treaty ports.

On the conclusion of the war between Russia and Japan in 1905, a Treaty and Additional Agreement relating to Manchuria were entered into between Japan and China. By the former the Chinese Government consented to all the transfers and assignments made by Russia to Japan in Manchuria; and by the latter the following cities and towns in Manchuria were opened as places of international residence and trade:—Feng-huang-ch'eng, Liao-yang, Hsinmintun, Tung-chiang-tzu (on the Liao River), and Fa-ku-men in Fengtien Province; Ch'ang-ch'un, Kirin, Harbin, Ninguta, Hunch'un, and Sansing in the Kirin Province; and Tsitsihar, Hailar, Aihun and Manchuli in the Heilungchiang Province.

In October, 1911, a revolution broke out in Hankow, which resulted finally in February, 1912, in the abdication of the Manchu Dynasty in favour of a Republican form of Government. In 1913, a second revolution, engineered by the Southern Party, was successfully put down by President Yuan Shih-kai. Since that date the Central Government has been gradually consolidating its position, and bringing about a centralisation of power in Peking. In May, 1915, a new treaty with Japan was concluded by which additional privileges are granted to Japanese in Manchuria and Mongolia. Towards the end of 1915 President Yuan Shih-kai engineered a campaign to revert to a Monarchical form of government, and, as the result of elections held all over the country, was invited to ascend the throne as Emperor. The Southern Provinces, however, immediately rose in revolt, and the attempt failed and finally ended with the death of Yuan Shih-kai in May, 1916. The Vice-President, Li Yuan-hung, succeeded to the Presidency, and all traces of the Yuan Shih-kai *régime* were rapidly abolished. The first Republican Parliament reassembled, and the government reverted to the Republican form adopted after the overthrow of the Manchu Dynasty in 1912. Both Houses of Parliament are elected by a system of limited franchise, and the government of the country is vested in them. The President, who is elected by Parliament, is assisted by a Premier and a Cabinet of Ministers, whose appointments have to be approved by Parliament, and to whom they are responsible for their actions. An abortive attempt to restore the Monarchy was suppressed in June, 1917, after which Parliament was again dissolved, and government carried on by the Cabinet and President Feng Kuo-Chang, Li Yuan-hung having resigned. The Anfu party was crushed by the Chihli party and Chang Tso-lin combined in the war of 1920, and in that year a revolt in South China culminated in the declaration of an independent Republic of South China (with its capital at Chung King) including the former provinces of Yunnan, Kwei Chow, Sze Chuen and Honan, but this Republic has not yet been recognised, and internal and external discussions appear to threaten its existence. This has since (1921) dissolved into a sort of loose federation, Tsuchuan, Yunnan, Kwangsi, Kwangtung, Kweichou, and Hunan all not owning allegiance to the central Government. The old M.P.'s, after the second dissolution of Parliament in 1917, to the number of about 150, met at Canton and elected Sun Yat Sen as President of China. The election of Hsü Shih Ch'ang in 1918 by the "Tuchün's" Parliament was held by them to be illegal. There were thus two "Presidents" in a divided China, one in Canton and one in Peking. The recent war of May, 1922, has helped to make prospects of reunification brighter by the defeat of Chang Tso-lin by Wu Pei-fu on the one hand, and the expulsion of Sun Yat-sen by the latter's ally, Ch'en Chuing-ming, on the other. Li Yuan-hung has resumed the Presidency, and summoned the members of the old Parliament to meet in Peking to discuss and settle the long-deferred question of the Constitution. During 1923 the situation changed again, Li Yuan-hung being expelled from Peking as the result of a *coup d'état* by the Northern Military Party; Sun Yat Sen also expelled Ch'en Chiung-ming and re-established himself at Canton. On Oct. 10, Tsao Kun, one of the successful generals, was declared President of the Chinese Republic, and the situation appeared to be stabilised under a firm and energetic ruler.

The estimated foreign population of China was as follows in 1921: British, 9,298; Japanese, 144,434; Russian, 68,250; American, 8,230; Portuguese, 3,493; German, 1,255; French, 2,453; the total being 240,769. Out of a total of 3,421 foreign firms in China, 534 were British, 1,237 Russian, 955 Japanese, 273 German, 136 American and 113 French.

DEFENCE.—The army is undergoing reorganisation. The total strength of all forces in August 1913, just after the Rebellion of that year, was estimated at 500,000, but no authenticated statistics are obtainable. An Air Force is being organised, the assistance of a British officer (Group-Capt. F. V. Holt, C.M.G., D.S.O.) having been obtained until June 1922. The Navy consists of 2 protected cruisers built in 1911 (2,750 tons), 4 older protected cruisers (4,300-3,000 tons), 3 torpedo gunboats (850 tons), 11 gunboats (750-550 tons), 4 destroyers (400 tons), and 8 small torpedo boats (120 tons).

EDUCATION.—Many changes in administration and development are under discussion, including a proposal to establish universal compulsory primary education. In 1918-19 there were 134,000 schools in operation, with 4,500,000 pupils. There is a University in Peking. In 1922 there were upwards of 1,250 Chinese newspapers and magazines, published at regular periods, in Pekin, Shanghai, Tientsin, and the other large centres, in addition to English and other Foreign daily newspapers.

COMMERCE.—The net trade of the open ports is stated as follows, in *Haikwan taels* (in 1921 the *Haikwan tael*=3*s*. 11½*d*.)

Year.	Imports.	Exports.	Total.
1914	569,241,382	356,226,629	925,468,011
1918	554,893,082	485,883,031	1,040,776.113
1919	614,647,365	599,268,939	1,213,916,304
1920	762,250,230	541,631,300	1,303,881,530
1921	906,122,439	641,255,537	1,507,377,976

The import of Indian opium is now prohibited.

External Trade, 1921.
Haikwan Taels.

Country.	Imports from.	Exports to.
Japan	210,359,237	172,110,728
Hong Kong	231,138,080	152,875,077
U.S.A.	175,789,652	89,541,816
Great Britain (1920)	131,719,952	45 804,536
(1921)	150,000,000	31,000,000
France	9,639,138	23,945,151
Straits Settlements	8,031,246	19,461,388
Germany	13,348,856	6,773,917

COMMUNICATIONS. — *Railways.* — About 7,000 miles were open in Jan. 1922, inclusive of the Manchurian lines, while 2,500 miles more are projected or under construction.

Shipping.—The China Merchants Steam Navigation Co. have a fleet of 31 ships of an aggregate tonnage of 60,000. Besides this, there are a large number of small vessels engaged in the coasting trade and on the Yangtse. In 1921 the total tonnage of the 215,000 vessels entered and cleared at Chinese ports was 114,500,000. Of these ships 38,855 (42,200,000 tons) were British, 139,000 (31,800,000 tons) Chinese, and 25,200 (31,600,000 tons) Japanese, 5,500 (4,400,000 tons) U.S.A. In June, 1918, a vessel of 14,750 tons, constructed at the Kiangnau Dock and Engineering Works at Shanghai, was launched and supplied to the order of the United States Shipping Board.

Telegraphs are being rapidly constructed by the Central Government, and Peking is in communication overland with Europe and Tibet, the line being extended to Lhasa. In 1922 there were about 50,000 miles of land lines and several high-power wireless installations.

CUSTOMS AND POSTS.—The Chinese Maritime Customs is the controlling service; this body consists of nearly 1,000 Europeans, a large proportion of them British subjects, all under the control of the *Inspector-General.* By an Imperial Decree of May, 1906, the Maritime Customs Dept. was transferred from the Foreign Board to the Board of Revenue, and two Chinese Administrators-General were appointed. But the change has not materially affected the powers hitherto exercised by the Inspector-General. In addition to the collection of dues at the Treaty Ports, this service manages the lighting and navigation thereof, and keeps a small fleet of cruisers to enforce its regulations. The Chinese Post Office, formerly a branch of the Customs, was transferred in 1911 to the Ministry of Communications, and a Foreign Co-Director General, with a considerable foreign staff, was appointed; letters can be sent all over the 18 provinces at a uniform rate of 3 cents for 20 grammes. The number of Chinese post offices is 10,470 (1920), 401,000.000 postal packets and 4,200,000 parcels were handled in 1920.

BUDGET (July 1919-June 1920).

Ordinary Revenue	*Taels*	400,838,001
Extraordinary Revenue		80,581,785
Total		490,419,786
Ordinary Expenditure	*Taels*	271,289,205
Extraordinary Expenditure		224,473,681
Total		495,762,888

Chinese Debt (Jan., 1920).

War Loans outstanding	£30,000,000
Boxer Indemnity do.	48,000,000
Railway Loans do.	40,000,000
General Loans do.	50 000 000
Japanese Loans do.	30 000 000
Short term Loans do.	17,000,000
	£215,000,000

About 10*s*. 2*d*. per head of the population.

At the end of September, 1922, according to the official statement of the Ministry of Finance, the total debt was *taels* 1,906,000,000, or less than 5 *taels* (11*s*.) per head of the Chinese population.

Included in the expenditure is the sum of 214,000,000 *taels* towards repayment of debt.

MANCHURIA lies to the north of China Proper, and has a total area of about 360,000 square miles, with a population estimated at 11,000,000. The capital is Mukden (pop. 250,000), a station on the Manchurian railroad and connected with the Russian system. Indigo, opium, cotton, tobacco, and various cereals are grown, and there is great mineral wealth.

MONGOLIA has a total area of 1,076,000 square miles and a population estimated at about 3,000,000, the desert of Gobi being within its borers. Outer Mongolia, by the Treaty of Kiakhta of 1915, is an autonomous state under Chinese suzerainty, with seat of government at Urga. Its ruler (Khan) has lost practically all political power and Mongolia has become a self-governing Republic, in alliance with the Soviet government at Moscow. A Bolshevik garrison is now maintained at Urga. The principal industry is cattle and sheep raising and the provision of transport animals.

TIBET (area, 750,000 square miles; pop. 3,000,000) borders on British India, *see* p. .

CHINESE TURKESTAN (or *Sinkiang*) has a total area of 600,000 square miles and a population estimated at 2,000,000. It includes Zungaria and Chinese Tartary, and provides sheep, cattle, and transport animals for the caravan routes. The chief centres are Kashgar and Urumchi.

CAPITAL OF THE CHINESE REPUBLIC, Peking. Population (1921), 1,300,000. The population of the principal ports in 1919 is estimated as follows:—Amoy, 400,000; Canton, 1,370,000; Changshá, 1,272,000; Chingkiang, 500,000; Chungking, 1,011,600; Foochow, 1,500,000; Hangchow, 729,950; Hankow, 290,000; Harbin, 365,000; Ichang, 450,000; Kiukiang, 380,000; Kiungchow, 590,000; Nanking, 900,000; Ningpo, 2,200,000; Shanghai, 1,600,000; Soochow, 1,100,000; Tientsin, 838,000; Tsingtau, 310,000; Wanhsien, 752,000; Wenchow, 1,750,000; Wuchow, 350,000.

FLAG: Five horizontal bands, red, yellow. blue, white, black.

BRITISH LEGATION.

BRITISH CHAMBERS OF COMMERCE IN CHINA AT *Canton, Changsha, Chefoo, Foochow, Hankow, Harbin, Mukden, Newchwang, Peking, Shanghai, Swatow, and Tientsin.*

Peking, distant 11,770 miles; transit, 39 days (or by Siberian Railway 13 to 14 days).

COLOMBIA

(Républica de Colombia).

President (1922–1926), General Pedro Nel Ospina. *assumed office* Aug. 7, 1922.
Foreign Affairs, Dr. Jorge Velez.
Finance, Dr. Aristóbulo Archila.
Treasury, Dr. Gabriel Posada Villa.
War, Dr. Alfonso Jaramillo.
Instruction, Dr. Arroyo Diaz.
Agriculture and Commerce, Dr. Antonio Paredes.
Interior, Dr. José Ulyses Osorio.
Public Works, Dr. Aquilino Villegas.

Envoy Extraordinary and Minister Plenipotentiary in England, Señor Dr. Don Luis Cuervo Marquez, 10 De Vere Gardens, Kensington, W. 8.
Secretary, Señor Dr. Don Jesus M. Yeres.
Consul-General, Señor Don Joaquin Orrantia, 7 Sicilian Avenue, Southampton Row, W.C. 1.
Consul in Liverpool, Señor Don Genaro Payan.

The Republic of Colombia lies in the extreme north-west of South America, having a coast-line on both the Atlantic and Pacific Oceans. It is situated between 2° 40′ S. to 12° 25′ N. lat. and 68° to 79° W. long., with an estimated area of 461,606 square miles, and a population estimated at 5,475,000, of whom more than one-half are whites and half-castes. The country is intersected by three great ranges of the Andes, known as the Western, Central, and Eastern Cordilleras; the second contains the highest peaks, but the latter is the more important, as it consists of a series of vast table-lands, cool and healthy. This temperate region is the most densely-peopled portion of the Republic.

The principal rivers are the Patia, Cauca, Magdalena, Caquetá and Putumayo. The Patia flows through the famous *Minima Gorge* of the Western Cordilleras, and one of its tributaries (the Carchi, or Upper Guiatara) is spanned by the Rumichaca Arch, or *Inca's Bridge*, of natural stone. On the Funza is the Great *Fall of Tequendama*, 480 feet in height.

The Colombian coast was visited in 1502 by Christopher *Columbus*, and in 1536 a Spanish expedition under Queseda established a government of certain coastal communities under the name of New Granada, which continued under Spanish rule until the revolt of the Spanish-American colonies of 1811-1824. In 1819 *Simon Bolivar* (born 1783, died 1830), established the Republic of Colombia, consisting of the territories now known as Colombia, Panama, Venezuela and Ecuador. In 1829-1830 Venizuela and Ecuador withdrew from the association of provinces, and in 1831 the remaining territories were formed into the Republic of New Granada. In 1858 the name was changed to the Granadine Confederation and in 1861 to the United States of Colombia. In 1886 the present title was adopted. In 1903 Panama seceded from Colombia, and is now a separate Republic.

The Colombian forests are extensive; among the trees are mahogany, cedar, fustic, and other dye-woods and medicinal plants. The mineral productions are emeralds, gold, silver, platinum, copper, iron, lead, and coal; petroleum is available in large quantities but is unworked. The principal agricultural products are coffee, cotton, plantains, and bananas, and in some parts tobacco, wheat and other cereals. Manufactures, for home consumption, consist of woollen and cotton stuffs. The chief exports are coffee, precious metals, hides, india-rubber, and bananas. All religions are tolerated.

The standing army consists of about 6,000 men; the navy has been nearly abolished. Railroads are in their infancy, about 750 miles being open in 1920, with 8,680 (1907) miles of telegraph. There is a bi-weekly passenger and mail aeroplane service (German) between Barranquilla and Girardot, the transit to the coast from Bogotá being thus reduced to two and a half days; a similar service, by same company, is in operation between Cartagena and Barranquilla. The rate of exchange is about \$5 gold = £1 (approximately).

Spanish is the language of the country.

	1920–21.	1923.
Revenue (estimate) gold	\$27,058,530	\$21,900,800

COSTA RICA.

(República de Costa Rica.)

President, Julio Acosta, *assumed office* May 8, 1920.
Minister of Foreign Affairs, Miguel Obregon (*ad interim*).
Treasury, Tomas Soley Guell.
Interior (*ad interim*), Aquiles Acosta.
Education, Miguel Obregon.
Works, Narciso Blanco.
Public Safety, Aquiles Acosta.

Minister in London (vacant).
Consul-General, Percy G. Harrison, 7 Crosby Square, E.C. 3.

The Republic of Costa Rica, the most southern State of Central America, extending across the isthmus, between 8° 17′ and 11° 10′ N. lat. and from 82° 30′ to 85° 45′ W. long., contains an area of about 23,000 English square miles, and a population (1922) of 485,113.

For nearly three centuries (1530-1821) Costa Rica formed part of the Spanish-American dominions, the seat of government being at Cartago. In 1821 the country joined in the War of Independence, and from 1824-1839 it was one of the United States of Central America.

The principal agricultural products are coffee, bananas, rice, maize, sugar-cane, potatoes, cocoa and beans, the soil being extremely fertile. The chief exports (1922) are coffee (£1,373,892), bananas (£1,029,419), sugar, gold and silver bullion cacao, hardwoods, vegetables, skins, and hides. The imports are dry goods, hardware, provisions, railway materials, machinery, paints, and general merchandise (in 1922, 61 per cent. from United States, 14 from United Kingdom, 4 per cent. from Germany, 6 from Central America, and 7 from Hispano-America.

The chief ports are Limon, on the Atlantic coast, through which passes the whole of the important banana trade with the U.S. and U.K., as well as by far the larger part of the other exports and imports; and Puntarenas on the Pacific coast. In 1922, 601 foreign vessels (848,775 tons) entered at Costa Rican ports. About 405 miles of railroad were open in 1922. In 1922 there were 299 post offices, dealing with 5,585,084 packets, and 147 telegraph offices (one wireless), with 2,140 miles of telegraph and telephone line. A considerable amount of English capital is embarked in the Republic. Spanish is the language of the country.

2nd Secretary (*and Chargé d'Affaires ad int.*), Dr. P. Rodriguez Capote.
Chancellor, Señor Domingo Govantes.
Consul, Dr. Rafael Cerviño, 46 Kingsway, W.C. 2.

The island of Cuba (the largest of the "West India" Islands) lies between 74° and 58° W. long., and 19° and 23° N. lat., with a total area of 44,178 sq. miles and a population of 2,889,004 (Nov. 1919).

The island of Cuba was visited by Christopher Columbus, during his first voyage, on October 27, 1492, and was then believed to be part of the Western mainland of India. Early in the 16th century the island was conquered by the Spaniards, to be used later as a base of operations for the conquest of Mexico and Central America, and for almost four centuries Cuba remained under a Spanish Captain-General. The slave trade was abolished early in the 19th century, and the slaves were emancipated from 1880-1886. The government of Spain was marked by a generally corrupt administration, complicated by internal unrest fomented by external influences, and the various attempts at independence met with severe military repression. The separatist and autonomous agitation culminated in the closing years of the 19th century in a fierce and bloodthirsty war, and although a conciliatory movement was evinced by the Madrid authorities in 1897, the struggle was continued by the party of separation in the island. In 1898 the government of the United States put into execution a threat of interference by the despatch of the battleship *Maine* to Havana harbour, and in February of that year the vessel was sunk by an explosion, the cause of which appears likely to remain an unsolved mystery. On April 20, 1898, the U.S. Government demanded the evacuation of Cuba by the Spanish forces, and a short Spanish-American war led to the abandonment of the island, which was occupied by U.S. troops. From Jan. 1, 1899, to May 20, 1902, Cuba was under U.S. military rule, and reforms of the widest and most far-reaching character were instituted. On May 20, 1902, an autonomous government was inaugurated with an elected President, and a legislature of two houses. The island was, however, again the prey of revolution from July to Sept., 1906, when the U.S. Government resumed control. On Jan. 28, 1909, a republican government was again inaugurated.

Of the total area of 28,000,000 acres, only about 1,375,000 acres are cultivated, 50 per cent. of these being under sugar cane and 30 per cent. under tobacco, sweet potatoes and bananas. Rice, coffee, cocoa and maize are also grown and tropical fruits (oranges, coco-nuts, pine apples, &c.) flourish. The chief agricultural products of the island are tobacco and sugar (sugar crop in 1921–2, 4,047,236 tons; 1922–3, 3,601,056 tons); the chief product of the forests is mahogany, while cedar is also used for boxing the tobacco crop. The live stock includes about 4,500,000 cattle and 600,000 horses, the vast savannahs of Central Cuba being particularly suitable for cattle ranges.

3,600 miles of railroad are open and about 6,000 miles of telegraph line; there are about 1,500 miles of roads.

Spanish is the language of the island.

Part of the Austro-Hungarian Monarchy declared its independence on Oct. 18, 1918, as the Czecho-Slovak Republic, and ten days later the *Národni Výbor* (National Council) of Czecho-Slovakia took over the administration of the independent territories. The political neighbours of the Republic are the Austrian and Hungarian Republics on the S., the German and Polish Republics on the N., the German Republic on the W., and the Ukraine Republic on the E. Within these limits are the former Austrian Provinces of Bohemia and Moravia and part of the Province of Silesia; and Northern Hungary from the Danube (at Pressburg, on the Austrian frontier) to the Carpathians (at the headwaters of the Ung River in the eastern slope of Mt. Vereezka)—a total area of about 54,877 sq. miles, with a population (Census of 1921) as under:—

Bohemia	6,781,936
Moravia	2,633,027
Slovakia	2,926,824
Silesia	650,442
Ruthenia	596,601
Total	13,588,830

Moravia and Silesia, and at 3,605,371 for Slovakia and Ruthenia, of whom 6,000,000 are Czechs, 3,700,000 Germans, 1,700,000 Slovaks, 1,200,000 Magyars, 300,000 Ruthenians and 250,000 Poles. The new State was recognised by Austria in 1918 and by Hungary on March 10, 1919. The National Assembly, consisting of a Senate and a Chamber of Deputies, is elected by universal adult suffrage of both sexes. The executive power is exercised by a Council of Ministers, appointed by the President. In 1919 the Democrats, Agrarians and Slovaks were in the ascendancy, Socialists 28, Clericals 28 and Progressives 6 being in the minority of the 260 members. The Constitution guarantees religious and political freedom, and the Church will be separated from the State. About 75 per cent. of the people are Roman Catholics.

As regards both natural resources and industrial development, Czecho-Slovakia is one of the richest territories in Europe. By the Peace Treaty it has acquired about 80 per cent. of the whole industry of the former Austrian Empire. It has several rich coalfields, and possesses valuable mineral resources which, notably in Slovakia, have not yet been fully developed. Radium, gold, silver, iron, graphite and lead, are all mined successfully, while the whole country is abnormally rich in mineral and thermal springs. Oil is found in Slovakia, and Bohemia has rich deposits of clay, kaolin and sand. The whole country is well farmed, and agricultural production is on a very high level of excellence. In foodstuffs, however, the country is not self-supporting. Thirty-three per cent. of the total area of the country is forest land, and both in the productiveness of the forests and the quality of the timber the forest wealth of the Republic is enormous. In its industrial development Bohemia may be compared to Belgium. In Bohemia, Moravia and Silesia, which have a total population of ten millions, more than four million people are engaged in industry. The various industries are well organised, and as regards both machinery and modern improvements the factories are as well equipped as any in Europe. Outside of Slovakia illiteracy is almost unknown, and both the German and Czech elements which compose the working-class population are hard-working and in many cases highly skilled. The new Republic possesses, therefore, many valuable economic advantages, and after the first two and a half years of its existence it is no exaggeration to state that Czecho-Slovakia is in a far more flourishing state than most of its neighbours.

Czecho-Slovakia has no direct access to the sea, but has a right of access over the Elbe and Oder to Hamburg and Stettin, for which purpose the Government proposes to canalise the Upper Elbe in order to connect it with the Oder and the Danube. If this proposal is carried out, the country will be traversed by a waterway affording a communication from the North Sea and Baltic, *viâ* the Danube, to the Black Sea.

„ *Vice-Consul*, A. E. Dowden.

DANUBE COMMISSIONS.

The *International Danube Commission*, with its present headquarters at Bratislava (Pressburg), Czecho-Slovakia, was created by the Treaty of Versailles (1919), the States represented under the Treaty being Bavaria, Great Britain, Hungary, France, Italy, Yugo-Slavia, Czecho-Slovakia, Bulgaria, Austria, Rumania and Württemburg. The Commission controls the navigation of the Danube from Ulm (Württemburg) to Braila (Rumania), obtaining funds for improvements and administrative expenses from shipping dues. From Braila to Sulina (the mouth of the Danube), the navigation is controlled by the *European Commission of the Danube*, created by the Treaty of Paris 1856, after the Crimean War; the representation on this Commission is confined to France, Great Britain, Italy and Rumania. The river is connected by canals with the Main, a tributary of the Rhine (Ludwig Canal); this canal will be deepened to permit the passage of larger craft than at present, thus linking up the whole Rhine and Danube systems across Europe from the North Sea to the Black Sea. The total length of the river is about 1,738 miles, and ocean-going vessels reach Braila, where transshipment into river barges is necessary. A pilotage service is maintained by the International Commission at the Iron Gates (headquarters, Orsova).

The chief towns on the Danube are the Black Sea port of Sulina, with Galatz (confluence of the Sereth), Braila, Turnu-Severin and Orsova (Iron Gates), in *Rumania*; Russchuk, Vidin and Lom Palanka, in *Bulgaria*; Belgrade, the capital of *Yugo-Slavia*; Buda-Pest. the capital of *Hungary*; Bratislava (the present seat of the Commission), in *Czecho-Slovakia*; Vienna, the capital, and Linz and Passau, in *Austria*; Ratisbon (Regensberg), in *Bavaria*; and Ulm, in *Württemburg*.

THE INTERNATIONAL DANUBE COMMISSION.

British Delegation, Adm. Sir E. Troubridge, K.C.M.G., C.B., M.V.O. (*Delegate*); R. T. Smallbones, M.B.E., H.B.M. Consul, Bratislava (*Asst. Delegate*); Robert Thompson (*Secretary*).

EUROPEAN DANUBE COMMISSION.

British Delegate, Col. J. G. Baldwin, C.M.G., Minister Plenipotentiary.

DANZIG.

(Freie Stadt Danzig.)

Under Articles 100 and 102 of the *Treaty of Versailles*, the City of Danzig with the surrounding territory (constituting a total area of about 580 sq. miles, with a population estimated at 356,700) was declared to be a Free City, under the protection of the League of Nations. The Free City was constituted Nov. 15, 1920, with an executive Senate and an elected Legislature of 120 members. The harbour is administered by a mixed board of Poles and Danzigers under a neutral President, and the League of Nations is represented by a resident High Commissioner. The principal exports are timber, sugar and eggs, and the imports herrings, coal, textiles, machinery, fats and foodstuffs. The former shipbuilding industry shows signs of revival. The tonnage of ships entered in 1922 was 1,423,129 tons, and of those cleared 1,428,820 tons.

Danzig — High Commissioner of League of Nations, Lt.-Col. Mervyn Sorley Macdonnell, O.B.E. (March 1, 1923).

BRITISH CONSULAR OFFICES.

Danzig—Consul, B. H. Fry.
„ *Vice-Consul*, D. W. Keane (*acting*).

DENMARK.

(Kongeriget Danmark.)

King, Christian X., *born* Sept. 26, 1870; *suc.* May 14, 1912; *married*, April 26, 1898, Princess Alexandrine of Mecklenburg-Schwerin, and has issue 2 sons.

Heir Apparent, H.R.H. Prince Frederik (Crown Prince), *b.* March 11, 1899.

Consul-General—Leith, G. Davidsen.
Consulates at Hull, Liverpool, Manchester, Belfast, Falmouth, Guernsey, and Newcastle-on-Tyne.

A Kingdom of Northern Europe, and the smallest of the Northern States, consisting of the islands of Zeeland, Fünen, Lolland, &c., the peninsula of Jutland, and the outlying island of Bornholm in the Baltic. Denmark is situated between 54° 34′—57° 44′ N. lat. and 8° 5′—12° 40′ E. long., with an area of 15,042 square miles, and a population (July 1, 1921) of 3,283,000, an increase of 210,000 since 1920 (164,500 being due to the inclusion of Slesvig). Nearly one-half of the population live exclusively by agriculture, and one-fourth by manufactures and trade.

In 1864 Denmark was attacked by Prussia and Austria and deprived of Schleswig-Holstein (Prussia taking the whole territory after a further war with Austria in 1866). At the conclusion of peace between the Central Powers and the Allies in 1919, the question of Schleswig-Holstein was subjected to a plebiscite of the inhabitants, and North Schleswig is now part of Denmark.

The common products are wheat, rye, oats, barley, potatoes, cattle, horses, pigs, sheep, and butter. Its manufactures are, for the most part, for home consumption. Its principal imports are coals, manufactured goods (woollens, silks, cottons), iron, hardware, wine, fruit, tea, maize, and colonial produce. In 1918, 1,070,000 hectares were under corn crops, 387,600 ha. sugar and other beets, and 787,200 ha. hay crop. In July, 1918, the live stock numbered 544,900 horses, 2,123,400 cattle, 470,000 sheep, and 620,800 swine. The crops in 1918 included 4,120,400 qrs. of oats, 2,364,400 of barley, 1,507,500 rye, 2,003,900 mixed corn and 766,000 qrs. of wheat. Its chief exports are agricultural produce, including wheat and barley, bacon, hams, flour, butter, eggs, hides, skins, corn-meal and oil-cake, horses, and cattle. There is a sea-going mercantile marine of 399 steamers, with a tonnage of 341,835. There are (1917) 2,645 miles of railway and 8,437 miles of telegraph line.

DEFENCE.—The Army consists of about 14,000 trained men, the vote for 1918–19 amounting to Kr. 85,000,000 (including supplementary estimates of Kr. 69,000,000). The Navy consists of 4 coast-defence ironclads and 1 launched, 2 small cruisers, 27 torpedo-boats (built and building), 10 submarines (built or building). Vote, 1918–19, Kr. 33,000,000.

EDUCATION is free and compulsory, the schools being maintained by local taxation. Special schools are numerous, horticulture and agriculture predominating. The University is at Copenhagen.

Elsinore—Vice-Consul, Albert Wright.
Esbjerg—Vice-Consul, C. L. Okholm.
Fredericia—Vice-Consul, C. Loehr.
Frederikshavn—Vice-Consul, Sophus Korup
Horsens—Vice-Consul, Peter Nielsen.
Kastrup—Vice-Consul, Silvio Alfred Fugl.
Kolding—Vice-Consul, Christian F. Eff.
Korsöer—Vice-Consul, Harald Fischer.
Lemvig—Vice-Consul, L. Kier.
Nyborg—V.-Consul, Capt. E. B. de Merrall
Odense—Vice-Consul, Laurids B. Muus.
Randers—Vice-Consul, Victor H. Nisted.
Svendborg—Vice-Consul, A. Nielsen.
Thisted—Vice-Consul, Sören M. Zacho
Faröe (Thorshavn)—Consul, V. Lutzen.

The outlying possessions and colonies of Denmark have an area of about 50,000 square miles, with close on 35,000 inhabitants. They include the FARÖE, or Sheep Islands (515 sq. m., pop., 1916, 19,600); GREENLAND (ice-free portion about 50,000 sq. m., total area about 830,000 sq. m., population, 1911, 13,460), the trade of which is a Government monopoly. (The three islands in the West Indies—ST. CROIX, ST. THOMAS, and ST. JOHN—were sold to the U.S.A. in 1917, the price paid being stated as $25,000,000.)

Copenhagen, distant 728 miles; transit, 36 hours.

DOMINICAN REPUBLIC.

(República Dominicana.)

Provisional President (until Dec. 31, 1923), Juan Bautista Vicini Burgos.
Interior and Police, War and Marine, Manuel Jesus Troncoso de la Concha.
Foreign Affairs, Angel M. Morales.
Finance and Commerce, Agustin Acevedo.
Justice and Public Instruction, C. Armando Rodriguez.
Public Works and Communications, Octavio Acevedo.
Agriculture and Immigration, Pedro A Perez.

Consul-General in London, Eduardo Cazeaux, 19 St. Dunstan's Hill, E.C. 3.
Consul, Octavio Ventura.
Vice-Consul, A. M. Ventura.

The Republic of Santo Domingo, formerly the Spanish portion of the island of that name, is the oldest settlement of European origin in America, having been founded in 1496 by Bartolomeo Columbus, who named it Hispaniola. The island was peopled by the Spaniards with imported African slaves, who soon exterminated the "Indian" tribes. In 1821 an independent republic was proclaimed and the Spaniards abandoned the country. The present republic of San Domingo broke away from Haiti in 1844 and its independence is secured under a law of Nov. 6, 1844. The Dominican Republic comprises an area of 19,322 square miles, with a population of 897,405.

On 29 Nov., 1916, a military Government by U.S. officers was proclaimed, but on Oct. 21, 1922 a provisional Dominican government was installed, to be followed by a constitutionally elected government after Dec. 31, 1923, when the U.S. military forces of occupation will evacuate the island. The Customs are administered temporarily by officials appointed by the United States Government, under a Treaty by which the U.S. collects the Customs, assists the Government to maintain peace, and acts as intermediary between the Republic and its foreign creditors. Since 1907 not less than 55 per cent. of the Customs Collections has been deposited in a New York Bank to pay the interest and sinking fund charges of the Foreign Loan.

Sugar and cocoa are the most important crops, and coffee and tobacco are grown in fair quantities, the other products being mahogany, furniture woods, cotton, wax, honey, logwood, turtleshell, hides, and divi-divi. There are about 150 miles of public railroad, and telegraphic (3 wireless stations) and telephonic communication has been established throughout the Republic, which is connected by cable with North and South America, New York, Curaçao, and Porto Rico. Since Jan. 1, 1922, about 280 miles of first-class roads have been constructed and opened. In May, 1922 a highway was opened across the island, from Santo Domingo to Monte Cristy, and an extensive road-making programme is now being actively pursued.

Of the import trade in 1922, 72 per cent. came from U.S. and 7 per cent. from Great Britain. British trade is hampered by the insufficiency of direct maritime communication and by the absence of direct service with the largest ports, which are on the south coast, the ships of the R.M.S.P.Co. calling at the northern ports only.

	1921. (U.S. $)	1922. (U.S. $)
Revenue	$3,085,517	$12,164,142
Expenditure	1,798,401	12,353,686
Imports	24,595,727	14,317,497
Exports	20,743,448	15,231,355
Debt (Dec. 31)	12,000,000	14,800,203
Imports from U.K.	645,069	976,327
Exports to U.K.	334,165	2,085,055

CAPITAL, Santo Domingo, on the Ozama, founded in 1496 by Bartolomeo (brother of Christopher) Columbus; population (1921) 38,000; other centres are Santiago (17,000) and San Pedro (14,000).

FLAG: Red and blue, with white cross

BRITISH LEGATION.

British Chargé d'Affaires, Darrell Wilson.

BRITISH CONSULAR OFFICES.

Santo Domingo—Consul, Darrell Wilson.
,, *Vice-Consul*, H. H. Gosling.
Sanchez—Vice-Consul, Major S. A. Court.
San Pedro de Macoris—Vice-Consul, Rev. A. H. Beer.

Santo Domingo is distant 4,600 miles; transit, 21 to 25 days.

ECUADOR.

(República del Ecuador.)

President (1920–1924), José Luis Tamajo, *assumed office* Sept. 1, 1920.
Foreign Affairs, Señor Dr. N. Clemente Ponce.
Interior, Señor Dr. Francisco Ochoa Ortiz.
Finance, Señor Dr. Alfonso B. Larrea.
Public Instruction, Señor Dr. Pablo A. Vasconez.
War and Marine, Señor Octavio G. Icaza.

Minister in London, Senor Don Gonzalo Zaldumbide.
Consul-General in London, Señor Don Guillermo H. Wright, 23 College Hill, Cannon St., E.C. 4.
Consuls at Liverpool, Birmingham, Southampton, Glasgow, and *Cardiff*.

An equatorial State of South America, extending from lat. 1° 38′ N. to 6° 5′ S., and between 60° 20′ and 81° W. long. (according to the Ecuadorian geography, but there are boundary disputes with Peru), comprising an area of 276,000 English sq. miles.

The former *Kingdom of Quito* was conquered by the Incas of Peru in the latter part of the 15th century. Early in the 16th century *Pizarro's* conquests led to the inclusion of the present territory of Ecuador in the Spanish Vice-Royalty of Peru. The independence of the country was achieved in a revolutionary war which culminated in the battle of Mount Pichincha (May 24, 1822).

The Republic of Ecuador is divided into 17 provinces and one territory. It has a population of about 2,000,000, mostly descendants of the Spaniards, aboriginal Indians, and Mestizoes. The territory of the Republic extends across the Western Andes, the highest peaks of which are Chimborazo (20,702 ft.), Iliniza (17,405 ft.), Carihuairazo (16,515 ft.), Cotocachi (16,301 ft.), and Pichincha (16,000 ft.) in the Western Cordillera; and Cotopaxi (19,498 ft.), Antisana (18,864 ft.), Cayambe (19,160 ft.), Altar (17,730 ft.), Sangay (17,464 ft.), Tungurahua (16,690 ft.), and Sincholagua (16,365 ft.) in the Eastern Cordillera. Ecuador is watered by the Upper Amazon, and by the rivers Guayaquil, Mira, Santiago, Chones, and Esmeraldas on the Pacific coast. There are extensive forests, and the cinchona bark tree is common.

Its chief products are cocoa, vegetable ivory, cotton, coffee, india-rubber, sugar, orchella weed, straw hats and hammocks, bark, yams, tobacco, fruits, sarsaparilla, wheat, &c. Its minerals consist of gold, quicksilver, lead, iron, and copper; emeralds and rubies are occasionally met with, and sulphur is found in many parts. The chief exports are cocoa, caoutchouc, vegetable ivory and gold, cinchona bark, Panama hats, coffee, and cattle; the chief imports are textiles and other manufactured goods. A railroad connecting Guayaquil and Quito was opened in 1908. The *Galápagos* (Tortoise) *Islands* (2,870 square miles) belong to Ecuador.

The language of the country is Spanish.

	1922.
Revenue	£1,867,391
Expenditure	2,379,553
External Debt (Dec. 31)	3,752,848
Internal Debt (Dec. 31)	3,257,293
	1921.
Imports	2,348,618

2nd Sec., Mohamed Kamel Moursy *Bey.*
3rd Sec., Abdel Rahman Fikry *Effendi.*

Egypt lies between 22° and 32° N. lat. and 24°–37° E. long. The northern boundary is the Mediterranean, and in the south Egypt is conterminous with the Sudan. The western boundary runs from a point on the east, N. of Sollûm (long. 25° E.), inland in a south-westerly direction for some distance and then turns S. along a meridian line approximately in long. 24° E. until it meets the parallel of 22° N. lat., which forms the N. boundary of the Sudan. The E. boundary follows a line drawn from Rafa on the Mediterranean (34° 15′ E. long.) to the head of the Gulf of Aquaba, from which point the remainder of the E. boundary is washed by the waters of the Gulf of Aquaba and the Red Sea. Within these boundaries is enclosed an area of about 363,181 sq. miles, with a population (1917) of 12,718,255.

The Nile Valley.—The river Nile runs through cliffs, which, with the exception of a stretch of granite in the neighbourhood of Aswan, are chiefly of sandstone from Wadi Halfa to near Esna, while further north from Luxor to Cairo limestone predominates. The valley varies in width from less than half a mile in the southern granitic region to over 10 miles in the northern limestone region, and the cliffs in some places rise to heights of over a thousand feet above the river. The fertile lands, on which the prosperity of the country depends, occupy the floor of the valley between the river and the bounding cliffs, while to the north of Cairo they spread out into the irregular fan-shaped formation of the Delta which comprises the six provinces of Lower Egypt, with the richest soil in the country. The Nile has a total length of 3,470 miles from the Victoria Nyanza to its mouths. In the 960 miles of its course through Egypt it receives not a single tributary stream. The river has a regular yearly rise and fall, attaining its maximum level about the middle of September and its minimum about the end of May. At Cairo the average rise and fall is about 13 feet.

The Libyan Desert.—Westward from the Nile Valley into Tripoli stretches the vast limestone plateau of the Libyan Desert. Though as a whole it constitutes one of the most arid and inhospitable regions of the world, the Libyan Desert contains a number of depressions wherein wells and springs furnish water in sufficient quantity to irrigate small areas and to support populations of several thousands. These depressions are the *Oases*, of which the principal from S.E. to N.W. are known as Kharga, Dahkla, Farafra, Baharia, and Siwa. On the eastern edge of the Libyan Desert, a few miles south-west of Cairo, stand the Pyramids of Giza, of which the highest, the *Great Pyramid*, is 451 feet high. Close to the pyramids is the *Great Sphinx*, 189 feet long.

The Eastern Desert of Egypt.—In the Eastern Desert a great back-bone of high and rugged mountains, mostly of the igneous and metamorphic rocks, extends north-westward from Abyssinia to near Suez, and reappears as a detached mass in the Peninsula of Sinai. The principal peaks of the Egyptian portion of this mountain chain are (from N. to S.) *Gebels* (Mounts) Gharib 5,760 feet, Abu Dokhan 5.450 feet, Sheyib 7,150 feet, Hamata 6,490 feet, Faraid 4,480 feet, Gerf 4,650 feet, Shendib 6.271 feet, and Elba 4,680 feet. Flanking this mountain chain on the west, between the axis of the range and the Nile are plateaux of sandstones and limestones, dissected by wadis (dry water-courses), often of great length and depth, with some wild vegetation and occasional wells and springs. The roads follow the course of the main *wadis* from well to well, and here and there are to be found small encampments of wandering Arabs.

The Sinai Peninsula.—The north (Mediterranean) coast of Sinai is flat and sandy like that of Egypt. Inland, the ground gradually rises into a highly dissected limestone plateau, which extends southward for about 150 miles and terminates in the great scarp of El Tih; in some parts this scarp rises to over 5,000 feet above the sea-level. South of El Tih the character of the country abruptly changes, the southern third of the peninsula being formed of rugged granitic mountains intersected by deep ravines. The highest peaks of these mountains, such as *Gebels* (Mounts) Katherina, 8,680 feet, Um Shomer, 8,530 feet, Eth Thebt, 8,030 feet, are higher than any of those in Egypt proper. Springs and wells occur in fair abundance, mostly in the *wadis*, and running water (mostly brackish) is found at a few points.

Native Population.—There are three distinct elements in the native population of Egypt. The largest, or "Egyptian" element, is a Hamito-Semite race, known in the rural districts as *Fellahîn* (*fellâh*=ploughman, or tiller of the soil). The *fellahîn* have been mainly Muhammadans since the conquest of the country in the 7th century, but 834,474 Coptic Christians are enumerated in the towns and villages. These Egyptian townsmen and peasantry numbered 12,404,893 in the total of the Census of 1917. A second element is the *Bedouin*, or nomadic Arabs of the Libyan and Arabian deserts (32,663 Bedouins and 107,364 Sudanese and Berbarin), of whom about one-seventh are real nomads, and the remainder semi-sedentary tent-dwellers on the outskirts of the cultivated land of the Nile Valley and the Fayûm. The third element is the *Nubian* of the Nile Valley between Aswân and Wadi-Halfa, of mixed Arab and negro blood. The Bedouins and Nubians are Muhammadans.

Foreign Population.—At the Census of 1917 the foreign residents were 205,998, of whom 30,797 were Turks 56.731 Greeks, 40,198 Italians, 24,354 British, 21,270 French and Tunisians, 2,789 Austro-Hungarians, 4.225 Russians, 157 Germans, 23,981 other Europeans, and 1,496 Persians.

Religions.—At the Census of 1917 there were 11,623,753 Muhammadans, 1,026,107 Christians, 59,581 Jews and 8,814 other religions.

Government.—From B.C. 30 to A.D. 639 Egypt was a province of the Roman Empire, but in A.D. 640 the Christian inhabitants were subjugated by Moslem invaders, and Egypt became a province of the Eastern Caliphate. In 1517 the country was incorporated in the Ottoman Empire, and was governed by pashas sent from Constantinople until the beginning of the 18th century, when for about 100 years the ruler was chosen from among the Mamelukes, or bodyguard. From 1798-1801 French troops occupied the country, with the ostensible object of suppressing the Mamelukes and restoring the authority of the Sultan, and after their forced evacuation of the country *Mohammed Ali*, who was proclaimed *Pasha* in 1805, exterminated the Mamelukes in 1811, and was eventually made hereditary governor of Egypt and the Sudan by a *firman* from the Sultan of June 1, 1841. Mohammed Ali was succeeded before his death by his son *Ibrahîm* (1848), whose nephew *Abbâs I* ruled from 1848–1854. During the reign of *Said* (1854–1863), a son of Mohammed Ali, the concession for the Suez Canal was obtained, and his successor, *Ismail* (1863-1879), a son of Ibrahim, was granted (by *firman* of May 14, 1867) the title of KHEDIVE, the previous rulers having held the title of *Vali*, or Governor. In the early years of Ismail's reign the Egyptian dominions were very largely extended, until in 1875 its territories comprised an area of nearly 1,500,000 sq. miles, with a population of about 16,000,000. The wild extravagance of Ismail drove him to raise enormous loans in Europe, which plunged the country into such financial embarrassment that the Governments of France and Great Britain intervened and forced Ismail to abdicate, appointing his son *Tewfik* (1879–1892) to succeed him. By a Khedivial decree of November 10, 1879, two Comptrollers-General were appointed for the reorganisation of the administration and re-establishment of financial equilibrium, Major Evelyn Baring being the British and M. de Blignières the French representatives. The Dual Control governed Egypt for two years, and a series of reforms was initiated, but further progress was interrupted by a military revolt, headed by an officer of the Egyptian Army (Ahmed Arâbi *Pasha*). The revolt assumed alarming proportions, but the French Government declined to intervene, and a British expedition was despatched to re-establish the authority of the Khedive. The Dual Control was abolished by a decree of the Khedive (January 18, 1883), and a British financial adviser was appointed in place of the Comptroller-General. In January, 1884, Sir Evelyn Baring (who had previously served as Comptroller-General) was appointed Consul-General for the United Kingdom, and the British expeditionary force, sent to quell the rebellion of 1882, remained in the country as an army of occupation. Meanwhile a revolt had broken out in the southern provinces, headed by Sheikh Mohammed Ahmed, of Dongola, who proclaimed himself a *Mahdi* of Islam. In 1892 Tewfik was succeeded by his elder son *Abbâs II.*, who declared himself an adherent of the Central Powers and was deposed in 1914, Hussein Kamil *Pasha* being appointed in his stead. On November 18, 1914, a British Protectorate was declared over Egypt, which was therefore taken from the suzerainty of the Sultan of Turkey, and the Khedive assumed the title of Sultan. Sultan Hussein Kamil died October 9, 1917, and was succeeded by his brother, the present King. In March, 1922, Egypt was declared to be an independent kingdom.

Local Government.—The chief towns constitute governorships (*muhâfzas*), and the remainder of the occupied country is divided into provinces (*mudirias*), which are subdivided into districts (*markaz*), each under a *mamûr*, who controls the head man (*omda*) of each village in his district. By the law of 1883 provincial councils were instituted, consisting of two representatives from each *markaz*, under the presidency of the *mudîr* (or governor) of the province. These councils were reorganized in 1910 and were made the elementary education authority for the province, with certain restricted powers of local government.

Defence. — Service in the *Egyptian Army* is nominally compulsory on all Egyptian subjects between the ages of 19 and 27, the recruits required each year being chosen by ballot; but certain classes (professors, students, Government employees, &c.) are exempt, and exemption may also be purchased for £E20, if paid before the ballot. Natives of the Sudan are enlisted voluntarily for service in the Egyptian Army, which consisted of 984 officers and 20,997 men in 1922.

There is no *Navy* in the proper sense of the term; there are 3 small cruisers belonging to the Coast Guard and Fisheries service, and 4 vessels under the Ministry of Communications, while the different Government Departments possess steamers on the Nile for inspection purposes.

The *Egyptian Police* (under the Ministry of the Interior) consists of City and Provincial Police, the former comprising 306 officers (75 Europeans), 476 European constables, and 6,585 men, the latter 369 officers and 6,162 men. There are also 60,859 *ghafirs*, or native night-watchmen.

Education on native lines has long been given in elementary vernacular schools. The native system of education is completed by the more promising pupils at the Azhar University in Cairo, the principal University of the Moslem world. In 1921–2 there were 142 *Elementary Schools* (*Maktabs*) under Government supervision, with 21,270 pupils and 3,541 *Maktabs* under inspection for grants-in-aid with 268,664 pupils; there were also 52,886 pupils in other elementary schools. The government primary schools give a 4-years' course and prepare for admission to secondary, agricultural and other special schools. There were also 1,148 Egyptian institutions with 111,935 pupils and 569 foreign institutions with 50,916 pupils. There are *Colleges* of Medicine, Law, Education, Engineering, Commerce, Veterinary Science and Agriculture at Cairo. Much assistance is given to education by private enterprise and benevolence and foreign schools abound. A National University was founded in 1908 at Cairo.

Agriculture.—The total area of Egypt is estimated at approximately 222,400,000 English acres, of which about 8,450,000 acres are formed of the alluvium brought down by the Nile from the Abyssinian hills, the remainder being chiefly limestone desert. Only the former are cultivable, and only that portion of them which can be irrigated from the waters of the Nile—this portion amounts at present to 5,400,000 acres (1919), and is capable of extension (to 7,600,000 acres) by the improvement of water storage facilities and means of distribution. By these works, and by the construction of a vast network of canals with controlling masonry works, a small part of the excess waters of the river have been stored and distributed at all seasons of the year, and perennial irrigation has been extended throughout Middle and Lower Egypt. The increase in the value of the land has been enormous, and some 2 million acres have been added to the cultivable land of Egypt. Although nearly the whole population is directly or indirectly connected with agriculture, the total given in the census return of 1917, under the headings of proprietors, tenants and labourers, &c., amounts to 4,012,000 persons employed, representing only 30·5 per cent. of the population. In 1921 the land was held as to 5,023,013 *feddâns* by 1,887,202 native owners, and as to 551,487 *feddâns* by 7,165 Europeans. The agricultural land is of two kinds. The first is that which is under the basin irrigation system, by which the land receives one watering only. This watering consists of a flooding at high Nile: as the flood decreases, the seeds of the various crops are sown, and the basin fields are left without further watering. Harvests of wheat, barley, beans, clover, vetches and lentils are gathered in due course. The second kind of land is that which is perennially irrigated by means of canals, and receives waterings according to rotations laid down by the Irrigation Department. In these lands, which are for the most part in Lower Egypt, cotton, maize, wheat, rice, beans, barley, sugar cane, clover, vegetables and fruit are the chief crops.

Cotton.—In 1922 there were 1,800,000 feddans under cotton, the crop being estimated at 4,353,000 kantars, against 1,291,889 feddans and 3,450,000 kantars in 1921. In 1922 the cotton exports were 6,479,372 kantars, valued at £E39,714,845, of which Great Britain took 2,906,515 kantars (£E17,874,228), U.S.A. 1,492,562 kantars (£E9,059,488) and France 731,916 kantars (£E4,504,893).

Live Stock.—In 1922 the cattle numbered 584,823, buffaloes 616,487, horses 34,942, mules 20,892, donkeys 613,726, and pigs 18,453.

Minerals.—The riparian districts of the lower Valley of the Nile are ill-provided with workable mineral deposits, with the exception of abundant building materials. The mineral resources of Egypt, therefore, are situated in its otherwise barren deserts. Known deposits are chiefly situated at great distances from one another and from the Nile. This fact has retarded exploration and development, but of late years considerable progress has been made. Owing to lack of knowledge of mining, consequent upon their pursuit being entirely agricultural, the local industrial classes have had very little hand in the existing enterprises, whose capital and organisation is chiefly foreign.

Manufactures and Industries.—The principal articles of Egyptian manufactures are cotton and woollen fabrics, silks, embroideries, brass, silver and copper ware, leather goods, rugs, pottery, alcoholic beverages, sugar, perfumery, and cigarettes. The principal Egyptian Industries are dyeing and tanning.

Railways.—The principal lines radiate from Cairo to Alexandria (and on to Rosetta), Damietta, and Ismailia (continuing northwards to Port Said and southward to Suez). From Cairo the line runs southwards for a distance of 554 miles to Shellal, the First Cataract. At this point a steamer connexion runs to Wadi Halfa, connecting the Egyptian State system with the Sudan Government Railways. Westwards from Alexandria (and close to the coast) runs a line, which it is hoped to extend eventually to the frontier at Sollûm, thus joining Tripoli to Egypt. The total length of the Egyptian State Railways (excluding the Auxiliary Railways of Upper Egypt and the Western Oases Railway) on March 31, 1922, was 1,590 miles. 27,342,000 passengers and 4,055,000 metric tons of merchandise were carried during 1921–2, the net receipts being £E1,359,346. The gauge is standard (4 ft. 8½ in.), with the exception of 138 miles between Luxor and Shellal, which are 3 ft. 6 in. gauge. There are two other State-owned lines in Egypt, namely, the Auxiliary Railways of Upper Egypt, consisting of 282 miles of standard gauge, and the Western Oases Railways, a length of 141 miles (75 centimetre gauge) connecting the oases of Kharga with the Nile Valley. In addition to the Government lines, there are 818 miles of light railways exploited by public companies.

Caravan Routes.—The principal caravan routes lead to the Oases of the Libyan Desert (though Kharga can now be reached by train), whence there is a route, known as the Darb el 'Arbain, leading to Dar Fûr and the south of the Sudan. There are many well-known routes across the Arabian Desert to the Red Sea, that from Qena to Qoseir being probably the most frequently used.

Shipping.—Apart from the three great seaports of Alexandria, Port Said, and Suez, Egypt has but few harbours and anchorages adapted for large craft; the principal are those of Sollûm and Matruh on the Mediterranean, Tor, Abu Zenima, Zeitia, Jemsa and Hurghada in the Gulf of Suez, and Safaga, Qosseir and Halaib on the Red Sea. The Khedivial Mail Steamship Line (which is under British management) has its headquarters at Alexandria and a depôt at Suez; the majority of the Egyptian pilgrims to Mecca now travel by it. The principal port is Alexandria, where 1,468 vessels (2,776,193 tons) entered and 1,445 vessels (2,759,496 tons) cleared in 1921. The traffic through Port Said amounted in 1921 to 626 vessels entered and 633 cleared, the remainder being dealt with *viâ* Suez.

Posts and Telegraphs.—There were in 1921 2,909 post offices and stations, dealing with a total inland correspondence of 72,340,000 (including letters, post-cards, newspapers, &c.), and a total foreign correspondence of 33,751,000. There were on March 31, 1921, 88,898 miles of telegraph and telephone lines, with 109,111 miles of wire. A system of savings banks has been introduced, under the control of the Post Office, the actual deposits being collected in rural districts by the *sarrâf* (village tax-collector).

Debt.—The *Caisse de la Dette*, a body representing the creditors of the Egyptian Treasury, has considerable powers and special privileges. The *Caisse*, appointed during an era of bankruptcy, succeeded in protecting the interests of the bondholders, but as Egypt became solvent and prosperous, its stringent regulations prevented the development of the country out of surplus revenue, a large part of which was held in suspense as contingent security for the service of the debt. Though the *Caisse* still exists, its duties are now limited to receiving the revenues necessary for the interest and for the payment of the coupons as they become due, while it also holds a considerable reserve fund, the interest on which reduces the amount of the Treasury contribution. The Egyptian debt was stated as follows (in £ sterling) on April 1, 1921 and 1922:—

Debt.	1921.	1922.
	£	£
Guaranteed Debt, 3 per cent. ………………	5,872,000	5,661,800
Privileged Debt, 3½ per cent. ………………	31,127,780	31,127,780
Unified Debt, 4 per cent. ………………	55,971,740	55,971,960
Total …………	92,971,740	92,761,540

The *Cost* of the Debt (in the Budget for 1922–23) is exclusive of £E664,826 assigned to the service of the Ottoman Loans of 1855, 1891 and 1899, which were guaranteed on the Egyptian Tribute.

CAIRO, the capital (population about 800,000), stands on the E. bank of the Nile, about 14 miles from the head of the Delta. Its oldest part is the fortress of Babylon in old Cairo, with its Roman bastions and Coptic churches. The earliest Arab building is the Mosque of ‘Amr, dating from A.D. 643, and the most conspicuous is the Citadel, built by Saladin towards the end of the 12th century. The bazaars are always interesting, especially the Khân-el-Khalili, the Hamzâwi, and the Brass Bazaar, though the Muski, which leads to them, is fast losing its oriental character.

ALEXANDRIA (population about 450,000), founded B.C. 332 by Alexander the Great, was for over 1,000 years the capital of Egypt. Its great Pharos, or lighthouse, was one of the "Seven Wonders of the World" (*see* p. 90). It now contains two royal palaces, Ras-el-Tin and Montaza, while almost the entire cotton trade of the country is here controlled by the big dealers and brokers. At the census of 1917 the towns of Tanta (74,195), Port Said (75,192) and Assiut (51,431) also exceeded 50,000 inhabitants.

The most northerly of the Baltic provinces, is bounded on the N. by the Gulf of Finland, on the S. by Latvia, on the W. by the Baltic Sea and on the E. by Lake Peipus and *Soviet* Russia (along a line roughly parallel with the eastern shore of the lake). The islands of Dago, Osel and other smaller islands in the Baltic form part of the Republic. It has an area of about 17,953 sq. miles (within the boundary settled by agreement with *Soviet* Russia), with a population (1920) of about 1,250,000. A large portion of the surface consists of forests, moors, and small lakes. Agriculture is the chief industry, rye, oats, barley, and flax being the chief crops, and dairy farming is carried on. There are important manufactures, including distilling, oil pressing, woollen, cotton, tobacco, cork, soap, and petroleum. There were (1923) 684 miles of broad gauge and 482 miles of narrow gauge railway in operation.

Legislature consists of a single-chamber Assembly (Riigikogu) of 100 members elected for 3 years by universal adult suffrage. The executive is entrusted to a council of Ministers, the Prime Minister being Regent of the Republic.

Consul-General, Capt. L. Norrgren, 57 Gordon Square, W.C. 1.

A country situated on the gulfs of Finland and Bothnia, which was conquered by Russia from Sweden, and annexed in 1808. Resulting from the revolution in Russia, Finland proclaimed its independence in 1918, and is now an independent Republic. The area is 145,588 square miles, with a population (1922) of 3,402,582 of whom about 3,000,000 are Finns, 300,000 Swedes, and 2,000 Laps, leading a nomadic life in the north. Nearly all the inhabitants are Lutherans. There is a university at Helsingfors, with 2,770 students, of whom 737 are women, in addition to the Polytechnic and the (reopened) Swedish University at Abo. The leading crops are rye, barley, oats, potatoes. Saw mills, wood pulp, cellulose and paper manufacture provide the chief industry, and the forests are a great source of wealth, immense quantities of timber being prepared for export; dairy produce is also exported. There are (1923) 2,788 miles of railroad; and a merchant fleet of 4,691 vessels (mostly small), of which 636 are steamers. Railway connexion with Sweden was completed in 1919.

The country was formerly governed by the Finnish Senate, of 22 members, with a Diet of 4 estates elected by the people, but under the Constitution of Jan. 1, 1907, there is a single Chamber elected by universal suffrage of both sexes, women being likewise eligible for election to the Chamber. Finland was thus the first country to concede woman suffrage and representation, and it is noteworthy that it was gained without agitation.

The *Aland Archipelago*, a group of some 300 small islands at the entrance to the Gulf of Bothnia was wrested from Sweden by Russia in 1809, and was incorporated in the government district of Finland. The total area of the archipelago is about 210 square miles, with a population of about 17,000, of whom about two-thirds inhabit Aland (the largest island).

FIUME.

(Free City of Fiume.)

Military Governor, Gen. Gaetano Giardino.

By the *Treaty of Rapallo*, the Free City of Fiume was recognized by Italy and by Yugo-Slavia; but until the Treaty is carried out in its entirety the city is occupied by Italian military forces and the Military Governor exercises legislative and executive power. The area is about 8 square miles with a population of 50,000, of whom about 10,000 inhabit the surrounding country, and 40,000 the city itself.

British Consul, Fiume—Alan Napier.

The most westerly State of Central Europe, extending from 42° 20′ to 51° 5′ N. lat., and from 7° 45′ E. to 4° 45′ W. long., bounded on the north by the English Channel and Straits of Dover (Pas de Calais), which separate it from England. Its circumference is estimated at about 3,000 miles, and its area (in 1914) at 207,076 square miles, divided into 87 departments, including the island of Corsica, in the Mediterranean, off the west coast of Italy. The territory ceded by the *Treaty of Frankfort* (May 10, 1871) amounted to 5,602 square miles; that regained by the *Treaty of Versailles* (June 28, 1919) to 5,819 square miles, making the present area of France (exclusive of Algeria) 212,895 square miles, with a population (census of March 6, 1921) of 39,209,666 (inclusive of Alsace and Lorraine). In 1922 there were 759,846 births, 383,220 marriages, 27,684 divorces, and 689,257 deaths; in 1920 the excess of women over men was 2,500,000.

France has always been attractive to foreigners, of whom (1921) 1,550,449 were resident there, including 470,873 Italians, 415,546 Belgians, 303,141 Spanish, 55,456 British, 34,027 Russians, and 30,948 Americans.

GOVERNMENT.—The monarchical system of government was overthrown by the *French Revolution* (1789–1793), and the First Republic endured until the Great Napoleon (born Aug. 15, 1769, died May 21, 1821) founded the First Empire in 1804. The monarchy was restored in 1814, and also after the "Hundred Days" of Napoleon (March 20–June 29, 1815), until the Second Republic of 1848, which became the Second Empire on Nov. 22, 1852. On Sept. 4, 1870, the Emperor Napoleon III. (nephew of the Great Napoleon) was deposed, and the Third Republic was set up. The head of the Republic is the President, elected for 7 years by the National Assembly of the two houses of the Legislature, the *Senate* of 300 members (elected by indirect vote for 9 years, one-third being renewable every 3 years) and the *Chamber of Deputies* of 597 members (elected by direct vote for 4 years). Members of the legislature receive 15,000 francs a year and travelling facilities over the railways.

PRODUCTION.—The chief agricultural products are wheat, barley, rye, maize, oats, potatoes, beetroot (for the manufacture of sugar), hops, &c. Fruit trees abound, and are very productive, the principal being the olive, chestnut, walnut, almond, apple pear, citron, fig, plum, &c. The agricultural production in 1913, 1921 and 1922 is shown in the following table:—

	Production.		
Crop.	1913. Quintals.	1921. Quintals.	1922. Quintals.
Wheat......	86,919,050	88,034,290	64,000,000
Rye	12,714,750	11,276,110	9,500,000
Barley......	10,437,600	8,342,850	8,600,000
Oats	51,826,010	35,482,950	35,500,000
Potatoes...	125,859,652	83,096,550	83,000,000

The extent of land completely devastated by artillery fire in France was 3,306,350 hectares, comprising 4,329 communes. There were 794,000 dwellings destroyed or damaged, of which on Oct. 10, 1922, about 408,000 had been reconstructed. Forestry is an important industry, the principal forests being those of the Ardennes, Compiègne, Fontainebleau, and Orléans, consisting chiefly of oak, birch, pine, beech, elm, chestnut, and the cork-tree in the south. The vine is cultivated to a very great extent (69,250,000 hectolitres of wine were produced in 1922), as the names Bordeaux, Burgundy, Champagne, &c., universally testify; cider-making is also an important industry, and the production in 1921 amounted to 482,986,573 gallons. The live stock (1921) included 13,343,440 cattle, 9,599,560 sheep, and 5,166,080 pigs. The mineral resources include coal, pig iron, copper, lead, silver, antimony, and salt. Under Article 50 of the *Treaty of Versailles*, the coalfields of the *Saar Basin* are ceded to France for 15 years, at the end of which time the inhabitants are to decide by a *plébiscite* whether they will remain French, return to Germany, or become a self-governing community. The coalfields abut on Lorraine, and have an area of 217 square miles, with a population of 640,000, and they include the towns of Saarbrück (60,000), Saarlouis (16,000), and Merzig (10,000), on the River Saar. In 1911 the mines of France produced 30,000,000 tons, but in spite of the damage done to them it reached 25,000,000 in 1921, to which must be added over 3,500,000 tons from the Moselle basin and 9,500,000 tons from the Sarre. Payments already made for the reconstruction of war damage of all kinds amount to 98,000,000,000f., and it is reckoned that another 84,000,000,000f. will be necessary to complete the cost of compensation and reconstruction. Under Annex V. of the Treaty, Germany also undertakes to deliver to France 7,000,000 metric tons of coal annually for 10 years, and to make good any deficiency due to War causes in the production of coal in the departments of Nord and Pas de Calais. The most important manufactures are of metals, watches, jewellery, cabinet-work, carving, pottery, glass, chemicals, dyeing, paper making, woollens, carpets, linen, silk, and lace. Glass manufacture and pottery are also important, and the sardine fisheries and the culture of oysters are a source of wealth.

DEFENCE.—The *National Army* of France consists of the Metropolitan Army, the Colonial Army, the Gendarmerie, and Republican Guard, and of the partly native armies of Algeria, Morocco, and Tunis. These forces had a total strength on a peace footing (in 1914) of 633,733 all ranks. In the War of 1914–1918 over 20 per cent. of the French people were mobilised, and 9,717,000 all ranks passed into the Armies of France (exclusive of troops from Algeria, Tunis, and Morocco). Of this total over 1,500,000 were returned as killed or missing. By law of 1919, the French Army will consist in future of 350,000 all ranks on a peace footing, and of 1,300,000 on a war footing, with a reserve (including Territorials) of 2,000,000 all ranks. The *French Navy* was manned in 1920 by 56,000 officers and other ranks, and consisted in 1923 of 6 Dreadnought and 3 Pre-Dreadnought battleships, 6 cruisers, 5 light cruisers, 51 destroyers, and 47 submarines, 20 airships and 98 aeroplanes.

ARMISTICE MONUMENT.—In the Forest of Compiègne is a *Carrefour de l'Armistice*, from which the *Clairière de la Victoire* leads to the Armistice Monument, unveiled Nov. 11, 1922. The monument marks the spot where the Germans signed the armistice terms presented by Maréchal Foch, and bears the inscription *Ici le 11 Novembre 1918 succomba le criminel orgueil de l'Empire Allemand vaincu par les peuples libres qu'il prétendait asservir.*

EDUCATION.—The educational system is highly developed. *Central Administration* comprises (*a*) Ministry of Public Instruction; (*b*) Superior Educational Council, charged with the actual administration; (*c*) Consultative Committee (advisory); (*d*) Educational Bureaux and Inspecting Staffs, whose heads report direct to the Minister. *Local Administration* comprises (*a*) Territorial Academies, with inspecting staffs for all grades, and (*b*) Departmental Councils, presided over by the *préfet*, charged especially with *primary* education. By the Law of July, 1904, all congregationist institutions are to be suppressed within 10 years, and many were at once closed, some re-opening under lay management. (i.) *Primary: Secular, comp.* and *free.* Age 6–13. Schools include (*a*) infants; (*b*) lower primary; (*c*) higher do. Supplementary courses, and courses for adults. Lower and higher primary certificates granted. Numerous private courses are aided from local funds. Schools are for boys, for girls, or mixed. (ii.) *Secondary:* State lycées, communal colleges, and many private establishments, 7-yrs. course, either (*a*) purely classical; (*b*) purely modern; (*c*) Latin and sciences; or (*d*) Latin and modern languages. Degree of Bachelor conferred on completion. For females, a similar organisation, course 5–6 yrs. Sèvres school and the Sorbonne Association well-known. (iii.) *Special Schools* are very numerous, many public institutions being dependent on ministries other than that of Public Instruction. (iv.) *Universities* (State universities alone grant degrees, but numerous private faculties and private institutions further higher education): Aix, Algiers, Angers, Bordeaux, Caen, Clermont, Dijon, Grenoble, Lille, Lyon, Marseilles, Montauban, Montpelier, Nancy, Nantes, Paris, Poitiers Rennes, and Toulouse.

COMMUNICATIONS.—The principal rivers of France are the Seine, Loire, Garonne, and Rhône; the navigable waterways having a length of 4,214 miles, with 3,263 miles of canals. The system of railroads in France is very extensive; they are almost entirely *concédés*, and become State property after the expiration of the concession. The length of lines of general interest, inclusive of local lines, open for traffic on 31 December, 1921, was 27,683 miles, the total receipts from passenger and goods traffic, &c., being £126,299,380 (£1 = 50 fr.). In 1922 there were 50 fatal accidents on French railways, with 96 killed and 544 injured; in 1921, 72 accidents with 137 killed and 656 injured; and in 1920, 142 accidents with 122 killed and 1,064 injured. The length of telegraph wires is 118,129 miles, and of telephone lines 99,514 miles.

Shipping.—The gross tonnage of the French mercantile marine in 1922 was 3,560,000 gross tons, of which 366,000 gross tons were sailing vessels. Under the Armistice clause France has received 109 ex-German vessels (445,543 gross tons). During the year 1920 the tonnage of French and foreign vessels entering French ports amounted to 28,790,399 tons, of which 7,426,723 tons were French, while the total clearings amounted to 16,947,025 tons, of which 5,291,395 tons were French. The chief ports are Marseilles, Rouen, Bordeaux, Le Havre, Calais, Boulogne, Dunkirk, and Cherbourg. A bill was passed by the Chamber in 1921 for the canalisation of the Rhone, which will make the river navigable for 1,200 ton vessels from the sea to Switzerland, and will also provide electric power and irrigation to the surrounding departments.

COMMERCE.—The principal imports are wool, cotton, coal, silk, oleaginous fruits and seeds, machinery, raw skins, cereals, timber, caoutchouc, copper, petroleum oils, coffee, and wines. The principal exports are cotton tissues, silk tissues, wool, woollen tissues, wines, smallwares, automobiles, &c., silks, raw skins, millinery and artificial flowers, dressed skins, tools and metal goods, machinery, pig iron, butter, table fruits, refined sugar, brandy and liqueurs, fish, and cheese.

Alsace-Lorraine. — *High Commissioner*, M. Mirhan (1920). Alsace-Lorraine, formerly a part of the Holy Roman Empire, was ceded to France in 1648 at the Peace of Westphalia, and was ceded to Germany by the *Treaty of Frankfort* (May 10, 1871), after the Franco-Prussian War. At the close of the War, 1914–1918, the Provinces were regained by France under the *Treaty of Versailles* (June 28, 1919). They embrace the fertile plain between the Rhine and the Vosges, and stretch beyond these mountains as far as Luxemburg. Wine, tobacco, hops, iron, and coal are among the leading productions, and the cotton industry is most flourishing. The area is 5,605 square miles; the population in March, 1921, was 1,709,749. Principal towns, Strassburg (pop. 166,767), Mülhausen, and Metz.

Algeria.—The three departments of Algeria—Algiers, Oran, and Constantine—form an integral part of France, under a Governor-General, assisted by a Consultative Council. These departments lie between 4° 36′ W. to 6° 16′ E. longitude, 37° 6′ N. to an undetermined S. limit, about 30° N., covering an area estimated at 222,120 square miles, with a population (1921) of 5,806,090, of whom 829 were Europeans and 4,976,262 natives. The revenue in 1922 was estimated at *francs* 707,047,499, and the expenditure at *francs* 707,326,774. The bulk of the trade is with France, the exports to France amounting in 1920 to *francs* 934,715,000 (total exports *fr.* 1,355,372,000), and the imports from France to *fr.* 2,291,005,000 (total imports *fr.* 3,072,707,000). The exports consist mainly of wine, wheat and other cereals, sheep and oxen, skins, fruits, zinc and iron ores, olive oil, phosphates (372,019 metric tons in 1921), cork wood, esparto grass, manufactured tobacco, and vegetables. The principal imports from the U.K. were coal and patent fuel, machinery, cotton oil, cotton tissues, tin plates, clothing, and prepared skins. Iron, copper, quicksilver, zinc, and lead mines are being worked. In 1919 there were 2,228 miles of railroad open for traffic; and in 1921 the number of ships engaged in foreign trade entering and clearing Algerian ports was 4,067, of a net tonnage of 7,685,111 tons. The principal town is Algiers, the capital (population, 1921, 551,949), a most important coaling station and much frequented as a health resort; other large towns are Oran, Constantine, Bône, and Tlemnçe. *Governor-General*, M. Théodore Steeg.

CAPITAL, Paris, on the Seine. Population (1921), 2,906,472; there are 82,127 houses and 1,149,366 families according to the census of March 1921. Fourteen other cities exceed 100,000 — Marseilles 586,341, Lyons 561,592, Bordeaux 267,409, Lille 200,952, Nantes 183,704, Toulouse 175,434, St. Etienne 167,967, Strasbourg 166,767, Nice 155,839, Le Havre 163,374, Rouen 123,712, Roubaix 113,265, Nancy 113,226, and Toulon 106,331. Mulhouse, Amiens and Limoges exceed 90,000, and 30 others exceed 50,000.

FLAG: The "tricolour," three vertical bands, blue, white, red (blue next to flagstaff).

BRITISH EMBASSY.

Embassy, 39 Faubourg St. Honoré.

Ambassador Extraordinary and Plenipotentiary, His Excellency The Most Hon. Marquess of Crewe, P.C., K.G. (1922) ……£16,500
Minister Plenipotentiary, E. C. E. Phipps, C.M.G., C.V.O.
1st Sec., O. G. Sargent.
" H. Knatchbull-Hugessen, C.M.G.
" R. S. Hudson.
2nd Secretary, V. F. W. Cavendish-Bentinck.
Hon. Attachés, Capt. A. Paget; Capt. G. J. Sandys; H. M. G. Jebbe.
Commercial Counsellor, J. R. Cahill.
Commercial Sec., A. H. S. Yeames.
Naval Attaché, Comm. E. B. C. Dicken, D.S.C., R.N.
Military Attaché, Maj.-Gen. Hon. Sir C. J. Sackville-West, K.B.E., C.M.G.
Asst. do., Lt.-Col. Lord Douglas Graham, D.S.O., M.C.
Air Attaché, Squadron Leader J. P. C. Sewell, O.B.E.
Secretary to H.M. Ambassador (temporary), Hon. G. Chichester.
Archivist, W. D. Cuthbertson, M.B.E.
" (*Assistant*), E. J. Moignard.

BRITISH CHAMBER OF COMMERCE, 6 Rue Halevy, Paris, IXème. *President*, John Laurier.

There are also British Chambers of Commerce at 2, Rue Beauvau, Marseilles, and 4, Avenue Massena, Nice.

Paris is distant from London 267 miles ; transit, 7 to 8 hours.

FRENCH COLONIES.

Colony, &c.	Area.	Population.
Indo-China	257,000	18,000,000
Asia Minor	150,000	4,500,000
Africa	4,100,200	43,550,000
America	33,200	500,000
Oceania	10,000	100,000
Total	4,550,400	66,650,000

In ASIA.—*French India* includes Pondicherry, on the Coromandel coast ; Chandernagore, on the Hooghly ; Karikal, in the Cauvery delta ; Yanaon, in the Godavery delta ; and Mahé, on the Malabar coast—the total area being 200 square miles with an estimated population of 277,700. *French Indo-China* comprises the possession of Cochin-China and the four protectorates of Cambodia, Annam, Tonkin, and Laos. In 1898–9 the port of Kwang-Chow-Wan was also acquired on lease from China. The capital is Hanoi, in Tonkin, and the total area is 309,979 square miles, with a population (1912) estimated at 16,600,000.

In ASIA MINOR.—The French mandatory sphere of *Syria, Cilicia* and *Lebanon* has a total area of about 150,000 square miles, with an estimated population of 4,500,000 (*see* also pp. 833 4).

In AFRICA.—*Algeria* (*see* above) is an integral part of France. *Morocco* (*see* p. 809–10) is a French (and partly Spanish) protectorate.

Tunis (*Bey of Tunis*, Sidi Mohammed ed Habib, *acceded* 1922) has been a French protectorate since 1881. It lies between Algeria and Tripoli, and extends southwards to the Sahara, with a total area of about 45,000 sq. miles and an estimated population of 2,000,000, of whom about 600,000 are Berbers and 500,000 Arabs. The valleys of the northern region support large flocks and herds, and contain rich agricultural areas, in which wheat, barley, and oats are grown. The vine and olive are extensively cultivated. The principal minerals are coal, copper, lead, zinc and iron, and phosphates and marble are also worked. The chief exports are phosphates, olive oil, wheat, esparto grass, barley, beans, blankets, sponges, and dates; the chief imports are textiles and other manufactures, iron, steel, machinery and provisions. Eighty per cent. of the trade is with France and Algeria. Tunis, the capital, has a population of 230,000; other towns are Sfax (84,000), Bizerta (30,000), Susa (30,000), Kairwan (22,000), Gabes (16,000), and Monastir (6,000). *French West Africa* extends from Mauritania to Dahomey, and has a total area of 1,509,733 square miles, and a population of 11,344,076. It consists of *Senegal* (74,000 sq. miles, pop. 1,250,500), capital, St. Louis; *Upper Senegal Niger* (304,000 sq. miles), and the *Niger Military Territory* (533,000 sq. miles), which have a total population of about 6,036,200; *French Guinea* (92,600 sq. miles, pop. 1,737,350); *Ivory Coast* (126,100 sq. miles, pop. 1,216,300); and *Dahomey* (38,000 sq. miles, pop. 878,500); adjoining Dahomey is the French Sphere of the former German colony of *Togoland* (23,400 sq. miles, pop. 800,000); while the hinterland of these colonies forms the *French Sahara*, which has an estimated area of 924,160 sq. miles and a population of about 450,000. *French Equatorial Africa* consists of the *French Congo* (513,000 sq. miles., pop. 9,000,000) and of the French Sphere in the former German territory of *Cameroon* (267,000 sq. miles, pop. 2,750,000). *French East Africa* consists of the *Somali Coast* (46,300 sq. ms., pop. 208,000) and of the large island of *Madagascar* (226,000 sq. miles, pop. 3,153,500) with its dependencies (Nossi Bé, Sainte Marie, Réunion, and the Mayotte-Comoro Islands, and St. Paul, Amsterdam, and Kerguelen Islands). Agriculture and cattle raising are the principal industries; the minerals include gold, silver, iron, copper, lead, and zinc. The chief exports are gold, cattle, bark, manioc (for arrowroot), beans, hides, skins, fibre, rice, timber and rubber; the chief imports are cottons, metal manufactures, wines and spirits, coal, clothing, lime and cement. The capital, Antananarivo, has a population of 75,000; other towns are Tamatave (the chief port), Majunga, Diego-Suarez, Mananjary, Tuléar, Andevoranto and Vohémar. Off the south-east coast are the uninhabited islands of St. Paul, Kerguelen and Amsterdam. There is now direct communication across French and British territory in Africa, with posts on the Atlantic and Indian ocean.

In AMERICA.—Off the south-east coast of Newfoundland are two small groups of islands, of which the largest are St. Pierre and Miquelon. In the West Indies, Martinique and Guadaloupe, with Basse Terre, Marie Galante, Ile des Saintes, Petite Terre, St. Bartholomew, and St. Martin; and in South America, Cayenne or French Guiana. The total area of French possessions in North and South America is 35,320 square miles, with a population of 428,850.

In AUSTRALASIA.—New Caledonia (7,200 sq. ms., pop. 50,500) is a large island with many dependencies, and the Society Islands (Tahiti, &c.) and other islands have a total area in the Pacific Ocean of 8,378 square miles, with a population estimated at 81,100. The New Hebrides are under joint Franco-British administration.

GERMANY.

(Deutsches Reich.)

President of the German Republic, Herr Friedrich Ebert, *born*, Feb. 4, 1870, *assumed office*, Feb. 11, 1919.

MINISTRY.

Chancellor, Dr. Stresemann.
Vice-Chancellor and Minister for Reconstruction, Dr. Robert Schmidt.
Foreign Affairs, Dr. Stresemann.
Interior, (vacant).
Labour, Dr. Brauns.
Justice, (vacant)
Finance, Dr. Luther.
Food (vacant).
Communications, Herr Oeser.
Defence, Dr. Gessler.
Posts, Dr. Hoefle.
Industry, Herr Koeth.
Ministry for Occupied Territory, Dr. Fuchs.

Ambassador in London, Dr. Friedrich Sthamer, 9 Carlton House Terrace, S.W. 1.
Consular Dept. of the Embassy, 21A Bedford Place, W.C. 1.

The area of Germany is approximately 172,270 square miles, with a population on Oct. 8, 1919 of 59,858,284, of whom 28,498,891 were males and 31,359,393 were females. The population on Dec. 1, 1910 was 64,925,993. Births in 1920 numbered 1,651,593 and deaths 985,235, births being 26·7 per 1,000 of population, deaths 15·9 per thousand.

Religious confessions in the present area were in 1910:—Protestants 38,117,501, Roman Catholics 19,326,396, Jews 538,912, others 472,132.

There are 43 large towns with over 100,000 inhabitants, and of these 29 are in Prussia, 4 in Saxony, 3 in Bavaria, 2 each in Baden and Hesse, 1 each in Württemburg and Brunswick, and three Hanse Towns.

At the outbreak of war, Aug., 1914, "Germany" was a Confederate League, bearing the name "German Empire," under the hereditary presidency of the King of Prussia, holding the title of "German Emperor."

By the *Treaty of Versailles* the "Reichsland" of Elsass-Lothringen and the Saar coal basin (temporarily) were ceded to France; parts of Posen and West Prussia to the newly-formed Republic of Poland; North Schleswig to Denmark; and Moresnet and Malmédy to Belgium. Plebiscites held in June 1920 in parts of East and West Prussia yielded majorities for Germany. A plebiscite to decide the fate of Upper Silesia, which was held under the Peace treaty, resulted in division between Poland and Germany. Memel City with adjoining territory has been ceded to Lithuania.

The Colonial possessions of the German Empire extended over 1,035,086 sq. miles in Africa, 96,210 sq. miles in the Pacific, and 2,943 sq. miles in Asia—a total of 1,134,239 sq. miles, with a population estimated in 1914 at 15,000,000. By the *Treaty of Versailles* Germany renounced her overseas possessions, with all rights and titles therein, and the delegates to the International Council at Paris allocated Togoland and Kamerun to Great Britain and France; German East Africa to Great Britain; German S.W. Africa to the Union of South Africa; the German Pacific possessions N. of the Equator to Japan; and those S. of the Equator to Australia and New Zealand.

On Nov. 9, 1918, the German Emperor abdicated, and the Government of the country was taken over by the Council of the People's Commissioners in Berlin. On Nov. 11, 1918, Germany was granted an armistice, and on June 28, 1919, peace was signed at Versailles. In Jan. 1919, elections were held to a National Assembly on the basis of universal adult suffrage (male and female), and on Feb. 11, 1919, the first President of the German Versammlung was elected at Weimar. Under the new Constitution of August 11, 1919, the federal legislature consists of a *Reichstag* representing the whole nation and elected by popular suffrage (male and female), with proportional representation, and a *Reichsrat* representing the separate States. The people possess the right of initiative and the referendum. Bills dealing with economical questions or social issues arising thereout must first be submitted to the new advisory Economical Council (*Reichswirtschaftsrat*).

PRODUCTION AND INDUSTRY.—Germany, up to the commencement of the War, was becoming more and more a manufacturing country. In 1907, 32·6 per cent. of the population were supported by agriculture, 37 per cent. by industry and mining, 11·5 per cent. by trade and communications. Of the total area in 1907, 78,632,140 acres were under cultivation, and 34,272,141 acres were woods and forests. The Live Stock (Dec. 1, 1921) included 3,683,252 horses, 16,850,584 cattle, and 15,879,223 pigs; Germany supported about nine-tenths of her population by her own produce in 1914. The mineral produce was valued in 1912 at £592,250,000, and included 190,109,440 tons of coal, 87,233,084 of lignite, and 28,607,903 of iron ore; potash, rock-salt, lead-ore, gold and silver ore, graphite, asphalt, petroleum, Epsom-salts, boracite, tin-ore, quicksilver-ore, antimony-ore, cobalt-ore, nickel-ore, arsenic-ore, manganese-ore, bismuth-ore, uranium-ore, wolfram-ore, pyrites, vitriolic-ore, and alum-ore are also worked. Crefeld, Elberfeld-Barmen, Chemnitz, Augsburg, and the provinces of Westphalia and Silesia are the great centres of the textile industries. By laws of 1919 and 1920, all coal, heavy iron and steel, potash and coal-tar producing concerns were compulsorily fused into All-German Syndicates, governed by assemblies representing Producers, Traders and Consumers, with equal representation for Employers and Employed.

Under the stimulus of the falling mark exchange, which favoured competition abroad and induced the home public to convert its depreciating currency into solid goods, Industry has flourished almost uninterruptedly since 1919. Unemployment has been very slight, and in Sept. 1922 touched the lowest figure recorded. Production of all industrial goods has recovered, but in most cases remains below that of 1913. Bankruptcies have almost disappeared. In 1913 bankruptcies totalled 9780; in the first half of 1923, 183. Currency reform or stabilisation is expected to cause a decline in industrial activity

OLD AGE AND INFIRMITY INSURANCE.—The German scheme of social legislation gives all subordinate bread-winners in Germany a legal right to pecuniary subvention when unfitted for work through sickness, accident, premature infirmity, or old age. Insurance is compulsory. This National Insurance is based on mutual insurance and self-administration. The Infirmity Insurance Act came into force Jan. 1, 1900. The insured include all persons working for wages or salary as workpeople, artisans, journeymen, apprentices, domestic servants, laundresses, dressmakers, sempstresses, housekeepers, charwomen; overseers, foremen, engineers, assistants, clerks and apprentices in merchants' offices (excepting assistants and apprentices in chemists' shops), schoolmasters, schoolmistresses, tutors and governesses, including foreigners working in Germany under these categories. Pensions for premature infirmity are given to insured persons when unfit for work; old age pensions to all insured persons on attaining the age of 70, though still capable of work. A comprehensive project of reform of the State insurance legislation became law in 1911. The new law codified previous legislation, established new Insurance Authorities, reduced working-class influence in the Accident Insurance organisations, provided pensions for widows and orphans, and made other changes of importance. Another Bill extending Insurance benefits to private officials, clerical employés and others above the class of manual workers, became law in 1911. A Bill establishing Federal Unemployment Insurance for industrial workers (not farm labourers or domestic servants), clerks, actors and orchestra musicians, and a Bill providing a Federal Labour Exchange Organization, are before the Reichstag. The income limits within which social insurance is compulsory are being constantly changed owing to the currency depreciation. In late 1923 many social insurance organisations were reported to be in financial difficulties.

DEFENCE.—By Article 160 of the *Treaty of Versailles* the German *Military Forces*, as from March 31, 1920, must not comprise more than seven divisions of infantry and three divisions of cavalry, a total force of 100,000 all ranks. By Article 181 of the Treaty, the German *Naval Forces* must not exceed 6 battleships of the Deutschland or Lothringen class, 6 light cruisers, 12 destroyers, and 12 torpedo boats. No submarine vessels are to be included in the naval forces, and all war vessels in excess of the above numbers are to be broken up or devoted to commercial purposes. Under the terms of the Armistice of Nov. 11, 1918, the German High Sea Fleet surrendered to the Allies (Nov. 21, 1918) and was interned in Scapa Flow, manned by German naval crews. It was scuttled by its crews in Scapa Flow, while in custody, on June 21, 1919. In consequence of this breach of the Armistice agreement by the German crews the Allies (Nov. 10, 1919) called upon the government to surrender 5 light cruisers, and certain floating docks, cranes, and dredgers, in addition to the previous naval surrenders. By Article 198 of the Treaty the armed forces of Germany must not include any military or naval *Air Forces*, and no dirigible balloons, aeroplanes, sea-planes or flying boats.

COMMUNICATIONS.—The total length of the *Railroads* at end of 1919 was 55,950 kilometres, of which all except 3,623 kilometres belong to the

Republic. The number of registered automobiles and motor cycles (July 1, 1921) was 90,390. Length of *Telegraph Lines* (1920) 223,300 kilometres (length of wires, 2,385,600 kilometres); telegrams handed in, 74,736,000; post offices, 36,497; telegraph offices, 47,485; wireless stations, 162; telephone call-stations, 40,146; letters delivered, 4,550,100,000; cash on delivery orders, 9,895 million marks; money orders, 15,055 million marks; telegrams despatched, 74,736,000; telegrams received, 76,554,000. The number of employés in the service of posts, telegraphs, and telephones was 444,453. The State postal services were taken over by the Federal Government in 1920. In addition to some 6,000 miles of navigable rivers there are over 1,500 miles of canals and 1,600 miles of ship canals. At the outbreak of the War of 1914–1918 Germany ranked second to Britain in the list of maritime countries. On January 1, 1913, the Mercantile Marine consisted of 2,098 sea-going steamers of 17·65 register tons and upwards (4,380,348 tons gross register), and of 2,420 sailing vessels (447,870 tons gross register); number of seamen, 77,746. As a result of the War and of the Peace Treaty shipping in 1919 sank to 419,000 tons, but there has since been a rapid recovery, due mainly to native building, but partly to purchases from abroad. Finished new constructions of vessels exceeding 100 gross tons were in 1919, 134,535 tons, 1920 241,985 tons, 1921 509,064 tons, 1922 575,264 tons. On December 31, 1922, shipping had increased to 2,175,969 tons. Recovery was helped by the establishment of eleven new yards during the War. The chief ports of Germany are Hamburg, on the Elbe; Bremen, on the Weser; Stettin, on the Oder; Königsberg, on the Pregel; Kiel, on the Baltic (connected with the Elbe by the Kaiser Wilhelm Canal); and Lübeck, on the Baltic. Kiel is being converted into a free port. Under the Peace Treaty Danzig became a Free State, subject in its foreign affairs to the Polish Republic. Traffic in the chief ports has increased since the War at a great rate, and now exceeds that of 1913. Arrivals at Hamburg were: 1913, 14,195,496 net tons, 1919 1,870,000 tons, 1920 4,485,833 tons, 1921 9,532,801 tons, 1922 13,005,089 tons, first six months of 1923 7,517,312 tons against 6,927,560 tons in same months of 1913. Bremen shipping traffic in the first half of 1923 also exceeded that of before the War.

FINANCE.—Under Articles 248–263 of the *Treaty of Versailles* the German Government undertook to pay the cost of the Armies of Occupation from Nov. 11, 1918, until they shall be withdrawn, the occupied area extending to the Rhine (with "bridgeheads" on the right bank) from Eiten, on the Netherland's frontier, in the north, to the junction of the German–Lorraine frontiers, in the south. The amount of the reparations due by Germany under the Treaty was fixed in January, 1921 (by the Financial Council of the Allies at Brussels) at 132 milliards of gold marks (£6,600,000,000) payable in bonds, to be redeemed by annual payments of 2 milliard gold marks, together with a sum equivalent to 26 per cent. of German exports. Of the amounts thus payable the various shares from 1921–1929 were apportioned to France 52 ninety-second parts, Great Britain 22, Italy 10 and Belgium 8 ninety-seconds; from 1929–1932 the shares are varied to France 130 two hundred and thirtieth parts, Great Britain 55, Italy 25 and Belgium 20 two hundred and thirtieths; and for the succeeding 31 years France 156 two hundred and seventy-six parts, Great Britain 66, Italy 30 and Belgium 24 two hundred and seventy-six parts.

German federal Finances are in a state of complete chaos. Since the Armistice, Finances have been in close association with the depreciating mark exchange. The best period of post-war Finances was reached in June, 1922, when over 70 per cent. of Expenditure (including Reparations) was covered by revenue from taxation. In the second accountancy period of August, 1923 only 0·7 per cent. of Expenditure was covered. The fall in mark exchange and the consequent price rise rapidly increased the Expenditure, while receipts from taxes, railways and posts increased relatively slowly. As a result of this the mark collapse led to a complete disproportion between Expenditure and Revenue, and current deficits had to be covered by increasing the Floating Debt of discounted Treasury Bills, against which the Reichsbank printed unsecured notes, thereby again depreciating the currency and reducing the value of the tax yield. The movements of mark exchange and the Debt accumulation have been as follows:

	Marks to the £1	Total Debt. In Millions of Marks.
Mar. 31, 1914 ……	20·43	4,918
Sept. 30, 1920 ……	214	242,699
June 30, 1921 ……	280	292,659
June 30, 1922 ……	1,394	375,993
June 30, 1923 ……	711,775	24,990,423
Sept. 30, 1923 ……	723,187,500	46,844,781,444

The Reichsbank's note circulation rose from 2,593 million marks on Dec. 31, 1913 to 1,280,095 millions on Dec. 31, 1922, and 8,627,729,773 millions on Sept. 22, 1923. Only 64 milliards of the Debt is funded. Owing to the fact that the currency depreciated even more rapidly than the Debt accumulated, the gold burden of the Debt has decreased, being approximately £1,000,000,000 on June 30, 1921, £233,000,000 on June 30, 1922, and £7,000,000 on August 31, 1923. The Republic's Debt to the states incurred as compensation for the federalised railways had fallen on Sept. 30, 1923 to under £40.

Budget 1923–24.

	Marks.
General Administration Ordinary Expenditure ……………	731,955,751,000
General Administration Ordinary Revenue ……………	731,955,751,000
General Administration Extraordinary Expenditure…………	84,597,763,000
General Administration Extraordinary Revenue…………	18,776,637,000

Adding 449,327 milliards estimated subsidies to cover state undertakings deficits, and the deficit on the separate Reparations Budget, the estimated total deficit was 621,961 millions. This Budget will have no resemblance to the realised Budget, a deficit exceeding 350 billions having been incurred in the first five months of the Financial Year, April 1923—March 1924.

German Trade.

	1913.	1922.
Total Imports ………	11,654 mill. gold marks.	6,200 mill. gold marks.
Total Exports ………	10,891 mill. gold marks.	3,970 mill. gold marks.
Imports from U.K.…	£60,499,693	£49,062,000

GERMAN FEDERATED STATES.

PRUSSIA.

GOVERNMENT (April 28, 1921).

President, Herr Braun.
Interior, Herr Severing.
Finance, Herr Richter.
Agriculture, Herr Wendorff.
Trade and Commerce, Herr Siering.
Instruction and Worship, Herr Boelitz.
Minister of Justice, Herr am Zehnhoff.

The Republic of Prussia comprises the larger portion of Germany, with a total area in 1919 of 113,750 sq. miles and a population on Oct. 8, 1919 of 36,094,272 (Saar district excluded).

Of the total population 17,250,644 were males and 18,843,608 females. The number of births in 1921 was 1,001,473, against 1,209,500 in 1913. The number of deaths in 1921 was 529,870, against 656,490 in 1913. Marriages were 462,107 against 323,709. The surplus of births over deaths in 1921 was 438,897 or 11·29 per 1000 inhabitants.

Prussia possesses a large number of navigable rivers intersecting the country—viz., the Pregel, Oder, Elbe Weser, and Rhine. The coasts of the Baltic and North Seas form a number of gulfs and bays. The principal mountains are the Harz and the Giant Mountains, the latter reaching an altitude of 5,255 feet. The forests are extensive, occupying an area of 18,053,000 acres, chiefly consisting of fir. Minerals consist of coal, iron, copper, lead, potash, alum, nitre, zinc, cobalt, sulphur, nickel, arsenic, baryta, amber, agate, jasper, onyx, &c., and, to a small extent, silver. Salt (from the brine springs of Prussian Saxony) is abundant. Metallic ores, coal, salt, precious stones belong partially, and amber totally, to the Crown. Agriculture and the rearing of cattle are the industries employing the largest number of persons, but Prussia has long ceased to be a mainly agricultural State. Wheat, rye, oats, barley peas, millet, rape-seed, maize, linseed, flax, hemp, tobacco, sugar-beet, hops, &c., are extensively cultivated. Prussia's manufactures comprise practically all branches. The cotton works are extensive, and there are numerous manufactories of silk, woollen, mixed cotton and linen fabrics, including shawls, carpets, &c., and woollens, with leather, earthenware, glass, paper, and tobacco manufactures, as well as metallurgical works of great importance and large output. Brewing is a business of great importance.

	Marks.
Revenue (Estimate) 1921–22	16,776,716,736
Expenditure do.	16.776,716,736
Total debt, 1920	5,900,000,000

The whole of the old Funded Debt of Prussia has been taken over by the Republic under the arrangement for transfer of the Prussian State Railways.

CAPITAL, Berlin, on the Spree. In 1920, by fusion of suburban municipalities and of some adjacent rural communes, was created Great Berlin with a population of 3,803,770.

Other largest cities are Cologne, on the Rhine (633,904), Breslau, on the Oder (528,260), Essen, on the Ruhr (439,257), Frankfort, on the Main (433,002), Düsseldorf, on the Rhine (407,338), Hannover, on the Leine (392,805), and Dortmund on the Emscher (295,026).

BAVARIA.

Minister-President, Dr. von Knilling.

The Republic of Bavaria is divided into two unequal parts. The eastern portion, comprising eleven-twelfths of the whole, is situated between 47° 16′—50° 34′ N. lat. and 9° 01′—13° 50′ E. long.; the western part, forming the Palatinate, on the left bank of the Rhine. The total area is 29,486 square miles, and the population (in 1919) 6,108,703. The rivers are the Danube, Rhine, Main, Lech, Isar, and Inn. The Bavarian forests are extensive, covering nearly a third of the country; the soil is highly productive, wheat, rye, oats, and barley being the chief products; buckwheat and maize are also grown, and tobacco is one of the staple articles. Wine is produced in the Palatinate, in Lower Franconia, and in Middle Franconia. The hop-plant is most extensively cultivated. Many important manufactures are carried on. The brewing of beer is carried to great perfection. The chief imports are sugar, coffee, woollens, silks, stuffs, drugs, hemp, cotton, tobacco, and flax; the chief exports are timber, grain, wine, hops, beer, leather, glass, jewellery, &c. The Thüringian State Saxe-Coburg-Gotha was incorporated in Bavaria in 1921.

	Marks.
Budget, 1920–1921	2,921,240,521
Public debt, Oct. 1, 1921	153,673,666

CAPITAL, Munich, on the Isar. Population (1919), 630.711. Other large towns are Nürnberg, N.W. of Munich (353,298), and Augsburg, on the Wertach-Lech (154,555).

SAXONY.

The Republic of Saxony has an area of 5.856 English square miles, with a population (1919) of 4,663,298. More than one-half of the surface is arable, and has always been in a high state of cultivation, producing the usual cereals and leguminous plants, with rape, buckwheat, flax, and fruits. The forests supply timber of excellent quality; minerals are rich and abundant (coal, silver, tin, bismuth, cobalt, iron, zinc, lead, nickel, arsenic, &c., besides marble, porcelain, earth, and various gems); special manufactures of Saxony are:—Machinery, cottons, worsted yarns, soft wool tissues, carriages, furs, clothing, jute, furniture stuffs, hosiery, gloves, and other knitted goods, laces, embroideries, curtains, paper, wood and straw pulp, bottle glass, musical instruments, chocolates, sweets, cigars, and Meissen porcelain. The imports are chiefly corn, wine, salt, cotton, silk, flax, hemp, wool, coffee, tea, &c. Its chief town, after the capital, is Leipzig (pop. 604,386), the great book-market, with, next to those of Berlin and Munich, the most frequented University of Germany (having 5,925 matriculated students in 1912–13). Plauen (pop. 104,918), and Chemnitz (pop. 303.775), the Manchester of Saxony.

	Marks.
Revenue and expenditure, 1920-21	1,204,388 077
Debt, Jan. 1 1921	598,180,298

CAPITAL, Dresden. Pop. (1919), 587,748.

WÜRTTEMBERG.

The Republic of Württemberg has an area of 7,534 English square miles, and a population (in 1910) of 2,518,773, of whom 30 per cent. are Roman Catholics. It possesses rich cultivated fields, orchards, gardens, and hills covered with vines; the forest, grain, and pasture-land being nearly equally distributed throughout. Spelt, wheat, rye, oats, barley, hemp, hops, potatoes, beans, maize, and turnips are the principal agricultural products. The minerals, consisting chiefly of salt, iron, granite, limestone, ironstone, fireclay, &c., abound in the kingdom; mineral springs are also numerous. The principal rivers are the Neckar and the Danube. The manufactures generally are linen, woollen and cotton fabrics, carpets, paper, leather, gunpowder, firearms, tobacco, iron and steel goods, pianos, clocks, pottery, cabinet work, &c. There are also many oil mills, breweries, and brandy distilleries. The principal exports are grain, cattle, wood, gunpowder, firearms, pianos, clocks, salt, oil, leather, woollen, hosiery, cotton and linen fabrics, stays, beer, wine, &c.

	Marks.
Revenue, 1920-21	500,594,232
Expenditure	597,981,715
Public debt, April 1, 1921	833,479,000

CAPITAL, Stuttgart. Population (1919) 309,197.

MINOR STATES.

Baden, separated by the Rhine from France (Alsace) and Switzerland, has an area of 5,819 square miles, with a population (1919) of 2,208,503. A great part of the surface is mountainous and covered with forest trees, including the Schwarzwald (Black Forest) and the Odenwald, but more than three-fifths of the total area is under cultivation, corn, wine, fruit, potatoes, tobacco and hops being the chief agricultural products. The principal manufactures are cigars, cotton and silk stuffs, brushes, jewellery and trinkets, clocks, chemicals, paper and machinery. More than half the population are Roman Catholics. Capital, Karlsruhe, pop. (1919) 135,952. Other large towns are Mannheim (229,576), Friburg (87,946), Pforzheim (73,839), and Heidelberg (69,806).

Land Thüringen. The seven Thüringian States, Saxe-Weimar-Eisenach, Saxe-Meiningen, Saxe-Altenburg, Schwarzburg-Rudolstadt, Schwarzburg-Sondershausen, Reuss-Greiz and Reuss-Gera, have been constituted into a single state under the title Land Thüringen, with an area of 4,541 square miles, a population of 1,508,025, and two seats in the Federal Reichsrat. In size Land Thüringen is sixth among German states. The new state is governed by a "Volksrat"; Capital, Weimar (37,233).

Hesse, in the West Centre, consists of Northern and Southern portions, nearly equal in size, on either side of the Main River, with a total area of 2,968 square miles and a population (1919) of 1,290,988, of whom more than half are Protestants. The country is mountainous but fertile, and agriculture is flourishing. Capital, Darmstadt, pop. (1919) 82,367. Other large towns are Mayence (Mainz) at the confluence of the Main and the Rhine (107,930), Offenbach (75,580), Worms (44,285), and Giessen (33,402).

Mecklenburg-Schwerin, between the Elbe and the Baltic, has a total area of 5,068 square miles, with a population (1919) of 657,330. Agriculture and stock raising are the principal industries, the Mecklenburg breed of horses being famous. The chief manufactures are bricks and machinery. Capital, Schwerin, pop. (1919) 45,645.

Oldenburg, on the North Sea, between the estuary of the Weser (at Bremen) and the Prussian province of Hannover, has detached territories in Lübeck (between Holstein and Mecklenburg) and Birkenfeld (Rhine Province of Prussia). The total area is 2,479 square miles, with a population (1919) of 517,765. The chief industries are agriculture, bee-keeping and stock-raising; the principal manufactures are brewing and distilling, tanning, tobacco and corks. Capital, Oldenburg, pop. (1919) 32,540.

Brunswick, 1,418 square miles, pop. (1919) 480,599; in Northern Germany. Capital, Brunswick, pop. (1919) 139,539.

Anhalt, 906 square miles, pop. (1919) 331,258; is in Central Germany. Capital, Dessau, pop. (1919) 57,658.

Lippe, 470 square miles, pop. (1919) 154,318; Capital, Detmold (15,301).

Mecklenburg-Strelitz, between Mecklenburg-Schwerin, Pomerania and Brandenburg, has a total area of 1130 square miles, with a population (1919) of 106,394. Chief industries are agriculture and wood products. Capital Neustrelitz, pop. (1919) 11,246.

Waldeck, 438 square miles, pop. (1919) 55,999; Capital, Arolsen (2,793).

Schaumburg-Lippe, 130 square miles, pop. (1919) 46,257; Capital, Buckburge (6,745).

The *Free Hanse Towns* comprise the three cities of *Lübeck*, on the Trave (area 115 square miles, pop. 120,568), *Bremen*, on the Weser (area 99 square miles, pop. 311,266), and *Hamburg*, on the Elbe (area 160 square miles, pop. 1,050,359). Each has a small rural territory and has full Federal independence, with a Council of State (under the Presidency of a Burgomaster).

TRADE FLAG: Black, red and gold.

CAPITAL OF THE GERMAN REPUBLIC, BERLIN.

BRITISH EMBASSY.

British Ambassador, His Excellency the Rt. Hon. Lord D'Abernon, G.C.M.G. (1920) £8,000
Counsellor, Joseph Addison.

Counsellor, M. Constantine Collas.
Secretary, M. K. Diamantopoulo.
Consul-General, M. S. Constantinidis (*acting*), 36 Gordon Square, W.C. 1.

A maritime Kingdom in the south-east of Europe, bounded on the N. by Albania, Yugo-Slavia and Bulgaria, on the S. and W. by the Ionian Sea, and on the E. by the Aegean and Turkey, with an estimated area of 42,000 sq. miles and an estimated population (1922) of about 6,800,000.

Government.—Greece became a kingdom in 1830, after a successful insurrection against the Turkish government, to which the country had been subjected since the 15th century. The legislature consists of a Chamber of Deputies (or *boulé*) elected for 4 years by universal manhood suffrage, and of a Council of State. Members of the legislature are paid 4,000 *drachmæ* annually. At the outbreak of the Great War the sympathies of the reigning house of Greece appeared to be with the Central Powers, but under the influence of M. Venizelos the Kingdom eventually entered the War on the side of the Allies, and King Constantine left the country (June 11, 1917). King Alexander, who acceded to the throne, died from the effects of a monkey-bite, Oct. 25, 1920. The crown was offered to his younger brother Paul, a Regency being meanwhile proclaimed under Admiral Coundouriotis. The November elections drove the Venizelists from office, and the Regent, having admitted M. Rallis to the Premiership, was called upon to resign. He was succeeded by Queen Olga, until a plebiscite was taken, and King Constantine was thus restored to the throne in December 1920. After the disastrous campaign in Asia Minor in Sept. 1922, a bloodless revolution caused the abdication of King Constantine in favour of his eldest son.

Prior to the Balkan Wars of 1912-13 the area was less than 25,000 sq. miles, the addition of portions of *Macedonia* and *Epirus*, *Crete* (2,950 sq. miles, pop. 336,151), and certain *Aegean Islands* increasing the area to 43,522 sq. miles. During the War of 1914-1918 Greece eventually declared for the Allies against the Central Powers, and her territories were increased by the occupation of *Thrace* (including the monastic republic of *Mount Athos*), and the islands of *Imbros* and *Tenedos*. Under an arrangement with Italy, to come into effect after the ratification of the *Treaty of Sèvres*, the *Dodecanese* (12 islands) were surrendered by Turkey, and these were to be handed over to Greece by Italy with the exception of *Rhodes*, for which a special arrangement was made: this arrangement was, however, repudiated by Italy, and the fate of the island is in abeyance. Greece also received under the Treaty a mandate for the occupation and administration of the town and district of *Smyrna*, but military operations by forces of the Angora Government, under Mustapha Kemal Pasha, recovered the mandated region in Sept. 1922, the Greek forces being annihilated, and Smyrna was evacuated on Sept. 8, 1922, and that part of the Greek population of Asia Minor which escaped massacre by the Turks took refuge in Greece. By the *Treaty of Lausanne* (1923) Greece lost Eastern Thrace (that part lying E. of the Maritza river) and the islands of Imbros and Tenedos, which were retroceded to Turkey. The country is thus composed of a continental portion (the southern part of the Balkan Peninsula), and of islands in the Ægean, Mediterranean, and Ionian Seas. The surface is nearly all mountainous; the coasts are elevated, irregular, and deeply indented.

Production.—Agriculture is the principal industry and employs more than half the population. The most important of the fruit trees are the olive, the vine, orange, lemon, fig, almond, citron, pomegranate, and currant-vine. The principal minerals are silver, lead, zinc, emery, copper, magnesium, sulphur, salt, and marble. The chief manufactures are smelting, textiles, and shipbuilding. The imports are cotton and other manufactures, corn, timber, cattle, hides, sugar, salt fish, and coal. The exports consist of wine, olives, olive oil, tobacco, currants, figs, cognac, hides, lead, iron ore, magnesite, iron pyrites, chrome ore, emery, marble, and sponges. The imports in 1920 were, from Gt. Britain, 320 million drachmæ; U.S.A. 287 million; Italy 125 million; France 109 million; and other countries 333 million. The exports were, to U.S.A., 40 million; Gt. Britain, 37 million; Italy 26 million; France, 20 million; and other countries 178 million.

Defence.—Service in the Army is universal and compulsory between the ages of 21 and 57. Both the land and sea forces were reorganised during the War of 1914-1918, and about 150,000 all ranks fought with the Allied Armies. The Navy consisted (July, 1919) of 6 ironclads, 1 modern cruiser, 14 destroyers, 6 torpedo-boats, and 2 submarines.

Education is free and compulsory, maintained by local taxation supplemented by State grants. Secondary education is somewhat backward, particularly in the country districts. The University at Athens is of some repute.

Finance.—The debt in 1912 was 1,040,900,000 *drachmæ*, and the Balkan Wars of 1912-13 added 354,960,000 *drachmæ*, the Great War added

1,028,000,000 *drachmæ*, and subsequent military operations to March, 1921, were responsible for 1,776,140,000 *drachmæ*.

Communications.—There were (1919) 1,400 miles of railroad open for traffic. There is a ship canal cutting through the Isthmus of Corinth for ships up to 1,500 tons. The post offices (in Old Greece) number 1,150, dealing with 36,000,000 postal packets; telegraphs, 4,951 miles. The mercantile marine consists of 110 sailing vessels above 100 tons capacity, and 298 steamers (449,184 tons). The principal harbours are the Piræus (port of Athens), Syra, Patras, Salonica, Volo, Corfu, Kalamata, Laurium, Cavalla, and Canea (Crete).

GUATEMALA.

República de Guatemala.

President (1922–1926), José Maria Orellana, *assumed office* Dec. 9, 1921.
Min. of Foreign Affairs, Señor Don Roberto Lowenthal.
Minister in London,
Consul in London, D. Bowman, 11 Queen Victoria Street, E.C. 4.

Guatemala, the most northerly of the Republican States of Central America, is situated in N. lat. from 13° 45′ to 17° 49′, and in W. Long. from 88° 12′ 49″ to 92° 13′, 43′ and comprises an area of 42,456 square miles, and a population in 1921 of 1,600,535. The Republic is divided into 22 departments, and is traversed from W. to E. by an elevated mountain chain, containing several volcanic summits rising to 13,000 feet above the sea; earthquakes are frequent, and the capital was destroyed by an upheaval in Jan., 1918. The country is well watered by numerous rivers; the climate is hot and somewhat malarious near the coast, but very temperate and healthy in the higher regions. About 620 miles of railway were open for traffic in 1917. There were 4,543 miles of telegraph working in 1921. The chief ports are San José de Guatemala and Champerico on the Pacific, and Livingston and Puerto Barrios on the Atlantic side. The principal export is coffee, other articles being bananas, sugar, timber, *chicle* (chewing gum), hides and beans. Spanish is the language of the country.

	1922.
Revenue	£1,115,673
Expenditure	1,267,232
External Debt (Dec. 31)	1,908,563
Internal Debt (Dec. 31)	1,062,947
Imports	1,806,843
Exports	2,564,676
Imports from U.K.	273,941
Exports to U.K.	54,404

CAPITAL, Guatemala. Pop. (Census 1921) 115,938; other towns are Quezaltenango (35,000), Coban (30,000), and Totonicapan (27,000).

FLAG: Three vertical bands, blue, white, blue.

Quezaltenango—Consul, Hugo Fleischmann.
San José—Vice-Consul, David Savage.

Transit to New York *viâ* Puerto Barrios and New Orleans, 7 days, thence to London, 8 days.

HAITI.

(République d'Haïti.)

President, M. Louis Borno, *assumed office* May 15. 1922 ……………………£4,800
Foreign Affairs, Camille Léon.

Minister in London, Jules Lizaire.
Consul, J. G. Dalzell, 76, Victoria Street, S.W.1.

The Republic of Haiti is the western or French portion of the island of San Domingo, which, next to Cuba, is the largest of the "West India" Islands.

---

* Drachmæ converted at par; 25 dr.=£1. (*See also* p. 423).

The island was visited on Dec. 6, 1492, by Christopher Columbus, who named it *Espagnola*, the native name being *Haiti* (mountainous) or *Quisqueya* (vast). The Spaniards explored the island and almost exterminated the 2,000,000 native Indians, whom they replaced with African negroes. By the Treaty of Ryswick (1697) the western portion of the island was ceded to France, and in 1803 the territory was abandoned by the French, and a republic was proclaimed under the aboriginal name of Haïti. In 1822 the rule of the Haitian President was extended over the whole of the island, the eastern portion having declared its independence of Spain in 1821. Since 1844 the eastern portion has formed a separate republic (see Dominican Republic).

The area of the republic is 10,200 square miles, with a population estimated at 2,500,000. The mountains are richly and heavily timbered, and susceptible of cultivation nearly to their summits; it is probably the most fertile spot in the West Indies, whilst its harbours, especially Port-au-Prince, offer considerable facilities to foreign trade. The principal productions are coffee, logwood, cocoa, cotton, hides, sugar, honey, gums and oilseeds, these being the chief exports. It is said to contain mines of gold, silver, copper, tin, and iron. Its commercial prosperity has been almost annihilated by repeated revolutions. In November, 1915, both Houses of the Congress ratified a treaty with the U.S.A., establishing a virtual protectorate over the Republic, which came into effect in May, 1916. An armed Constabulary, rural and urban, under American officers, has been constituted, and a coastguard service is attached. On Nov. 17, 1920, some prominent Haytians met and formed the "Union Patriotique," an association for raising funds by public subscription all over the country for the purpose of sending delegates to plead the cause of the Haytian people. It was arranged to send a delegation of three members to New York and Washington, and on February 6, 1921, two of them left, the third following two months later. It appears that the Haytian cause has found supporters there, and as a result of the visit of this delegation a Senatorial Commission of enquiry visited the island (Nov.–Dec. 1921), and in their subsequent report advised the U.S. Government to maintain the occupation and to appoint a High Commissioner. The Constitution was amended in June 1918, and under its provisions the President is elected for four years. The principal foreign trade is carried on with the United States, Great and Greater Britain, France, and Germany; the principal articles imported from Great Britain in 1921–22 were piece-goods, jute bags, hardware, and agricultural tools. French is the language of the country.

„ *Vice-Consul*, Edmund D. Watt.

Transit, 15 days.

The HEJAZ. *See* Arabia.

HONDURAS.

(República de Honduras.)

President (1920–1924), General Rafael Lopez Gutierrez, *assumed office* Feb. 1, 1920.

Consul-General in London, A. B. Ryde, 4 Lloyds Avenue, E.C. 3.

The Middle State of Central America, stretching in N. lat. between 13° 10′ and 16°, and W. long. between 83° 10′ and 88° 40′; containing 44,275 English square miles, with a population estimated at 673,408 (1922).

Christopher Columbus landed at Cape Honduras in 1502, and in 1524 the country was settled by the Spaniards. In 1525 *Hernando Cortes* founded the city of Puerto Cortes and from 1539 to 1821 the country formed part of the Captaincy-General of Guatemala. From 1821 to 1839 Honduras was included in the Confederation of Central America.

The Republic of Honduras has a coast-line of nearly 400 miles on the Caribbean Sea, chief ports, Truxillo, Puerto Castilla, Puerto Cortes, Omoa, Roatan, Tela, and La Ceiba; but only about 40 miles on the Gulf of Fonseca, on the Pacific side, chief port, Amapala. (NOTE.—Amapala is on Tiger Island; port on mainland is San Lorenzo, 3 hours in gasoline launch from Amapala. From San Lorenzo by auto to capital, Tegucigalpa, 88 miles, good road, 5-6 hours. Road from Tegucigalpa to N. coast now reaches Comayagua and the journey can be made to Comayagua in 4 hours. From there to end of railroad, 3 to 4 days by mule. A through road for automobile traffic is completed from Comayagua to Pito Solo, at S. end of Lake Yojoa, and work is in progress for the extension of motor traffic over the road from Jaral, at the north end of the lake, to the railway terminus at Portrerillos, thus completing direct inter-oceanic transport communication. When this route is open New York will be only 7 days from Tegucigalpa.) The country is mountainous, being traversed by the Cordilleras. The soil is very fertile, the products being bananas, mahogany, fruit, cattle, sugar, rubber, rice, tobacco, coffee, indigo, sarsaparilla, hides and skins, indiarubber, cedar, fustic, rose, henequen and Lima wool (Kapok). There is an immense amount of uncultivated land. The number of cattle in 1920 was approximately 500,000. The forests are extensive, but there is a lack of communications and transport. Its mineral wealth is great. In 1921 there were 895 kilometres of railway open, all on the North Coast. The language of the country is Spanish.

	1919–20.	1920–21.	1921–22.
Revenue	£836,000	£951.491	£923.372
Expenditure	971,000	960.546	889.237
*Foreign Debt	5,398,570	5,398.570	5.398,570
†Internal Debt	533.397	566.550	576.600
Exports	2,083,418	1,357.147	1,346.601
Imports	3,858,228	4.180.675	3.201.065

---

* The external debt remains the same. No interest has been paid since 1872, and arrears of interest amounted on Jan. 1, 1923, to nearly £23,000,000; the Government propose to pay off £1,200,000 in annual instalments of £40,000.

† Bearing no interest.

Ninety per cent. of the foreign trade is with U.S.A. American money is legal tender at 200 per cent. (2 to 1).

CAPITAL, Tegucigalpa. Pop. (1921), 40,000; La Esperanza and Santa Rosa have each about 10,000 inhabitants.

FLAG: Three horizontal bands, blue, white, blue (with five blue stars on white band).

Alimentation, J. Bud.

Minister in London, Count Ladislas Szapáry, 9 Prince's Gate, S.W.7.

Hungary was declared a Republic on Nov. 17, 1918, its territories being decreased from the area of the former Kingdom of Hungary (which was united to the Austrian Empire by the identity of sovereigns) through the transfer of Transylvania to the Rumanians and of Croatia and Slavonia to the new Yugo-Slav Kingdom (*q.v.*) and of Slovakia and Ruthenia to Czecho-Slovakia (*q.v.*). The area of Hungary is about 36,179 sq. miles, with a population (almost entirely Magyar) estimated (1920) at 7,482,000. The political neighbours are Czecho-Slovakia on the N., Yugo-Slavia on the S., Rumania on the E., and Austria on the W.

On the declaration of Republican institutions in 1918, Count Károlyi assumed office as Provisional President, but on March 22, 1919, Count Károlyi resigned, and was succeeded by a "Bolshevik" administration with a "Soviet" (Workmen's Council), in which Bela Kun (or Cohen) was the dominant personality. This administration was driven out of power by the successes of the Rumanian military forces (which invaded Hungary and occupied Budapest) and was followed by a Socialistic Government under Julius Peidel (Aug. 1, 1919). Six days later the Socialistic Government was superseded by an administration appointed by the Archduke Joseph, who accepted office as Provisional President, Aug. 7, 1919, but resigned in consequence of the protests of the Supreme Council in Paris.

On March 21, 1920, Admiral Nicholaus von Horthy of Nagybána was appointed Governor of Hungary by vote of the National Assembly, which gave him royal rights, with the exception that his approval is not necessary to the verification of laws made by the National Assembly.

In 1921, the ex-king Karl made two efforts to regain the throne, remaining in the country from March 26 to April 5, and from Oct. 21 until removed under escort. On each occasion the Hungarian Government was informed that a Hapsburg restoration would not be tolerated by the European Powers. In August 1921 the Serbians evacuted Baranya, which they had occupied since the Armistice. Immediately afterwards Hungary should have handed over the *Burgenland* to Austria, but was prevented from so doing by a band of Hungarian irregulars, who prevented the entrance of the Austrian authorities. The Austrians declined to use force, and the questions at issue have been referred to the mediation of Italy.

All religions are tolerated; the greater number of Magyars are Roman Catholics, but there is a large Protestant minority. The parcelling out of the great estates, which was forcibly attempted during the Karolyi régime, has been continued to a small extent, but on an economic basis and at the initiative of the owners; a land-reform bill aiming at the forced sale of the properties exceeding a given area has been passed.

A single chamber National Assembly (introduced Jan. 4, 1920, in place of the Upper and Lower Houses of the former Parliament) is elected by universal suffrage. The question of providing a Second Chamber from a reformed House of Magnates (which ceased to function after the revolution) is under discussion.

The greater part of the area of present Hungary consists of the Alföld or Great Plain, parts of which may be considered as among the most fertile for agricultural purposes in the world, producing grain of excellent quality and supporting a number of horses, cattle and swine. The mountainous districts having been ceded to surrounding states by the Peace Treaty, Hungary has lost the greater part of the forests and mines, which formerly contributed so largely to the national wealth.

Prior to the war Hungary imported merchandise to the value of approximately £85,000,000, and exported approximately £75,000,000 annually; in the year 1916 the imports amounted to about K. 3,220,000,000 and the exports to about K. 2,650,000,000. Taking an average exchange equivalent, based on Zurich quotation for the year 1916, these amounts may be taken as £80,500,000 and £66,250,000 respectively. There is a British-Hungarian Chamber of Commerce at Budapest, and there are openings for trade in chemicals, machinery, hardware, small tools, iron mill products, leather, and textiles. Hungarian (or German) is the language in which business letters should be written.

No part of Hungary touches the sea. The length of navigable rivers is 687 miles; there are about 5,000 miles of railways and 5,800 miles of telegraph in the present Kingdom.

The pre-war revenue of Hungary was about 2,250 million *Korona* (£93,750,000), whereas the estimated revenue according to the Budget for the year 1921–2 amounts to 20,296,000,000 *Korona* (£17,000,000). The public debt stood at 6,000,000,000 *Korona* (£250,000,000), and its present amount may be estimated at about

800,000,000,000 *Korona*, but this is dependent on exchange conditions and subject to decisions that may be given by the Reparations Commission, which has not yet begun to sit in Budapest.

CAPITAL: Budapest, on the Danube, has a population of 1,184,616 (1921). The other large towns are: Szeged (110,000), and Debreczen (103,000); there are 34 other towns with a population over 20,000.

FLAG: Red, white, green (horizontally), arms (without supporters) in centre.

ICELAND.

(Island.)

King, Christian X. (*see* Denmark).
Presidents of Al-thing, H. Steinsen; Benedikt Sveinsson; Magnus Kristjansson.

Iceland is a large, volcanic, and treeless island in the North Atlantic Ocean, extending from 63° 23' to 66° 33' N. lat., and from 13° 22' to 24° 35' W. long., with an estimated area of 40,497 square miles, or greater than that of Ireland. The population was 94,866 in 1920.

An Act for the creation of a Danish-Icelandic Federal Constitution, Denmark and Iceland to be free and independent States under the same Sovereign, came into force on Dec. 1, 1918, but since the constitution granted in 1915 the assembly (Al-thing) had been more or less independent of the Government at Copenhagen in internal questions. The principal products of the island are sheep, cattle, ponies, and fish, and the imports consist of almost all the necessaries of life, the chief items being grain and meal, sugar, coffee, salt, cotton goods, tobacco, spirits, hardware, and timber. Total imports (1922): estimated, £1,698,215; exports, £1,733,928. Iceland is in direct telegraphic communication with Great Britain.

CAPITAL, Reykjavik. Population, about 18,000. Other towns are Isafjörður, Akureyri, and Seydisfjörd.

FLAG: Blue, with white-bordered red cross.

Reykjavik—Consul, Asgeir T. Sigurdsson, O.B.E.
Do., Pro-Consul, Jon. Thorvaldsson.

Without Portfolio, Signor Giuriati.

Ambassador in London, His Excellency Marchese della Torretta, 20 Grosvenor Square, W. 1. (Nov. 1922).
Counsellors, Signor Gabriele Preziosi; Signor Francesco M. Taliani, C.B.E.
1st Secretary, Signor Giovanni Balsamo.
Attaché, Signor Guido Crolla.
Military Attaché, Col. Virginio Riggi, C.M.G.
Naval Attaché, Capt. Conte Raineri Biscia.
Air Attaché, Capt. Silvio Scaroni.
Commercial Attaché, Signor G. B. Ceccato.
Chancellor, Signor Guiseppe de Grossi.
Archivist, Signor Ugo Catani.
Consul, Signor G. A. Pirelli, 144 Queen Victoria Street, E.C. 4
Vice-Consul, Cavaliere P. Righetti.

A Kingdom in the South of Europe, consisting of a peninsula, the large islands of Sicily and Sardinia, the island of Elba, and about 70 minor islands (with certain dependencies hereinafter noted). It is bounded on the N. by the Republics of Switzerland, Germany, and Austria, on the S. by the Mediterranean, on the E. by the Adriatic and by the League of Nations territory of Fiume, Istria, &c., and on the W. by France and the Ligurian and Tyrrhenian Seas. The total area of the kingdom of Italy in 1914 was 110,623 sq. miles, and by the *Treaty of Versailles* (June 28, 1919) Italy gained from Austria-Hungary the Trentino (about 4,000 sq. miles) and Trieste (with about 1,000 sq. miles of the Adriatic Sea-board). The Vilayet of *Konia* (40,000 sq. miles, pop. 1,000,000) is within the Italian sphere of influence.

The total area of the Kingdom of Italy was estimated (Jan. 1920) at 120,450 square miles, with a population of about 38,500,000. There is a large settled and floating population of Americans and English.

The Italian peninsula is traversed throughout its length by the chain of the Apennines; the Alps form its northern limits, dividing it from France, Switzerland, Germany, Austria and Yugo Slavia. *Mont Blanc* (15,782 feet), the highest peak of the Alps, is in the French Pennine Alps, but within the Italian borders are Monte Rosa (15,217 feet) and several peaks from 12,000 to 14,000 feet. The chief rivers are the Po, the Adige, the Tiber, and the Arno.

GOVERNMENT.—Italian unity was accomplished under the House of Savoy, after an heroic struggle from 1848-1870, in which the great patriots *Mazzini* (*born* 1805, *died* 1872) and *Garibaldi* (*born* 1807, *died* 1882) were the principal figures. It was completed when Lombardy was ceded by Austria in 1860 and Venice in 1866, and through the evacuation of the Papal States by the French in 1870. In 1872 the King of Italy entered Rome, and that city was declared to be the capital. The government is that of a constitutional monarchy with a legislature of two houses—the *Senate* (of 385 life members appointed by the King), and the *Chamber of Deputies* of 510 members (elected by adult manhood suffrage). The maximum duration of Parliament is 5 years; Deputies receive 15,000 lire annually.

---

[*] Signor Mussolini is the accredited leader of *Fascism*, the *Fascisti* representing a revolutionary movement against the alleged inactivity of post-War Italian statesmen. The uniform of the movement is a black shirt, and the name is derived from *fascio* or band (*cf.* the *fasces* of the Roman lictor) in which the movement was organized.

PRODUCTION. — Agriculture (including the growing of grapes, olives and chestnuts) is the principal industry. Italian wines are numerous and celebrated, and olives and olive-oil are furnished by Tuscany, Liguria, and the province of Bari; while fruit abounds and is largely exported. The cultivation of the silkworm forms an important industry. Among the principal minerals are iron, lead, zinc, copper, manganese, and antimony ores, sulphur, gypsum, amianthus, alum, and boracic acid. Silver is found in Sardinia, and some gold in the Alps. Salt is a Government monopoly. In 1922 the produce of the vines amounted to 782,782,800 gallons, and that of the olive crop (1922) to 5,291,100 centals. The principal exports are cotton, silk and woollen tissues, motor cars, olive-oil, wine, candied citron, sienna earths, pastes, coral, rags, boracic acid, raw and thrown silk, hemp, cattle, straw hats, rice, iron, zinc and copper ores, sulphur, marble, fruit, vegetables, fresh and prepared meats, poultry chemical products, woods, roots, &c., for dyeing and tanning, artistic works, &c. The imports chiefly consist of cotton, wheat, coal, coke, chemicals, colonial produce, yarns, jute and manufactured goods, woollens, raw silk, silkworms' eggs and cocoons, machinery, iron and steel in bars, plates and rails, hardware, raw hides, horses and cows, fixed oils, salt fish, dye-stuffs, tobacco, earthenware, &c. The manufactures are woollen, cotton, silk, hemp, and linen yarns and tissues, motor cars, rubber tyres and tubes, leathers, straw and felt hats, furniture, chemical products, paper, agricultural and other machinery, prepared meats, artistic works (such as mosaics, pottery, Venetian glass, alabaster ornaments), &c. Sugar is extracted from beet in large quantities for home consumption.

DEFENCE.—The *Army* consists on a peace footing of 310,000 all ranks. On May 23, 1915, Italy declared war on Austro-Hungary, and on Aug. 27, 1916, a state of war was declared to exist with Germany. The cost of the war to Oct. 31, 1918, amounted to 48 millards of lire (£1,920,000,000). During the War of 1914-1918, over 15 per cent. of the population were mobilised, and 5,250,000 men passed into the Armies of Italy. The killed and missing amounted to 650,000. The *Navy* includes 5 modern and 6 pre-Dreadnought battleships, 5 armoured cruisers, 30 destroyers, 100 torpedo boats, and 80 submarines. The peace *personnel* of the Italian Navy is about 40,000 all ranks. Spezia and Pola, the chief naval and military ports of the kingdom, are securely fortified.

EDUCATION.—Primary Education is free and compulsory, and evening continuation classes are also compulsory for military recruits. It is maintained by local taxation and State grants. Secondary education is generally State-maintained, and schools are increasing in number. Several of the Universities are of very ancient foundation.

COMMUNICATIONS.—On June 30, 1922, there were 9,800 miles of railway open for traffic, 435 being electrified; the post-offices (1919) numbered 11,314, and there were 35,328 miles of telegraph line. The sea-going commercial marine (1922) consisted of 1,016 steamers (2,698,722 tons) and 397 sailing vessels (167,613 tons). In 1921 (including coasting traffic) 34,406,285 tons entered and 33,696,401 tons cleared at Italian ports.

ITALIAN COLONIES, &c.

Colony.	Area.	Population.
Libia	810,000	1,000,000
Eritrea	64,000	380,000
Somaliland	193,000	300,000
Tientsin	20	10,000
Konia	40,000	1,000,000
Total	1,107,020	2,690,000

Libia.—The Turkish vilayet of Tripoli and the mutessarifat of Benghazi on the northern coast of Africa, were occupied by Italy in 1911–12, and under the Treaty of Ouchy (Oct. 1912) the sovereignty of the province was transferred to the King of Italy, the spiritual headship over the Muhammadan population being retained by the Sultan. Tripoli is the most easterly of the Barbary States, extending from the frontiers of Tunis to those of Egypt, a distance along the coast-line of nearly 1,100 miles, and inland to the south a distance of about 800 miles. The transferred territory comprises the four sub-provinces or Mutessarifik of Tripoli, Khoms, Jabel-el-Gharb, and Fezzan, and also of Benghazi or Cyrenaica, a total area of 810,000 square miles, with a population of about 1,000,000. There are no rivers in the country, and, the rainfall being precarious, a good harvest can only be reckoned on every four or five years. Barley, dates, olives, oranges, lemons, and vegetables are produced, and the principal imports are metals, British and other European manufactures, tea, beads, wine and spirits, besides a number of articles for barter in Wadai, Bornu, and the Western Sudan, whither caravans proceed from Tripoli. The principal articles of exports are ostrich feathers, ivory, skins, sponges, hides, esparto grass, wool, cattle, and horses. The ancient ruins in Cyrenaica, *i.e.*, at Cyrene, Ptolemais, and Apollonia, are interesting to explorers, as well as those at Leptis Magna, which is close to Khoms, or 70 miles from the city of Tripoli. The population of Benghazi consists of Arabs, Greeks, Maltese, and a few Levantines. The commerce in cereals, wool, cattle for Malta, and other agricultural produce, is considerable, when a sufficient rainfall causes good harvests. The capital of "Tripolitana" is Tripoli (population 50,000), and of Cyrenaica, Benghazi (population 35,000).

Governor of Cyrenaica, General Bongiovanni.
Governor of Tripolitana, Count Volfe.

Eritrea is a Red Sea colony, and extends from Ras Kasar, 18° 2′ N., to Ras Demoira, 10° 42′ N., and is bounded on N.W. by the Anglo-Egyptian-Sudan, on S. by Abyssinia, and on S.E. by French Somaliland. It consists of a triangular portion of barren and sandy lowland with a coast-line along the Red Sea of about 700 miles, and covers a total area of 64,000 square miles, with a population of about 380,000, of whom about 3,000 are Europeans. The capital is Asmara, Massowa being the chief port, where there is a good harbour. The principal products are potash, skins, and salt, of great value as being the monetary currency of Southern Abyssinia.

Governor of Eritrea, Admiral G. Cerrina.

Somaliland.—Italian Somaliland comprises a coastal strip on the Gulf of Aden and the Indian Ocean, from 11° N. lat. to the Equator, and is bounded on the N. by the Gulf of Aden, on E. by the Indian Ocean, and on W. by British Somaliland, Abyssinia, and British E. Africa. French and British Somaliland lie between Eritrea and Italian Somaliland. The total area is about 193,000 sq. miles, and the population is estimated at 300,000. Agriculture and camel and cattle rearing are the principal industries. The capital is Mogadisho, on the Indian Ocean.

Governor, C. Riveri.

Tientsin.—Italy obtained in 1902 a concession of land fronting the Peiho river (China), with a total area of 20 square miles and a population of about 10,000 natives.

Konia.—Under the *Treaty of Sèvres* Italy received from Turkey the right to occupy the Asia Minor district of *Konia* (40,000 square miles) of which, however, the suzerainty remains vested in the Sultan.

JAPAN.

(Nippon.)

Emperor, Yoshihito, K.G.; *born* Aug. 31, 1879; *succeeded* July 30, 1912; *accession ceremony*, Nov. 10, 1915; *mar.* Princess Sadako, May 10, 1900, and has issue 4 sons.

Heir Apparent and Regent, Prince Hirohito, G.C.B., G.C.V.O., *born* April 29, 1901; *married* (1924) Princess Nagako, daughter of Prince Kuniyoshi Kuni; (*appointed Regent*, Nov. 25, 1921).

CABINET (Sept. 2, 1923).

Prime Minister, Admiral Count Gombei Yamamoto.
Minister of Foreign Affairs, Baron Hikokuchi Ijuin.
Minister for Home Affairs, Viscount Shimpei Goto.
Minister of Finance, Junnosuke Inouye.
Marine, Admiral Takarebe.
War, Gen. Baron Guchi Tanaka.
Justice, K. Hirayuma.
Education, K. Okano.
Agriculture and Commerce, Baron Den.
Communications, K. Inukai.

Ambassador in London, Baron Gonsuke Hayashi, G.C.V.O., 10 Grosvenor Square, W. 1.
Chancery of the Embassy, 37, Portman Square, W. 1.
Counsellor, Marquis Kinichi Komura.
1st Secretaries, Iyemasa Tokugawa, O.B.E.; Takezo Okamato.
2nd Secretary, Gicho Nishizawa.
3rd Secretaries, Kojiro Inoué; Katsutaro Miyasaki; Kikusuke Minetomo; Toyokichi Fukuma; Kaname Wakasugi; Yokichi Okuma.
Attachés, Takemi Miura; Nobushiro Sugiyama; Sakujiro Kurihara; Shoichi Kanki; Kaoru Maki; Nagao Kita; Katsuo Okazaki; Yoshizo Tanaka; Toyozo Kawanichi.
Naval Attaché, Rear-Admiral Tamaki Tosu, C.B.
Asst. Naval Attaché, Lt.-Comdr. Shiro Takasu.
Military Attaché, Maj.-Gen. Ren-ichiro Okamoto.
Asst. Military Attaché, Capt. Masao Maruyama.
Financial Attaché, Teiji Sekiba (*acting*).
Commercial Attaché, Shinjiro Matsuyama, 116. Gresham House, Old Broad St., E.C. 2.
Asst. do.. Torao Wakamatsu.
Chancellors (37 Portman Square, W. 1), Saburo Kasahara; Chuhei Unno; Tsuneo Hattori; Sukeharu Takahashi; Toichi Araki.
Commercial Chancellor (Gresham House, E.C. 2), Takashi Kato.
Consul-General (*London*), Yoshitaka Hori, 1 Broad Street Place, E.C. 2.
Consul (*Liverpool*), Saizo Mashiko.
" (*Glasgow*), A. Scott Younger.
" (*Middlesbrough*), Waynman Dixon.
" (*Cardiff*), E. H. Trimby.

This ancient and extensive Empire consists of four large and many small islands, said to comprise in all above 4,223, the principal of which are Honshu, Shikoku, Kiū-shū, Hokkaïdô or Yezo, situate to the north of the main island, from which it is separated by the Tsugaru Straits, and Formosa, called by the Japanese, Taiwan. The Ainu, an uncivilised but harmless tribe, who in ancient times occupied the greater part of the country, are still found in Yezo. The Kurile Islands have belonged to Japan since 1875, and in 1876 she incorporated the Luchu (Riu-kiu) Islands under the name of "Prefecture of Okinawa." The empire, with its dependencies, comprises an area of 235,886 square miles, with a population (Oct. 1921) of 79,965,777. The islands are eminently volcanic, and 18 of the summits are still active; the chief of these, Fuji-san, or Fujino-yama, the loftiest and most sacred mountain of Japan, about sixty miles from Tokio, is 12,370 ft. high, and has been dormant since 1707. Japan is also liable to frequent, and occasionally disastrous, earthquakes. The country is very mountainous, and not more than one-sixth of its area is available for cultivation. It possesses numerous fine harbours. The soil is productive, teeming with every variety of agricultural produce. Copper, iron, sulphur, lead, manganese, tin, tungsten, molybdenum, antimony, zinc, agate, cornelian, and rock crystal are found. Gold is found in the island of Sado, and silver mining is prosecuted on a small scale; while there is a good supply of middling coal. Petroleum is also being produced in quantities, especially in the Province of Echigo. Among the vegetable productions may be noted the camphor-tree, paper mulberry, vegetable wax-tree, and a lacquer-tree, which furnishes the celebrated "lacquer" of Japan. The principal timber trees are the Cryptomeria japonica, Pinus Massoniana, and Zelkowa Keaki; the Paulownia imperialis is largely used for fancy boxes and works of art; the maple is merely for ornament. Chestnut, oak, beech, and elm are comparatively rare and little used. The tobacco-plant, tea-shrub, potato, rice, wheat and other cereals are all cultivated; rice is the staple food of the people, about 310,000,000 bushels being consumed annually (in 1922 the home grown crop amounted to 303,460,000 bushels). Agriculture, upon which the Japanese bestow great care, is their chief occupation. The coasts are extremely rich in fish. The floral kingdom is rich, beautiful, and varied, though scented flowers are comparatively few. Fruit is abundant, including the orange, persimmon and loquat; European fruits, such as apples, strawberries, pears, grapes, figs, and peaches are produced, and the American navel orange is extensively grown.

Commerce and Industry.—The chief manufactures are silk and cotton, cotton yarn, matches, paper, glass, lacquer ware, porcelain and bronze, and shipbuilding is an important industry in the yards; the cotton-spinning factories increased from 152 in 1913 to 159 in 1921. The chief imports are raw cotton from India, U.S., Egypt, and China; flour from the U.S.; and piece goods, metals, manures, woollens, wool, drugs, rails, locomotives, and machinery from the U.S.A. and Europe. Sugar is largely imported from the Dutch East Indies, Philippine Islands and Formosa; indigo from Germany, British India and Dutch East Indies; kerosene oil from U.S. and the Dutch Indies; beans, peas, and pulse from China and Korea; and rice, principally from British India, French India, Korea, Siam, and China. The chief exports are silk, cotton fabrics, cotton yarns, refined sugar, knitted goods, copper, matches, coal, camphor, straw plaits, porcelain, earthenware, and marine products.

Communications.—There were 9,198 miles of railroad open in Dec., 1922, in addition to 1,397 miles open in Kora, 758 miles in Formosa and 126 in Saghalien, while the South Manchurian Railway in China (686 miles) is under Japanese control. The mercantile marine of Japan and Her dependencies consisted in 1922 of 3,230 steamers above 20 tons (874 of them over 1,000 tons), and 2,729 sailing vessels over 100 tons. The total tonnage entered and cleared at open ports in 1921 was 107,341,151 (72,294 vessels). The three great ports are Kobé, Yokohama and Osaka, the first named having a large transhipment trade, in addition to direct imports and exports. In 1921 there were 5,963 post offices dealing with 3,858,850,629 postal packets, and 45,003 miles of telegraph line carrying 70,924,692 messages outwards.

Defence.—Service in the *Army* is universal and compulsory between the ages of 20 and 40. The peace strength was reduced in 1922 to 212,731 all ranks The *Navy* includes 11 battleships (5 to be scrapped), 7 battle cruisers (3 to be scrapped), 18 coast defence (5 to be scrapped), 15 light cruisers, 103 destroyers, 10 torpedo boats and 43 submarines (July, 1923). Japan declared war against Germany on Aug. 23, 1914, and her fleet was active throughout the war, while her troops took part in the operations in Siberia.

Education is in the lower grades free and compulsory. High schools are State-aided, and prepare for a 3 years' course at the Universities. There are high schools for girls, and the technical and special schools are well attended. There are six State Universities of Tokio (2), Kyoto, Tohoku (at Sendai), Hokkaido and Kiushu (at Fukuoka).

Formosa.—The island of Formosa (Taiwan) was ceded by China to Japan (June 2, 1895) in accordance with the Treaty of Peace. Its total area is 13,500 square miles, with 3,807,329 inhabitants (1921). Imports, *Yen* 40,433,289; exports, *Yen* 23,541,621, in 1921. The colony has been self-supporting since 1906. Estimated rev. and exp. (1922-23), *Yen* 106,002,034. Capital, Taihoku; pop. (1921), 173,359.

Saghalin (Karafuto).—The southern half of this island was ceded by Russia at the close of the Russo-Japanese war. The ceded territory has a total area of 9,824 sq. miles with a population (1921) of 103,515. The Japanese Government is encouraging the settlement of agriculturists, and there is a large fishing industry. Estimated revenue and expenditure (1922-23) *Yen* 18,329,333.

The *Kwantung Peninsula* (capital, Dairen, formerly Dalny), which had been leased to Russia by China, was similarly leased to Japan after the Russo-Japanese war. Area, 1,220 sq. miles; population (1921) 840,657. Dairen provides Japan with a mainland port, ice free all the year round, and the peninsula is fertile. Imports (1920 *Yen* 81,211,303; exports, *Yen* 115,030,780. Estimated revenue, *Yen* 15,947,658, (1921-22) Capital, Dairen; pop. (1921), 131,106.

The *Pescadores* (Bokoto) consists of about 63 islands, with a total area of 85 square miles. and a population of (1921) of 56,600.

Korea (Cho-sen).—By a treaty of Aug. 23, 1910, Korea was annexed to Japan and became part of the Japanese Empire.

Korea is situated between 122° and 128° E. long., and between 34° and 43° N. lat., and the coast is fringed with innumerable islands, of which the largest is Quelpart. Total length, 600 miles from north to south, and greatest breadth 135 miles from east to west, with an area of about 85,156 square miles. Population estimated at 17,452,918 (Dec. 1921); there are 367,618 (Dec. 1921) Japanese in the country. The soil is fertile, but mountainous except in the river valleys. The staple agricultural products being rice and other cereals, beans, cotton, tobacco, and hemp; the other natural products are chiefly gold and hides. Ginseng, a medicinal root much affected by the Chinese, is largely grown under Government supervision in the province of Pyeng-An, and, being a Government monopoly, forms a rich source of revenue. Gold, copper, coal, iron, and other minerals are distributed throughout the country. The principal exports are beans, rice, fish, livestock, cowhides, ginseng, wheat, barley, iron ores, and raw cotton. Manufactures are as yet in a primitive condition, the principal being hemp cloth, brass ware, and an excellent quality of paper resembling the Japanese article, but stouter. The greater part of the sea-borne trade is carried in Japanese bottoms. Considerable progress is being made in the direction of the proper lighting of the coast. The total railway mileage open to traffic is 1,397 miles. Estimated rev. and exp. (1922-23), *Yen* 158,124,167. Capital, Seoul (Keijo-fu); pop. 250,000.

Imports into Korea, 1921	*Yen* 232,381,584
Exports from Korea, 1921	,, 218,277,223

Pacific Islands.—Under the *Treaty of Versailles*, 1919, Germany renounced the sovereignty of all her over-sea possessions, and the German Pacific Islands N. of the Equator have been allocated to Japan. These islands, in Micronesia, are the Pelew, Caroline, Marshall and Ladrone groups, with a total area of about 800 sq. miles, and a population of 48,505 natives and 3,671 Japanese (1920).

Shantung.—The German possessions in the *Shantung Peninsula* of China (Kiao-Chao, &c.), were allocated to Japan.

CAPITAL OF THE JAPANESE EMPIRE, Tôkiô, formerly called Yedo, the residence of the Emperor; population (Oct., 1921), 2,204,400. On Sept. 1, 1923 a disastrous earthquake destroyed great portions of the cities of Tokio and Yokohama. Other cities are—Osaka, 1,296,200; Kiôto, the ancient capital, 613,300; Nagoya, 616,700; Kobé, 636,900; Yokohama, 430,900; Hiroshima, 163,300; Nagasaki, 179,400; Hakodate, 152,000; Kanazawa, 134,500; Kure, 136,800; Sendai, 118,984; Otaru, 108,113; Kagoshima, 103,180; Sapporo, 102,580; and Yahata, 100,235.

FLAG: White, charged with rising sun (red).

BRITISH EMBASSY.

British Ambassador, His Excellency the Rt. Hon. Sir Charles Eliot, G.C.M.G., C.B. (1919) £6,300

KERAK, OR TRANSJORDANIA.

Emir, H.H. Abdullah, second son of the King of Hejaz, *appointed* April, 1921.

Kerak (or Transjordania), bounded on the west by Palestine, on the north by Syria, on the east by Iraq, and on the south by Hejaz and Nejd, has an Arab population of about 500,000 of whom almost all are Muhammadans. the area is unknown as the boundaries are not definitely determined. The extreme west of the country is fertile, and agricultural and pastural industries are carried on, but the rest of the country is almost entirely desert. The Hejaz Railway connects Maan with Amman, the latter being an important station on the Cairo-Baghdad air route.

CAPITAL, Amman.

British Representative, H. St. J. B. Philby, C.I.E.

KHIVA. *See* Russia.

KURDISTAN.

Kurdistan is a mountainous district of Eastern Asia Minor, between Armenia (N.), Syria and Mesopotamia (S.), Persia (E.), and Turkish Anatolia (W.). The Kurds are a semi-nomadic tribe inhabiting the mountainous regions of Turkish Asia Minor and of N.W. Persia. They are believed to be the Karduchi of Xenophon's *Anabasis*, and for centuries they lived in quasi-independence, punctuated by raids and subsequent punitive expeditions. In 1920 the autonomy of Kurdistan was recognised by Turkey and Persia, and by the Supreme Council of the Allied Powers.

The area of the country is estimated at 65,000 to 70,000 square miles, with a population of 2 to 3 millions. The chief centres are Diarbekr, Bitlis, Van (to the east of Lake Van) in the former Turkish dominions, and Urmia (to the west of Lake Urmia) and Kermanshah, in the Persian dominions. *Lake Van* (2,000 sq. miles in extent) occupies the central portion of the former Vilayet of Van; *Lake Urmia* (1,600 sq. miles in extent), across the Persian border, is about 4,000 feet above sea level, and its waters are so salt that fish cannot live therein.

The climate is severe, with a short hot summer and long and severe winter; but cereals, vines and fruit are abundantly cultivated on the slopes of the mountains; rice is grown in the hot, well-watered plains, while the rich pasture-lands of the slopes and valleys support large herds of horses, mules and sheep. The mineral wealth of the country is almost entirely undeveloped, but it is believed to be very great, and there are numerous hot and cold mineral springs; salt is obtained in large quantities in the neighbourhood of Lake Van.

The Kurds are Muhammadans and fierce persecutors of the Christians in their districts and in the neighbouring territory of Armenia.

LATVIA.

(Republika Latvija.)

President, Jahnis Tschakste.
Premier and Foreign Affairs, Z. A. Meierovics.

Minister in London, G. W. Bisseneek, 24 Gledhow Gardens, South Kensington, S.W. 5.
Sec. of Legation, Herbert Leepins.
Consul-General, E. Bihrinsch, 329, High Holborn, W.C. 1.

A Baltic Republic at the eastern and southern shore of the Gulf of Riga, formerly part of the Russian Empire. Latvia was proclaimed an independent state on Nov. 18, 1918. Its frontiers are common with Esthonia, Russia, Poland and Lithuania. The constitution is that of a democratic republic, with universal suffrage and proportional representation. Parliament (*Saeima*) consists of a single chamber of 100 members. The area being about 41,000 sq. miles, with a population of about 2,000,000.

The surface of the country is generally flat with marshy areas, interspersed with many lakes. Agriculture and dairy farming are the principal occupations of the people, and there are many flourishing industries. The fisheries are also of importance. The chief exports are flax, timber, butter, paper and glass; chief imports are agricultural machinery and implements and wood and metal machinery. The total imports in 1922 were valued at 107,000,000 *lats* (francs). The tonnage of ships entered in 1922 was 1,293,515 tons. The chief ports are Riga, Libau and Windau. In 1923 there were 1,807 miles of railway in operation. The revenue in 1923–24 was estimated at 173,000,000 *lats*.

CAPITAL, Riga, at the mouth of the Dvina (Dangava) river, population 280,000; other centres being Libau (Liepaja) 77,000, Dvinsk (Dangavpils) 45,000, Mitau (Felgava) 25,000, and Windau (Ventspils) 18,000.

FLAG: Red, white, red.

BRITISH LEGATION.

British Minister to Latvia (*also to Lithuania and Esthonia*) John Charles Tudor Vaughan, C.M.G., M.V.O. (1922).

LIBERIA.

(Republic of Liberia.)

President (1924-1928), C. D. B. King, *assumed office* Jan. 1, 1920, *re-elected* for 1924-28.
Vice-President, H. T. Wesley.
Secretary of State, E. J. Barclay.
Treasury, J. Harris.
Attorney-General, Louis A. Grimes.
Postmaster-General, A. Karnga.
War & Interior, J. F. Cooper.
Education, Bernard W. Payne, M.D.
Receiver of Customs and Financial Adviser (lent by Govt. of U.S.A.), Sidney de la Rue.

Envoy Extraordinary and Minister Plenipotentiary in London (vacant).
Sec. of Legation (Chargé d'Affaires), C. W. Dresselhuys.
Consul-General, C. E. Cooper, 52A Drury Buildings, Liverpool.
Commercial Attaché and Consul, J. T. Grein, 27 Mincing Lane, E.C. 3.
Vice-Consul, A. E. Donaldson.

An independent Negro Republic of Western Africa, occupying that part of the coast of North Guinea which is between the rivers Cavalla, S.E., and Mano, N.W., a distance of about 350 miles, with an area of about 48,000 square miles, and extending to the interior to latitude 8° 50′, a distance of 150 miles from the seaboard. It was founded by the American Colonization Society in 1820, and has been recognised since 1847 as an independent State. The population is estimated at 1,500,000 to 2,000,000, including about 12,000 Americo-Liberians. The principal exports are palm-kernels, piassava, palm-oil, coffee, cocoa, ivory and kola nuts. The chief imports are rice, tobacco, Manchester goods, provisions, spirits, salt, hardware, glass and earthenware and building materials. The executive power is vested in a President elected for four years, assisted by a ministry; there are two houses of Legislature, the Senate, with eight members elected for six years, and the House of Representatives with fifteen members elected for four years. There is no regular army, but there is an enlisted frontier force of about 600 men under native officers. The control of the customs is in the hands of a General Receiver (who is also Financial Adviser) lent by the Government of the U.S.A. There are 10 ports of entry along the 350 miles of coast and 12 interior ports. In 1921, 263 vessels (622,668 net tons) entered and cleared at Monrovia; of these 82 (249,228 net tons) were British.

LIECHTENSTEIN.

(Fürstentum Liechtenstein.)

Prince, Johann II., *b.* Oct. 5, 1840; *suc.* Nov. 12, 1858.
Administrator, Gustav Schädler (*appointed* June 9, 1922).

A Principality on the Upper Rhine, between the Austrian province of Vorarlberg and Switzerland; area 59·61 square miles, pop. (1921) 11,500. The main industries are agriculture (chief products being corn, cattle, wine and turf) and textiles. Revenue (1921), 693,270,520 *francs*; expenditure 633,491,520 *francs*; debt 345,849,520 *francs*.

CAPITAL, Vaduz. Pop. 1,400.

LITHUANIA.

(Lietuva.)

President, A. Stulginskis (May 15, 1920).
Premier and Foreign Affairs, Dr. Ernest Galvanauskas.

Minister in London, Monsieur T. Narusevicius.
Legation, 10 Palace Gate, W. 8.
1st Sec. (vacant).
2nd Sec., K. Gineitis.
Commercial Attaché, V. K. Rackauskas.

The independence of the Lithuanian Republic (Lietuva) was proclaimed at Vilna on Feb. 16, 1918. The Republic consists of the former Russian Government of Kovno and portions of the Suvalki and Vilna Governments, and is bounded on the N. by Latvia, on the S. by the German district of Königsberg and Poland, on the E. by Poland, and on the W. by the Baltic Sea, the total area included in the Republic (including Memel Territory) being about 20,000 sq. miles, with an estimated population of 2,000,000. Memel Territory was occupied by Lithuania in Jan. 1923, and negotiations as to its final status are still (Nov. 1923) in progress between the Lithuanian Government and the Conference of Ambassadors.

The legislature consists of a single chamber Assembly (*Seim*) of 78 members, elected by universal adult suffrage, the Executive being entrusted to a council of ministers. A new currency was issued in Oct. 1922 to supersede the depreciated German *mark*. 1 *Lit* of 100 *cents* = one tenth U.S. gold $. Rate of exchange (Sept. 1923) *lits* 46·40 = £1.

CAPITAL, Kovno, on the Niemen (pop. 100,000), other centres being Memel, on the Baltic (50,000), and Shavli (25,000).

FLAG: Three horizontal bands, yellow, red, green.

LUXEMBURG.

(Grand-Duché de Luxembourg.)

Grand Duchess, H.R.H. Charlotte, *born* Jan. 23, 1896, *succeeded* (on the abdication of her sister) Jan. 9, 1919; *married*, Nov. 6, 1919, Prince

Felix of Bourbon-Parma. *Heir Apparent*, Prince Jean, *born* Jan. 5, 1921.

Minister of State, M. Reuter.

Chargé d'Affaires, M. A. B. Pescatore.

Consulate-General in London, 37 Bedford Square, W.C. 1.

A Grand Duchy in Central Europe, bounded by Germany, Belgium, and France; it formed part of the Germanic Confederation, 1815–66, and was included in the German "Zollverein." In 1867 the Treaty of London declared it a neutral territory under the sovereignty of the King of the Netherlands, on whose decease, 23 Nov., 1890, it passed to the Duke of Nassau. The territory was invaded and overrun by the Germans at the commencement of the war in 1914, but was liberated in 1918, U.S. troops entering the capital on Nov. 22. By the *Treaty of Versailles*, 1919, the country is declared to be free from all ties with Germany. The area is 999 square miles; the population (1916) 263,824, nearly all Roman Catholics. The principality is rich in iron-ore. The revenue in 1921 was estimated at 63,808,926 francs, expenditure 149,773,345 francs; debt (1 Jan., 1921) 128,000,000 francs. There are 328 miles of railway. The army numbers about 300 men. The capital, Luxemburg (population 45,676), is a dismantled fortress.

FLAG: Red, white, blue.

British Envoy, Rt. Hon. Sir G. D. Grahame, G.C.V.O., K.C.M.G. (1922).

Consul-General, M. C. Gurney, C.M.G., M.V.O.

Consul N. le Gallais.

Pro-Consul, Etienne Victor.

MEMEL.

(*See also* **Lithuania.**)

Under the *Treaty of Versailles* Germany renounced the sovereignty over the town and territory of Memel, and a French High Commissioner, with a small garrison, governed the Territory in the name of the Allies until Jan. 1923, when the Territory was invaded and occupied by the Lithuanians. Negotiations are proceeding as to the terms of autonomy upon which it shall be placed under Lithuanian sovereignty. The total area administered is 945 square miles, with a population of about 150,000, of whom about 42,000 inhabit the town of Memel.

Memel—Vice-Consul, Raleigh Le May.

MEXICO.

(Estados Unidos Mexicanos.)

President, Alvaro Obregon, *assumed office* Dec. 1, 1920.

War, General Francisco R. Serrano.

Education, Señor José Vasconcelos.

Legation, 48 Belgrave Square, S.W. 1.

Consul-General in London, Senor Don A. Mascarañas, 25, Craven Road, W. 2.

Liverpool—Consul, Señor Don Rafael Aveleyra, 51 South John Street.

Glasgow—Consul, Señor Don Filiberto Valero, 30, Hill Street.

Mexico occupies the southern part of the continent of North America, with an extensive seaboard to both the Atlantic and Pacific Oceans, extending from 15° to 32° 30′N. lat. and 87 to 117° W. long., and comprising one of the richest and most varied zones in the world. It comprises 27 states, 3 territories, and the federal district of Mexico, making in all 31 political divisions, comprehending an area of 768,883 square miles with a population of (1910) 15,063,207.

The two great ranges of North America, the Sierra Nevada and Rocky Mountains, are prolonged from the north to a convergence towards the narrowing Isthmus of Tehantepec, their course being parallel with the west and east coasts. The surface of the interior consists of an elevated plateau between the two ranges, with steep slopes both to the Pacific and Atlantic (Gulf of Mexico). In the west is the Peninsula of California, with a mountainous surface, separated from the mainland by the Gulf of California. The Sierra Nevada, known in Mexico as the *Sierra Madre*, terminates in a transverse series of volcanic peaks, from Colima on the west to Citlaltepete on the east, the intermediate and highest peaks being Ixtaccihuatl (17,879 feet) and Popocatepetl (19,784 feet). The low-lying lands of the coasts form the *Tierra Caliente*, or tropical regions (below 3,000 feet), the higher levels form the *Tierra Templada*, or temperate region (from 3,000 to 5,000 feet), and the summit of the plateau with its peaks is known as *Tierra Fria*, or cold region (above 5,000 feet). The only considerable rivers are the *Rio Grande del Norte*, which forms part of the northern boundary, and is navigable for about 70 miles from its mouth in the Gulf of Mexico, and the *Rio Grande de Santiago*, which runs from Lake Chapala to the Pacific. The remaining streams are governed by the formation of the land, and run in mountain torrents between deep-cut cañons or "barrancas." The largest fresh-water lakes are *Chapala*, some 50 miles in length, and *Patzcuaro* and *Xochimilco*. In the north-west are saline lakes amid bare and dry regions. The climate varies according to the altitude. Yellow fever sometimes occurs at Merida, Yucatan.

The earliest invaders, or *Toltecs*, gave place in the 13th century to the *Aztecs*, who were conquered in the 16th century by Spanish adventurers under *Hernan Cortes*.* Spanish rule was established at *Tenochtitlan*, a 14th century Aztec city (now Mexico), and Mexico remained a Spanish dominion until its freedom was asserted by a revolutionary war, 1810–1827. From 1837–1848 the province of Texas gave rise to hostilities with the United States, terminating in a three years' war and a cession of the disputed territory to the victorious northern States. In 1810 a Republic was proclaimed, but Iturbide declared himself Emperor in 1821. He was shot in 1824, and a Republic was again established. In 1862 the French troops came to Mexico, and in 1864 an Empire under Ferdinand Maximilian of Austria was declared. In 1867 the downfall of the Empire and the death of the Emperor gave rise to the new Republic, which has endured to the present day. The most prominent of modern Presidents is *Porfirio Diaz*, who ruled (except during 1880-4) from 1876 to May 25, 1911. Since the fall of Diaz internal disturbances, in which eleven Presidents have figured, have continued with varying degrees of intensity, and considerable friction (amounting almost to a state of war) has arisen with the United States. On July 15, 1914, Venustiano Carranza assumed control of the executive, but his anti-foreign attitude and legislation, together with the seizure of many properties (a few of which belonged to British subjects) led to a refusal of the British Government to grant recognition of his administration. The degree to which Carranza departed from his declaration of neutrality during the Great War undoubtedly influenced the British Government when this policy was adopted. Carranza was overthrown by a further revolution in 1920, and is believed to have been shot by the insurgents. After the fall of Carranza the executive power was assumed by de la Huerta as provisional President, and on Dec. 1, 1920, General Obregon, whose *coup d'état* had caused the downfall of Carranza, became head of the Republic. The determination of the new government to uphold the Carranza constitution of 1917, which has led to confiscatory measures in connection with nationalization of the petroleum of the country, and contains (among other departures from the accepted comity of nations) provisions which restrict the rights of foreigners, has caused the British, American, French and Belgian governments to adopt a policy of non-recognition of the Obregon administration until foreign interests are treated with the respect customary among enlightened nations. The expropriation, without payment of compensation, of several hundreds of private properties, in pursuance of the Obregon agrarian policy, has called forth strong protests from foreign Powers.

---

* The remains of *Hernan Cortes* have been definitely located in the Temple of Jesus, Mexico City. They are contained in a marble vault, with the funeral garments.

Acapulco, Manzanillo, Mazatlan, Salina Cruz, and Guaymas are the chief ports on the Pacific; and Vera Cruz, Tampico, Progreso, and Puerto Mexico on the Atlantic or Gulf of Mexico. There were 15,804 miles of railroad open on Sept. 16, 1912, and 40,687 miles of telegraph. The railroads have in a large measure been built by American and English companies.

The principal agricultural crops are maize, wheat, barley, Chile-pepper, sugar, coffee, cotton, tobacco, vanilla, flax, grapes, and all kinds of tropical fruit. The maguey, or Mexican aloe, yields a favourite beverage, "pulque"; other species of the same plant supply pita-flax and sisal-hemp (henequen). The forests abound in mahogany, rosewood, ebony, and caoutchouc trees. The mineral wealth is very great; silver and gold, copper, lead, and quicksilver, iron and coal, are the leading products of the mines. Woollen and cotton spinning and weaving, and other branches of industry, are encouraged by high protective duties. The imports, nevertheless, consist very largely of textile manufactures. Of the exports 45 per cent. consist of silver and gold; sisal hemp (henequen), coffee, hides and skins, timber, logwood, vanilla, tobacco, dyestuffs, sugar, and drugs ranking next in importance.

The monetary system has recently been placed on a gold basis, with a gold *peso*=50 cents U.S. currency. In Sept. 1922, the Mexican Government undertook to set aside for the service of the debt the sum of 30,000,000 gold *pesos* in 1923, rising by 5 million gold *pesos* annually to 50 million gold *pesos* in 1927. The total of the debt in Sept. 1922, was stated at 508,830,300 gold *pesos* (=$254,415,150 U.S.) of which about one half was raised for railroad purposes.

The language of the country is Spanish.

Estimated revenue	(1922)	$216,000,000

MOROCCO.

(Maghreb el aksa.)

French and Spanish Protectorate.

Sultan, Mulai Yusef, G.C.M.G., *proclaimed* Aug. 18, 1912.

Morocco, the largest of the Barbary States, is situate in the north-west of the African Continent, between 27°-36° N. lat. and 1°-11° 40′ W. long, with a total area estimated at 314,000 square miles, and a population of about 7,000,000. Morocco is traversed from the Atlantic coast in the south-west to the Algerian frontier in the north-east by five parallel ranges, known generally as the *Atlas Mountains*. Between the various ranges lie well-watered and fertile plains, the lower slopes of the northern flanks of the mountains being well-wooded, while the southern slopes are exposed to the dry winds of the desert and are generally arid and desolate. The most northerly point of Morocco is the peninsular of Ceuta, which is separated from the Continent of Europe by the narrow strait of Gibraltar. The Jebel Musa dominates the promontory, and with the rocky eminence of Gibraltar was known to the ancients as *The Pillars of Hercules*, the western gateway of the Mediterranean. Between 32° N. and 30° N. is the headland Ghir, which encloses a bay containing the port of Agadir formerly known as the "Gate of the Sudan." This port formed the bone of contention between France and Germany in 1911-1912.

The climate is generally good and undoubtedly healthy, especially on the Atlantic coast, the country being sheltered by the Atlas Mountains from the hot winds of the Sahara. The extremes of temperature in Tangier and Mogador are 92° Fahrenheit in the summer and 37° in the winter, with a rainy season from October to May. The Mediterranean coast is drier and less temperate, but not unhealthy, while the plains of the interior are intensely hot.

Government.—From the end of the 8th century A.D. until the year 1912 Morocco was ruled by a despotic Amir or Sultan of various dynasties, that of Filali having reigned since 1649. The imperial umbrella (the symbol of sovereignty) was passed on by nomination, and the rule was arbitrary and unchecked by any civil limits. The country was subject to European intervention at many periods, and during the closing years of the nineteenth century the dominant power in the country was France, whose Algerian territory formed the eastern boundary. By the Anglo-French Convention of 1904 Great Britain had recognised the predominance of French rights, but in 1905 Germany exhibited an interest in Moroccan affairs, and at the *Algeciras Conference* in January, 1906, an attempt was made by the Powers to define the various interests, and to establish order in the country by means of an organised police force. Between 1906 and 1911 there were frequent conflicts between French troops and Moroccan tribesmen, and in 1908 internal dissensions led to the defeat and deposition of the Sultan Abd el Aziz IV. by his brother Hafid, who eventually triumphed and was recognised by the Powers in 1909. In 1912 Sultan Hafid abdicated and accepted a pension from France, and was succeeded by his brother Moulai Yusef.

France is the paramount power in Morocco, and the Government of the greater part of the country is administered by the French Republic, which is recognised as the "protecting power." In addition to France, the kingdom of Spain has had relations with Morocco for many centuries. The northern portion of Morocco, as defined in the Franco-Spanish Treaty of 1912, forms a Spanish "sphere of influence." In this Spanish zone there were tribal risings in 1921, and during the operations to quell these risings the Spanish Expeditionary force met with serious reverses in the neighbourhood of Melilla. A Civil High Commissioner was appointed in 1922 over the Spanish zone to inaugurate a policy of pacification. *Ceuta*, in 35° 54′ N. lat. and 5° 18′ W. long., has been a Spanish possession since the close of the 16th century, and forms part of the administrative province of Cadiz, and the adjacent Alhucema and Zaffarin islands are Spanish possessions. A special international *régime* was designed for *Tangier* before the War by negotiations between the British. French and Spanish Governments, but the outbreak of the War prevented this *régime* from being put into operation. Pending further negotiations the town and zone are administered by the Sultan's representative and the diplomatic body.

Among the agricultural products are wheat, barley, maize, beans, peas, birdseed, linseed, coriander, cummin, fenugreek, esparto, and hemp, and the northern slopes of the Atlas produce many fruits, principally figs, almonds, pomegranates, lemons, olives, oranges and dates, the latter growing also on the southern slopes and in the plains. The live stock includes large quantities of horses, cattle, sheep and goats, while the poultry and egg industry is of increasing importance. Antimony, iron, coal, copper, lead and tin (the last three in considerable quantities) are known to exist, and gold and silver are also found. Rock salt and brine are exported in large quantities. The trade of Morocco is chiefly with France and Algeria, Great Britain and Spain, the chief imports being cottons, sugar and soft goods, the exports being grain, eggs, hides and skins, and wool. The unit of currency in the French protectorate is the franc, while in the Tangier zones the franc, the Spanish and the *Hassani peseta* are all current, and in the Spanish zone the two last of these currencies.

Communications.—The French have built some narrow gauge military railways from Casablanca to Rabat, to Kinitra and Mequinez, and to Settet, while the Franco-Spanish treaty provides for a line from Tangier to Fez. Telegraphic communication is established by submarine cables from Tangier to Cadiz, Tarifa and Oran, and there are wireless stations at Tangier, Rabat, Casablanca, and Mogador; inland lines have been built by the French to Fez and to some of the ports, as well as to the borders of the Spanish zone, and the latter line will shortly be extended to Tangier. Roads have also been constructed in the French zone, and it is now possible to go to Fez or Marrakesh by motor-car.

The principal *Harbours* are Tetuan, Tangier, El Araish, Rabat, Casablanca, Mazagan, Saffi, Mehedia, and Mogador.

Horticultural Adviser, B. Gerritzen.
Consul-Gen., Dr. J. Steyn Parvé, 28 Langham Street, W. 1.
Vice-Consul, Dr. H. G. von Oven.

A maritime Kingdom of Central Europe, situate on the North Sea, in lat. 50° 46′—53° 34′ N. and long. 3° 22′—7° 14′ E., consisting of 11 provinces, and containing a total area of 12,761 square miles, with a population in August, 1922, of 7,029,881. The majority, about three-fifths, belong to the several Reformed Churches; and the remainder are Roman Catholics, with about 107,000 Jews. The land is generally flat and low, intersected by numerous canals and connecting rivers—in fact, a network of water courses. The principal rivers are the Rhine, Maas, and Yssel, with the mouths of the Schelde. The chief native products are herrings and other fish, cattle, horses, swine, sheep, poultry, eggs, seed, potatoes, oats, rye, wheat, barley, beans, peas, buckwheat, beetroot, chicory, flax, hemp, tobacco, and dairy produce. The principal manufactures are shipping, bricks, margarine, cocoa, chocolate, linen, rich damasks, cottons, woollens, cigars and other manufactured tobacco, candles, confectionery, earthenware and pottery, glass bottles and ware, chemical and pharmaceutical products, matches, perfumery, sugar, bicycles and automobiles, boots and shoes, starch, potato flour, engines, metal substances, works of art in gold and silver, incandescent lamps, machinery, motors, paper, printing, oils, beer, "geneva" and other liqueurs. Diamond-cutting employs numerous hands in Amsterdam.

Communications.—The total extent of canals is about 2,000 miles. There were 2,117 miles of railroad open in 1918, and 5,249 miles of telegraph line. The mercantile marine, on Dec. 31, 1922, consisted of 570 steam and motor vessels and 330 sailing vessels, etc. In 1922, 14,074 vessels (48,307,000 cubic metres) entered, and 14,138 vessels (46,564,000 cubic metres) cleared at the various ports. An Act for the damming and draining of the Zuyder Zee was passed in 1918.

Defence.—The Home Forces consist of a conscript army, with an annual levy of 19,500 men, producing a first-line army of 251,000, or (including reserves) 327,000 all ranks. The Royal Navy consisted, on July 1, 1921, of 90 ships (4 of them ironclads, and 1 protected cruiser).

Education.—Private State-aided primary instruction is encouraged rather than public, though the latter is provided if required, by local taxation. The average attendance at primary schools is 96 per cent. Secondary schools for working classes are numerous, well equipped and attended. The principal Universities are at Amsterdam, Groningen, Leiden, and Utrecht, and there are technical universities at Delft (polytechnic), Rotterdam (commercial, Wageningen (agriculture), and Utrecht (veterinary).

NETHERLANDS COLONIES.

TOTAL AREA, 832,473 square miles.
POPULATION (1920), 49,514,038.

The possessions of the Kingdom of the Netherlands in the EAST INDIES (Administrative Capital *Batavia*, pop. about 140,000) are very considerable, comprising the whole of the SUNDA ISLANDS and MOLUCCAS: *Sumatra* (area, 162,000 sq. miles), *Java* and *Madura* (51,000 sq. miles), *Netherlands Borneo* (115,000 sq. miles), *Celébes Island* (72,000 sq. miles), *Moluccas* (44,000 sq. miles), *Timor Islands* (18,000 sq. miles); with the exception of a portion of Borneo and Eastern Timor, together with WESTERN NEW GUINEA. JAVA and MADURA have a population (1920) of 34,984,171, and produce a sufficient supply of food for a dense population, besides furnishing sugar (29,272,103 piculs produced in 1922), tobacco, tea, coffee, tin, and other products for exportation (customs receipts, 1922, 43,367,388 fl.). The "outlying" islands are frequently administered by their own princes, subject to the directions of a Netherlands Resident. There was (1922) a colonial army of 1,349 officers and 31,695 men. The colonial revenue for 1921 was about 769,689,000 guilders and the expenditure about 1,055,173,000 guilders. The exports, for private account, amounted in 1921, for Java, Madura, and the other outlying islands, to 1,193,709,000 florins, while the imports for the same year amounted to 1,117,428,000 florins.

In South America the colony of SURINAM, or Netherlands Guiana (imports, 1921, 13,150,025 guilders; exports, 6,562,014 guilders), embraces 49,845 square miles and contains (1922) 108,241 inhabitants; and in the West Indies, CURAÇAO (imports, 18,566,036 guilders; exports, 12,763,971 guilders; population, 33,232) and five other small islands belong to the Netherlands, having an area of 436 square miles, with a population of 21,731 (imports, 1,811,924 florins; exports, 627,365) florins.

Trade of Colonies with U.K.

	1920.	1921.
Exports to U.K.	£35,020,944	£35,504,167
Imports from U.K.	23,661,768	52,073,000

NICARAGUA.

(República de Nicaragua.)

President, Señor Don Bartolomé Martinez.
Minister of Foreign Affairs, Dr. Carlos Cuadra Pasos.

Chargé d'Affaires (London Legation), Señor Don Eduardo Perez-Triana, 49 St. James's St., S.W.1.
Consul in London, Señor Don Narciso Lacayo, 65 Bishopsgate, E.C.2.
Vice-Consul, Wyness B. Gauld.

The largest State of Central America, with a long seaboard on both the Atlantic and Pacific Oceans, situate between 9° 45′—15° N. lat. and 83° 40′—87° 38′ W. long., containing an area of 51,660 English square miles and a population (census of 1920) of 638,119, of whom about three-quarters are mixed blood and the rest Indians, besides the Mosquitos, who are mostly in a primitive state.

---

* fl.12·106 = £1 (normal). Oct. 1923, fl.11·60 = £1.

† An act of Oct. 22, 1919, authorized a forced loan of 450,000,000 fl., bearing interest at 5 p.c. and redeemable at par in 1934.

Nicaragua was discovered by Columbus in 1502, and was overrun by the Spaniards under Davila in the first quarter of the 16th century, forming part of the Spanish Captaincy-General of Guatemala until 1821, when its independence was secured. The present constitution rests on the fundamental law of Nov. 10, 1911 (amended 1913) and is that of a centralised republic. The President is elected by direct suffrage for four years.

The chief products are coffee, bananas, sugar, timber (cedar, mahogany, rosewood, &c.), tobacco, maize, rice, beans, cocoa, hides, gold and silver. Considerable quantities of foodstuffs are imported as well as cottons and other manufactures, principally from the United States, which also take the greater part of the exports.

There are 146 miles of railway, 2,500 miles of telegraph and 1,240 miles of telephone. Good roads are very few, and transportation, especially in the rainy season (May-Nov.), is attended with great difficulties.

Corinto, on the Pacific coast, is the chief port of the country, handling about 75 per cent. of the total trade. Bluefields is an important port on the Atlantic coast, whence considerable quantities of bananas and timber are shipped to New Orleans. Owing to defective communications the Atlantic littoral is practically isolated from the rest of the Republic and the chief centres of population.

Education is backward, at least 50 per cent. of the population being illiterate.

The official language of the country is Spanish.

Consul-General, G. K. Conradi, 36 King St., E.C. 2.
Vice-Consul, Th. V. Aass.

Norway, an independent kingdom, founded in 872 (fundamental law of May 17, 1814), was united with Sweden under the same King from Nov. 4, 1814, to June 7, 1905, when the union was dissolved. The Parliament of 150 members is called the "Storthing," which is divided into two sections, chosen by itself to discuss projected Bills, called "Odelsting" and "Lagting." Norway, the western and northern portion of the Scandinavian peninsula, is about 1,100 miles in length, its greatest width about 250 miles. It is divided into 20 provinces, or fylker, and comprises an area of 124,130 sq. miles with a population (1920) of 2,649,775. The coast-line is extensive, deeply indented with numerous fiords, and fringed with an immense number of rocky islands. The surface is mountainous, consisting of elevated and barren tablelands, separated by deep and narrow valleys. The cultivated area is about one-thirtieth part of the country; forests cover nearly one-fourth; the rest consists of highland pastures or uninhabitable mountains.

Agriculture gives employment to a large part of the population but is unable to furnish sufficient produce for home consumption; hence it has been necessary to import considerable quantities of corn, meat, and pork. Fishing and forestry are important industries and manufactures are aided by great resources of water power, calculated at 12 to 13 millions of horse power, of which about 10 to 11 per cent. are utilized. The imports consist chiefly of the necessary articles of consumption. The chief exports consist of fish, oil, and other products of the fisheries, timber, matches, pulp, paper, skins and furs, nails, minerals, stone, ice, calcium carbide, condensed milk, butter, margarine, tinned goods, saltpetre, &c. Norway voted for prohibition of alcoholic beverages in 1919 (385,000 for prohibition, 275,000 against).

Defence.—Service in the National Militia is universal and compulsory. The peace strength is about 60,000 all ranks, and the war effective is about 360,000 of all ranks. In time of war all males between the ages of 15 and 55 are liable for service. The Navy consists of 4 ironclads, 27 torpedo-boats, 1 gunboat, 3 destroyers, 7 submarines, and several minelayers.

Education is compulsory and free between the ages of 7 and 14, schools being maintained by local taxation with State grants in aid. The attendance is high. Secondary schools are provided by the State, by local authorities, and privately. There are many special schools and industrial and technical institutes. The University of Christiania was attended in 1922 by 2,300 students.

---

* C$ = Córdoba, worth $1 U.S.

Communications.—The total length of railways open in 1922 was 2,148 miles, of which 271 miles were private lines. The length of telegraphs and telephones belonging to the State in June, 1922, was 16,910 miles. The mercantile marine, Jan. 1, 1923, consisted of 3,740 vessels, of 1,619,400 net tons. The earnings of the Norwegian mercantile marine in foreign traffic amounted in 1922 to about 462,000,000 *kroner.*

PANAMA.

(Republica de Panama.)

President (1920-1924), Belisario Porras, *assumed office*, Oct. 1, 1920.

MINISTRY (Nov. 14, 1918.)

Secretary of Government and Minister of Justice, Rodolfo Chiari.
Foreign Affairs, Narciso Garay.
Finance, Eusebio A. Moralez.
Public Instruction, Octavio Mendez Pereira.
Public Works (*Fomento*), Juan A. Jimenez.

Minister in London (vacant).
Consul-General, Don Archibaldo Boyd, Cooper Building, Church Street, Liverpool.
Consul in London (*acting*), Don C. J. Dunbar MacConnell, 232 Finsbury Pavement House, E.C. 2.
Consul in Birmingham, S. Sauri.

Panama, formerly one of the nine Departments of Colombia, revolted in Nov. 1903, and established a separate Government. The area of the Republic is 31,890 square miles, the population 442,522 (excluding Canal Zone). The soil is extremely fertile, but there is little cultivation and nearly one half of the land is unoccupied. The chief crops are bananas, coffee, tobacco, and cereals. The imports are almost entirely manufactured goods and foodstuffs. A railway 47 miles in length joins the two oceans.

	1921-22.	1922-23.
Revenue	£1,065,000	£1,100,783
Expenditure	1,540,000	1,257,426
	1921.	1922.
Imports	£2,396,871	£2,053,709
Exports	512,931	497,496
	1921.	1922.
Imports from U.K.	£305,095	£220,893
Exports to U.K.	138,938	65,504

The total value of supplies purchased for the *Canal Zone Commissaries* for the fiscal year ended June 30, 1921, was $8,096,039 (U.S.Cy.).

The language spoken is Spanish.

CAPITAL, Panama. Population (1920), 66,851. Colon had a population in 1920 of 31,230.

FLAG: Quarterly, white with blue star, red, blue, and white with red star.

PAPACY, The.

Sovereign Pontiff (260th), His Holiness Pope Pius XI. (Achille Ratti), *born* at Desio, March 31, 1857 *elected* Pope (in succession to Benedict XV.) Feb. 6, 1922.

The office of the ecclesiastical head of the Roman Catholic Church is vested in the Pope of Rome, who is the Sovereign Pontiff of the Western Church, and claims temporal power over the Papal States which were incorporated with Italy from 1860 to 1870, the territory of the Papacy now being confined to the palaces of the Vatican and the Lateran and the Villa of Castel-Gandolfo, which are guaranteed to the Pope (with a yearly indemnity of 3,250,000 lire, which is neither claimed nor paid) by the Italian Government.

British Envoy Extraordinary & Minister Plenipotentiary, Hon. Sir Odo Russell, K.C.V.O., C.B. (1923).
1st Secretary, C. J. F. Dormer, M.V.O.
Temporary Secretary, R. Thynne.

PARAGUAY.

(República del Paraguay.)

President (ad interim), Dr. Eligio Ayala.
Foreign Affairs, Dr. Rogelio Ibarra.
Finance, Dr. Luis A. Riart.
Justice and Instruction, Dr. Lisandro Diaz Leon.
War and Marine, Col. Manlio Schenoni.
Interior, Dr. Modesto Guggiari.

Minister in London, (vacant).
Consul-General in London, Capt. Ernesto Ibañez (*acting*), 14, Chiswell House, Finsbury Pavement.

An inland State of South America, situate between 20°—6° 30′ S. lat. and 54°—62° W. long. The area of Paraguay (exclusive of the Chaco) is computed at 75,700 square miles, and it contains a population of about 800,000.

Paraguay was visited in 1527 by Sebastian Cabot, and in 1535 was settled as a Spanish possession. In 1811 Paraguay declared its independence of Spain, and from 1814–1840 was governed by Francia, a Paraguayan despot, who was succeeded by Lopez, 1840 1862. In 1862 Francisco Solano Lopez succeeded his father, and in 1864 declared war against Brazil, Argentina and Uruguay being involved in the struggle. Against these three nations Lopez conducted a five years' war, which terminated in his defeat and death at the *Battle of Cerro Corá*, March 1, 1870. This dogged struggle reduced the country to complete prostration, and the population, which was 800,000 in 1857, is alleged to have fallen in 1870 to 250,000, of whom barely 30,000 were men. The present constitution was adopted at the close of the war, and under its provisions the head of the executive is the President, elected by an electoral college for four years and ineligible for office for eight consecutive years after the expiration of his term. A Vice-President is similarly elected, and succeeds automatically in the case of the death, expulsion or absence of the President. There is a Cabinet of 5 members.

Paraguay proper consists of a series of plateaus, intersected by abrupt ranges of hills, some of which reach an altitude of 2,000 to 3,000 feet above sea level. The Paraguay and Alto Paraná rivers are navigable at all seasons for vessels of 6 to 7 feet draft. Many of the tributary streams are also navigable for much of the year. The Pilcomayo river is navigable for small craft for 180 miles from Asuncion; but is liable to shrink unduly with drought. The plateaus are covered with grassy plains and dense forest, the soil being marshy in many parts and liable to floods; while the hills are covered for the most part with immense and valuable forests. The streams flowing into the Alto Paraná descend precipitously into that river. In the angle formed by the Parana-Paraguay confluence are extensive marshes, one of which, known as "Neembucu," or endless, is drained by *Lake Ypoa*, a large lagoon, south-east of the capital. The *Chaco*, lying between the rivers Paraguay and Pilcomayo and bounded on the north by Brazil, forms the subject of a long standing dispute with Bolivia; it is practically a dead level, though a slight and uniform rise westward is now known to exist, and suffers much from floods and still more from drought.

The chief agricultural products are tobacco, yerba maté, oranges, timber, quebracho extract, hides and cassava (mandioca), maize, rice, sugar-cane, ground-nuts, and other tropical and sub-tropical plants. The forests contain many varieties of timber, but only cedar and a few of the best known hardwoods find a market abroad. Stock-raising, lumbering, tobacco growing, and the gathering of *Yerba* (Paraguay tea), are the principal industries. The chief articles of export are hides, timber, yerba maté, tobacco, quebracho extract, cattle and meat products, oranges, and petit grain oil. The Army numbers 2,000 to 3,000 men. A railway, 232 miles in length, which belongs to an English company, connects Paraguay with the Argentine railway system. The journey from Asuncion to Buenos Aires (985 miles) occupies 53 hours. Train ferries enable the run to be accomplished without break of bulk. The language is Spanish.

	1921-2.
Revenue (Estimate)	£801,066
Expenditure (do.)	820,574
Foreign Debt (Dec. 31, 1922)	1,315,152

Consul-General in London, Sir Harry Foster, 82 Victoria Street, S.W. 1.

Persia—called by the natives Irán—comprises an area of 630,000 sq. ms., with a population estimated at 10,000,000. By the Anglo-Russian Convention of Aug., 1907, Great Britain and Russia mutually engaged to respect the integrity and independence of Persia, while marking out certain regions in S.E. and N.W. Persia respectively in which each had, for geographical and economic reasons, special interests. On Aug. 9, 1919, this Agreement was superseded by a Treaty between Great Britain and Persia, by which Great Britain agrees to respect the integrity of Persia, and to provide a loan of £2,000,000, in return for the security of diplomatic and commercial relations between the two countries, and for the purpose of establishing order and developing the resources of the State. This agreement was, however, never put into force, and was denounced by the Persian Government (with the concurrence of Great Britain) in Feb., 1921.

In March, 1921, Persia signed a treaty with the Russian *Soviet* Republic, which provides *(inter alia)* for mutual diplomatic and consular representation, restores to Persia Firuzeh and Ashurada, annuls all concessions previously granted to Russians in Persia, hands over the Russian Discount and Loan Bank to the Persian Government, cancels all Persian debts to Russia, denounces all previous Russo-Persian treaties, abolishes the "capitulations" as regards Russian subjects in Persia, and denounces all treaties made between Russia and third Powers regarding Persia.

Persia is mostly an arid table-land, encircled, except on the east, by mountains, those in the north rising to 18,700 ft. The central and eastern portion is a vast salt desert. The only navigable river is the Karun, which was opened to foreign navigation from Mohammerah to Ahwaz in 1888. There are only 8 miles of railway open, and travelling is mostly by caravans, and transport by pack-animals. The cost of carriage is, therefore, very heavy. An option for the construction of a railway from Khanikin to Tehran *viâ* Kermanshah and Hamadan (with a branch to Enzeli on the Caspian) was granted in 1920 to the Persian Railways Syndicate.

The chief products are cereals, cotton, gums, dried fruits, silk, tobacco, and opium. The minerals (little worked) are salt, iron, coal, copper, lead, sulphur, &c., with turquoises. Oilfields in Southern Persia have been successfully worked by an English company since 1902. The only important manufacture is that of woollen carpets (mostly a domestic industry), but shawls, silks, and cotton fabrics are also produced. There are extensive forests in the north and west. Sheep and goats are numerous, and good wool is produced. The Persians are mostly Shiah Muhammadans; but there are many adherents of Babiism (an eclectic form of Deistic religions), and Armenian Christians. The laws and popular education are based on the precepts of the Koran. Persia is divided into provinces, of which the principal are under Governors or Governors-General.

Owing to increasing popular discontent with a corrupt and incompetent administration and an extravagant Court, a nationalist movement began in Dec., 1905. In Aug., 1906, the Shah, Muzaffer-ud-Din, admitting the need for reforms, granted a Constitution. He was succeeded in 1907 by his son Muhammed Ali Shah who was deposed by the National Assembly in 1909, to be succeeded by his son, Sultan Ahmad Shah (under the regency of Nasr-ul-Mulk, until 1914).

The revenue (£1,480,780 in 1913–14) is derived from land tax, Crown lands, customs, opium, salt, and lease of monopolies. The foreign debt of Persia amounted (Dec. 31, 1916) to £6,325,700. British commercial interests in Persia much exceed those of any other country, the trade between the British Empire (including India and Mesopotamia) and Persia amounting to more than 80 per cent. of the total trade of the country. The sea-borne trade of Persia passes chiefly through the ports of Bushire, Bunder Abbas, and Mohammerah, and *viâ* Baghdad and Duzdap. The shipping of the Persian Gulf is principally British.

Persia's Foreign Trade.

(In thousands of krans.)

	Imports.	Exports.	Total.
1913-14	647,165	455,840	1,103,005
1914-15	499,323	396,058	895,381
1915-16	464,108	377,135	841,243
1916-17	494,771	433,895	928,666
1917-18	468,066	338,714	806,780
1918-19	476,287	270,869	747,156
1919-20	629,793	367,817	997,610
1920-21	482,352	355,617	837,969
1921-22	609,775	502,044	1,111,820

The value of the kran has varied (since 1900) from 18 to 70 krans to £1 sterling; in 1922–23 the exchange value was about 4¼*d.*

In 1921–22 the leading imports into Persia were cotton fabrics, sugar, iron and steel goods and tea; the principal exports were heavy oils, benzine, petrol and fruits.

CAPITAL, Tehran (pop. 210,000); other large towns are Tabriz (180,000), Ispahan (80,000), Meshed (80,000), Kerman (50,000), Yezd (60,000), and Shiraz (60,000).

FLAG: White, bordered with green (top) and red (bottom), with arms (lion and sun) in centre.

Peru is a maritime Republic of South America, situated between 1° 31′ 29″ and 19° 13′ S. latitude and between 69° and 81° 19′ W. The territory between 17° 47′ S. and 19° 13′ S. is occupied by Chile, as the result of the Pacific War of 1879–1882; in 1922 this "Tacna-Arica" question was submitted to arbitration by treaty between Peru-Chile and the arbitration is still in progress. The area of the Republic is estimated at 532,000 square miles, and the population (1921) at 5,550,000. It is bounded on the north by the republics of Ecuador and Colombia, as the latter claims a territory in the Amazonian basin; on the east by Brazil and Bolivia, and on the south by Chile and Bolivia.

Peru was conquered in the early 16th century by Francisco Pizarro (born 1478, died 1541), who subjugated the Incas (a tribe of the Quichua Indians), who had invaded the country some 500 years earlier, and for nearly three centuries Peru remained under the Spanish rule. A revolutionary war of 1821-1824 established its independence, declared on July 28, 1821. The constitution rests upon the fundamental law of Oct. 18, 1856 (amended Nov. 25, 1860), and is that of a democratic Republic under a newly drawn constitution of 1919. The President is elected for five years by direct vote of the people.

The country is traversed throughout its length by the Andes, running parallel to the Pacific coast, the highest points being *Huascaran* (22,050 feet), *Huandoy* (21,100 feet), *Arequipa* (or Misti) volcano (20,013 feet), *Hualcan* (20,000 feet), and *Lirima*, *Tocora*, and *Sarasara*, all over 19,000 feet. There are four distinct regions, the *costa*, west of the Andes, the *sierra* or western slopes of the Andes, the *punas* or mountainous wastes below the region of perpetual snow; and the inward slopes (*montaña*) and boundless forests of the Amazonian basin. The coastal area, lying upon and near the Pacific, is not tropical, though close to the equator, being cooled by the Humboldt-Current; its chief products are sugar, cotton, petroleum, wool, hides and skins, and it contains the chief towns and most of the white population. In the barren mountain section are to be found minerals in great richness and variety which await improved transport facilities before their production can be considerably increased; it is inhabited by Indians in a low state of civilization. Upon the eastern slope of the Andes are to be found very large tracts suitable for cultivation and stock raising, at present almost wholly unexplored owing to lack of communication. This part of the country should show most interesting developments in the future. The tropical lowlands lie east of the Andes towards the borders of Brazil, and consist mainly of unexplored or little known country inhabited by Indians in a savage state. There are here dense jungles, of which the principal commercial product is wild rubber. The gold production in 1921 was valued at £326,458, and in 1920 at £265.972. The Lobos and other islands on the Pacific coast provide guano.

The principal imports are coal, cotton, woollen, linen and silk goods, drugs, earthen and stone wares, machinery, explosives, metals and manufactures thereof, oils, stationery, paper manufactures, timber, and wheat. The chief exports are cane sugar, cotton, petroleum and copper. In Jan.–June, 1923, the U.S.A. sent 36 per cent. of the imports and took 34 per cent. of the exports, while the U.K. sent 22·5 per cent. and took 19 per cent.

The total length of the railways open (1920) was about 1,984 miles; in 1923 about 200 miles of new lines were under construction. There is also steam navigation on Lake Titicaca and the River Desaguadero. The eastern rivers are also navigated to some extent by steam craft. Wireless telegraphy stations have been established in many places.

Defence.—The Army is recruited by voluntary enlistment, supplemented by conscription, and numbers about 5,000 of all ranks; the Navy includes two cruisers built at Barrow, and a destroyer bought from the French Government, and 2 submarines. There is a military aerodrome at Chorillos (near Lima) and a seaplane station at Ancón.

Language.—Spanish is the official language of the country, but native dialects (of which Quichua is the most important) are spoken by a considerable portion of the Indian population.

The Republic of Poland was proclaimed at Warsaw in November, 1918, and under the *Treaty of Versailles* (June 28, 1919) the assentors to the Covenant of the League of Nations, and the signatories of the Treaty of Peace, guarantee the independence of the Republic. which is reconstituted within the limits of the 18th-century "Polish Commonwealth." This state extended in the year 1772 over an area of 740,000 sq. kilometres, and included a population of about 13,000,000. The political neighbours of the Republic are the Baltic Sea, the German Republic (Prussian Königsberg District), and the Republic of Lithuania, in the N.; the Republic of Czecho-Slovakia in the S.; the Kingdom of Rumania in the S.E.; Soviet Russia in the E.; and Germany in the W. The present area of the Republic may be estimated at 386,273 sq. kilometres, with a population, at the 1921 census, of 27,160,000 (of whom 18,660,000 are Poles, and 8,500,000 other nationalities). The predominant religion of the people is Roman Catholic, but all faiths enjoy equality, and there are a considerable number of Protestants and a very large number of Jews.

In 1919 hostilities broke out between Poland and Soviet Russia, and after initial successes the "Red" armies of Bolshevik Russia appeared (in August, 1920) likely to deal a crushing blow at Polish independence, the capital (Warsaw) being in peril of capture. A dramatic counter-attack by the Polish troops at the critical period reversed the nature of the campaign. Poland was enabled to conclude peace on favourable terms, and claimed the renunciation by the Soviet at Moscow of about 110,000 sq. kilometres, containing a population of about 3,610,000 (1,048,000 Poles).

---

* Peruvian £100 = (Sept. 1922) £100.

GOVERNMENT.—A Republican form of government was adopted by the Constituent Assembly in 1921, the Chief of State exercising the executive authority through a Ministry responsible to the Legislature. The Legislature consists of a Diet (*Sejm*) elected by universal adult (male and female) suffrage, and of a Senate elected by adult (male and female) suffrage of those over 30 years of age. The Constitution voted on March 17, 1921, is very Liberal.

PRODUCTION.—Mining, cotton, metal work, agriculture, forestry and stock raising are the principal industries, the chief crops being rye, wheat, oats, barley, potatoes, and sugar-beet; the live stock includes cattle, horses, sheep, and pigs. There are valuable coal mines in Upper Silesia, Congress Poland, and Little Poland (Galicia); zinc, lead ore, mineral and potassium salts, and in Galicia (Boryslaw) are famous oil fields; the output of crude oil (1919) was 831,700 tons; (1920) 765,020 tons; (1921) 704,870 tons. The chief manufactures are textiles, those of minor importance being machinery and metal works, chemicals, and leather. The exports in former years were principally agricultural produce and textiles, the imports being raw wool, cotton and jute, woollen and cotton goods, and machinery.

DEFENCE.—The peace effective of the army is 17,000 officers and 250,000 other ranks. A small navy, for coastal defence, is being organized.

EDUCATION.—Education is compulsory and free, and there is considerable voluntary effort in addition to the work of the State. Secondary education is conducted on a high level, with good attendances, and there are universities at Cracow (founded 1364), Warsaw, Lwow, Poznan, Lublin, and Wilno; Polytechnics at Warsaw and Lwow, and an Academy of Science at Cracow.

COMMUNICATIONS.—There are about 10,000 miles of railway and over 25,000 miles of telegraph line, with well-developed telephone systems in all the large centres. Over 4,000 miles of navigable waterways exist on the Vistula, Narew, Bug, Warta, and Pilica, of which about 1,100 are navigable by steamers. The free city of Danzig is within the Polish Customs area, free transit for Germany being guaranteed.

FINANCE.—The revenue for 1922 was estimated at 458,620,000,000, and the expenditure at 591,634,000,000, shewing a deficit of nearly 133 milliards of Polish marks, which will be partly met by a loan and partly by credit operations. In accordance with laws of Feb. 28, 1919, and Sept. 26, 1922, a new currency (*Zloty*) is being considered, the *Zloty* being of the value of one 3100th of a kilogram of gold.

CAPITAL, WARSAW, on the Vistula (which is spanned by four magnificent bridges) contains many fine buildings; population 1921, 931,176. Other large towns are Lodz (451,000), the centre of the textile industry; Lwow or Lemberg (219,000); Posen, on the Warta (170,000); Cracow, on the Vistula (182,000); Vilna (129,000); Bialistok (77,000) and Sosnowice (86,700).

Commercial Counsellor and Consul-General (*London*), Senhor O. G. Potier, 12, Taviton St., Gordon Square, W.C. 1.
Vice-Consul (*London*), Maj. M. C. V. Hurst, 11 Portland Place, W. 1.

Portugal lies in 37°—42° 8′ N. lat. and 6° 15′—9° 30′ W. long., being 360 miles in length from N. to S., and averaging about 100 in breadth from E. to W. Continental Portugal contains an area of 35,500 square miles, with a population in 1920 of 6,399,355, and the Portuguese Colonies a total area of 804,841 square miles, with a population estimated at 9,675,000. The Azores and Madeira are regarded, not as colonies, but as a part of continental Portugal. The chief products are wheat, barley, oats, maize, flax, hemp, and the vine in elevated tracts; in the lowlands, rice, olives, oranges, lemons, citrons, figs, and almonds. There are extensive forests of oak, chestnut, sea-pine, and cork, the cultivation of the vine and the olive being among the chief branches of industry; the rich red wine known to us as "port" is shipped from Oporto. Its mineral products are important—copper, lead, tin, antimony, coal, manganese, iron, slate, and bay-salt, which last, from its hardness and purity, is in demand. Its manufactures consist of gloves, silk, woollen, linen and cotton fabrics, metal and earthenwar goods, tobacco, cigars, &c. The exports consist to the extent of 50 per cent. of wine, which is the chief industrial product of the country; others are cork, cattle, copper-ore, fruits, oil, sardines, and salt. The imports are manufactured goods—hardware, cotton and woollen stuffs, machinery, wheat, sugar, dried fish, coal, &c. The commercial marine (1917) numbered 104 steam and 102 sailing vessels, with a tonnage of 122,726. In 1918, 5,566 vessels, of 3,284,995 tons, entered the ports of the Republic. Railways 1,827 miles in extent were open for traffic in 1917, and there were 5,351 miles of telegraph line in 1917. For many years the national income was considerably less than the expenditure; this deficiency has added to the national debt.

Defence.—Service in the militia is universal and compulsory. The peace effective is about 32,000. War strength, about 150,000. The Navy consists of 1 coast-defence ship, 4 protected cruisers, some old pattern gunboats, 4 destroyers, and 3 submarines and 4 gunboats, acquired in England (1920), and 6 ex-Austrian destroyers, manned by about 4,898 sailors.

Education is free and nominally compulsory between the ages of 7 and 15, but is not strictly enforced, and over 75 per cent. of the population above 7 years old are illiterate. Secondary education is conducted in State lyceums. There are also military, naval and other special schools. The University of Coimbra (founded A.D. 1291) had 1,100 matriculated students in 1910.

	1922–3.
Revenue (estimate)	*$279,287,855
Expenditure (estimate)	572,478,835

Lisbon, distance 1,110 miles; transit, 50 hours.

PORTUGUESE COLONIES.

PORTUGUESE INDIA has a total area of 1,470 square miles, with a population of 605,000, and includes Goa, Damaun, and Diu. Revenue, 1909–10, £223,000; imports, £1,316,000; exports, £220,000.

MACAO, in China, on the Canton River, has an area of 3 square miles and a population of 80,000. Revenue, 1920–21, $2,631,981.

PORTUGUESE TIMOR (the northern portion of the island), in the Malay Archipelago, has an area of 7,450 square miles, with a population of 300,000. Revenue, 1920–21, $803,859; expenditure, $803,859.

CAPE VERDE ISLANDS, off the west coast of Africa, have an area of 1,475 square miles and a population of 150,000. Revenue, 1919–20, $2,783,196.

PORTUGUESE GUINEA, on the west coast of Africa, has an area of 14,000 square miles and a population of 400,000. Revenue, 1921–22, $3,692,000; expenditure, $2,939,846.

SAO THOME and PRINCIPE ISLANDS, in the Gulf of Guinea (area 442 square miles, population 45,000). Revenue, 1920–21, $1,586,597; expenditure, $1,373,660.

PORTUGUESE WEST AFRICA (Angola and Kabinda) has a total area of 480,000 square miles, with a population of 5,000,000. Revenue, 1921–22, $22,507,000; expenditure, $22,507,000.

PORTUGUESE EAST AFRICA (Delagoa Bay, Gazaland, Inhambane, Mozambique, Nyasa, Quilimane, and Tete) has a total area of 300,000 square miles, with a population of 3,200,000. Revenue, 1921–22, $13,749,636; expenditure, $13,749,636; total trade, 1917–8, (imports and exports), £8,600,000. A scheme for a trans-continental railway from *Benguella* (Lobito Bay) in Angola, traversing the Katanga mineral district of the Congo and thence running southwards through Rhodesia to Buluwayo and eastwards to Beira is being developed under British, Belgian and Portuguese control.

Rumania is a kingdom of South Eastern Europe in the classical *Dacia* and *Scythia Pontica*, the territory roughly defined by the three great rivers Danube, Theiss, and Dniester, whose central point is the line of the Carpathians. The territory is known as Wallachia, Moldavia, Bessarabia, Bukovina, Transylvania, with parts of the Banat, the Dobrudja, Crizana and Maramuresh. The kingdom has its origin in the union of the Danubian principalities of *Wallachia* and *Moldavia* (and the addition thereto of a strip of Southern *Bessarabia*) under the *Treaty of Paris* (April, 1856). The principalities remained separate entities under the suzerainty of the Turkish Empire until 1859, when Prince Alexander John Cuza was elected Prince of both Principalities, still under the suzerainty of the Porte. Prince Cuza abdicated in 1866 and was succeeded by Prince Charles of Hohenzollern-Sigmaringen, in whose successors the crown is now vested. By the *Treaty of Berlin* (July 13, 1878) a new Principality (consisting of the two above mentioned) was recognised as an independent State, and part of the *Dobruja* (which had been occupied by the Rumanians) was incorporated in the new Principality. On March 27, 1881, the former Principality was recognised by the Great Powers as a Kingdom. Rumania is not a "Balkan" State. She took no part in the military operations of the Balkan League against Turkey in 1912–13. Her unexhausted military power secured for her a readjustment of her south-eastern (Dobruja) frontier in 1913. In the War of 1914–1918, Rumania fought on the side of the Allies from Aug. 27, 1916, and after many vicissitudes (due mainly to the sudden collapse of the Russian Armies in 1917), she emerged in triumph at the cessation of hostilities. Her territories were greatly increased as a result of the War, and the *ante bellum* area of the Kingdom (53,000 sq. miles) was more than doubled by the inclusion within its borders of *Bessarabia*, *Transylvania*, *Bukovina*, and part of the *Banat* of Temesvar. The area of the enlarged Kingdom of Rumania may thus be estimated at 122,282 sq. miles, and the 1914 population of 7,000,000 has has been increased to 17,000,000. The dominating religion is that of the Greek (Orthodox) Church.

GOVERNMENT.—The government is that of a Constitutional Monarchy, the legislative assembly consisting of a Senate (56 members) elected for 8 years, and of a Chamber of Deputies (361 members) elected for 4 years by universal suffrage, provision being made for the proportional representation of minority parties. The executive is entrusted to a council of ministers.

PRODUCTION.—The soil of Walachia, Bessarabia, and Moldavia is among the richest in Europe, and it was stated in August, 1921, that "from a comparative point of view Rumania would probably be one of the first war convalescents to attain complete recovery." The wheat crop for 1922 was 2,504,045 metric tons. The agricultural produce consists of wheat, maize, millet, oats, barley, rye, beans, and peas. Vines and fruits are abundant. The fertile plain of Transylvania yields large crops of maize, wheat, rye, oats, flax, and hemp, and the rich lands of Bessarabia produce wheat, maize, barley, flax, tobacco, water melons, fruit, and grapes. Agriculture and sheep and cattle raising are the principal industries of the kingdom, but the climate of this part of South-Eastern Europe is of the Continental character, with intense winter cold and summer heat, and fierce summer droughts sometimes defeat these principal industries. The forests of the mountainous regions are extensive (11,888,792 acres), and the timber industry is important. The country is rich in minerals, and produces petroleum, salt, coal, lignite, iron, gold, and mica; the workers in the oilfields number about 50,000 and are the largest single unit of workers in any one industry; the production of petroleum was 1,885,225 tons in 1913, 1,168,414 tons in 1921, and 1,368,929 tons in 1922. Manufactures are in their infancy, and the imports are chiefly the manufactured goods of Western Europe; the exports consist principally of wheat, barley, maize, oats, petroleum, timber, cattle, salt and hides. All estates over 100 hectares have been expropriated and divided among the peasants.

DEFENCE.—Service in the *Army* is universal and compulsory. In the War of 1914–1918 over 900,000 all ranks passed into the Armies of Rumania, and of this number over 25 per cent. were killed or returned as "missing." At the resurgence of Nov. 1918, an army of 400,000 was again in the field. This force was the deciding factor in the Rumano-Hungarian question, and it drove the Bolshevik dictator (Bela Kun) into exile from Buda Pest. There is a small *Navy* on the Black Sea (30 vessels) and on the Danube.

EDUCATION is free and nominally compulsory, there being 19,374 schools with 1,612,763 in attendance. Secondary schools are well attended. There are also special schools and

Universities at Bucharest, Jassy, Cluj, and Cernauti. A Government High School of Commerce was opened in 1913.

COMMUNICATIONS.—In 1919 there were about 7,131 miles of railway open for traffic in the whole kingdom; railway communication requires great development in order to cope with the problem of carrying the cereal crops to the shipping ports. There are 19,715 telegraph and telephone offices. The mercantile marine consists of about 120 steamers and 600 sailing vessels. The Black Sea ports are Sulina and Constantza, the latter is linked with the interior by a railway.

		1922-23.

The Union of Socialist Soviet Republics.—The Union covers the greater part of the area of the former Russian Empire, from which the independent states of Finland, Poland, Esthonia, Latvia and Lithuania have also been formed. The greater part of the remaining territory forms the Russian Socialist Federal Soviet Republic, which is in union with other Soviet Republics in Russian territory to form the Russian Union. The total area of the Union is approximately 8,000,000 square miles, with a population (partly enumerated and partly estimated) in 1920, of 136,000,000. Prior to the War of 1914–18 the *Russian Empire* of the Tsar Nicholas II. covered more than 8,500,000 square miles, with a population of about 183,000,000.

The constituent Republics of the Union are:—

Republic.	Sq. miles.	Population.
I. Soviet Russia	7,616,000	100,000,000
II. Ukraine	175,000	26,000,000
III. White Russia	23,000	1,750,000
IV. Transcaucasia	75,000	6,000,000
V. Bokhara	85,000	1,450,000
VI. Khiva	26,000	800,000
	8,000,000	136,000,000

The Union is governed by the All-Russian Congress of *Soviets*, which meets annually and elects a Central Executive Committee (*Tzik*) of 370 members. The *Tzik* meets every three months for fourteen days, and between the sessions the supreme power in the Union is

---

*At par 25·225 *lei* = £1 (for 1922 values see p. 439).

Employed (*a*) on Brit. Commercial Mission, *Moscow*; (*b*) at *Vladivostock*; (*c*) Russian Claims Dept., B. of Trade; (*d*) *Constantinople*; (*e*) Dept. Overseas Trade, *London*.

exercised by an executive committee (*presidium*) of 17 members.

Chairman of Presidium, Kalinin
Secretary, Sapronoff.

Representatives are elected to the All-Russian Congress by indirect choice, each village *Soviet* sending representatives to a *Volost* (group *Soviet*), the *Volosts* to *Uyezd* (larger group) *Soviets*, the *Uyezds* to provincial *Soviets*, and the last-named to the All-Russian Congress. The principal executive departments are the Supreme Revolutionary Tribunal, the Council of Commissars of the People, and the Council of Labour and Defence. Counter-revolutionary tendencies are repressed by the State Political Department, formerly known as the *Tcheka*, but since 1922 as the *G.P.U.* (*Gosudarstvennoe Politicheskoe Upravlenie*).

I. SOVIET RUSSIA.

The Russian Socialist Federal Soviet Republic.

Area and Population.—The R.S.F.S.R. consists of Great, Little, East and West Russia and Siberia, of the associated Labour Communes of Karelia and the German Volga, of the associated autonomous Provinces of Votiak, Ziriansk, Kalmuick, Maruisk, Tchuvash, Kabarda, and Buryat, and of the associated autonomous Republics of the Crimea, Darghistan, Gorsky (Mountain Republic), Bashkir, Tartar, Kirghiz and Turkestan. The total area is approximately 7,727,000 square miles, with a total population of about 102,250,000.

The R.S.F.S.R. arose from a military revolution in the Russian Empire during the Great War of 1914-1918. Involved in the War from Aug. 1, 1914, the forces of the Tsar fought against the Central Powers with varying success. On March 12, 1917, owing to the avowed hostility of the *Duma*, the Tsar Nicholas II abdicated, but the successor nominated by him was not admitted to power, and a provisional government was set up under Prince Lvov. On May 16, 1917, this administration was taken over by a Republican Cabinet under Alexander Kerenski, but Kerenski failed to establish a settled government, and on Nov. 7, 1917, the "Military Revolutionary Committee" of the Petrograd *Soviet* seized the authority of government and transferred it to the All-Russia Congress of *Soviets*. The Tsar Nicholas II, with the Tsaritsa, Tsarevitch Alexis (heir apparent), and the Princesses (and such faithful adherents as remained to them), were arrested by order of the Kerenski Cabinet. They were subsequently captured by the Bolsheviks, and on July 16, 1918, the Tsar and his family and attendants were butchered in cold blood.

For many years prior to the Great War a sullen undercurrent of unrest had been noticeable in the Russian Empire, particularly among the University students and the educated classes. The movement spread rapidly among the workers and peasants from about the year 1860, and was secretly organised in 1869 as the "Society for the Liberation of the People." The reforms originally demanded were neither antidynastic nor revolutionary, but impatient extremists endeavoured to hasten reform by violent means, and resorted to terrorism and assassination to achieve their aim, which was criticised as a desire to reduce rule to anarchy, and to substitute for existing authority "nothing," as expressed in their nickname. This *Nihilism* was kept in check by a large force of Secret Police, whose methods were generally arbitrary and frequently inhuman, arrest on suspicion of membership of a secret society, or of sympathy with Nihilism, being followed by banishment for life or by penal servitude in the mines of Siberia. The opposing theories of government at the time of the revolution of 1917 were known as "Maximalist" and "Minimalist" rule, the *Soviets* claiming to represent the Maximalists or largest class, the Republican Cabinet being accused of representing only the *bourgeoisie*, or smallest (Minimalist) class. The Maximalists or *Bolsheviks* (Bolsheviki = majority or "the masses") professed to act in the name not only of the people of Russia, but in harmony with a projected "Federation of the Proletariates of the World."[*] The military revolution of 1917 was accompanied by a *débacle* in the field, and many of the soldiers abandoned their arms and returned to their homes, while the armies of the Central Powers advanced victoriously into Russian territory, and after granting an armistice they imposed on the *Soviet* government the crushing conditions of the *Treaty of Brest Litovsk* (March 2, 1918), which remained effective until the military strength of Germany and Austria was broken by the Allies. The Bolshevik *régime* had been fostered by the Central Powers and was opposed by the Allies, who sent such naval and military help as could be afforded to various bodies who were stemming the tide of Bolshevism in Siberia (Admiral Koltchak), South Russia (Denikin), and North Russia (Tchaikovski), mainly with a view to create a diversion on the eastern German-Austrian front, and in response to a declaration of war by the *Soviets* against governments which were held by them to be representative of Minimalist rule and of the *bourgeoisie* they had pledged themselves to eradicate. But the victorious close of the European War caused a growing reluctance among the Allied Nations for further military adventures, and the reinforcements sent in 1918 were withdrawn during the autumn and winter of 1919 from Archangel and Murmansk in the North, from Odessa in the South, and from Vladivostok in Siberia. The withdrawal preceded a collapse of the "White" resistance to the "Red" (Bolshevik) armies. In 1920 war broke out between the Republic of Poland and the *Soviet* armies, in conjunction with operations under General Wrangel, the successor of Denikin in the South. After initial successes the Polish armies were driven back and Warsaw appeared to be in imminent danger of capture, when a dramatic recovery saved the Polish capital and brought about negotiations for peace on terms favourable to Poland, under the *Treaty of Riga* (March 19, 1921).

Government.—The *Central Government* of pre-War Russia was an absolute autocracy, the country being regarded as the estate of the autocrat and the public revenue as his private income, from which the expenses of administration were met. Reforms of various kinds were introduced from time to time. The peasants, who constituted 75 per cent. of the inhabitants, were freed from the condition of serfdom in 1861 by the Tsar Alexander II., and land was allotted to them in communal ownership; and in 1906 the Imperial *Duma* (parliament), elected under the tentative constitution, was opened by the Tsar, but it possessed little authority and its recommendations were usually ignored, while it was liable to be dissolved at the will of the Tsar. The government in force at the outbreak of the War in 1914 was "Constitutional" in name alone, as the limits to the power of the ruler were subject to the possibility of an immediate and complete resumption of the former autocracy, at the will of the autocrat. The *Soviet* government, although composed of representatives indirectly elected by the masses, does not appear to be truly representative, as no provision is made for "the opposition" to the executive power, only candidates approved by the *G.P.U.* (or *Tcheka*) having a chance of success at the elections. It also appears that individual liberty is considerably less than in the time of Tsardom, while freedom of speech and the liberty of the Press are definitely denied to the people.

---

[*] Bolshevik propaganda work has been extensively carried on in Europe and the United States, but has gained few adherents in democratic countries. The principal agency for Bolshevik propaganda abroad is the *Rosta* (Russian Telegraph Agency), which has at its disposal considerable sums derived from the "nationalisation" of the banks and commercial houses of the *bourgeoisie*. Personal propaganda is directed by Koppelmann Semenoff. In 1920 the sum of £75,000 was offered by the *Soviet* government as a subsidy to the London Labour organ, *The Daily Herald*, but was refused by the directorate.

Local Government was, and still remains, highly developed. In the rural districts of Imperial Russia there were village councils under the presidency of a *starosta* (mayor), villages being grouped into provinces and thus into governments, with larger elective councils for the administration of local affairs. Combined with this system of village communities was a highly organised system of co-operative trading, the villagers being grouped by voluntary association into districts, usually corresponding with local government areas. The produce of the soil was disposed of in return for manufactures obtained by the Society and distributed at the Co-operative shops. Municipalities were also administered by elective councils under the presidency of a mayor, but in many cases the local authority of such municipalities was overshadowed by the superior authority of the military governor. After the revolution, the village and other communities set up *soviets* of workers and peasants, and the provincial *soviets* send representatives to the All-Russia Congress, municipalities having a double representation from their own *soviet* and from that of the province in which the municipalities are situated.

Education was not widespread in the Tsar's dominions. Primary schools afforded only the most elementary instruction, and the attendance was voluntary, while they were closed in rural districts during the summer months. Secondary schools existed only in the great cities, and the eleven universities had only 40,000 students of both sexes. Fully 90 per cent. of the peasants (*i.e.* 72 per cent. of the people) were illiterate. A rural *starosta* who could neither read nor write was in no way unusual, and accounts were frequently kept for the local branch of the Co-operative Society by the village schoolmistress or by the priest, the *abacus* being employed by the shopkeeper for simple additions of roubles and kopeks by means of movable balls (of different colours) on a wire frame. Under the Bolshevik *régime* popular education is administered by a commissar, in whose charge have been placed all educational institutions and theatres, museums and galleries; the education of the workers in the towns is facilitated by lectures and school teaching, but among the peasants in the rural districts even the inadequate provision formerly made has in most places been discontinued, and future generations of peasants will contain an even larger proportion of illiterates than those of Imperial Russia. In 1922 there were stated to be 5,000,000 pupils in the 55,000 elementary and secondary schools, and about 300,000 in 4,000 advanced and technical schools; while there were (in 1922) two universities in Moscow, and one in each of twenty other large centres. The Orthodox Church was disestablished by the Bolsheviks and all its property confiscated. On Feb. 14, 1918, the *Soviet* government adopted the Gregorian (Western) Calendar.

Finance.—The finances of Soviet Russia have reached a chaotic state from which they are unlikely to recover for many decades. Communism declared war on capital, and capitalists declined to risk money in Russian industrial enterprises, which have been financed by paper money from the government printing presses. These presses also provide payment for the army and the government officials, until the paper *rouble*, which was exchanged at about ten to £1 sterling in 1914 had ceased to possess any real value, after reaching grotesque quotations of four millions to the gold *rouble* and 40 millions to £1 sterling. Before the War the annual revenue of the Empire was about 3,500,000,000 *roubles* (at the 1914 rate of exchange 9·458 *roubles* = £1 sterling). The estimates of *Soviet* Russia for 1918–1921 are as under *in paper roubles*:—

	Revenue.	Expenditure.
1918	15,800,000,000	46,700,000,000
1919	50,600,000,000	125,800,000,000
1920	150,000,000,000	1,150,000,000,000
1921	4,139,900,000,000	26,000,000,000,000

Debt.—The outstanding Foreign Debt of Russia on Jan. 1, 1917 (before the Revolution), with the annual charge for Interest, may be stated as under:—

	Debt.	Interest.
To Great Britain..	£629,674.406	£34,000,000
To France.........	*Francs* 3.950,000,000	*Francs* 828,700,000
To U.S.A.	$282,136.011	$10,100,000
To Japan	*Yen* 256,000,000	*Yen* 20,700,000
To Italy..........	*Lira* 36,123,836	....
To Netherlands..	*Guilders* ..	*Guilders* 59,200,000

In Aug. 1914 there was a gold reserve in the State bank to the value of £176,000,000, but this is believed to have been expended by the *Soviet* government, together with all the balances requisitioned from other sources. All internal and external obligations of the State have been repudiated. All banks and financial and trading concerns and shipping enterprises have been declared to be the property of the proletariate, and the balances and credits have been dissipated by theft or neglect. Private ownership of land has been abolished and all real estate has been declared proletariate property.

Defence.—The *Red Army* consisted in 1923 of about 720,000 all ranks, including 37 cavalry brigades of about 3,000 men, and about 30,000 sailors serving on land. The *Red Air Fleet* is reported to consist of about 250 aeroplanes, but it is stated that an organization of 10,000 aeroplanes is aimed at for the year 1924. The *Red Navy* is believed to consist of four capital ships and about thirty destroyers and small fighting craft.

Production and Industry.—All production and industry in *Soviet* Russia has been nationalized.

An exodus of workers to the agricultural districts followed the disorganization of industrial enterprise, and agriculture has also been affected by compulsory requisition of produce from peasant cultivators. In 1921 a new economic policy was inaugurated of leasing industrial establishments to private enterprise and of taxation in lieu of requisition of agricultural produce, but lack of confidence and of capital restricts manufacture, and the peasants appear disinclined to cultivate grain for the purpose of paying taxes. Agriculture outweighs all other industries in importance, the principal crop being rye, the food of the people; wheat, the second largest crop, was formerly exported in great quantities, and owing to the breakdown of the railways of Russia it has been found necessary to export wheat from the south and to import it by sea for other parts; barley, oats, millet and maize are also important food crops, and potatoes are largely grown. About one million tons of sugar were grown in 1923. Among the important industrial crops are flax and hemp and cotton, but the 9,000,000 spindles working in the cotton industry in 1913 have dwindled to half that number, and the output is less than one-sixth of pre-revolution years. The chief mineral output is petroleum, the total in 1922 being nearly 5,000,000 tons; the chief metals produced in 1922 were gold 90,500 oz., and platinum 16,052 oz. The live stock included (1921) 14,000,000 cattle, 18,000,000 sheep, 6,750,000 pigs, and 15,000,000 horses.

External Trade.—In 1914 the Imports into Russia were valued at 1,100,000,000 *roubles*, and the Exports from Russia at 960,000,000 *roubles*, a total trade (at 9·458 *roubles*=£1) of £217,480 000, the chief imports from the United Kingdom being machinery and coal, the exports to the U.K. being principally cereals, timber, eggs and flax. In March, 1921, the Tenth Communist Congress met at Moscow, and Ulianov Lenin is reported to have declared his abandonment of Communism and conversion to the principle of natural economic development under Trade Treaties with Great Britain and such other Powers as can be induced to enter into similar obligations. At the *Genoa Conference* (May, 1922) the *Bolshevik* delegates failed to give assurances as to the attitude of the *Soviet* Government, and negotiations for loans and trade relations were abortive.

In 1921 the total trade of Russia was about one-tenth of that carried on in 1913. Russian imports were derived as to 35 per cent. from Great Britain, 24 per cent. from Germany, 15·8 per cent. from U.S.A., and 10·1 per cent. from Norway and Sweden. The exports were sent as to 47·9 per cent. to Great Britain, 22·7 per cent. to Latvia, 12·9 per cent. to Norway, and 5 per cent. to Germany. *Soviet* Russia's amended trade statistics for 1922 show the weight of imports at 165,790,000 poods, against 56,110,000 poods in 1921, and exports of 56,340,000 poods, against 12,960,000 poods. Of the imports, 39,170,000 poods were relief goods, against 3,130,000 poods in 1921. The largest imports were from Great Britain, with 41,080,000 poods, the United States 23,130,000 poods, Finland 14,290,000 poods, and Germany 14,060,000 poods. As buyers from Russia Great Britain led with 22,440,000 poods, Germany 8,350,000 poods, Finland 5,560,000 poods, and Latvia 5,420,000 poods. Germany's real share in both directions is greater than the figures show, as part of her trade with Russia is booked to the transit countries.

	1921.	1922.
Imports from U.K.	£2,181,000	£3,679,000
Exports to U.K.	2,695,000	8,176,000

Communications.—There were (1922) 42,504 miles of railway in use, and (in 1913) 15,261 post offices carrying 2,663,900,000 letters, &c., and 476,177 miles of telegraph wire. Under *Soviet* administration the financial deficit on the working of the railways has increased in proportion as transport conditions have deteriorated. In 1918 the deficit was 6,000,000,000 *roubles*, in 1919 more than twice that amount, and in 1920 it was 51,000,000,000 *roubles*. The principal railway lines are the main *European* network from Petrograd, through Moscow to Astrakhan and across the Urals *viâ* Perm, Ufa, Samara and Saratov, with northern extensions to the Kola Peninsula and to Archangel and running southwards to the Baltic, the Crimea and the Caucasus; the *Trans-Siberian Line* from Chelyabinsk, on the Ural frontier, to Omsk, and round Lake Baikal to Chita and Stryetensk. From Chita the line crosses the Manchurian frontier (as the Eastern China Railway) to Harbin and Vladivostok, where a northward extension runs to Khabarovka. The projected *Amur Railway*, if completed, will connect Stryetensk with Khabarovka, and the Trans-Siberian line will thus connect the western and eastern limits of Russia on Russian territory. The *Trans-Caspian Railway* runs from Krasnovodsk (opposite Baku) to Askabad, Merv, Bokhara, Samarkand, Khokand and Andijan, with a 200-mile branch from Merv to Kushk (near Herat) on the Afghanistan border. The *Orenburg-Tashkent Line*, from the European boundary, across the Kirghiz Steppe to Kazalinsk, Perovsk and Tashkent, whence a short line connects with the Trans-Caspian system. The *Trans-Caucasian Line* runs through Georgia, Azerbaijan and Armenia, from Batum and Poti, on the Black Sea, *viâ* Tiflis, to Baku, on the Caspian, where it is met by the European system of Rostov on the Don. From Tiflis branches run to Kars, and *viâ* Erivan to Mount Ararat on the Armenian frontier, and to the Persian frontier at Julfa. There are in *European Russia* about 150,000 miles of navigable rivers and canals and lakes, of which total about one-fourth of the distance is navigable by steam vessels, a further eighth by sailing vessels, and nearly one-third by rafts. In Asiatic Russia there are 85,000 miles of waterway, of which 20,000 miles are navigable. Some 175,000 persons were engaged in the traffic (1910), the vessels numbering (in 1910) 4,000 steamers and 23,000 sailing vessels. In 1906 the ships and rafts carried over 400,000,000 tons of goods. The principal seaports are Petrograd and Kronstadt on the Gulf of Finland, Sevastopol (Black Sea), Archangel on the White Sea, and Ekaterinsk in the Kola River (Murmansk), Vladivostok (Sea of Japan), and Petropaulovsk in Kamtchatka.

Capital.—On March 14, 1918, the seat of Government was transferred from Petrograd to MOSCOW, which had a population in 1922 of about 1,200,000. PETROGRAD (before the War "St. Petersburg") the former Capital, founded by Peter the Great on the banks of the Neva in 1721, had a population in 1922 of about 1,750,000. Other centres are Saratov (240,000), Rostov (200,000), Astrakhan (200,000), Ivanovno-Voznesensk (170,000), Samara (150,000), Orenburg (150,000), Tula (135,000), Yaroslavl (130,000), Irkutsch (130,000), Nijni-Novgorod (120,000), Vitebsk (100,000), Gomel (100,000), Ufa (100,000), Perm (100,000), Vladivostok (100,000), Tsaritsin (100,000), and Chita (80,000). Archangel had about 45,000 inhabitants in 1914.

II.—THE UKRAINE.

(Ukraina.)

President of the Soviet of People's Commissars and Commissar for Foreign Affairs, C. T. Rakovsky.

On Nov. 21, 1917, the greater part of "Little Russia," consisting of the former governments of Chernigov, Kharkov, Kieff, and Poltava (with Ekaterinoslav and Kherson in "South Russia," and Podolia and Volkynia in "West Russia"), was encouraged by Germany to declare itself independent as the *Republic of the Ukraine*. The new Republic was despoiled by Germany in 1917–18, and subsequently overrun by Bolshevik forces, and a military and economic alliance was concluded between *Soviet* Russia and the *Ukraine Socialist Soviet Republic* (Dec. 28, 1920). The total area of the Republic is about 174,000 sq. miles, with a population of about 30,000,000. The chief town and seat of government is Kharkoff (pop. 1914, 260,000), other large centres being Odessa, the great port on the Black Sea (with a population in 1914 of 650,000), Kieff (pop. 1914, 600,000), Ekaterinoslav (pop. 1914, 180,000), Nikolayev (100,000), Kremenchug (100,000), Poltava (85,000), Elisabetgrad (80,000), and Vinnitza (50,000). The Ukraine is the great wheat-growing district of Russia, and contains large deposits of iron ore and coal. Agriculture is the principal industry, and there are large iron and steel works. Before the War of 1914–8 the exports from the Ukraine (wheat, sugar, hides, bristles and wool) were of the annual value of about £75,000,000, and the imports (manufactured goods and machinery) about £50,000,000.

CAPITAL, Kharkoff. Population (1914), 260,000.

III.—WHITE RUSSIA.

President of the Soviet of People's Commissars and Commissar for Foreign Affairs, M. Tchervyakof.

The independence of White Russia was recognised by *Soviet* Russia in 1919, and a military and economic alliance was concluded Jan. 16, 1921. The independent republic covers the former government of Minsk and parts of Vitebsk and Moghilef, and its area may be estimated at 55,000 sq. miles, with a population of about 6,000,000. The political neighbours are Lithuania and Poland, on the west, and the Ukraine, on the south. The capital is Minsk (pop. 120,000). Although bound by treaty to *Soviet* Russia, there is a political tendency towards the Baltic States, and fusion with these is a possible result of the movement.

CAPITAL, Minsk. Population, 120,000.

IV.—TRANS-CAUCASIA.

Armenia, or Hyastan.

President of the Armenian Soviet Republic, M. Myasnikov.

Foreign Affairs Commissar, M. Mravyan.

Armenian Representative in London, Maj.-Gen. Bagratuni.

Armenia occupies the uplands between the Iranian plateau and Asia Minor, and is bounded by the Black Sea on the N., by Kurdistan on the S., by Azerbaijan on the E., and by Turkish Asia Minor on the W., and until the outbreak of the War of 1914–18 it was shared between Turkey (35,600 sq. miles), Russia (20,587 sq. miles), and Persia (6,518 sq. miles). The rivers Euphrates, Tigris, Aras, Kur, and Tchorokh take their rise within its boundaries, and at the meeting of the former Turkish, Persian, and Russian boundaries is *Mount Ararat* (17,160 feet), the traditional resting place of "Noah's Ark." In the uplands the climate is severe, but in the valleys and plains the soil is fertile, producing all kinds of cereals, cotton, rice, sesame, hemp, flax, and tobacco. Sericulture (silkworm breeding), sheep-breeding, and fruit growing are capable of great development. Armenia has great mineral resources hardly as yet developed. Naphtha, sulphur, bitumen, and nitre abound, while the mountains yield salt (mineral and in solution), gold, silver, copper, lead, iron and valuable marbles; there are also numerous hot and cold mineral springs (similar in nature to those of Vichy). The Armenian Church is the oldest established Christian church, Christianity having been recognised as the State religion in 300, and from the 5th century there is a national language and literature. On account of their religion the Armenians have suffered a general persecution by Islam, particularly in the *vilayet* of Sivas, Bitlis, Diarbekir, Mamuret-el-Aziz, Van, and Erzerum, where massacres have frequently been organised with a view to extermination. In 1915–17 there were wholesale deportations and massacres of the Christian population of Turkish Armenia, while the Armenian Christians of Azerbaijan and of Russian Armenia were similarly treated by Turkish and Kurdish hordes. In 1918 the Supreme Council of the Allied Powers recognised the independence of the *Republic of Armenia* (area, 20,587 sq. miles, population 1,250,000). Under the Treaty of Peace with the Allies (May 11, 1920), Turkey recognised the independence of Armenia, with its capital at Erivan. In 1920 a Bolshevik movement set up the *Armenian Socialist Soviet Republic*, on the lines of the Moscow government.

CAPITAL, Erivan. Population (estimated), 90,000.

Georgia, or Sakartvélo.

President of the Council of People's Commissars, M. Divani.

Commissar for Foreign Affairs, M. Svanidze.

Chargé d'Affaires of the National Georgian Government (exiled by Soviet invaders), M. Soumbasoff, 58 Redcliffe Square, S.W. 10.

A former Kingdom in Transcaucasia, with a history of more than 2,000 years as a State, was annexed by Russia in 1801 in violation of the Treaty of Alliance of 1783. At the beginning of 1918 it regained its independence. The *Georgian Socialist Soviet Republic* comprises the former governments of Tiflis and Kutais, the districts of Zakathali, Sodchi, Sukhum and Batum; the total area (excluding the Province of Lazistan, now Turkish, and claimed by Georgia ethnographically), is about 45,000 sq. miles with a population (1915) of 3,175,156. The Republic is bounded on the N. by the Caucasian Mountains, on the S. by Armenia, on the E. by the Republic of Azerbaijan, and on the W. by the Black Sea. It includes the important Black Sea ports of

Batum (pop. 50,000) and Poti (pop. 30,731). Other large towns are Tiflis, the capital (pop. 1914, 356,000), Kutais (pop. 85,151), Sukhum (pop. 61,974), Tchiaturi, the centre of the manganese industry, (pop. 25,675), Dusheti and Signagi. The Railway system of Georgia extends to 970 miles. The trunk line 556 miles long, connects the Black Sea ports of Pito and Batum with Baku on the Caspian Sea. Batum and Baku are also connected by a petroleum pipe line. The Republic is very rich in mineral resources such as manganese, iron, copper, silver-lead, petroleum, coal, &c. It has over 500 mineral springs, partly unexploited, among them many containing sulphur and radium. Its agricultural resources are also very considerable.

	Roubles.
Revenue, 1919-20	797,401,000
Expenditure, 1919-20	731,933,000
Imports, 1918	141,000,000
Exports, 1918	153,000,000

CAPITAL, Tiflis. Population (1914), 356,000.

British High Commissioner at Tiflis, Commander Luke, D.S.O., R.N.

Azerbaijan.

President of the Soviet of People's Commissars, M. Narimanof.

Commissar for Foreign Affairs, M. Gusseynof.

Azerbaijan is a Transcaucasian Republic on the south-western shore of the Caspian Sea, extending from the Caucasus in the north to Persia in the south and from the Caspian on the east to Armenia and Georgia. The former Russian governments of Baku and Elisavetpol and part of the Erivan government are now included in the Republic. The Republic is in alliance with *Soviet* Russia against their "common enemy, the imperialistic *bourgeoisie*." The area is about 50,000 sq. miles, with a population estimated at 4 to 5 millions, of whom over 75 per cent. are Muhammadans.

The Capital is Baku (pop. 250,000) on the shore of the Caspian Sea, the centre of the petroleum industry. Baku is connected by railway with Batum (Georgia) on the Black Sea, via Tiflis, and with Moscow, via Rostov. Other towns are Elisabetpol (65,000), Derbent (35,000), Kuba and Shemakha. CAPITAL, Baku.

V.—BOKHARA.

President of the Council of the Soviet of Nazars and Nazar for Foreign Trade, Khodjayef Feyzulla.

Bokhara is a Central Asian Republic with an estimated area of 85,000 square miles, and a population of 1,450,000, the majority being Muhammadan Uzbegs. The capital (Bokhara) is a station on the Russian Trans-Caspian Railway, and has a population of about 75,000. The principal products are rice, wheat, fruit, hemp, cotton, and silk. Exports (mainly to Russia) are agricultural products and silk and cotton manufactures; imports are principally manufactured goods and sugar. The Emirate was abolished in 1920 and the Emir fled to Afghanistan. A *Soviet* Republic of Bokhara was established and its independence was recognised, by *Soviet* Russia by Treaty of March 4, 1921. CAPITAL, Bokhara.

VI.—KHIVA

(Khorezm.)

The *National Soviet Republic of Khorezm*, formerly the Khanate of Khiva, lies between Bokhara, Turkestan and the Kirghiz Province, and has a total area of about 26,000 square miles, with a population of 800,000, of whom about half are nomads. The country occupies the fertile delta of the Oxus and is highly productive. The capital (Khiva) has about 10,000 inhabitants. The independence of the Republic has been recognised by treaty with *Soviet* Russia (Sept. 30, 1920). CAPITAL, Khiva.

SARRE TERRITORY.

Under the *Treaty of Versailles* Germany renounced the government of the Sarre Basin in favour of the League of Nations, the government being entrusted to a commission of 5 members nominated for one year by the League. At the expiration of 15 years from Jan. 10, 1920, the population will be called upon to decide by a plebiscite the government under which they wish to be placed. The total area is about 743 square miles, with a population of about 713,000. The chief towns are Sarrebruck (117,000), Neunkirchen (35,000) and Saint Ingbert (18,000).

SALVADOR.

República del Salvador.

President (1923-1927), Señor Dr. Don Alfonso Quinonez Molina, *assumed office* March 1, 1923.

Vice-President, Señor Dr. Don Pio Romero Bosque.

Foreign Affairs, Education and Justice, Señor Dr. Don Reyes Arrieta Rossi.

Interior and Public Works, Señor Dr. Don Rodolfo Schonenberg.

Finance, Señor Dr. Don Gustavo Vides.

War and Marine, Señor Dr. Don Pio Romero Bosque.

Envoy Extraordinary and Minister Plenipotentiary to Gt. Britain, Señor Dr. Don Arturo Arguello-Loucel (*resident in Brussels*).

Sec. of Legation and Consul-General in London, Señor Dr. Don Pio Romero Bosque, Junior, 7 Union Court, Old Broad Street, E.C. 2.

The Republic of Salvador extends along the Pacific coast of Central America for 170 miles, with a general breadth of 43 miles, and contains an estimated area of 7,225 square miles, with a population estimated at 1,525,926. It is divided into 14 departments. In 1921 there were 55,539 births (37 per 1,000) and 30,613 deaths (20 per 1,000), 10 per cent. of the deaths being due to malaria.

Salvador was conquered in 1526 by Pedro de Alvarado, and formed part of the Spanish viceroyalty of Guatemala until 1821. In 1840 the Republic broke away from the federation of Central American States. The constitution rests upon the fundamental law of 1864 (revised in 1886), the President and Vice-President being elected for four years by direct vote of the people, the President being ineligible for a successive term in either office.

There are distinct areas in the low alluvial plains of the coast and the interior plateau, with a mean elevation of about 2,300 feet, broken in many places by volcanic cones, of which the highest are Santo Ana (8,300 feet) and San Miguel (7,120 feet). The lowlands are generally hot and unhealthy. There is a wet season (winter) from

May to October, and a dry season (summer) from November to April. Earthquakes are frequent, and on June 8, 1917, a series of seven shocks nearly destroyed the capital, and ruined the towns of Santa Tecla, Armenia, and Apopa. The volcano on Mount Salvador was actually in eruption in Oct. 1917, and a severe earthquake was experienced on April 28, 1919, doing great damage to the capital.

The principal river is the Rio Lempa, which rises in Guatemala and flows into the Pacific, with tributaries in the Santa Ana, Asalguate, Sumpul and Torola, the Lempa being navigable for most of its course by small steamers. In the eastern districts the Rio San Miguel rises near the Honduras boundary and flows into the Bay of Fonseca. The western boundary crosses the Laguna de Guija, the greater part of which lies within the borders of Salvador, and in the centre of the Republic is the large volcanic lake Ilopango, with a smaller lake, Coatepeque, further west.

The chief industry is the cultivation of coffee; sugar is also grown, as well as indigo, rice, balsam, &c. The principal exports are coffee (80 per cent. of total value), indigo, tobacco, sugar, gold and indigo. The chief imports are textiles, hardware and machinery, chemicals and drugs. About 69 per cent. of the imports are from the U.S. and 15 per cent. from the U.K.

The total length of the railways is 262 miles; a British railway nearly 100 miles in length connects Acajutla with the capital and Santa Ana, the coffee centre and a line from the port of La Union to the capital was opened in 1922. The principal ports are Acajutla, La Libertad and La Union.

There are 120 post-offices and 234 telegraph offices, with 2,400 miles of wire.

The language of the country is Spanish.

	1919-20.	1920-21.

CAPITAL, San Salvador. Pop. *circ.* 80,000. Other towns are Santa Ana (70,000), San Miguel (40,000), San Vicente (30,000), Nueva San Salvador (26,000).

FLAG: Three horizontal bands, light blue, white, light blue.

BRITISH LEGATION.

British Minister (Guatemala),

BRITISH CONSULAR OFFICES.

San Salvador—Consul and Chargé d'Affaires, J. Douglas Scott.

" *Vice-Consul*, W. Gibson.

Acajutla—Vice-Consul, Thomas Massey.

Salvador is 5,700 miles from London; transit (passenger), *viâ* New York and thence every 3 weeks by direct steamer to La Libertad; or *viâ* New Orleans and thence every week by direct steamer to Puerto Barrios (Guatemala); time 3 to 5 weeks.

SAN DOMINGO. *See* Dominican Republic.

SAN MARINO.

Regents, Two "Capitani Reggenti."

Consul-General for San Marino in Great Britain, Commendatore Melvill A. Jamieson, F.R.G.S., 17 Cockspur Street, S.W. 1.

A small Republic in the hills near Rimini, on the Adriatic, founded, it is stated, by a pious mason of Dalmatia in the 4th century, and governed by a Council of 60, of whom two are elected as Regents for six months (1 April and 1 October), being thereafter ineligible for office for three years. The area is 38 square miles, the population 12,036. There is an army of about 1,000. The city of San Marino (pop. 2,000) occupies the slope of Mount Titano, and has an impregnable castle, where King Berengar of Lombardy took refuge in 950 A.D., a fine church and Government palace, and a theatre. The principal industries are wine, cereals, cheese, oil and cattle raising, in addition to the utilization and export of gravel from Mount Titano and production of white and hydraulic lime at Serravalle. A Treaty of Extradition was concluded between the Governments of Great Britain and the Republic of San Marino on 16th Oct., 1899.

FLAG: Two horizontal bands, white, blue (with coat of arms of the Republic in centre).

British Consul-General, E. Mervyn de Garston (Leghorn, Italy).

SERBIA. *See* Yugo-Slavia.

SIAM.

(Muang T'ai.)

King, Rama VI., G.C.B., G.C.S.I., G.C.V.O., *born* January 1, 1880; *succeeded* October 23, 1910.

Foreign Minister, H.H. Prince Traidos (*acting*).

Envoy Extraordinary & Minister Plenipotentiary, in London, Phya Prabha Karavong, 23 Ashburn Place, S.W. 7.

Consul-General (Vacant: *Temporary Offices*, 23 Ashburn Place, S.W. 7).

The Kingdom of Siam, or Muang T'ai (area about 195,000 square miles; population, 1922, 9,225,000), is a buffer State between British Burma and French Indo-China, and its integrity is guaranteed by the British and French Governments by the Anglo-French Agreement of April, 1904. The King is an absolute monarch, and appoints his successor. There is an Executive Council of Ministers with an adviser in Foreign affairs (usually of American nationality), and a Financial adviser (hitherto always of British nationality) and, since 1895, a Legislative Council of State, consisting of the Ministers, eight royal princes, and over twenty members appointed by the King, who has an absolute power of veto. A number of English, French, Italians, Danes, and Americans are employed in the various State departments. There is an army of nearly 50,000 men, and a few small gunboats; compulsory military service has been introduced. The Kingdom contains many Chinese (largely engaged in trade and industry), besides Shans, Laos, Malays, Burmese, and Cambodians, and over 1,600 Europeans. The principal religion is Buddhism. Education is now under the Minister of Public Instruction. There are 394 public schools and 4,237 schools of all kinds, attended by 122,800 children. A University is in process of organisation.

The upper part of Siam is mountainous, the lower flat. Bangkok is the only much-frequented port. Over two-thirds of Siamese sea-borne trade, which centres at Bangkok, is with the British Empire, and is largely in the hands of British firms or of Chinese trading from Singapore and Hong Kong. German shipping, which had held the lead in tonnage for many years past, has ceased to visit Bangkok since August, 1914, and, as a consequence, there has been a large increase in Norwegian and British shipping. The chief products of Siam are rice, teak, and tin (from Lower Siam). The area under rice is being much enlarged by irrigation. There is a large number of rice mills, mostly in or near Bangkok. The teak industry in the great forests of N. Siam is mainly in English hands. In 1918–19 rice constituted 81 per cent. and teak 3½ per cent. of the exports from the port of Bangkok; while hides and marine products are also exported in considerable quantities. Among imports are treasure, cotton goods and yarn, silk goods, provisions, gunny bags, kerosene, sugar, opium, metals and metal wares, machinery, &c. The general tariff rate is 3 per cent. *ad valorem.* Burma imports teak and cattle overland from Siam, and exports thither cotton and silk goods, &c. Except tin, wolfram, rubies and sapphires, there are no important mineral products as yet. About 1,200 miles of railroads (mostly State-owned) are now open for traffic. Railways from Bangkok run to Korat (165 miles N.E.), Chiengmai (820 miles N. of Bangkok), Petriu (40 miles E.); the southern line to Trang, on the west coast of the Malay Peninsula, was open to traffic in October, 1916, and in July, 1918, was completed to the Kedah border where junction with the Federated Malay States Railway system was effected. There is through railway connexion between Bangkok and Penang and Singapore, and the railway is being extended from Petrien to the Cambodian frontier. Good roads are few. There are 3,000 miles of telegraph lines.

Military Attaché, Lt.-Col. Don P. Rich.
Naval Attaché, Lieut.-Comm. Señor Don José Iglesias.
Consul-General, Excmo. Señor Don José Congosto, 40 Trinity Square, E.C. 3.
Vice-Cons., Señor Don Pedro Lecuona.

A Kingdom situate in the south-west of Europe, between 36°—43° 45′ N. lat. and 4° 25′ E.—9° 20′ W. long., bounded on the south and east by the Mediterranean, on the west by the Atlantic and Portugal, and on the north by the Bay of Biscay and France, from which it is separated by the Pyrenees; and occupying the larger portion of the great Iberian Peninsula. Its coast-line extends 1,317 miles—712 formed by the Mediterranean and 605 by the Atlantic—and it comprises a total area of 196,700 English square miles, and an estimated population, in Jan. 1923, of 21,658,222—110 to the square mile. The interior of the peninsula consists of an elevated tableland surrounded and traversed by mountain ranges—the Pyrenees, the Cantabrian Mountains, the Sierra Guadarrama, S. Morena, S. Nevada, Montes de Toledo, &c. The principal rivers are the Douro, the Tagus, the Guadiana, the Guadalquiver, the Ebro, and the Minho. The Constitution upon which the present Government is formed is dated 30 June, 1876. Spain is rich in iron, copper, and lead; its mineral resources are only partially exploited, and principally by foreign capital under foreign direction. The country is generally fertile, and well adapted to agriculture and the cultivation of heat-loving fruits—as olives, oranges, lemons, almonds, pomegranates, and dates. The agricultural products comprise wheat, barley, maize, oats, rice, with hemp and flax of the best quality. The vine is cultivated in every province; in the south-west, Jerez, the well-known sherry and tent wines are made; in the south-east, the Malaga and Alicante. The principal articles imported are raw cotton, spirits, fish, wheat and flour, sugar, coal, timber, woollen manufactures, machinery and railway materials, hides, &c. The principal exports are wine, copper and copper ores, lead, iron ores, olive oil, raisins, oranges, cork, esparto grass, wool, salt, quicksilver, grapes, &c. Trade was for many years mostly confined to France and Great Britain, but Germany had, before the war, become a serious competitor, while the United States and Belgium share an increasing proportion of Spanish trade. Home manufacture is protected by high customs duties.

In 1923 there were about 10,000 miles of railway open, and 69,400 miles of telegraph line.

The sea-going mercantile marine over 50 tons, on Jan. 1, 1921, consisted of 621 steamers (912,817 tons) and 581 sailing vessels (101,285). In 1922, 19,033 vessels of 20,305,998 tons (displacement) entered and 16,741 vessels of 17,405,842 tons (displacement) cleared at Spanish ports.

Defence.—The authorised peace establishment, including forces in North Africa, was, in 1922, 19,827 officers and 217,000 men (275,000 in 1922, owing to the situation in North Africa). War strength: Field Army, first line, 300,000; second line, 450,000.

The Navy consists of 3 (15,700-ton) battleships and 3 modern cruisers, with 1 old battleship and 4 old cruisers; there are also 7 torpedo-boat destroyers, 20 torpedo-boats, 7 submarines, and 21 gunboats.

Education, Primary, is nominally compulsory and mainly free, and is State-aided, the public schools being maintained by local taxation. Many private schools are under clerical control, and supervision is lacking. *Secondary* High Schools are in each province, but the curriculum is defective. *Universities* at Barcelona, Granada, Madrid, Murcia, Oviedo, Salamanca, Santiago, Saragossa, Seville, Valencia, and Valladolid.

---

* Budget for 1923–24 is same as that for previous year.

† At par *Pesetas* 25·225 = £1 (*see* also p. 439).

‡ The figures are official and are based on prices ruling in 1916. In 1920 and 1921 the totals should be twice those given above.

BRITISH CHAMBER OF COMMERCE FOR SPAIN, 8 Rambla de los Estudios, *Barcelona* (Branch, 9 Calle Marqués de Cubas, *Madrid*).

Madrid, 1,150 miles; transit, 45 to 50 hours.

The BALEARIC ISLES are an archipelago of 15 islands in the Mediterranean, the largest being Majorca, Minorca, Iviza, and Formentara; the total area is 1,935 square miles, with a population (1921) of 338,894. The archipelago forms a province of Spain, the capital being Palma in Majorca.

CEUTA, which forms part of the Province of Cadiz, is a fortified post on the Moroccan coast, opposite Gibraltar. The total area is 5 miles, with a population of 35,219.

The CANARY ISLANDS are an archipelago in the Atlantic, off the African coast, consisting of 7 islands and 6 uninhabited islets. The total area is 2,807 square miles, with a population of 473,497. The Canary Islands form a Province of Spain, the capital being Santa Cruz in the island of Teneriffe.

Spanish Colonies.

The Spanish Colonies (exclusive of Ceuta and the Canary Islands, which form an integral part of the kingdom) consist of certain settlements and islands of Western Africa, with a total area of close on 82,400 square miles, and a population exceeding 275,000.

FERNANDO PO (*Fernando Póo*) lies in the Bight of Biafra in 3° 12′ N. lat. and 8° 48′ E. long., about 20 miles distant from the west coast of Africa, and is a mountainous island (Pico de Santa Isabel, 10,800 feet), with forests of oil palm, ebony, mahogany, and oak, and sugar-cane, cotton, and indigo. Cocoa, coffee, sugar, tobacco, vanilla, and kola nut are cultivated, and large quantities of cocoa and other products are exported. Total population 20,650. The capital is Basile, and the largest town Port Clarence (1,500 inhabitants). Dependencies of the island of Fernando Po are:—

Annobon Island (*Anno Bom*), in the Gulf of Guinea, in 1° 24′ S. lat. and 50° 35′ E. long.; population 1,391.

Corisco Islands, consisting of Corisco, Bana, Elobey Grando, and Elobey Chico, lie in Corisco Bay, and export ebony, logwood, and other forest produce. Total population 96,072.

Fernando Po—British Vice-Consul, A. C. Reeve (*acting*).

RIO DE ORO is a possession on the north-west coast of Africa, between Cape Bogador and Cape Blanco, or approximately between 21° 20′–26° N. lat., and extending eastwards to about 13° W. long. The territory is part of the waterless Sahara, with a sparse population of wandering Muhammadan Arabs; population 253.

Rio Muni (or *Spanish Guinea*) is a coastal settlement of West Africa between Cameroon and French Congo (1° N.—2° 10′ N. lat.), extending about 125 miles inland. The inhabitants are Bantu tribes, and the principal settlements are at the mouths of the Muni, Benito, and Campa rivers, and at Bata on the coast.

Spain exercises a protectorate over a part of Northern and of Southern Morocco (*see* pp. 809 10) and on the Moroccan seaboard are certain Spanish *presidios*, formerly used as convict settlements.

Melilla is a town on a rocky promontory of the Riff coast, connected with the mainland by a narrow isthmus. The population is 50,170.

Alhucemas is a settlement on the bay of that name, and includes six islands: population 322.

Peñon de la Gomera (or *Peñon de Velez*) is a fortified rocky islet about 40 miles west of Alhucemas Bay; population 398.

The Chaffarinas (or Zaffarines) are a group of three islands near the Algerian frontier, about 2 miles north of Cape del Agua; population 318.

Ifni, on the Atlantic coast of Morocco, about 100 miles south of Agadir, affords access to the interior of south-west Morocco, but has no great trade at present.

SPITSBERGEN.*

The Spitsbergen ("Pointed Mountain") Archipelago lies between 76° 26′–80° 50′ N. lat. and between 10° 20′–32° 40′ E. long., with an estimated area of 25,000 square miles. The archipelago consists of a main island, known as West Spitsbergen (12,000 sq. miles); North East Land, closely adjoining and separated by Hinlopen Strait; the Wiche Islands, separated from the main land by Olga Strait; Barents and Edge Islands, separated from the main land by Stor Fjord (or Wybe Jansz Water); Prince Charles Foreland, to the W.; Hope Island, to the S.E.; Bear Island (70 square miles) 127 miles to the S.; with many similar islands in the neighbourhood of the main group.

The archipelago is generally mountainous and there are traces of extinct volcanic action. The highest points are Mount Newton (5,676 feet), Mount Poincaré (5,446 feet) in the N.E., and Hornunstind (4,690 feet in the S., of the main island. The coast is deeply indented by fjords, of which the largest are King's Bay, Cross Bay, Ice Fjord, Bell Sound, Lowe Sound, and Horn Sound in the W., and Red Bay, Liefde Bay and Widje Bay in the N.; of these, Ice Fjord from the W. and Widje Bay from the N., the heads of which are only about 10 miles apart, give access to the centre of West Spitsbergen.

The principal minerals are coal, gypsum, oil and building stones. In 1917 the coal export was 40,000 tons, and in 1918 60,000 tons (mainly to Scandinavia); the 1919 output is estimated at 100,000 tons. The archipelago is visited by whalers (but the industry is declining), and by hunters for seal and wild fowl.

Certain districts in the main island (West Spitsbergen) have been named as follows:—King James Land and New Friesland (W. and E. of Widje Fjord) in the N.; Sabine Land, in the centre; and Torell Land in the S. There are settlements at Longyear "City" (on Ice Fjord); Davis "City" (on Lowe Sound); Green Harbour (at the S. entrance of Ice Fjord) with a high power Telefunken wireless station (erected by the Norwegian Government) connecting with Europe; and Coal Haven (in King's Bay).

South Cape is 370 miles from the Norwegian Coast. Ice Fjord is 520 miles from Tromsö, 650 miles from Murmansk, and 1,300 miles from Aberdeen. Transit from Tromsö to Green Harbour (the postal station) 2½ to 3 days; from Aberdeen 5 to 6 days.

THE SUEZ CANAL.

The Suez Canal.—The *Compagnie Universelle du Canal Maritime de Suez* is an Egyptian company, authorised in 1856, and confirmed in 1866, with a capital of 200,000,000 francs in 400,000 shares of 500 francs each. The British Government acquired from the Khedive in 1875 a total of 176,602 shares (cost £4,000,000, value March 31, 1922, £19,740,125).

---

* The spelling of the name with a "z" is a corruption of the true name.

The Suez Canal was opened in 1869. The total length of the canal is 101 miles, with a width of 45 metres (147 ft. 8 in.), having cost 804,701,506 francs to construct and enlarge; the maximum draught of water allowed for vessels using the canal is 9·45 metres (31 feet). The average time for the transit through the canal is 15 hours 36 minutes. By a convention, signed on Oct. 29, 1888, the canal was exempted from blockade, and vessels of all nations, whether armed or not, are to be allowed to pass through it in peace or war. The management of the canal is entrusted to a council of 32 administrators, of whom 10 are British (three representing H.M. Government and seven the shipowning interest).

British Directors, Lord Inchcape, G.C.M.G., K.C.S.I., K.C.I.E. (*Vice-President of the Company*); Sir Aubrey Brocklebank, Bart.; Sir Fredk. Green, K.B.E.; Rt. Hon. Sir R. S. Horne, G.B.E., K.C.; T. Harrison Hughes; Oswald Sanderson; Sir E. Wyldbore-Smith.

Representing H.B.M. Govt., H. T. Anstruther, Sir Ian Malcolm, K.C.M.G.; Sir J. T. Davies, K.C.B., C.V.O.

The following table shows the number and tonnage of vessels which have passed through the Suez Canal since 1914, with the percentage of British vessels:—

Year.	No. of Vessels.	Net Tons.	British Tonnage.
			%
1914	4,802	19,409,495	66·5
1915	3,708	15,266,155	76·3
1916	3,110	12,325,347	79·6
1917	2,353	8,368,918	73·6
1918	2,522	9,251,601	79·5
1919	3,986	16,013,802	70·9
1920	4,009	17,574.657	61·7
1921	3,975	18,118,999	62·9
1922	4,345	20,743,245	64·5

The tonnage of the *merchandise* carried was 25,776,000 tons in 1913; 17,049,000 tons in 1920; and 21,360,000 tons in 1922. Details of the nationality of the vessels passing through the Canal in 1922 are appended:—

	No. of Vessels.	Net Tons.	Per cent. (Tonnage).
British	2,736	13,352,710	64·5
Netherlands	455	2,161,471	10·4
French	215	996,875	4·8
Japanese	170	928,386	4·5
Italian	225	858,011	4·1
German	149	735,129	3·6
United States	137	668,213	3·2
Norwegian	79	308,711	1·5
Danish	61	279,838	1·4
Swedish	55	242,413	1·2
Spanish	16	46,437	0·2
Yugo-Slav	12	43,709	0·2
Russian	12	40,938	0·2
Greek	10	31,929	0·2
Chinese	2	7,604	·04
Egyptian	5	7,043	·03
Syrian	6	3,828	·02
Totals	4,345	20,743,245	100

The transit receipts in 1870 were 5,718,756 fr., and in 1922, 166,845,419 fr.

The rate of transit dues as from March 1, 1923, is 7 fr. 75 c. per ton, and 5 fr. 25 c. for vessels in ballast.

The net dividends for the year 1915 amounted to 120 fr. on the ordinary 500 fr. shares, and 97·915 fr. on the Actions de Jouissance. In 1922, the dividends were 320 fr. and 298·88 fr., respectively.

The 2,736 British vessels included in the total for 1922 are grouped under the following categories:—

	No.	Net Tonnage.
Merchant vessels	2,009	9,729,963
Mail steamers	207	1,360,444
Warships and transports	241	1,097,218
Government chartered vessels	56	292,453
Vessels in ballast	223	902,632
	2,736	13,382,710

SWEDEN.

(Sverige.)

King of Sweden of the Goths and the Wends, Gustaf V., *born* June 16, 1858; *suc.* December 8, 1907; *mar.*, Sept. 20, 1881, Victoria, dau. of Grand Duke of Baden, *born* August 7, 1862 (and has issue 3 sons).

Heir Apparent, Gustaf Adolf, Duke of Skåne, Crown Prince, *born* Nov. 11, 1882; *married* (1) June 15, 1905, H.R.H. the late Princess Margaret of Connaught (*died* May 1, 1920). (2) Nov. 3, 1923, Lady Louise Mountbatten, Princess of Battenberg.

CABINET (April 19, 1923).

Prime Minister, E. Trygger.
Foreign Affairs, C. F. W. Hederstierna.
Justice, L. B. Ekberg.
Finance, K. J. Beskow.
Commerce, M. R. Wohlin.
Communications, S. E. J. Lübeck.
Defence, C. A. G. Malmroth.
Social, C. G. O. Malm.
Public Worship & Instruction, S. Clason.
Agriculture, D. H. Petterson.
Ministers without Portfolio, B. C. Hasselrot; E. R. Stridsberg.

Envoy Extraordinary and Minister Plenipotentiary in London, Baron E. K. Palmstierna.
Legation, 27 Portland Place, W. 1.
Counsellor of Legation, C. R. P. Reuterswärd.
Secretary, T. H. W. Wistrand.
Military Attaché, Col. E. Mossberg.
Attachés, P. E. F. Arnander; S. O. Broms.
Social Attaché, Dr. E. R. Sjöstrand.
Naval Attaché, Commander A. de Bahr
Agricultural Adviser, M. W. F. de Wachenfelt
Chancellor, J. Stille.
Consul-General, E. G. Sahlin, 329 High Holborn, W.C. 1.
Vice-Consuls, F. Wennerberg; Harry Eriksson.
Swedish Church, Harcourt Street, Marylebone Road, W. 1.

Sweden comprises the eastern half of the Scandinavian peninsula, and comprises the capital and 24 governments, "Län," with an area of 173,151 square miles, and a population, Dec. 31, 1922, of 5,987,520, nearly all Protestant. This area includes the great lakes of Hjälmaren, Mälaren, Vänern, and Vättern. Nearly 46 per cent. of the population are devoted to agriculture, about 298,000 being owners and 50,000 tenants of the land they cultivate. The country for the most part is flat with pleasant undulations, rising in the north-west to the Kölen Mountains, which separate Sweden from Norway; and may be divided into three separate districts—the northern, forest; central, mining; the southern, agricultural. The climate in the south is favourable for producing grain. The principal articles of cultivation are the various cereals—oats, rye, barley, wheat—and potatoes. The forests are very extensive, covering one-half of the surface of the country, and consisting of pine, birch, fir; these are of great importance, supplying timber, pitch, and tar, and the chief fuel of the country, in addition to sulphite and mechanical wood pulp for the paper-making industry. The mineral products are extremely rich: iron of excellent quality, that known as the Dannemora iron being converted into the finest steel; gold and silver in small proportions; copper, lead, nickel, zinc, cobalt, alum, sulphur, porphyry, and marble. There is a railroad opening up the rich iron-ore districts of Lapland, and mineral trains run from Gellivare and Kiruna to Luleå on the Gulf of Bothnia and to Narvik on the Atlantic. Considerable mines of coal are being worked in Scania. The chief imports are coffee, wine, tobacco, and other ordinary colonial produce, coal, cloth, yarn, wool, cotton, skins, manure, iron, fish, oils, wheat, rye, pork, and machinery. The chief articles of export are timber, butter, iron, steel, wood pulp, paper, matches, stone, iron and zinc ores, &c. In 1921 the exports of paper were 183,790 tons, and in 1922 the exports were 273,434 tons.

Railroads 9,591 miles in length (of which 3,495 are the property of the State) were open on Jan. 1, 1923; and 49,720 miles of telegraph wires (inclusive of 22,150 railroad telegraph wires), 147 stations, and 1,915 railroad and 1,421 other telegraph stations. There were at the same date 435,000 miles of telephone wires.

Defence.—Service in the *Army* is universal and compulsory. The peace effective is about 104,000 trained men. The first line can be raised to war strength of about 140,000; second line, 95,000. The *Navy* consists of 59 fighting vessels (410 guns), 13 being ironclads, with submarines, submersibles, and some training ships, &c.

Education.—(i.) *Primary:* Compulsory and free. Illiteracy rare. Maintained by local taxation, with State grants. Attendance good. (ii.) *Secondary:* Well-developed, schools numerous and efficient. (iii.) *Special schools* make a feature of technics and navigation. (iv.) *Universities:* Lund, Upsala, and private faculties in Stockholm and Gothenburg.

The Helvetia of the Romans, a Federal Republic of Central Europe, situated between 45° 50′—47° 48′ N. lat. and 5° 58′—10° 30′ E. long. It is composed of 22 Cantons, of very dissimilar size, united under a Constitution dated 29 May, 1874, and comprises a total area of 15,950 square miles, with a population of 3,888,320 in 1920, who are divided between Roman Catholics, 40 per cent., and Protestants, 59 per cent., Jews numbering 7,400, and others 11,000. The population is formed by three nationalities, distinct by their language, as German 71 per cent., French 21 per cent., Italian 6 per cent., and Romansh (Grisons), 1½ per cent. It is the most mountainous country in Europe, having the Alps, covered with perennial snow and glaciers, rising from 5,000 to 15,213 feet in height, not only along its southern and eastern frontiers, but throughout the chief part of its interior; and the Jura mountains in the north-west. Agriculture is followed chiefly in the valleys, where wheat, oats, maize, barley, flax, hemp, and tobacco are produced, and nearly all English fruits and vegetables are grown. The forests cover about one-sixth of the whole surface. The manufactures consist chiefly of silks, cottons, linen, lace, thread, woollens, &c.; clocks and watches have long been the staple products of Geneva and Neufchâtel, while leather, gloves, pottery, tobacco and snuff, cheese, &c., are made. In 1914 there were 3,530 miles of railway in working order, 17,333 miles of telegraph line, 317,403 miles of telephone line, and 2,099 post-offices; the profit on the railways in 1920 was 47,300,000 francs.

The legislative power is vested in a Parliament, consisting of two Chambers, a National Council of 198 members, and a Council of States of 44 members; both Chambers united are called the Federal Assembly, and the members of the National Council are elected for three years, an election taking place in October. The executive power is in the hands of a Federal Council of 7 members, elected by the Federal Assembly, presided over by the President of the Confederation. The President has a salary of 27,000 francs; the Vice-President and other members of the Federal Council 25,000 francs each. The members of the Federal Council are elected for three years; each year the Federal Assembly elects from this council the President and the Vice-President; they are elected for one year, the five other members for three years. Not more than one of the same canton may be elected member of the Federal Council.

Defence: Militia. Active Army, 12 yrs.; initial trg., 65–90 days. Subsequently 11 days per ann.; *then* Landwehr, 8 yrs.; 1 trg., 11 dys. for dismtd. branches only; *then* [Landsturm to age 48]. *War Strength*, 140,600; Landwehr, 65,000; Landsturm, 57,000.

Education.—Control by cantonal and communal authorities. No central organ. Illiteracy rare in Protestant cantons. (i.) *Primary:* Free and nominally compulsory, but attendance is not strictly enforced in the essentially Roman Catholic cantons. School age varies. (ii.) *Secondary:* Age 12–15 for boys. Schools numerous and well-attended, and there are many private institutions. (iii.) *Special schools* make a feature of commercial and technical instruction. (iv.) *Universities:* Bâle, Berne, Fribourg, Geneva, Lausanne, Zurich, and Neuchâtel.

Berne, transit, 22 hours.

SYRIA, LEBANON AND CILICIA.

French High Commissioner, Général Weygand.

Syria.—British forces, together with small French and Arab detachments, drove the Turks out of Syria and Lebanon in 1918, and occupied those districts and the district of Cilicia. By decision of the Supreme Council of the Allies the districts in question were entrusted to France, to be administered under a mandate.

The Emir Feisal (son of the King of the Hedjaz and, since 1921, King of Iraq) had from the outset assumed the administration of the districts of Aleppo, Hama and Homs, which had been assigned as Independent Arab districts under an earlier agreement of May, 1916, between France and Great Britain (the *Sykes-Picot Agreement*), and it was intended to allow the Emir to remain under French guidance, but on March 8, 1920, the

---

* Estimated.

"Syrian Congress" at Damascus declared Syria independent, and the Emir Feisal was crowned King of Syria. The action of the Syrian Congress did not receive the sanction of the Allied Powers, and General Gouraud occupied Damascus, Aleppo, Hama and Homs. The Emir Feisal left the country, and afterwards became King of Iraq (*q.v.*). The French Mandatory Zone was first divided into the four autonomous states of Great Lebanon, Damascus, Aleppo and the Alaouites (the region round Latakia), each having a French adviser responsible to the High Commissioner at Beyrout. The latter three states have now been grouped together to form the *Syrian Federation*, with a nominated Council. The actual form of government differs in each of the states, but the guiding principle in each is real and effective French control.

Syria is a geographical term for part of the former Turkish territories in Asia Minor, and its Northern limits are still undefined. The present temporary Northern boundary between Syria and the territory occupied by the forces of Mustafa Kemal Pasha (the leader of the Nationalist movement in Asiatic Turkey) was defined in the agreement between France and the Kemalists, and is roughly as follows:—From a point immediately S. of Payas (on the Gulf of Alexandretta) to Meidan Ekbes (the railway station and environs remaining in Syria), thence S.E. to the railway station of Tchoban Bey, leaving the districts of Marsova to Syria and of Karnaba and Killis to the Kemalists; thence along the Baghdad Railway to Nussebin and along the old highway to Jizireh-ibn-Omar on the Tigris (the districts of Nussebin and Jizireh-ibn-Omar remaining in Kemalist territory, with the roadway between these two places). The E. boundary separates Syria from Mesopotamia along a line running roughly N.E. from the E. side of Jebel Druze to a point 15 miles S.E. of Jezrieh Ibn Omar (80 miles E. of Mardin); the S. boundary follows a line from Ras el Nakoura on the coast, N. of Akka, and running S.E. by E. to the Hedjaz railway line S. of Nasib, with a projection northwards to include the head waters of the Jordan, the Hule Lake and the Lake of Tiberias being included in Palestine. Within these limits, the estimated area is 100,000 sq. miles, with a population of about 3,000,000, of whom the greater number are Orthodox Muhammadans, with a proportion of Shiites and Druses. The products of Syria are wheat, tobacco, fruit, wine and silk, but there is little cultivation without irrigation, the inland districts being cut off from the moisture-laden winds by a mountain barrier, running parallel with the coast. The mineral wealth is believed to be unimportant, but there is a certain amount of bitumen. The principal Syrian towns are Damascus (est. pop. 300,000), Aleppo (250,000), Homs (70,000), and Hâma (60,000). The administrative capital is at Beyrout (Grand Lebanon). Damascus contains the Mosque of the Ommayedes (where is the tomb of Saladin), and in the south-western quarter is "The Gate of God," through which the pilgrimage to Mecca passes annually, while the "street called Straight" (Acts ix, 11) runs E. to W. through the city. Damascus is an important commercial centre, and among its industries are metal work and mother-of-pearl inlay. At Baalbek (Heliopolis), on the western slopes of the Anti-Lebanon range (35 miles N.N.W. of Damascus), are ruins of 1st to 3rd century Roman temples (the Circular Temple, the Great Temple and the Temple of Bacchus), and in the vicinity of the ruins is the largest cut stone in the world (60 × 17 × 14 feet), weighing 1,500 tons. The railway system consists of a line from Beyrout to Damascus (narrow gauge), with a connexion at Rayak for Homs, Hama and Aleppo (standard gauge). The line from Tripoli to Aleppo, *viâ* Homs, was re-opened in 1921. A narrow-gauge tramway runs from Mameltein along the coast. From Damascus there is railway communication with Palestine, *viâ* Deraa, and the Syrian railways link up with the Baghdad railway at Aleppo.

The administrative Capital of Syria is Beyrout.

The Great Lebanon (the former Turkish provinces of Lebanon and Beirut), declared a State by the High Commissioner, under the title of *Etat du Grand Liban*, in 1920, extends along the Mediterranean littoral from the Palestine frontier to Nahr el Kebir (15 miles N. of Tripoli) and is bounded on E. by the Great Central Depression, known as the Bekaa, in which flow the rivers Orontes and Litani. Its total length is about 120 miles, and its width varies from 30 to 35 miles. The estimated area of the Great Lebanon is about 4,300 square miles, with an estimated population of 579,778. The products of the soil are olives, wheat, grapes, oranges and mulberry-trees; the live stock are numerous and one of the principal sources of wealth. The Capital is Beyrout (pop. 91,498), which is the chief seaport and also the administrative capital of Syria. Tripoli is the next important town and seaport. Minor ports are Junieh, Tyre and Sidon. The national flag is the French tricolour with a Cedar of Lebanon on the white band.

Governor of the Great Lebanon, M. Aubouard (*acting*).
Beyrout—British Consul-General, H. E. Satow, O.B.E.
„ *Vice-Cons.*, J. B. F. Vaughan-Russell; N. Mayers (*acting*); L. C. Pettit (*acting*).
Aleppo—Consul,
„ *Pro-Consul*, A. Akras.
Alexandretta—Vice-Consul, J. A. Catoni.
Damascus—Consul, C. E. S. Palmer, D.S.O.

Cilicia extends round the Gulf of Alexandretta, from Lebanon in the south to the Anti Taurus in the north, and from the Seihun Irmak river in the west to Urfa in the east, the total area (which includes part only of the ancient Roman province of Cilicia, or of the Turkish vilayet of Adana) being about 12,000 square miles with a population estimated at 300,000. The country is generally fertile and produces wheat, cotton, wool, sesame, &c., and is capable of considerable agricultural development. The principal towns are Adana (45,000), the former capital of the Turkish vilayet of that name, Marash (50,000), and Alexandretta or Iskanderun (10,000), the chief port and an important strategical centre, with command of the Beilan Pass. Cilicia was handed over to the Kemalist forces by the French on Jan. 4, 1922. The district is now under the control of the Nationalist Assembly of Angora.

TAURIDA.

In March 1918 the former government of Taurida declared its independence as the *Taurida Republic*. The area is 13,312 sq. miles, with a population (1914) of 2,000,000, and the Republic is bounded on the N. by the Dnieper river and the Province of Ekaterinoslav, on the W. and S. by the Black Sea, and on the E. by the Sea of Azov. The soil is very productive, especially in its southern peninsular, known as the *Crimea* (the ancient Tauric Chersonese). The capital is SIMFEROPOL (pop. 1914, 85,000), other towns being Sevastopol (pop. 1914, 62,000), Kertch (pop. 1914, 60,000), Theodosia (pop. 1914, 44,000), Berdiansk (pop. 1914, 41,000), Yalta (pop. 1914, 31,000), Eupatoria, Melitopol, and Perekop.

TURKESTAN.

In Jan. 1918 the former Russian Provinces of Ferghana, Syr-Daria, Amu-Daria Samarkand and Semiryechensk, with a total area of about 420 000 sq. miles and a population of about 7,000,000, declared their independence as the *Republic of Turkestan.* The territories of this Republic extend from the Aral Sea in the W. to the boundaries of the Chinese Republic in the E., and between the River Chu and Lake Balkash on the N., and Khiva, Bokhara and Afghanistan on the S. The capital is TASHKEND (pop. 1914, 275,000), other large centres being Khohkand (pop. 1914, 125,000), Samarkand (pop. 1914, 100,000), Adijan (pop. 1914, 90,000), and Namangan (pop. 1914, 80,000).

Economic Affairs, Mahmoud Essad *Bey.*

Turkish Representative in London (not yet appointed), 169 Portland Place, W. 1.
1st Secretary,

The Ottoman Turks are derived from Central Asian tribes, who were converted to the Muhammadan faith in the seventh century. These Muhammadan tribes attacked and conquered the Asiatic Provinces of the Byzantine (Eastern Roman) Empire, and by the middle of the fourteenth century they had spread from Asia Minor into South East Europe. In 1453 they captured Constantinople, and spread over the whole of the Balkan Peninsula, their name of Osmanli, or Ottoman Turks, being derived from Othman, or Osman (1299-1326), a notable Turkish leader in the fourteenth century. Early in the sixteenth century the Ottoman Empire was spread over Egypt and northern Africa, and penetrated northward into Hungary, a great part of which was incorporated with the Turkish dominions until 1699, when the *Peace of Carlowitz* freed the country from Turkish rule. In the nineteenth century the outlying African dominions, with the exception of Tripoli, broke away from their suzerain, or were occupied by other Powers, and in the latter part of the century the northern states of the Balkan Peninsula asserted their independence, under guarantees of the Christian Powers. The outcome of these political upheavals was a demand for better government in the remaining dominions of the Sultan. During the process of constitutional reforms, which drove the Sultan Abdul Hamid (1876–1908) from the throne, war broke out between Italy and Turkey, and Tripoli and Benghazi were ceded to Italy under the *Treaty of Lausanne* (Oct. 12, 1912). These events were followed in the autumn of 1912 and the early months of 1913 by a disastrous war with the states of the Balkan League (Bulgaria, Montenegro, Serbia and Greece). At the outbreak of hostilities the European dominions of Turkey extended westwards to the Adriatic and northwards to Bosnia-Herzegovina (Austria), thus including the districts known as Macedonia, Thrace, and Albania. By the *Treaty of London* (1913), the north-western boundary of European Turkey was a line drawn from Enos, on the Adriatic coast, to Midia, on the Black Sea, thus excluding Adrianople, which had capitulated (after a long siege) to the Bulgarian forces. At the outbreak of the second Balkan war (in which Serbia and Greece were aided against Bulgaria by Rumania), Turkey re-occupied Adrianople, thus recovering a part of the lost dominions. In the Great War of 1914-1918, Turkey threw in her lot with the Central Powers and made unsuccessful attacks on Egypt and South Russia. Great Britain sent an expedition to Gallipoli (which was withdrawn) and to Mesopotamia and Palestine, which freed those countries and Syria from Turkish rule, while various tribal revolts in Arabia ended the Turkish suzerainty in that peninsula. On Oct. 30, 1918, Turkey surrendered unconditionally before the conquests of the various Anglo-Indian and Imperial British columns and their Arabian allies. The final peace settlement with Turkey was the subject of protracted negotiations. The first definite proposals were embodied in the *Treaty of Sèvres*, which was signed on Aug. 10, 1920, but was never ratified. The rise of the Turkish Nationalist movement in Asia Minor, which brought into existence a *de facto* Government at Angora, and the defeat of the Greek armies in August-September, 1922, finally destroyed any possibility of the *Treaty of Sèvres* being brought into force.

Treaty of Lausanne.—As a result of the Peace Conference, which met at Lausanne from November, 1922, until February, 1923, and again from April to July, 1923, a treaty was signed there on July 24, 1923. This treaty has been ratified by Turkey and Greece, and will come into force as between Great Britain and Turkey when it has been ratified by Great Britain, France, Italy and Japan or any three of those Powers. The main provisions of the treaty and various instruments annexed to it are that Turkey retains Eastern Thrace, including Adrianople, while ceding Syria, Palestine, Mesopotamia and the rest of Arabia. The northern boundary of Mesopotamia is to be settled by negotiation within nine months, or failing that by reference to the League of Nations. Italy is confirmed in possession of the Dodecanese, and Greece in possession of the islands formerly held by Turkey in the Aegean, except Imbros and Tenedos. Turkish rights over Egypt, the Sudan and Cyprus come to an end. A special convention demilitarises zones on either side of the Bosphorus and Marmora, and lays down rules for preserving the freedom of the Straits in peace and war. These rules are to be applied under the auspices of the League of Nations by a commission composed of representatives of Turkey, France, Great Britain, Italy, Japan, Bulgaria, Greece, Rumania, Russia, Serbia and, in the event of her accession, the United States. The minorities clauses are the same as in recent European treaties. Turkey cedes ground for military cemeteries at Anzac and elsewhere. The old extraterritorial privileges of foreigners ("Capitulations") are abolished, but a special convention concluded for seven years provides that foreigners residing or trading in Turkey are to be subject to no taxes or disabilities not imposed on Turks. A commercial convention concluded for five years establishes an import and export tariff and lays down that there shall be no discrimination against foreign shipping and trade.

---

[*] Following the military successes of Mustapha Kemal Pasha (Commander-in-Chief of the armies of the Angora Government in Anatolia) against the Greeks, the Angora Government called upon the Sultan to resign. Sultan Muhammad VI, took refuge on a British warship (Nov. 17, 1922) and the National Assembly elected the heir presumptive to the Caliphate, without temporal power.

Turkey in Europe (10,000 sq. miles, estimated population 2,000,000) thus consists of Eastern Thrace (to the Maritza), including the cities of Constantinople and Adrianople, and is separated from Asia by the Bosporus at Constantinople and by the *Dardanelles* (Hellespont)—about 40 miles in length, with a width varying from 1 to 4 miles—the political neighbours being Greece and Bulgaria on the west.

Turkey in Asia (200,000 sq. miles, estimated population 11,000,000) comprises the whole of Asia Minor, and extends from the Aegean Sea to the western boundaries of Georgia, Erivan and Persia, and from the Black Sea to the Mediterranean, and the northern boundaries of Syria, Arabia and Iraq. This area corresponds approximately with *Anatolia* ("Land of the Rising Sun," or Orient) of the Greek historians.

Government.—The forces of the "Government of the Grand National Assembly" (with its seat at Angora), of which Mustafa Kemal Pasha is President, captured Smyrna from Greece on Sept. 9, 1922. The greater part of the city was destroyed by fire on the 13th of the same month. The Angora Government under the *Armistice of Mudania* of Oct. 11, 1922, resumed possession of Eastern Thrace, and gradually took over the administration of Constantinople from the Allies. Sultan Muhammad VI. (Vehideddin) fled to Malta on Nov. 20 without, however, abdicating, and the Heir Presumptive, Abdul Mejid Effendi, succeeded, after election by the Grand National Assembly at Angora, without any temporal functions and with the title of Caliph. He resides at Constantinople. The Caliph is in direct descent from Othman, the founder of the Empire. The religion of the State is by law Muhammadan, and the majority of the inhabitants are Muhammadans, but there are large numbers of Christians (of the Latin and Eastern rites) and Jews. Education is nominally compulsory and free. There are primary schools, training schools for teachers, and at Constantinople a university, founded in 1900.

Production.—Although the soil of Asia Minor is generally fertile, agriculture is still very primitive. Cereals are abundantly produced, cotton, tobacco, and coffee are generally cultivated, and figs, nuts, grapes, olives, and many varieties of fruit are grown. Samsoun is the chief centre of the tobacco growing industry, which is also of importance at Smyrna, Ismidt and Broussa. Cattle raising is an important industry. The export of merchandise was considerable before the War, and consisted principally of coffee, opium, tobacco, cotton, carpets, gums, and ottar of roses. The forests are a source of wealth, and the mulberry is planted for the silkworm industry, which centres round Broussa. The mineral wealth of Asia Minor is considerable, but almost undeveloped. Chrome ore, zinc, manganese, antimony, copper, borax, corundum (emery), coal and lignite, petroleum, gold (from the ancient gold mines of Troy), silver, and arsenic are among the minerals produced. The principal manufacture is carpet-weaving. Before the War the total exports were valued at about £T25,000,000 annually, and the imports at about £T45,000,000 (£T11 = £10). In 1913 the share of Great Britain in the import trade of Turkey was 40 per cent., in 1920 it had fallen to 29 per cent., and in 1921 to 21 per cent.

Communications.—About 300 miles of railway remain to Turkey in Europe. In Asia Minor the Anatolian Railways run from Haidar Pasha to Eski Shehir, Afion Karahissar, Konia and Eregli. Less important lines include the Eski Shehir-Angora, Mudania-Brussa, Smyrna-Cassaba, and Smyrna-Aidin systems. These railways have a total length of about 1,500 miles. There are electric trams in Constantinople and Smyrna.

Turkish Finances.—In 1921–22 the expenditure in the budget was placed at £T27,705,104, required almost entirely for salaries and departmental expenses; the amount actually expended was £T21,890,067, leaving about £T6,000,000 unpaid. The *ordinary* revenue was derived from customs (£T5,096,770), taxes in Constantinople vilayet (£T3,903,035), consumption taxes (£T3,278,503), and miscellaneous (£T1,058,231), a total of £T13,336,239. The *extraordinary* revenue was £T9,553,122, made up principally of Régie tobacco monopoly (£2,879,084), Eastern Telegraph Company (£T2,353,249), Ottoman Public Debt (£T3,833,393). The total receipts for 1921–22 were thus £T22,889,661, but of this total nearly £T8,000,000 is exceptional and non-recurrent, so that the 1921–22 deficit will be more than doubled in 1922–23.

The General Debt of the Ottoman Empire amounted on March 1, 1915, to £T170,048,107. New loans, advances, &c., issued during the War increased the total to £T488,115,647 on March 1, 1921, exclusive of indemnities or reparations due to Allied subjects. These figures are subject to modifications, no accurate accounts being available under present conditions. The *Ottoman Debt* is administered by a Council: *President*, Sir Adam Block, K.C.M.G. (*Delegate of British and Netherlands Bondholders*); *Members*, M. F. de Closières (*French*), M. B. Nogara (*Italian*), Hussein Djahid Bey (*Turkish*), J. Procter (*Imperial Ottoman Bank*). *Imperial Commissary*, Said Bey; *General Manager*, M. Georges Abonneau.

CAPITAL OF TURKEY, ANGORA, the headquarters of the Commissioners of the People, an inland town of Asia Minor, about 200 miles E.S.E. of Constantinople, with a population in 1923 of about 65,000. Angora (or Ancyra) was the capital of the Roman Province of *Galatia Prima*, and a marble temple dedicated to Augustus (now in ruins) contains the *Monumentum (Marmor) Ancyranum*, inscribed with a record of the reign of Augustus Caesar. It is reported that a new city is to be laid out, on the lines of Washington, D.C. CONSTANTINOPLE, the former capital, remains the seat of the Caliph of the Muhammadan World; it was the Roman city of Byzantium, and was selected by Constantine the Great as the capital of the Roman Empire about A.D. 328, and renamed by him; it became capital of the Eastern Roman Empire, A.D. 364; population estimated at 1,000,000. Other cities are Smyrna (70,000), Broussa (50,000), Scutari in Anatolia (50,000), Cæserea (50,000), Sivas or Sebasteia (45,000), and Trebizond (30,000). The population of Asia Minor has been greatly reduced by the exodus of Greeks and Armenians following upon the Turkish capture of Smyrna; the preceding figures are estimates of Oct., 1923.

FLAG: Red, with white crescent.

BRITISH EMBASSY (Constantinople).

Ambassador and High Commissioner, His Excellency the Rt. Hon. Sir Horace Rumbold, Bart., G.C.M.G., M.V.O.(1920) £8,500

Cons.-Gen., Señor Juan Carlos Muñoz, 55–57 Chancery Lane, W.C. 2.

The smallest Republic in South America, on the east coast of the Rio de la Plata, situate in lat. 30°—35° S. and long. 53° 25′—57° 42′ W., containing an area of 72,210 square miles, and a population on Jan. 1, 1918, of 1,407,247.

Uruguay resisted all attempted invasions of the Portuguese and Spaniards until the beginning of the 17th century, and 100 years later the Portuguese settlements were captured by the Spaniards. From 1726–1814 the country formed part of Spanish South America and underwent many vicissitudes during the Wars of Independence. In 1814 the armies of the Argentine Confederation captured the capital and annexed the province, and it was afterwards annexed by Portugal and became a province of Brazil. On Aug. 25, 1825, through the heroism of the 33 liberators (whose memory is perpetuated in the name of the province of *Treinta y Tres*), the country threw off the Brazilian yoke. This action led to war between Argentina and Brazil, which was settled by the mediation of the United Kingdom, Uruguay being declared an independent state in 1828. In 1830 a Republic was inaugurated, with a Constitution of Sept. 10, 1829. The President is elected by the legislature for a term of 4 years and is ineligible for a consecutive period of office. By an amendment to the Constitution (which came into force March 1, 1919) an administrative council was appointed to share the Executive power with the President.

The country consists mainly (and particularly in the south and west) of undulating grassy plains. The principal chains of hills are the Cuchilla del Haedo, which crosses the Brazilian boundary and extends southwards to the Cuchilla Grande of the south and east. In no case do the peaks exceed 2,000 feet. The principal river is the *Rio Negro* (with its tributary the Yi), flowing from north-east to south-west into the Rio de la Plata. The boundary river *Uruguay* is navigable from its estuary to Salto, about 200 miles north, and the Negro is also navigable for a considerable distance. Smaller rivers are the Cuareim, Yaguaron, Santa Lucia, Quequay, and the Cebollati. On the south-east coast are several lagoons, and the north-east boundary crosses (the Brazilian) Lake Mirim. The climate is extraordinarily healthy, with great uniformity of temperature, the summer heat being tempered by the breezes of the Atlantic and the geographical position causing a high thermometer in winter.

---

* 9 months only.
† Turkey within 1921 boundaries.
§ Turkey within former boundaries.

Wheat, barley, and maize are cultivated, but the export is at present prohibited. The wealth of the country is obtained from its pasturage, which supports large herds of horned cattle (7,802,450 in 1916) and sheep (11,472,900 in 1916), the wool of which is of excellent quality. Gold mines exist at Cuñapirú. The exports are entirely animal products, and include frozen and preserved meat, wool, hides, horn, hair, tallow, and jerked beef; the imports are principally machinery, textiles and clothing, food substances and beverages, coal, oil, timber, fuel and bloodstock. The principal imports from the U.K. are woollen and cotton goods, hardware, and coals. There are 1,499 miles of railway open (1922), all in British hands, and three short lines owned by the State; and 4,850 miles of telegraph, with 19,039 miles of telephones. There were 995 post-offices, dealing with 101,638,265 letters and packets. The language spoken is Spanish.

The most northerly Confederation of South America, situated approximately between 1° 40′ S. lat. and 12° 26′ N. lat. and 59 52′–73° 15′ W. long. It consists of 20 States and 2 federal territories. The best authorities calculate the actual present area to be approximately 363,728 square miles. The census of 1920 gave the population as 2,411,952.

Venezuela lies on the north of the South American continent, and is bounded on the north by the Caribbean Sea, west by the Republic of Colombia (with which Republic the boundary is in dispute), east by British Guiana, and south by Brazil. Included in the area of the Republic are over 70 islands off the coast, with a total area of about 14,650 square miles, the largest being *Margarita*, which is politically associated with Tortuga, Cubagua and Coche to form the newly constituted State of *Nueva Esparta*. Margarita has an area of about 400 square miles.

Venezuela was visited by Columbus in 1498, and in 1499 by Alonzo de Ojeda and Amerigo Vespucci, the former naming the Gulf of Maracaibo Venezuela, or "Little Venice" (on account of the Indian pile-built settlements on the coast and shores of the lake), and the name was afterwards extended to the whole of the Orinoco basin. In 1550 the territory was formed into the captaincy-general of Carácas, and the country remained under Spanish rule until the revolt under *Simon Bolivar*, a native of Carácas, who defeated the Spanish forces in the battles of Lastoguanes (1813) and Carabobo (1821), and thus secured the independence of the country. Bolivar was an untiring hero in the cause of independence, and through his efforts (and those of his adjutant Sucre) Venezuela, Ecuador and Colombia (Upper Peru) achieved their freedom from Spain, while Peru was enabled to establish its independence in consequence of his victories. He died in 1830, at the age of 47, and his remains were re-interred at Carácas in 1842. Venezuela formed part of the Federal Republic of Colombia from 1822–1830, since which time it has been independent. There have been many revolutions since 1846, particularly in 1849, 1868, 1889, 1891, 1900, and 1908. In 1854 President Monagas liberated the African slaves, and in 1864 President Falcón divided the country into States and formed them into a Federal Republic. The present constitution rests upon the fundamental law of June 13, 1919, under which the government is that of a Federal Republic of twenty autonomous States, a Federal District, and two Territories, with a President elected by the Federal Congress for seven years.

The Eastern Andes from the south-west cross the border and reach to the Caribbean Coast, where they are prolonged by the Maritime Andes of Venezuela to the Gulf of Paria on the north-east. The main range is known as the Sierra Nevada de Merida, and contains the highest peaks in the country in Picacho de la Sierra (15,420 feet) and Salado (13,878 feet), the maritime ranges containing the Silla de

Carácas (8,531 feet). Near the Brazilian border the Sierras Parima and Pacaraima and on the eastern border the Sierras de Rincote and de Usupamo enclose the republic with parallel northward spurs, between which are valleys of the Orinoco tributaries. The Sierra Parima contains Yaparana (7,175 feet) and Duida (8,120 feet), and Para Caima contains Maraguaca (8,228 feet) and Roraima (8,530 feet), the latter being on the Venezuela-Guiana boundary. The slopes of the mountains and foothills are covered with dense forests, but the basin of the Orinoco is mainly *llanos*, or level stretches of open prairie, with occasional woods.

The principal river of Venezuela is the *Orinoco*, with innumerable affluents, the main river exceeding 1,500 miles in length from its rise in the north-western mountains of the republic to its outflow in the deltaic region of the north-east. The Orinoco is navigable for large steamers from its mouth for some 700 miles, and by smaller vessels as far as the Maipures Cataract, some 200 miles further up stream. Among the many tributaries of the main stream are the Ventuari, Caura and Caroni from the south, and the Apure (with its tributary the Portuguesa), Arauca, Meta, and Guaviare from the west, the Meta and Guaviare being principally Colombian rivers. The upper waters of the Orinoco are united with those of the Rio Negro (a Brazilian tributary of the Amazon) by a natural river or canal, known as the *Casiquiare*. The costal regions of Venezuela are much indented and contain many lagoons and lakes, of which *Maracaibo*, with an area exceeding 7,000 square miles, is the largest lake in South America. Other lakes are Zulia (290 square miles), south-west of Maracaibo, and Valencia (216 square miles), about 1,400 feet above sea level in the Maritime Andes. The *llanos* also contain lakes and swamps caused by the river floods, but they are dry in the summer seasons.

The climate is tropical and, except where modified by altitude or tempered by sea breezes, is unhealthy, particularly in the coastal regions and in the neighbourhood of lowland streams and lagoons. The hot wet season lasts from April to October, the dry cooler season from November to March.

The principal imports are cotton prints and shirtings and cotton drill, mainly from the U.K., and hardware, principally from the U.S. The principal articles of export are coffee (81,552 metric tons in 1919); cacao (19,833 metric tons in 1919); goatskins, asphalt, sugar, hides, and balata. The U.S. is the principal customer.

Spanish is the language of the country.

Military Attaché, Col. G. Ostojic, C.V.O.

The Kingdom of the Serbs, Croats, and Slovenes is an outcome of the War of 1914–1918, through the fusion of the Kingdoms of Serbia and Montenegro with the Yugo-Slav districts of Austria-Hungary. The area and population of the new kingdom are approximately as under:—

District.	Sq. Miles.	Est. Pop.
Serbia	34,500	5,000,000
Montenegro	5,800	500,000
Croatia and Slavonia	16,418	2,700,000
Banat (part)	6,000	800,000
Bosnia	16,233	1,630,000
Herzegovina	3,527	270,000
Carniola (part)	2,500	350,000
Styria (part)	1,900	350,000
Total	86,878	11,600,000

The political neighbours are the Republics of Austria and Hungary on the north, Albania and Greece on the south, Bulgaria and N.W. Greece on the east, and, on the west, the "buffer state" of *Fiume* and the Adriatic Sea. This "buffer-state" has been constituted by agreement with Italy, and has a special status.

In 1913 Serbia, as a member of the *Balkan League* (Bulgaria, Greece, Serbia, and Montenegro), waged a successful war against Turkey, and enlarged her boundaries; but in August, 1913, Serbia and Greece were attacked by Bulgaria, their former ally, owing to disputes concerning the division of the spoils. The second war collapsed in a few weeks through the threatened intervention of Rumania, and ended in the *Treaty of Bucharest* (Aug. 7, 1913), by which the whole of "Old Serbia" (the greater parts of the Turkish vilayets of Macedonia) were included within the Serbian boundaries. The assassination of the Austrian Heir Presumptive (June 28, 1914) brought about an invasion of Serbia by the forces of Austria-Hungary and resulted in the War of 1914–1918, during which the whole country was overrun by the forces of Austria, Germany, and Bulgaria. On Aug. 28, 1916, the Serbian Parliament met at Corfu, but in Oct., 1918, the Serbian armies were again in occupation of Nish, and on Nov. 3, 1918, the capital was re-occupied. Montenegro (*Tzrna-Gora*) was formerly a province of the old Serbian Empire. It has an area of 5,800 square miles (including the territory acquired from Turkey in 1913) and a population estimated at 500,000. On Nov. 29, 1918, the National Skupshtina deposed King Nicholas (who had reigned since Aug. 28, 1860), and a decision was made to reunite Montenegro with Serbia. King Nicholas died on March 21, 1921, and the union of the country with Yugo-Slavia is now an accomplished fact. The chief town is Cettinje (pop. 5,000) and the ports are Antivari and Dulcigno. On Oct. 30, 1918, the National Assembly of the former Hungarian provinces of Croatia and Slavonia proclaimed the complete independence of those provinces, and a National Council was established, to which representatives of other Slav States (Boznia, Herzegovina, and parts of Austria and Hungary) were admitted. On Dec. 29, 1918, a Ministry was formed for the Serb, Croat and Slovene Kingdom, in which representatives of Croatia and Slavonia were included.

Old Serbia has no seaboard, but the whole coast of Croatia, Dalmatia, and Montenegro is included in the Yugo-Slav Kingdom, and access is thus possible to the Adriatic at any point of the littoral of these territories. By a convention with Greece of May, 1914, similar access is obtained to the port of Salonika, on the Aegean; this convention was renewed in another form in 1923, a free zone in Salonika harbour being thus secured to the S-C-S. Kingdom. In 1922 there were about 6,000 miles of railway in operation. The Danube forms a great commercial highway, the Save and Tisa being also extensively used by river steamers. In January, 1923, a French company secured a contract for an aerial passenger and mail service between Paris and Belgrade.

The Army on a peace footing consists of 130,000 officers and men, the war strength being about 250,000.

The religion of the state is Greek-Orthodox and Roman Catholic. Primary education is free and nominally compulsory, but the attendance does not exceed 25 per cent. of the young. The State also maintains Secondary and Girls' High Schools. The University is at Belgrade.

The principal industry is agriculture, and the crops of 1922 were of average quality, enabling a considerable surplus of wheat, barley, oats, rye and maize (over 660,000 tons of last named) to be exported. The product of the vines also permitted a surplus to be exported. Of the exports of all kinds in 1922, Italy took 28 per cent. and Austria 23 per cent.

Questions of the Day.

IMPERIAL PREFERENCE.

PREFERENCE was instituted by Section 8 of the Finance Act, 1919, and has been in force since June 2, 1919, for tea, and September 1, 1919, for the other articles to which it applies. The Preference took the form of an additional duty of 2s. 6d. to 4s. per gallon on Non-Empire spirits, and a reduction of duty on other articles produced in and consigned from the Empire, viz., of one-sixth in the Customs duties on tea, cocoa, coffee, chicory, sugar and cognate goods, dried fruits, tobacco and motor spirit; of one-third in the Customs duties on cinematograph films, clocks and watches, motor cars and cycles, and musical instruments; and of varying amounts (*see* Customs Tariff, pp. 382-3) in the Customs duties on wine. The Excise duties on chicory, sugar, &c., and tobacco, were correspondingly lowered (*see* pp. 384, 385).

Particulars of the clearances at the full and the preferential rates of duty respectively of the articles upon which Preference is granted are given at the foot of this page.

In addition to the Preference now accorded to Imports from British Dominions certain other products are suggested for inclusion in consequence of the recommendations of the Imperial Conferences held in London in the autumn of 1923; these additions are detailed on page 481.

AID FOR AGRICULTURE.

DURING the past year the Agricultural Credits Act and the Agricultural Rates Act have been passed with the object of affording relief to the agricultural industry from the difficulties which it has been experiencing. The Agricultural Credits Act aims at assisting those farmers who purchased their farms after the introduction of the Corn Production Act in 1917 and before its repeal in 1921. A considerable proportion of the price of these farms was paid for with borrowed money, and as a rule the loans were not for very long terms. As a consequence there was much uncertainty as to what would happen when the money was called in. The Act enables these owners to obtain mortgages, repayable within a period of 60 years by yearly or half-yearly instalments on the instalment or the annuity system. The amount secured by the mortgage must not exceed 75 per cent. of the present value of the farms or an amount equal to 30 times the annual value of the land as ascertained for the purposes of Schedule A of the Income Tax Acts. The latter limitation excludes from the scope of the Act the building value of any agricultural land adjacent to a town. The mortgages will be granted through approved associations which are restricted in their profits, and the necessary funds for this

purpose will be advanced to the associations by the Public Works Loan Commissioners. The urgent need for the provision of additional short-term credit facilities is met in the Act, which provides for the organisation of co-operative credit societies, having for one of their objects the making of advances to members repayable within a period not exceeding 5 years for such agricultural purposes as may be approved by the Minister of Agriculture. It is proposed that these societies should be formed with £1 shares, of which 5s. should be paid up, and for each £1 share so paid up the Government would advance another £1. Another clause of the Act amends the Land Improvement Act of 1864 by removing the limit of 5 per cent. interest chargeable on loans to landowners and giving the Minister of Agriculture a discretion as to the rate to be charged.

The Agricultural Rates Act provides that the occupier of agricultural land in England and Wales, who since 1896 has been paying half rates, shall pay one-quarter until March 31, 1925, when the Act expires, unless Parliament otherwise determines. The deficiency thus caused in the produce of local rates will be made good by Government grants from the Local Taxation Account. This deficiency in England and Wales in the financial year 1923–4 was estimated by the Minister of Health at about £2,750,000. The relief given to Scottish farmers differs from that given to English and Welsh farmers, owing to differences in the system of rating.

BETTING TAX.

FOLLOWING the introduction of the 1923–4 Budget the Government appointed a Select Committee of 19 members to consider the question of imposing a duty on betting and to report whether such a duty is desirable and practicable. Evidence as to the present position of the law with regard to betting, which is undoubtedly in a rather chaotic condition, was given to the Committee by a representative of the Home Office. The general policy of the law seems to have been to prohibit facilities for betting where it was likely to do most harm and to discourage it by the indirect means of rendering betting contracts unenforceable and providing facilities for the recovery of money deposited for bets in certain cases. The extent and kinds of betting most frequent and details of the administration of the law formed the heads of evidence given by the chiefs of the Police Force. A scheme framed by the Board of Customs and Excise for levying a duty on betting was submitted to the Committee by Sir Horace Hamilton. This scheme was based on the method adopted for the entertainment tax and proposed an *ad valorem* duty. In the case of credit betting stamps could be used, but the majority of credit bookmakers could be taxed on their returns, which would be submitted to the Board and checked. For cash betting the scheme proposed that bets should be made on stamped tickets. The witness thought that if a duty on betting were imposed street betting must be abolished, and all betting carried out on licensed premises and the practice rendered non-criminal. Two licences were proposed, one for each professional bookmaker and one for each betting office. The personal licence would be similar to that held by an auctioneer. A scheme was submitted, at the Committee's request, by Sir John Pedder, of the Home Office, giving the outline of a scheme for the licensing of betting offices. This scheme proposed that any person who wished to set up a betting office would have to apply to a Court of Summary Jurisdiction for the registration of the premises. Renewal of registration would be necessary each year, and it was suggested that there should be power to disqualify betting offices and bookmakers. Evidence was also given by several prominent churchmen, representatives of the turf, bookmakers, &c., and a demonstration was given to the Committee of the workings of a totalisator. A number of machines were exhibited, and the operation of a totalisator on a race-course in Australia was shown by means of a cinematograph. At the time of going to press the Committee's report had not been published.

BRITAIN'S DEBT TO AMERICA.

BEFORE Mr. Lloyd George's Coalition Government fell, it had been decided that Sir Robert Horne, the Chancellor of the Exchequer, should during the recess proceed to Washington to discuss with the United States Government the question of the terms for the repayment of Great Britain's war debt of £856,000,000 to the Republic. In his place, Mr. Stanley Baldwin, accompanied by the Governor of the Bank of England, undertook the mission, and after several interviews with the Funding Commission appointed by Congress, returned to England with their proposals on the subject. These were placed before Mr. Bonar Law's Cabinet, and, despite differences of opinion as to the wisdom of accepting the terms without a further attempt at modification, were accepted, largely owing to the strong advocacy of Mr. Baldwin. Subsequently Congress approved the scheme, and the first payment by Great Britain was made during the course of the year.

The terms provided for the payment of 3 per cent. interest on the loan for the first 10 years, and for the following 52 years of 3½ per cent., plus ½ per cent. for sinking fund throughout the period. This meant a payment of about £30,000,000 a year, which not only paid interest but went to the reduction of the principal, the debt being extinguished in the 62 years. The original proposal of the British Government was to pay interest at 2½ per cent. with an additional ½ per cent. for sinking fund, or a total of about £21,000,000 a year. The alternative to the acceptance of the American conditions was the payment for interest alone of £50,000,000 a year, and it was recognised in financial circles that such a burden would be intolerable. "The strain of paying the five per cent. on the whole of the debt," declared Mr. Baldwin on his return from Washington, "would be greater than this country could carry."

BRITISH AND AMERICAN TRADE.

THE figures in the following tables are taken from the monthly review of the Midland Bank (London). The purpose of the figures was to emphasise the extraordinary economic conditions and to show that Britain and America, sharing between them one-half of the World's trade, are the only countries where the exchange is relatively stable in the midst of a world-wide debasement. In publishing the statistics the compiler stated that 39 countries have been included in the term "World," the exports and imports of those countries representing 90 per cent. of the trade of the whole world. The relative percentages of the trade of the remaining 10 per cent. would probably affect those stated below in only a very slight degree. It will be seen that the value of the "World's" imports is greater than that of its exports. This is accounted for by the fact that Exports are taken at F.O.B. values and Imports at C.I.F. values, an explanation of which is given on p. 507.

1920	7,376,000,000	1,334,000,000	18·1	2,214,000,000	30
1921	4,353,000,000	703,000,000	16·2	1,123,000,000	25·8
1922	4,170,000,000	720,000,000	17·3	856.000,000	20·5

THE BRITISH LEGION.

A Conference of Delegates from the various branches of the British Legion was held at Queen's Hall, London, on May 20–22, 1923, Mr. T. F. Lister being in the Chair. Amongst the resolutions carried were: compulsory employment of disabled ex-Service men in place of the King's Roll, establishment of Agricultural Wages Boards, elimination from press reports of the title "ex-soldier" then appearing in Police Court cases, dissatisfaction with Government's measures to deal with unemployment, and adherence to the principles of the League of Nations. An important alteration was carried in the rules of the B.L. The aim and object in Rule 3 (4) were altered to: "To press that those who assisted to save the country in its hour of need be granted the right to work, or be granted maintenance, instead of appealing to the Poor Law Authorities." The old sentence ran: "To press the claims of ex-Service men for employment, and to enlist the co-operation of employers and Trade Unions for this purpose."

Lt.-Col. G. Crossfield, D.S.O., T.D., was elected Vice-Chairman. The 1924 Conference will be held in London again. The Prince of Wales is Patron and Earl Haig President. Col. E. C. Heath is General Secretary. The *Offices* are at 26, Eccleston Square, S.W. 1.

BROADCASTING.

Great developments have taken place during the past year in connection with broadcasting. The number of broadcasting stations has been increased to eight, situated in London, Bournemouth, Cardiff, Birmingham, Manchester, Newcastle, Glasgow and Aberdeen, and experiments have been made by the British Broadcasting Company in the direction of establishing relay stations intended to receive and retransmit the programmes of the main stations. The entertainments provided by the Company have improved in quality during the year, notable performances being the broadcasting of operas from the National Opera House, Covent Garden. Difficulties, however, were experienced owing to the opposition of other entertainment bodies, notably those representing theatrical interests, concert givers and concert agents. The Entertainment Industry Joint Broadcasting Committee, representing all branches of the industry, decided to stop the broadcasting from theatres of plays and similar entertainments and to prohibit concert artists from performing at the broadcasting studios. The National Opera Company, however, continued to allow their operatic performances to be broadcast. Much confusion arose with regard to the question of licences, no provision having been made for the issue of licences to persons who made their own sets or assembled them from ready-made parts. In April last the Broadcasting Company estimated the number of persons with wireless sets not possessing a licence at 200,000. Negotiations between the Postmaster-General and the Company having failed to settle the question of licences for these home constructors of sets, a Government Committee was appointed to consider (*a*) Broadcasting in all its aspects; (*b*) contracts and licences which have been or may be granted; (*c*) the action which should be taken upon the determination of the existing licence of the Broadcasting Company; (*d*) the uses to which broadcasting may be put; (*e*) the restrictions which should be placed upon its use and development. Following the report of the Committee an agreement was arrived at between the Postmaster-General and the Broadcasting Company which provides, *inter alia*, for the issue of constructors' licences for a limited period at an annual fee of 15*s*., as compared with 10*s*. charged for B.B.C. licences, provided that no parts manufactured elsewhere than in Great Britain and Northern Ireland are knowingly used in the receiving apparatus. The fees for the B.B.C. licences and the experimental licences are to remain at 10*s*. per annum. The Company will receive 12*s*. 6*d*. out of the 15*s*. licence fee and 7*s*. 6*d*. out of the 10*s*. fee. These arrangements are to continue till the end of 1924, when it will be possible for the single form of licence recommended by the Committee to be introduced, if it should then be thought desirable. The licence held by the Company will be extended, under suitable conditions, to the end of 1926, and any profits earned beyond 7½ per cent. on its capital are to be surrendered to the Post Office.

CHEAPER GOVERNMENT.

The Estimates for the Civil Services and Revenue Departments for the year ending March 31, 1924, show a reduction of £88,184,994 on those of the previous year, the respective totals being

1923-24 ....£314,134,754
1922-23 ....£402,319,748

Of the total estimate, £298,134,754 is allocated to ordinary services and £16,000,000 to transitory services arising out of the War. Civil Services, including unclassified services cost, £251,670,043, and the Revenue Departments £62,464,711.

The new *Civil Service Estimates* compare as follows with those for 1922-23:—

DECREASES.

	Estimate 1923-24. £	Decrease on 1922-23 £
Royal Palaces	108,965	11,435
House of Commons	330,783	6,046
Treasury	324,952	39,517
Home Office	365,969	2,987
Foreign Office	203,707	40,972
Colonial Office	163,329	6,278
Board of Trade	1,032,548	836,700
Overseas Trade Dept.	299,960	37,963
Mercantile Marine Services	503,552	139,163
Mines Department	162,727	7,557
Ministry of Agriculture	1,764,451	47,153
Ministry of Transport	123,355	88,595
Exchequer and Audit Dept.	153,100	5,900
Board of Control	479,396	49,679
Registrar-General's Office	107,385	46,259
Stationery and Printing	1,644,592	1,033,090
Office of Works	557,080	11,420
Law Charges	249,798	10,730
Supreme Court of Judicature	537,534	27,842
Land Registry	91,674	10,379
County Courts	84,442	119,060
Police (England and Wales)	6,160,591	131,434
Board of Education	41,934,047	3,340,953
British Museum	291,816	9,689
Scientific Investigation	196,471	1,303
Scientific and Indus. Research	276,863	20,574
Diplomatic Services	1,231,965	219,988
Colonial Services	1,544,223	353,375
Middle East Services	8,668,500	2,507,600
League of Nations	92,190	87,755
Ministry of Pensions	73,655,246	16,335,754
Government Hospitality Fund	20,000	5,000
Ministry of Health	19,504,210	3,008,352
Ministry of Labour	16,187,005	1,854,582
Export Credits	250,000	250,000
Customs and Excise	5,009,000	211,000
Inland Revenue	6,582,211	572,117
Post Office	50,873,500	2,948,950

INCREASES.

	Estimates 1923-24. £	Increase on 1922-23. £
Diplomatic, &c., buildings	258,050	142,240
Housing schemes	198,650	146,630
Memorials	17,040	17,040
House of Lords Offices	58,170	1,387
Forestry Commission	163,000	143,000
Mint, including coinage	950,000	193,990
Office of Secretary for Scotland	166,821	47,110
Scottish Board for Agriculture	331,242	55,289
Oversea settlement	1,206,200	48,700
Old Age Pensions	23,200,000	585,000
Royal Commissions	95,000	44,000
War Graves Commission	769,000	412,239
Scottish Board of Health	2,493,730	781,308

DISAPPEARING LIABILITIES.

	Estimate, 1923-24.	Decrease on 1922-23.
Disposal and Liquidation Commission	£1,300,000	£3,000,000
Shipping Liquidation	2,000,000	6,751,900
Railway and Canal (War) Agreements Liquidation	1,965,220	31,519,780
Coal mines deficiency	1,500,000	3,500,000
Prize claims	50,000	180,000
Coal Industry Subvention	2,500	7,500
Compensation. Damage by enemy action	2,600,000	2,300,000
Treasury securities deposit scheme	—	38,600
Miscellaneous War Services (Foreign Office)	—	397,000

Ireland, since the establishment of the Free State, is costing the British taxpayer less. The upkeep of the Lord-Lieutenant's household, which last year cost £5,246, no longer concerns the Irish Department, whose estimate this year, at £90,945, shows a decrease of £1,283,363. A saving of £27,392 is also effected in services for Northern Ireland; the cost of the Irish Land Commission falls by £280,835 to a total of £1,821,515; and Royal Irish Constabulary Pensions drop from £2,000,112 to £922,424, a reduction of £1,077,688. Grants-in-aid for Northern Ireland are estimated at £2,450,000, a decrease of £2,050,000. On the other hand compensation for Criminal Injuries in Ireland has risen by £1,055,010 to £3,075,010, and the Ex-Service Men (Ireland) Grant by nearly £150,000, to £1,203,772. In these items, however, are included various other grants, which last year were shown separately.

Estimates for the India Office (£120,000) and the Secret Service (£200,000) remain unchanged. Charges which have disappeared include those for Cabinet offices, the Privy Seal office (£6,525 last year), War Memorials (£2,500), Treasury chest fund (£6,828), repayments to the Civil Contingencies Fund (£48,742), and Emergency Services (£9,000).

DECREASE IN PERSONNEL.

The number of persons employed in the Navy, Army and Air Force, and in Government departments (other than industrial staff) *Before the War*, at the *Armistice*, and on *April* 1, 1923:—

	1914 (Pre-War).	Nov. 11, 1918.	April 1, 1923.
Navy	174,500	436,000	99,500
Army	145,600	3,996,000	156,000
Air Force	—	293,000	28,000
Admiralty	4,400	20,457	8,203
War Office	2,800	18,324	4,685
Air Ministry	—	4,646	1,644
Post Office	208,900	197,315	181173
Pensions	—	8,561	23552
Inland Revenue	15,800	16,949	20,410
Labour	4,400	8,484	15,462
Customs and Excise	10,300	11,164	11,640
Disposals	—	65,142	1,037
Health	3,200	3,233	3 871
Trade	2,500	7,036	5,030
Food	—	9,181	90
Shipping	—	2,690	319
Agriculture and Fisheries	3,000	3,451	2,480
Works	700	2,050	3,013
Other departments	21,900	39,342	22,389
Totals	599,000	5,143,025	588,498

COAL EXPORTS.

The highest total of coal exports from Great Britain was reached in 1913, when 73,400,000 tons were sold to other countries, together with 1,235,000 tons of coke, and 2,053,000 tons of patent fuel. Bunker shipments for overseas voyages amounted to 21,024,000 tons. The respective figures for 1922 were: exports, 64,198,000; coke, 2,514,000; manufactured fuel, 1,227,000; bunkers, 18,259,000. In weight, coal was three-quarters of the total pre-war quantity of exports from Great Britain; but its value (£54,000,000) was not much more than one-tenth of the total received for our produce and manufactures. As cargo, coal is, however, a great help to British trade. Without it vessels bringing wheat, meat, cotton, ore and timber from abroad would have to go out in ballast. Freights are on the round voyage, and the carriage of coal helps to reduce homeward transport charges. Employment to British shipping was not before the war so marked a feature of the export trade in coal as might have been expected. Nearly 66,000,000 tons of coal and patent fuel went to European and Mediterranean destinations, more than 60 per cent. being carried in foreign vessels. On the other hand, 19·6 million tons sent long distances overseas were practically all shipped in British ships. The bulk of this coal went to the Argentine, Brazil and Chile. South American imports altogether amounted to 7·6 million tons. To West and South Africa and the Islands 1·9 million tons were sent. Less than 1,000,000 tons went to countries east of Suez, and North and Central America took about 100,000 tons each.

OIL FUEL AND COAL EXPORTS.

The growing use of oil fuel for ship propulsion is illustrated by the following figures taken from Lloyd's Annual Report for 1922–1923:—

On Lloyd's Register.	Gross Tonnage.
1914, July	1,310,209
1919, ,,	5,336,678
1920, ,,	9,359,334
1921, ,,	12,796,635
1922, ,,	14,464,162
1923, ,,	15,792,418

Steamers burning oil fuel in 1922–23 would have required 24,000,000 tons of coal if coal-fired.

THE CO-OPERATIVE MOVEMENT.

At the end of Sept., 1923, it was officially stated that the membership of British Co-operative Societies was 4,569,089, a decrease of 29,648 in twelve months. The amount of share capital had decreased by £1,473,511 to £81,629,702, whilst the total deposits, or loan capital, was £38,778,948. The Fifty-fifth Annual Conference of the delegates from the Co-operative Societies was held at Edinburgh on May 21–23, 1923, when 1,560 attended, representing 570 societies. The Co-operative Union actually consists of 1,300 societies. An endeavour is still being made to make the Co-operative Movement a part of the Labour Movement, and a considerable number of members are common to each. Resolutions dealt with Trade Boards Acts, which the Congress wanted extended instead of limited. The "Right to Work" principle was accepted as a remedy for unemployment. Objection was made to the occupation of the Ruhr, and the Government was to be urged to open up trade extensively with Russia. A scheme for the establishment of a Co-operative national daily newspaper was remitted back to the individual societies for further consideration. The Movement has four M.P.'s elected as Co-operators in the House of Commons.

CO-PARTNERSHIP.

On Dec. 31, 1922, the Ministry of Labour understood there were 236 schemes (225 certainly in operation) of Profit Sharing or Co-partnership. The net gain on the year was two, being six new, less four abandoned. From the returns received from 173 schemes, it seems that 116,441 persons were concerned in them, and that the average cash bonus worked out at £6 16*s.* 9*d.* per head. As far as is known there have been 467 schemes begun, of which 236 are still more or less in active currency. With the hope of extending the number of firms with co-partnery schemes, several conferences have been held. The Labour Co-partnership Association met in June in London, and in July at Oxford, whilst the Industrial League and Council met at Oxted in

July. Trade Unions are generally against Copartnership. The delegates of the Trades Union Congress instructed the General Labour Council in Sept., 1923, to investigate and report upon the subject.

THE COST OF LIVING.

APPARENTLY the cost of living, as compared with the pre-war standard, is becoming settled at about 70 per cent higher. Whether the official figures are reliable is a matter of question there is a feeling that the methods adopted in arriving at details are not so broad as they should be. The British methods lack the wonderful system of the U.S.A. Dept. of Labour in dealing with retail prices and family living costs. So many industries have adopted the official figure as the basis for determining the wages figure that a change of 5 points in the monthly announcement means a corresponding rise or fall in pay. The railwaymen, for example, have an increase of 1s. weekly when the figures rise 5 points, with a corresponding reduction for a fall. The Civil Service likewise suffers an amendment of the bonus half-yearly. The official figures of the cost of living and the number of workpeople whose wages were affected monthly are as follows :—

Month.	Index Figure.	Work-people.	Weekly rise or fall.
			£
Whole 1921	165 to 92	7,175,000	−6,041,000
" 1922	92 to 80	7,578,000	−4,206,000
January, 1923 ...	78	1,142,000	−13 600
February	77	485,750	−63,580
March	76	1,766,000	−143 510
April	74	2,295 100	−228,100
May	70	3,116,100	−235,600
June	69	3 489,700	−273,850
July	69	1,839,750	+65,195
August	71	431,850	+9,005
September	73	...	+10,000
October	75	1,160,000	...

In most months there have been increases as well as decreases; the net figures are given above.

DISARMAMENT PROPOSALS.

THE question of disarmament has continued to occupy a prominent place among matters of public interest during the past year. Much important practical work has been accomplished by the Mixed Armaments Commission of the League of Nations in the direction of drafting a treaty of mutual guarantees and disarmament, and at home much prominence was given to the subject of disarmament as the result of a debate in the House of Commons towards the end of July, on a motion of the Labour Party. The terms of this motion were as follows :—"That this House deplores the enormous and growing expenditure on the naval and air forces, and on other military preparations, which is beginning once more a competition in armaments, and is depleting resources that should be available for expenditure on education, public health, and similar social and human services, and, recalling the pledges of political leaders and the expectations of the nation that the great war was to end war, urges the Government to take immediate steps to call an international conference to consider a programme of national safety based on the policy that by disarmament alone can the peace and liberty of small and large nation alike be secured." An amendment was moved to substitute the following terms for those o the resolution :—"That this House views with alarm the danger of renewed competition in armaments among nations, and is of opinion that at the earliest favourable opportunity His Majesty's Government should use its influence to the utmost extent, both through the League of Nations and otherwise, to prevent a recurrence of such international competition and bring about a general limitation of armaments." The difference between the motion and the amendment, as the Prime Minister pointed out, was really in essence a difference of time, and the Government were of opinion that an international conference would not lead to success until a settlement of European conditions had been effected. The motion was defeated by 286 votes to 169.

The work of the Armaments Commission of the League of Nations resulted in the approval of a Draft Treaty for submission to the Assembly of the League embodying the principle of mutual guarantees of assistance as a basis for reduction of armaments. The treaty provides, *inter alia*, for a mutual guarantee of assistance in case of aggression for nations of the same continent, if the State claiming assistance shall have reduced its armaments on an agreed scale. The Council of the League, in the event of alleged aggression, is to decide which State is the aggressor, and then the form which the assistance shall take. Provision is made in the Treaty for supplementary defensive agreements between two or more States which have reduced their armaments, but these must be submitted to the Council of the League for approval. After approval by the Assembly of the League the Treaty will require ratification by the Government of each State.

THE DISTRIBUTION OF HONOURS.

IN regard to the most important section of the Honours conferred both at the New Year and on the King's birthday, a new method of recommendation came into operation last year as the result of the report of a Royal Commission appointed "to advise on the procedure to be adopted in future to assist the Prime Minister in making recommendations to the Crown of names of persons deserving special honour." With one exception, the members urged that a small Committee of the Privy Council should consider the names of all persons upon whom it was proposed to confer honours on account of political services before those names were submitted to the Sovereign. Appended to each name was to be a statement of the service for which the recommendation was made, a statement by the Patronage Secretary or Party Manager that no payment, or expectation of payment, to any Party or political fund was directly or indirectly associated with the recommendation, and the name and address of the person who originally suggested the name of the proposed recipient. Should the Committee report against any name and the Prime Minister be determined still to recommend that name, the Royal Commission proposed that the King should be informed of the Committee's report. The Government immediately adopted these suggestions, and in both Honours Lists the announcement of the Prime Minister's recommendations was delayed until they had been considered by a Committee of the Privy Council. This body at present consists of Viscount Ullswater (the Chairman), Lord Mildmay and Sir Evelyn Cecil, M.P.

The appointment of the Royal Commission was a sequel to discussions which had taken place in the House of Lords, and evidence was tendered by Lord Balfour, Mr. Asquith, Mr. Lloyd George and Mr. Bonar Law (Lord Rosebery being unable to attend owing to his health), by those responsible for the Party organisations, and by the Duke of Northumberland and the Earl of Selborne, who had been prominent in raising the question. Each of the Prime Ministers examined, as well as the Patronage Secretaries and Party Managers, stated that he had never been cognisant of any bargain or promise that an honour would be contingent on a contribution to Party Funds. The Commissioners declared that there had been for some time persons whom they stigmatised as touts who claimed to be able to secure honours in return for specified payments. Consequently they recommended the imposition of penalties both on touts and those promising payments for honours, and this proposal also the Government accepted, legislation with this object being introduced in the House of Lords.

HOUSING.

PROVISION OF ACCOMMODATION.

THE shortage of housing accommodation is still very great, and in spite of the large number of small houses provided in the last two years, chiefly by municipal authorities, the problem of housing the people appears to be very little nearer a solution than when building started after the war. With the object of encouraging the building of small houses the Housing Act, 1923, has been passed, which provides for the payment of Government grants and assistance by local authorities by way of loans, guarantees, etc. The Government grants are to be paid to local authorities where the latter provide houses themselves or assist private enterprise, and amount to £6 per house per year for 20 years, except where the total assistance in respect of a house built by private enterprise is less than the equivalent of £6 for 20 years, in which case the Government contribution is to be the equivalent of the assistance given by the local authority. The assistance given by the local authority may amount to more than £6 for 20 years, but the excess above this sum must be met locally. As regards the houses provided by private enterprise, the Minister of Health is required, before approving a grant, to satisfy himself that the need cannot be met without assistance. This assistance may take one of three forms, *viz.*, (*a*) A lump sum grant per house; (*b*) An annual payment for not more than 20 years to the person by whom the rates are payable; (*c*) Repayment to a building society of advances made for building or the purchase of a house.

The houses for which assistance will generally be available must have a "superficial area" within the following limits: Two-storey cottage—minimum, 620 square feet, maximum, 950 square feet; one-storey cottage, or bungalow, or flat—minimum 550 square feet, maximum 880 square feet. But where the Minister of Health is satisfied that having regard to special circumstances existing in any area smaller houses are necessary, the minimum sizes which will be permitted to rank for subsidy are 570 square feet and 500 square feet respectively. The superficial area is the area within the containing walls of the house, including chimney breasts, and in the case of two-storey houses is the combined area, as so measured, of the two storeys. The area of outbuildings which provide accommodation necessary to the occupation of the house is also included. Every house or flat must be provided with a fixed bath, except where otherwise approved by the Minister of Health on the recommendation of the local authority. The Act also gives new powers to local authorities to advance loans to builders and others for the construction of houses and extends the limits for loans under the Small Dwellings Acquisition Acts.

DECONTROL.

THE operation of the Rent Control Act of 1920 is to be continued until June 24, 1925, subject to the provisions of the Rent Restrictions Act passed during the past year. In certain cases, however, houses are excluded from the application of the Act of 1920 (called the principal Act), viz., houses which come into possession of the landlord, except where possession is secured under a judgment given on the ground of non-payment of rent, and houses which are leased after the passing of the Act for a term of not less than two years expiring after June 24, 1926. The provisions of the principal Act with regard to the recovery of possession are considerably modified, and the landlord may now recover possession where he reasonably requires the house for occupation as a residence for himself; or for a son or daughter over 18 years of age; or for any person *bonâ-fide* residing with him; or for some person engaged in his whole time employment or in the whole time employment of some tenant from him, or with whom, conditional on housing accommodation being provided, a contract for such employment has been entered into. The Court, however, must be satisfied that alternative accommodation is available, except in cases where the landlord requires possession for himself or for children over 18 years of age; but where the landlord did not become the landlord before June 30, 1922, the Court before making an order for possession must be satisfied that greater hardship would be caused by allowing the tenant to stay than by giving the landlord possession.

Provision is made in the Act for a suspension of an increase in rent in cases where a tenant obtains a certificate from the sanitary authority that the house is not in a reasonable state of repair and a copy of such certificate is served upon the landlord. In cases of sub-tenancies a further increase of 10 per cent. of the rent of the sub-let part is permitted. Tenants are protected in cases where exorbitant charges are made for furniture or other articles taken over as a condition of the grant of a tenancy, and houses let with furniture or attendance are not to be excluded from the provisions of the Act unless the rent fairly attributable to the furniture or attendance forms a substantial portion of the whole rent. Part II of the Act deals with restrictions on the right of possession in certain cases after the expiry of control in 1925 until June 24, 1930. If proceedings are taken against a tenant the Court may refuse to make an order for possession if it thinks the proceedings for ejectment are harsh or oppressive, or that exceptional hardship would be caused to the sitting tenant. Reference Committees may be established by the Minister of Health to assist the Courts in connection with questions of rent, character or condition of dwelling houses.

THE INTERNATIONAL LABOUR ORGANISATION.

By the Preamble to the Treaty of Peace the International Labour Organisation was set up as part of the League of Nations to improve conditions of labour "involving such injustice, hardship and privation to large numbers of people as to produce unrest so great that the peace and harmony of the world are imperilled." Although still in its infancy the Organisation has already produced good results, and in many countries all over the world workers now enjoy better conditions as a result of its efforts. The estimated cost for 1924 was rather less than £280,000, of which Great Britain bears a share.

The machinery created to carry out the objects of the Organisation consists of a Conference, which meets every year, composed of four delegates from each of the 57 States belonging to the Organisation, two of these delegates in each case representing the Government, and one each the employers and the workers. The fifth of these Conferences was held at Geneva in October last. The decisions of the Conference, which to be effective must be reached by a two-thirds majority, take the form of a Draft Convention—a precise treaty on labour conditions for signature by each State—or of a Recommendation, laying down the broad lines which the legislation in each State should follow on a particular question connected with labour conditions. Within 18 months of the closing date of the Conference, those Draft Conventions and Recommendations must be laid by the Governments before the Parliaments in their countries.

The latest figures show that 86 ratifications of Draft Conventions have been formally registered with the Secretary-General of the League of Nations, while 23 have been authorised but not yet formally communicated. In 131 cases ratification has been recommended by Governments to Parliaments but approval has not yet been signified, while 89 measures have been finally adopted by legislative authorities to give effect partially or wholly to the provisions of the Draft Conventions and Recommendations, and 74 others have been proposed and are before different Parliaments.

INTERNATIONAL MIDDLE-CLASS CONGRESS.

Dr. Tschumi, of the Swiss National Council, gave the inaugural address at the establishment of the International Middle-Class Union at Berne, on Sept. 21, 1923. The Congress was formally established and registered under the Swiss Law. Article 2 of the Constitution reads, "The I.M.-C.U. is based upon production, private economy, and independent labour, opposing energetically any tendency menacing its existence and its natural development. The I.M.-C.U. aims at grouping artisans, industrialists, tradesmen, intellectual workers, &c., of all countries for the defence of their economic and other interests." A Committee was appointed to draw up an agenda for the Congress that will be held in Berne during 1924.

INTER-PARLIAMENTARY UNION.

The Twenty-first Conference of the Inter-Parliamentary Union opened at Ustari, Copenhagen, on Aug. 15, 1923. Dr. Moltesen, Member of the Danish Folketing and head of the Danish Delegation, was elected President and welcomed 800 delegates and others. Representatives attended from all countries, the British Delegation of sixteen including Lord Treowen (President of Mission), Lord Rathcreedan, Sir Park Goff, Mr. Kenworthy, Sir E. Pryce-Jones, Sir Beddoe Rees, and General Spears. A Swedish resolution to ask America to enter the League of Nations was defeated, but one suggesting the co-operation of an impartial international authority dealing with the economical and fiscal reconstruction of European States was carried. The permanent Committee of the Inter-Parliamentary Union was instructed to enquire into, for report to next Conference, the question of Parliamentary control over foreign policy, and also to study and report upon colonial mandates and policies. M. Neergaard, Danish Prime Minister, stated that the Union was to work for a future in which international conflicts were to be settled by arbitration and not by arms.

LABOUR.

AMERICAN FEDERATION OF LABOUR.

The American Federation of Labour held its 43rd Annual Convention at Portland, Oregon, U.S.A., on Oct. 1–9, 1923, and reported a big drop in membership of trade unions. The comparative figures are :—

1897	264,825
1911	1,761,835
1919	3.260,068
1920	4,078,740
1923	2,926,468

The drop in membership coincides with that of the British Trade Union Congress since 1921. The Annual Convention was against active participation of the State in industry, continuation of child employment in mines and factories, Klu Klux Klan and Fascisti Movements. The American Federation of Labour is not a socialist body. Mr. Samuel Gompers (born in London, 1850) has been re-elected President for many years.

INDEPENDENT LABOUR PARTY.

The Independent Labour Party's Annual Conference was held at Queen's Hall, London, on April 1–4, 1923, Mr. R. C. Wallhead being in the Chair. The Independent Labour Party is quite apart from any Trade Unions, and must be regarded as one of the Socialist Parties in the country. Total Prohibition was rejected by 263 to 152, the previous question was carried by 93 to 90 on a resolution to forbid Labour M.P.'s to attend functions organised by political opponents, approval of the attempt by Vienna to re-construct a Second International by 265 to 52, agreement to salary of £1,000 per annum to the Editor of *The New Leader* (established Sept., 1922), withdrawal of occupation of the Ruhr by all the Allies, or at least by the British, and various other proposals for the establishment of a Socialist Commonwealth. Various statements have been issued by the Independent Labour Party on National and International subjects. Two summer schools of study were held at Scalby, Scarborough, and Hoddesdon, Herts. In Sept., 1923, Mr. George Young presented the

Independent Labour Party with Formosa Place, Cookham, to be used as a week-end retreat for leaders.

INTELLECTUAL WORKERS.

A difficulty is being found in dealing with the foremen and directing officers in industry, so far as Labour politics are concerned. One section would keep them out; the other would enrol them as workers. On April 7, 1923, an International Congress of Intellectual Workers opened at the Sorbonne, Paris. Eight different countries, including England, were represented by delegates from societies of intellectual workers, whilst eleven other countries were officially noted as having observers. The resolution was carried to found an International Confederation of Intellectual Workers, and a Committee was appointed to draft rules and deal with the creation and affiliation of national societies. M. Romain Coolus of Paris presided over the Congress.

LABOUR PARTY.

The 23rd Annual Conference took place at Queen's Hall, London, W., on June 26–29, 1923. About 900 delegates, representing an affiliated membership of 3,310,236 (a decrease from 4,010,361 of 1922), met under the presidency of Mr. S. Webb, M.P. A motion was adopted that to be eligible as a delegate one must not be a member of any organisation supporting for any political office a candidate who was not endorsed or approved by the Labour Party. Application for affiliation by the Communist Party was rejected by 2,880,000 to 366,000. A resolution forbidding Labour Whips to be given to Mr. Newbold, the Communist M.P., was carried by 2,270,000 votes to 219,000. Instructions that Labour M.P.'s were to oppose all armament votes were negatived by 2,924,000 to 808,000. Discussion of the suspension of four Labour M.P.'s from the House of Commons was refused by 2,882,000 votes to 430,000. Preparations were put in hand for a special election fund to meet the costs of the next General Election Proposals were carried in favour of a Capital Levy, criticism of the Government's Educational Policy, and dealing with general matters, *e.g.* Trade Boards, employment of aliens on ships, pure milk, foreign policy, &c. Mr. J. R. Macdonald, M.P., was elected the new Chairman for the year.

MINERS.

The Miners' Federation of Great Britain held their Annual Conference at Folkestone on July 10–14, 1923, with Mr. Herbert Smith in the Chair. Wages had been on the minimum scale during 1922, but by July, 1923, five districts, including South Wales, had received advances. Emphatic refusal was given to consider any proposals to return from the present seven-hour day to the old eight-hour day. Resolutions were carried in favour of two weeks' holiday with full pay, an enquiry into miner's blindness (*nystagmus*), any future wages' agreement to include a clause for compulsory membership of Trade Union, present 1*d.* levy on every ton of coal that expires in 1925 to be made a perpetual one and to be used for miners' pensions, apart from the Old Age Pensions and welfare improvements. The Miners reported a drop in membership from 839,902 in 1922 to 784,617 in 1923. During August, 1923, 44,306 coal mining employees were registered at the Labour Exchanges as unemployed. In the first eight months of 1923 there were 114 strikes, in which 142,000 mining employees were involved; these caused the loss of 1,004,000 working days.

RAILWAYMEN.

A slight decrease is reported in the membership of the three Trade Unions of Railwaymen from 464,784 in 1922 to 447,374 of 1923. The National Union of Railwaymen held their Annual Conference at Crewe on July 2–7, 1923. Mr. J. Marchbank was in the Chair, and he was re-elected for next year's Conference at York. Apart from resolutions in favour of nationalisation, higher wages, a shorter working day, and amalgamation of all Railwaymen's Unions, welcome was given to the scheme of the G.W.R. to help employees to purchase their houses; the Company would lend up to 90 per cent. of value of the house at 5 per cent., the amount of loan and interest being repayable over a period of 20 years. During 1922, 234 employees were killed and 15,908 injured whilst working on the railways of Great Britain. The number of unemployed in the Railway Service as registered with the Labour Exchanges on August 27, 1923, was 10,764.

RED INTERNATIONAL LABOUR UNIONS.

A conference was held in Memorial Hall, Farringdon Street, London, on April 14, 1923, attended by 223 delegates representing 126 branches of various Trade Unions. This very advanced section of the Labour Movement was represented by Mr. Frank Smith at the Second World Conference in Petrograd in November, 1922. Resolutions were carried in favour of a 44-hour week, a minimum weekly wage of £4 for adult workers, and full maintenance of all unemployed. At a mass meeting that followed, Mr. Tom Mann made an appeal for a "general strike." On May 12, 1923, the Conference was resumed, when the principal resolution carried was that of asking the dockers to strike in the case of any war with Russia. The leaders of this very small section of the Trade Union movement are far from unanimous on the question of politics to be adopted.

SOCIAL DEMOCRATIC FEDERATION.

Mr. G. M. Bell presided over the 37th Annual Conference of the Social Democratic Federation at Manchester Hotel, London, on August 6–9, 1923. Amongst the usual resolutions carried in favour of socialising and nationalising various forms of industry was one dealing with the railways, in which the present grouping of the railways was held to be "a menace to the interests of the community in every direction" and demanding that in case of nationalisation provision should be made for representation of railway employees in the management. The resolution carried on National Defence favoured a democratic force for national defensive purposes in place of a professional and standing army; there should be universal military training, but no private production of armaments; the tendency to oppose militarism and war by a policy of drift was viewed with apprehension. It is on this universal service question that the S.D.F. differs from the I.L.P. and the Labour Party.

TRADE DISPUTES.

Generally 1923, up to the time of writing, has been a quiet year in labour disputes. There have been only two outstanding cases, the boilermakers and dockers. Each might have been avoided without trouble. The lock-out of platers, riveters and caulkers began on April 30, 1923, and was continued in October, to enforce the agreement between the Employers' Federation and the Men's Federation in regard to overtime and piece rates. Approximately 10,000 workmen were directly affected, but indirectly every shipyard in the country was concerned. The dockers were mainly concerned in London and remained out from July 3 until Aug. 20 to protest against the reduction of 1s. a day, as previously agreed by their leaders. The Trade Unions concerned did not support the strikers. The men lost. The number of dockers on strike varied from 22,000 to 40,000, and they were instrumental in holding up much trade. Mining strikes were mainly in South Wales, and were organised to compel the Non-unionists to join the Trade Unions, in which endeavours they were temporarily successful.

Month.	Disputes.	Employees involved.	Days lost.
January, 1923	71	19,000	117,000
February	41	40,000	337,000
March	52	86,000	834,000
April	25	110,000	1,077,000
May	49	48,000	807,000
June	54	99,000	1,244,000
July	37	95,000	1,665,000
August	45	68,000	1,200,000
September	28	54,000	1,029,000
Whole years.			
1913	1,459	663,000	9,805,000
1921	763	1,801,000	85,872,000
1922	565	551,000	18,918,000

TRADES UNION CONGRESS.

The 55th Trades Union Congress was held at Plymouth on Sept. 3–8, 1923, with Mr. J. B. Williams (of the Musicians' Union) in the Chair. The comparative figures are:—

1866	143	Delegates, representing	199,374	members
1895	154	,,	960,931	,,
1922	171	,,	5,128,648	,,
1923	167	,,	4,369,258	,,

The drop during the last twelve months is due to unemployment and dissatisfaction with Trades Union management. The Congress was conspicuous for its return to wrangling of a personal nature in public and absence of discussion on important topics. The General Council was instructed to introduce a Bill into Parliament to enforce an 8-hour day and 48-hour week, but the resolution that the time had arrived for a 6-hour day was carried by 2,801,000 to 655 votes. *The Daily Herald.*—The Trades Union Congress at Southport 1922, recommended joint ownership with affiliation fee of 3*d.* per member per year. Continuous loss was reported on the paper, and the Plymouth Congress decided to continue the publication until the end of December, if the Trades Unions will find £12,500. The position was discussed at a private Session. *Resolutions.*—Opposition to longer Civil Service day—unanimously. Objection to Co-partnership, with instructions to General Council to enquire into profit-sharing schemes—unanimously. Registration of Theatrical Agents and Employers—unanimously. Evacuation of Ruhr by the Allies—unanimously. Disapproval of amendment of Trade Board Acts as proposed by Cave Committee. Pensions for the blind, mothers, &c. *Back to Unions.*—Acrimonious discussion arose over the campaign to get more members to join the Trade Unions and to stop the decline in membership Delegates accused one another of using meeting and propaganda for poaching upon allied societies and thus transferring from other Unions rath than breaking new ground. The drop in tw years for the Trades Unions attached to Congres was 2,021,000, or 33 per cent. *Officers.*—M Bowerman, M.P., retired under age limit fro Secretaryship, at a pension of £300 yearly. Mr Fred Bramley was elected, on fifth count, b 2,811,000 votes, to be the new Secretary at £75 per annum, on the understanding that he canno stand for Parliament. Miss M. S. Bondfield wa elected the new President at the first meeting o the new General Labour Council on Sept. 26.

UNEMPLOYMENT.

The Third Annual Conference of the Organise Unemployed took place in Coventry on April 9-11, 1923. The Conference was in favour of Direc Action and decidedly Socialist in tone. Abou 180 delegates from all parts of the U.K. wer present. The increasing number of unemploye has had a terrible effect upon the granting o Poor Relief. A White Paper has disclosed tha in March, 1923, 1,126,061 people were in receip of relief of some kind from the rates, as compared with 380,128 for March, 1914. In Wes Ham, during the year ended Aug. 31, 1923, th Guardians spent £2,051,698 on unemployme relief and paid in wages to the unemploye £77,199. In the insured industries alone fo Great Britain and Northern Ireland there hav been 1,200,000 registrations by unemploye persons monthly. On Aug. 27, 1923, the actua number was 1,354,750, an increase of 30,249 o the month.

WHITLEY COUNCILS.

The Joint Industrial Councils grew out of th recommendations of the Committee appointe in Oct., 1916, and presided over by Mr. J. H Whitley. The last Report shows that up t Dec. 31, 1922, 73 Joint Industrial Councils ha been established, and of them only 15 were no functioning. Unfortunately, the Whitley, o Joint Industrial, Councils are not in operatio in the Mining, Cotton, Engineering, and Shipbuilding Industries, but under the Railway Act of 1921 arrangements are in progress fo Whitley Councils between the companies an employees on the Railways. The number o workpeople directly covered by the presen Councils totals 3,750,000, and of those concerne in various arbitration Councils and bodies th figure is believed to approach 8,500,000 workpeople. District Whitley Councils have bee established as a decentralising feature, and eve in those industries where the national Council are in abeyance many local Councils are continuing their work.

LONDON'S DEBT.

LONDON'S debt substantially increased durin 1920–21, the total of £105,787,706 at the end o the financial year being £7,419,843 higher tha the aggregate twelve months earlier. Th greater part of the increase was in respect o Housing assisted schemes, which accounted fo £4,691,597. The debt of the London Count Council for purposes other than housing increased by £746,306, whilst the Metropolita Water Board debt rose by £1,553,139. Apar from housing, the debt of the remaining authorities showed a net increase of £349,803, the principal item being in respect of the Electricity Supply undertakings of the Metropolitan Borough Councils.

The charge for interest and repayment in respect of debt amounted in 1920-21 to £6,019,279 (interest £3,142,045, and repayment £2,877,234), of which £5,373,315 was borne by the rates, equivalent to a rate in the pound of 2s. 4·94*d*. Of the total charge £3,209,240 was in respect of rate services, £145,120 in respect of Housing assisted schemes, and £2,664,919 in respect of revenue producing undertakings. Commenting on the figures, the Finance Committee of the London County Council state:—

As the produce of a penny rate was not exceeded in 1920–21 no part of the deficiency on Housing schemes was borne by the Government, and the debt charges falling on the rates amounted to £127,251, equivalent to a rate in the pound of ·67*d*., as follows: Corporation of the City of London, £8,716; London County Council schemes, £59,913; schemes of Metropolitan Borough Councils, £58,622. As regards the other revenue producing services the revenues were insufficient to meet debt charges, and of the total charge of £2,664,919 no less than £2,036,824, equivalent to a rate in the pound of 10·71*d*. was taken from the rates. The debt charges in respect of the London County Council's tramways, amounting to £590,665, were wholly met out of the rates. The total debt charges of the Metropolitan Water Board in respect of 1920-21 amounted to £1,758,757, London's proportion being £1,414.825, and as the total deficiency exceeded the debt charges the whole of these amounts fell to be borne by the rates. The other revenue producing undertakings involved a total charge on the rates of £31,334.

The net debt attributable to the revenue producing undertakings, which exceeds 50 per cent. of the total net debt of London, was as follows:—

	At March 31, 1921.	Increase (+) or Increase (—) on 1920.
Water supply, London's proportion	£1,603.261	+ £1.553,139
Tramways	8,334,602	+ 248,032
Electricity supply	5,138.535	+ 401,011
Working-class dwellings	3,172,909	— 43,033
Housing assisted schemes	5,251,978	+ 4,691,597
Miscellaneous	86,104	+ 34,074
	£64,287,389	+ £6,884,820

The total net debt outstanding on rate services, i.e., excluding revenue producing services, on March 31, 1921, was £41,500,317, or 92 per cent. of the rateable value, as compared with £40,965,294, or 90·90 per cent. of the rateable value a year earlier. The Committee add that after 1921-22 the tendency to curtail capital expenditure will no doubt be reflected in the amount of debt, particularly for rate services, with the result that, in the absence of any new development calling for fresh expenditure, a reduction may again be looked for in the debt in the near future by reason of the normal operations of the sinking fund. The heavy charges on the rates in respect of debt for Tramways and Water Supply are exceptional, and will be very materially reduced in subsequent years as a result of the improving financial position of the Tramways undertaking and the exercise of the powers obtained by the Metropolitan Water Board in its Charges Act of 1921.

THE NATION'S WAR BURDENS.

NEARLY five years after the conclusion of hostilities on the European fronts, a comprehensive return of the nation's war burdens was supplied by the Treasury. Only in regard to casualties and shipping losses was it possible to give figures relating to the whole Empire. The total number of men enrolled was 9,496.370, of whom 6,211,427 belonged to the United Kingdom, 1,605.527 to the Dominions and Colonies, and 1,679,416 to India. The killed totalled 946,023 — 743,702 from the United Kingdom, 140,923 from the Dominions and Colonies, and 61,398 from India—and the wounded numbered 2,121,906—1,695,262 from the United Kingdom, 357,785 from the Dominions and Colonies, and 70,859 from India.

So far as expenditure was concerned, figures are only available for complete financial years, and for the five years which saw the beginning and end of the campaign the Exchequer issues were £9,590,000,000, of which £1,820,000,000 was raised from direct taxation, £910,000,000 from indirect taxation and other sources of revenue, £5,500,000,000 by borrowing at home, and £1,360,000,000 by borrowing abroad. The war loans to our Allies and the Dominions, excluding relief and other post-war loans, amounted to £1,644,000,000, France receiving £453,000,000, Italy £382,000,000, other Allies £659,000,000, and the Dominions £150,000,000.

The shipping losses of the British Empire were estimated at 8,000,000 gross tons, the value of the vessels (at about £70 a ton) and cargoes lost by enemy action being placed at £750,000,000, while the civilian lives lost at sea from the same cause numbered 22,000.

The expenditure of the United Kingdom on war pensions from Aug. 1, 1914, to March 31, 1923, was reckoned at £470,000,000, and the estimated capital liability after the latter date at 832,000,000. Until last March, the expenditure on mandated territories totalled £153,000,000.

Of a number of other items of expenditure resulting from British participation in the war, the most important are: £400,000,000 on unemployment, £225,000,000 on housing, £203,000,000 on the liquidation of the railway and canal agreements, and £101,500,000 on the bread subsidy. And the concluding intimation in this statement of stupendous totals was the brief declaration; "No German Colonies have been assigned to the British Empire."

WAGES—LONDON AND ABROAD.

AN interesting attempt to compare the level of real wages ruling for certain typical categories of adult male labour in London with that of similar workers in a number of capitals abroad has been made for the first time by the Ministry of Labour. The method employed by the Ministry aimed at ascertaining the quantities of each kind of food of working-class consumption that could be purchased in each city at the retail prices there current with the wages payable for given amount of labour measured in hours. The quantities so procurable were then expressed as index numbers, and these were combined to form an average for each of the trades considered. One set of averages was arrived at by taking the simple arithmetic mean of the index numbers and more valuable averages (shown below) were calculated by weighting the index number for each article by a figure corresponding to the relative importance of that article in the weekly food bill of working-class families in the United Kingdom. Current official statistics of retail prices of other factors in the cost of living have not yet been developed in the different countries sufficiently to enable a wider comparison to be made. For the purposes of the comparison statements were obtained by the Ministry from a number of capitals abroad showing for the 1st March, 1st April, and 1st June, 1923 (1) The rates of wages payable to adult workmen in 22 selected occupations; (2) the number of hours constituting a normal working day and week in those occupations; (3) the average retail prices of 19 articles of food ordinarily consumed in urban working-class families in most industrially developed countries. On the basis of this information, the following table was prepared showing the index numbers of comparative real wages, in detail for June, with averages for each of the three months, March, April and June, taking London as 100.

VACCINATION AND SMALL-POX.

THE past year witnessed renewed controversy in connection with the question of vaccination. The statement given below shows the vaccinations per cent. of the births, the total number of small-pox deaths registered, the small-po death rate per 100,000 of the population and th deaths from cow-pox and other effects o vaccination in England and Wales in each yea since the passing of the Public Health Act, 1871 The average annual number of small-pox death during the 17 years 1855 to 1871, was over 4,600 and excluding the epidemic year 1871 the average for the sixteen years to 1870 approached 3,500

Year.	Vaccinations per cent. of Births.	Small-pox Deaths.	Small-pox Death rate per 100,000 population.	Deaths from Cow pox and other effect of Vaccination.

RENT DECONTROL.

THE problem of rent decontrol caused th Government a good deal of political trouble, an was responsible for the resignation of thre ministers who, defeated at the general electio were unsuccessful when contesting vacanci created to enable them to return to the Hous of Commons. The first phase was the publication of the reports of Lord Onslow's departmental Committee which had been considering the Rent Restrictions Acts. The majority report recommended decontrol in the following summer of houses of the highest standard rent, decontrol at Midsummer, 1924, of houses of a standard rent exceeding £35 in London, and £26 elsewhere in England and Wales, and decontrol at Midsummer, 1925, of the remaining classes of houses, with similar removal of protection in Scotland. The minority report, signed by the Labour members of the Committee, urged that the protection given to pre-war rentals of £35 in London, £30 in Scotland, and £26 elsewhere, should be continued until 1930, and that as regards other grades of houses protected the restrictions should continue to the same date, unless previously withdrawn by Order in Council approved by Parliament, with immediate reductions in rentals.

Subsequently it was announced that higher-grade houses would be decontrolled in 1924, unless Parliament decided otherwise, and that all control would end in 1925. Then came the bye-elections and the appointment of Mr. Neville Chamberlain as Minister of Health, in succession to Sir Arthur Griffith-Boscawen, one of the defeated candidates, and a new policy was formulated and approved by the Cabinet. Mr. Chamberlain secured the passage of his bill by conciliatory methods. It continued control of all houses until June 24, 1925, set up a temporary system of "rent courts," and gave landlords the power to recover possession of houses owned by them before June, 1922, if reasonably required for themselves, their children, or any person resident with them or engaged in the whole-time employment of themselves or a tenant, houses to be decontrolled when landlords regained possession. Purchasers of houses after that date could obtain possession if they proved that the hardship upon them was greater than that upon the tenant. Tenants were given the right to appeal against increases of rent if houses were not maintained in good repair. After the period of decontrol, tenants were for five years to be protected against the danger of eviction without good reason, the County Courts, being given power to investigate such cases.

SUNDAY GAMES.

THE experiment of permitting games to be played on Sundays in the parks and open spaces under the control of the London County Council, which was started in July, 1922, is to be continued. The question was reconsidered in July last by the Parks Committee of the Council, who recommended that for the future the arrangements for the playing of games on Sundays previously approved by the Council be continued, with such minor modifications as may be necessary from time to time. A proposal to withdraw the privilege was defeated at a meeting of the Council by 83 votes to 33. The results of the experiment during its first year were generally satisfactory. No difficulties arose in connection with the playing of bowls, cricket, croquet, golf, hockey or lawn tennis; but a few complaints were received by the Council with regard to football, only one of which was serious and resulted in the permits of the club concerned being cancelled. The cost of the additional staff necessary during part of the year was £640, which sum was more than covered by additional receipts. In no case did the playing of games on Sundays necessitate a man working overtime or on his weekly leave day. The number of letters, petitions, &c., in favour of and against Sunday games presented to the Council up to the end of June, 1923, were:—In favour: Letters from 125 organisations and 104 individuals, and 708 petitions signed by 19,773 persons. Against: Letters from 262 organisations and 1,176 individuals, and 234 petitions signed by 14,322 persons. The number of games played from Sunday, July 23, 1922, up to and including Sunday, June 24, 1923, were as follows:—

	No. of Places.	No. of Games.
SUMMER SEASON, 1922, 10 Sundays—		
Bowls—136 rinks	22	351
Cricket—68 reserved pitches	5	40
,, Other pitches	7	371
Croquet—2 lawns	2	2

Tennis—611 grass courts	44	8,927
,, 75 hard courts	29	1,566
Total number of games	...	39,452

WORKMEN'S COMPENSATION.

A BILL was introduced in the House of Commons in May last to amend the Workmen's Compensation Act, 1906 and its amending Acts, and to amend the law with respect to employers' liability insurance, the notification of accidents, first aid and ambulance. The Bill as amended by Standing Committee A provided for the repeal of the Workmen's Compensation (War Addition) Acts of 1917 and 1919, but proposed certain increases in the amounts payable under the Act of 1906, either on the death of a workman or as weekly payments during a workman's incapacity. The total amount of compensation payable to the dependents of a deceased workman is limited to £600—compared with £300 under the Act of 1906—but this sum varies with the number and age of children left under the age of 15. In cases of incapacity the Bill proposed to substitute 30*s.* for £1 as the maximum amount of the weekly payment, and whilst 50 per cent. of the average weekly earnings remains the basis of compensation, provision is made for increasing this proportion in cases where the weekly earnings are less than 50*s.* Compensation is payable if the injury disables the workman for more than three days, but is not payable in respect of the first three days of disablement. Certain cases previously excluded from the benefits of the Acts on the ground that the disabled workman was doing something he was not employed to do are brought within the scope of the Act of 1906 by the following clause:—"For the purposes of the principal Act, an accident resulting in the death or serious and permanent disablement of a workman shall be deemed to arise out of and in the course of his employment, notwithstanding that the workman was at the time when the accident happened acting in contravention of any statutory or other regulation applicable to his employment, or of any orders given by or on behalf of his employer, or that he was acting without instructions from his employer, if such act was done by the workman for the purposes of and in connection with his employer's trade or business." It is proposed to extend the Acts to certain classes of shore fishermen; persons plying for hire with vehicles or vessels hired from the owners (other than under a hire purchase agreement); certain persons casually employed for the purposes of any game or recreation; and certain persons employed on ships otherwise than as members of the crew, not covered by the Act of 1906. Further amendments of this Act deal with the notices of accidents, references to medical referees, registration of lump sum agreements, power to make agreements as to compensation to workmen disabled by industrial disease, &c.

FOREIGN TRADE.

FRANCE.

DURING the first ten months of 1923 importations into France were of the total value of 25,620,674,000 Francs, compared with 18,568,714,000 Francs in the first ten months of 1922. Exports amounted during the same period to 24,376,250,000 Francs, against 17,376,484,000 Francs in the same period of 1922. There is thus a balance of 1,244,424,000 Francs in favour of imports as against 1,192,330,000 Francs during the first ten months of 1922.

GERMANY.

Germany's expanding trade is attracting some attention, and surprise is being expressed at her ability to finance these growing committments in view of the "flight from the Mark." During the first eight months of 1923 Germany bought 509,644 bales of cotton, against 443,343 bales bought by Great Britain, while for the corresponding period of 1922 Great Britain took 195,000 bales in excess of Germany's purchases. German manufacturers appear to have reorganised their businesses, and instead of purchasing British textiles in various stages of manufacture, the German cotton mills are engaged on the raw product as the following table of British exports to Germany show:—

	Nine months ended Sept. 30.		
	1921.	1922.	1923.
Textile machinery (tons) ...	288	1,784	564
Cotton yarn, unbleached (lb.)	8,984,600	26,866,900	20,054,900
Piece goods, all kinds (sq. yds.)	11,605.900	88,176,200	19,566,100

But if Germany is taking less from one industry, her requirements of coal, probably due to the Ruhr deadlock, have increased considerably; for the nine months to Sept., 1922, 6,100,000 tons were shipped from Great Britain to Germany, against 11,604,643 tons in the first nine months of 1923. The growth of German trade from the zero of the war must make immense strides as time goes on, and in face of the generally expected economic collapse of Germany the figures of expanding trade are difficult to reconcile with the story of her impoverishment. When Germany has fixed the amount of Reparations with the Allies and begins seriously to stabilise her currency and control her Budget, a great revival of German trading must be expected. But Germany will require to buy as well as to sell, so that the event will not necessarily be disastrous to Great Britain or any other country, and before the War Germany was one of Great Britain's best customers.

THE WORLD'S BAPTIST CONFERENCE.

THE Third Congress of the Baptists' World Alliance opened at Stockholm on July 21, 1923, to which 2,500 delegates, including 600 British and 1,000 Americans, were registered. The first Congress took place in London in 1905, and the second at Philadelphia in 1911. British delegates had to live on the C.P.R. liner *Marloch* owing to absence of sufficient hotel accommodation for so large a Congress. The Governor of Stockholm welcomed the Congress, and delegates preached on Sunday in all the churches in Stockholm. The Archbishop of Canterbury gave authority for a Baptist minister to occupy the pulpit of the English church at Stockholm on the occasion. A Congress pageant followed in the park, when speeches were made from specially erected platforms. The work of the Baptists throughout the world came under consideration, and arbitration and co-operation were supported in place of Socialism. The Rev. Dr. Shakespeare carried through the organisation as European Secretary of the Baptist World Alliance.

MOTOR LICENCES IN GREAT BRITAIN.—The Ministry of Transport's return of motor licences issued from Dec 1, 1922 to Aug. 31, 1923, shows that at the latter date the number of motor vehicles in respect of which licences were current was 1,105,000, including 384,000 cars taxed on horse-power, 430,000 motor bicycles, 173,000 commercial goods vehicles, and 86,000 motor hackney vehicles (taxi-cabs, &c.). This is an increase of 68,756 cars as compared with the corresponding period in 1921–22, an increase of 52,195 motor bicycles, 22,368 commercial motor vehicles, and 8,351 hackney cabs, motor omnibuses, &c. The increase of private motor carriages is 22 per cent., of motor cycles, 14 per cent., and of commercial vehicles nearly 14 per cent. Yet while the numbers have increased the average tax paid per motor has been reduced in value in all but one case, for whereas on Aug. 31, 1922, the average receipt in respect of a whole year's licence was £17 12*s*. for cars taxed on horse-power, £2 13*s*. 6*d*. for bicycles, £21 13*s*. for commercial goods vehicles, and £23 10*s*. for motor hackneys, these respectively produced at Aug. 31, 1923, £16 18*s*. 6*d*. for cars, £2 11*s*. 6*d*. for bicycles, £21 7*s*. for commercial goods vehicles, and £25 11*s* 6*d*. for motor hackneys. These figures reveal the fact that as regards private cars the horse-power of the engine is slightly reduced on the average, being under 17 horse-power in place of 17½ horse-power in 1922. Also that the average motor bicycle has paid 2*s*. less, and so is of slightly less weight and engine power, though the hackney vehicle has paid an increase average tax of about £2.

Public and Private Wealth.

A DECLINE IN THE NATIONAL INCOME.

The latest return of the Inland Revenue Commissioners (issued just as WHITAKER'S ALMANACK goes to press) is for the financial year ending March 31, 1922, and makes its appearance over twenty months after the close of the period to which it relates, instead of, as in pre-war days, some four months afterwards. Even at this interval it is seriously incomplete, as many of the more important figures are given only as "estimates."

This report shows the gross income of the nation to be estimated at £3,250,000,000, of which it is estimated that £80,000,000 represents income under the exemption limit, and other reductions and deductions allowable amount to another £720,000,000, making approximately £2,450,000,000 of income upon which Income Tax is levied. For the first time for many years, the total figure shows a decline from the preceding year instead of the growth to which we have been accustomed, a steady growth in the pre-war period, and a rapid growth during the later years of the War, and the two years of the post-war period. The estimated decline for the year is approximately £250,000,000. The explanation of the decline is probably to be found not so much in a decline in real wealth as in the shrinkage of prices from the excessively inflated level to which they had attained during the later years of the War and the earlier part of the post-war period.

The net receipt from Income Tax consequently fell by nearly £6,000,000 to a sum of £334,933,650 as against a Budget estimate of receipts from this source of £349,750,000. This receipt is almost exactly eight times the receipt from the tax in 1914, although the normal rate of tax has risen only a little over five times, namely, from 1*s.* 2*d.* in the £ to 6*s.* in the £. The lowering of the old exemption limit of £160 to the present £130, has evidently tapped a large number of incomes, and that, coupled with the rise in wages and prices has brought a large number of persons within the scope of the Income Tax Acts who had previously been outside them.

Super-tax produced a sum of £61,351,000, levied on an estimated number of 90,000 super-tax payers. This compares with a receipt of aproximately £3,350,000 levied on 13,900 super-tax payers in 1914, but here again a very large number of persons have been brought within the scope of the super-tax by the lowering of the minimum from £5,000 to £2,000, and the increase in prices.

At the other end of the scale the income of manual wage earners assessed for income tax during the year under review amounted to nearly £945,000,000 and the total net income assessed to tax (after deductions for exemptions and statements) amounted to nearly £674,000,000.

For the first time, this report contains a table showing the estimated number of individuals with total incomes above the exemption limit, sub-dividing them into those entirely relieved from tax, by the operation of abatements and allowances, and those chargeable to tax. These figures form the most valuable guide as to the incidence of the tax whereas in former years the only indication given was the "number of assessments," which were quite valueless as a guide, because as single individuals might, and often did, pay under several different assessments. It is important to bear in mind when studying this table, that the limit of exemption was reduced from £160 to £130 in 1915, but at too late a period in the year 1915–1916 to enable the department to make complete assessments on the new range of income, which consequently only became really effective in the financial year 1916–1917. These figures are as follows:

Year.	Number of Individuals.		
	Total.	Relieved from Tax.	Chargeable with Tax.
1913–14	1,200,000	70,000	1,130,000
1914–15	1,240,000	100,000	1,140,000
1915–16	1,480,000	120,000	1,360,000
1916–17	3,264,000	1,080,000	2,184,000
1917–18	4,476,000	1,520,000	2,956,000
1918–19	5,747,000	2,200,000	3,547,000
1919–20	7,800,000	3,900,000	3,900,000
1920–21	6,150,000	3,150,000	3,000,000
1921–22*	5,000,000	2,600,000	2,400,000
1922–23*	4,750,000	2,500,000	2,250,000

Two-thirds of the actual income of the country assessed to tax is provided under Schedule "D" (profits arising from trade, profession or employment) and 21 per cent. under Schedule "E" (salaries of Government, Corporation, or company employees), about 7 per cent. under Schedule "A" (income from the ownership of lands, houses, &c.), and the balance from Schedules "B" and "C" (profits from the occupations of lands, and income from British and Foreign Government Securities taxed by deduction at the source). It is somewhat curious, in view of the housing shortage, that the profits from the ownership of houses is almost stationary, while that from the ownership of lands shows a slight loss during the last eight years. The explanation would probably appear to be that while there is a shortage of small and medium sized houses there is a glut of large houses and mansions, whose owners cannot now afford to live in them, and for whom sufficiently wealthy tenants cannot be found, and the loss of income on the latter is approximately equalled by the increase from the former.

INCREASING COST OF REVENUE SERVICES.

A disquieting feature of the report is the sharp rise during the last few years in the cost of the Inland Revenue Services. During the closing stages of the War, approximately the same amount of Revenue (£660,000,000) was collected by the Inland Revenue Department, but whereas in 1918 the cost was only 0·59 per cent. of the amount collected, the cost rose in 1921 to 1·35 per cent., the actual cost of collection being in the first case £3,862,000 and in the latter £8,942,000. There appears to be no possible justification for the cost of collection of the same amount having increased by over £5,000,000, or over 130 per cent. The increased cost as compared with the preceding year amounted to £375,000 although £91,234,000 *less* was collected. Here would appear to be an opening for the immediate saving of about £5,000,000 in the National expenditure in one small department, the only possible objection being the "vested interests" of the officials concerned. The simplification of the needlessly abstruse form of the Income Tax return would save further large sums, not only in the cost of collection to the department, but in time and worry to the individuals concerned as well as, in the case of the latter, the payment of fees for expert assistance and advice in dealing with these forms.

---

* The figures for the last two years are "estimates" by the department.

INHABITED HOUSE DUTY.

An interesting sidelight is thrown by the figures for the Inhabited House Duty on the housing problem. This duty is levied on all dwelling houses (including residential shops, hotels, &c.) over the annual value of £20 and is charged at 3*d.* in the £1 on all private dwelling houses of an annual value of between £20 and £40, and at 2*d.* in the £1 on all other classes of dwelling houses within those limits, at double that rate where the value exceeds £40 but does not exceed £60, and at treble that rate where the annual value exceeds £60. These figures show a decline as compared with 1913 and 1914 since when the duty has for all practical purposes been stationary, there having been a slight increase in those between £20 and £40, counterbalanced by a slight decrease in those of about £60 in annual value. One knows that in the year under review a large number of houses was built, both under the Housing schemes of local authorities as well as under the subsidy scheme for houses built by private individuals, and, having regard to the prices ruling at the time, practically all of these houses would come within the scope of the Inhabited House Duty. Consequently the loss by reason of the larger houses being out of occupation must be very considerable. The department has cognisance of every house erected and occupied, and the figures regarding the number of such houses are at the present time of the greatest importance, but the only information given to the tax-payer on the question of these numbers in this somewhat expensive report is a space in the table that is blank except for the words "Not Available." This phrase in the reports took its rise during the War when it was quite possible not in the national interest to disclose to the enemy the precise nature of our resources, but it is being continued in Government statistics these many years afterwards. Certainly on a matter so important to the social well-being, the fullest information should be given, especially when it is in the possession of the departments.

CONTINUED GROWTH OF LIFE INSURANCE.

The phenomenal growth in the last few years in life insurance (to which allusion was made in WHITAKER'S ALMANACK last year) still continues, but the information is now only obtainable from the returns of the various life insurance companies, as the Inland Revenue Commissioners have now ceased to give this important information separately, and simply give a total sum which includes life insurance premiums with abatements, relief in respect of wife and children, earned income allowance and personal allowances.

STAMP DUTIES.

The receipt from stamp duties for the year 1921-22 showed a sharp decline from £26,541,000 to £19,577,000, of which nearly two and a half millions occurred in respect of conveyances and nearly £600,000 decrease in the receipt from cheque stamps. There was also a decrease of a quarter of a million on stamps from bills of lading and shipping policies, all due to the trade decline that had then begun to set in so strongly.

INCOME FROM ABROAD.

The sub-divisions of Schedule "C" show that income received from Indian Government securities during the year amounted to £9,366,000, the next largest receipts being £4,185,000 from New South Wales, £2,675,000 from Canada, £2,232,000 from New Zealand, £1,965,000 from Brazil, £1,788,000 from Queensland, £1,489,000 from Victoria, £1,135,000 from Cape Colony, £1,715,000 from China, and £873,000 from Japan. At the other end of the scale were totals of £7 from Fiji, of £15 from Zanzibar, of £31 from the Republic of Liberia, and £110 from Serbia. Income from Turkey amounted to £338,000, from France £523,000, and from Belgium £239,000.

ESTATE, &c., DUTIES.

Capital Values.—During the year ending March 31, 1922, Estate, &c., Duty was levied on capital passing at death of a gross value of £461,329,462, and of the net capital value of £419,834,589. The bulk of this was furnished by English estates of a gross capital value of nearly £390,000,000 and a net capital slightly exceeding £357,000,000. The number of estates involved was 105,596, of which 84,544 were estates in England. Only 5,567 of these estates exceeded £10,000 in value, 5,145 were between £5,000 and £10,000 in value, 24,731 were between £1,000 and £5,000 in value, and 70,151 were under £1,000 in value. Of the capital involved, £141,201,000 was of estates of under £10,000 in value, and slightly over £98,000,000 by those under £5,000 in value. £278,633,000 was furnished by the 5,567 estates exceeding £10,000 each in value. *Insolvent* estates were 1,213 in number, as compared with 1,034 in the preceding year, both showing a considerable decline as compared with pre-war years, when the number usually varied from 1,700 to 1,900. The number of estates liable to duty has shown a steady increase (with but a slight set-back occasionally) for many years, and has risen from 75,000 in 1914 to 105,000 in the year under review. The bulk of the increase occurs in the smaller estates, those under £5,000 in value having increased from 32,800 to 44,600, and those under £10,000 from 38,600 to 55,000. This does not point to any notable increase in real wealth, as it is fully accounted for by the rises in wages and prices, as well as by the closer collection by the department. On the whole, figures tend to show that, having regard to the increase in prices, the real wealth on which these duties are levied has shown no appreciable increase since the pre-war period. Another factor which has quite a definite bearing on the matter is the excessively heavy rates of duty now in force, which range up to 40 per cent. in estate duty on the capital involved, and in all but small cases, a further levy on the remaining balance, by way of legacy duty, ranging from 1 to 10 per cent. This has had the result during the past few years, in several cases where large estate are involved, of the estates being handed over to an intended successor during the lifetime of the testator, and if the testator makes such a gift absolutely, without retaining any right or interest therein, and survives the gift for a period of three years, such gift is not liable to duty, or if the gift be to a public or charitable institution more than 12 months prior to the death, such gifts are exempt.

It would appear that the limit in expansion of revenue from this source has already been reached, and for some years past the increase of the amount received has hardly been commensurate with the growth in the rate of duty (which only 15 years prior to the year under review was at a maximum rate of 8 per cent.) and the natural increase in the population, and in the total wealth of the community. This would appear to be borne out by the serious falling-off in the receipt from this duty during the first 32 weeks of the financial year 1923 24, when the receipt was less than that for the corresponding period of the previous year by £5,881,000, although the duties were levied at the same rate. The net capital value of the estates liable to duty in the year ending March 31, 1914, was, in round figures, £256,500,000 levied on 74,642 estates, whereas in the year ended March 31, 1922, the net capital value was roughly £420,000,000 levied on 105,596 estates. The greater part of this latter year was the period of the "peak" of high prices, and property passing by death would be valued for duty at the prices then current. Prices during the latter period averaged considerably over 100 per cent. in excess of pre-war prices, but the increase in the valuation of the estates was only 41 per cent., notwithstanding that the increase in the number of estates alone was 40 per cent.

Yield of the Duty.—The net receipt from the duty during the year ended March 31, 1922, was £52,520,987, as against a Budget estimate of £48,000,000, which estimate was slightly more than the actual receipt in the preceding year. The Budget estimates for the last two years appear to have been based on the actual receipt during the year 1921 22, or at the rate of £1,000,000 per week. At the time of going to press the receipt from the duty is short of the proportionate amount of the estimate.

During the year under review, of a total receipt from the duty of roughly £52,000,000, a sum of £21,765,000 was satisfied by the surrender of certain War Stocks and Bonds, Funding Loan and Victory Bonds, of somewhat over 40 per cent. of the total. This results in a reduction by that amount of the capital indebtedness of the State, but it reduces the amount of money available to meet current expenditure. This is as it should be, as these payments must of necessity be made out of capital, and are levied on the capital, and should therefore not be treated as income.

Of the total sum received by way of Death Duties £6,102,148 was received from the Legacy Duty, and £1,198,207 from Succession Duty, the balance being provided by the direct Estate Duty in its various forms.

Of the capital assessed to duty the largest proportion was in shares and debentures of joint stock companies which accounted for over £121,000,000, land, houses, mines, timber, &c. (all classed as realty) accounted for £103,000,000, British Government and Municipal Securities for £70,000,000, and cash in house or at bank for slightly over £36,000,000, with a further £12,000,000 for money on bonds, bills, notes and other securities, and £15,500,000 for money out on mortgage of real estate. Duty was paid on £14,700,000 on Life Policies, while household effects amounted to almost exactly the same sum. Women's estates in England were 41 per cent. in number and 28 per cent. in amount of the total.

Of the property subject to legacy duty, about 15 per cent. was left to a husband or wife, 40 per cent. to children or parents, 30 per cent. to brothers and sisters or nephews and nieces, 2½ per cent. to uncles, aunts and cousins, and about 12½ per cent. to more remote relatives or strangers in blood.

Duties in the Channel Islands.—It is interesting to note that there are no Death Duties in the Channel Islands, and only a nominal income tax, the latter having been imposed principally on account of additional War expenditure. Guernsey, in particular, pays its way and has a balance over to remit to London on a taxation so light as to make it appear, at first sight, that it is impossible for the island to pay its way. The secret of the success of the Island's Budget is in the rigid economy exercised in the expenses of administration. The principal receipts are from the liquor duties, which produced in 1922 a sum of £36,479, or an average per head on the population of 19*s.* 5*d.*, all of the duties being less than one-fifth of the corresponding duties levied in England. A small import duty ranging from 1*s.* to 3*s.* 6*d.* per ton on all imports produced about £23,000, and duties on tobacco and cigars (ranging from 1*s.* 6*d.* to 2*s.* 4*d.* per lb.) produced £16,237. The Income Tax at 6*d.* in the £ was estimated to produce rather over £20,000. The total ordinary revenue of the island for 1922 amounted to £177,857, and the corresponding expenditure to £151,350.

There has been for many years in the island a form of capital levy for providing the expenses of what would be, in England, classed generally as the local rate, but after this has been in operation for many years it has been agreed that it is quite unsatisfactory and proposals are shortly being submitted to the States for the expenses to be found by an occupation rate, similar in many ways to that in force in England and doing away with the capital levy. In a small insular community, it is easier to see the effect of any particular kind of taxation on the body of taxpayers at large, as well as on the trade of the community, and it is of especial interest at the present time to note that, after trial, taxation in the form of a capital levy is found to be inequitable as well as unsatisfactory in other ways, and that a change is being made to the manner in which these taxes are raised in England.

It is possible that at no very distant date the Islands may adopt some form of Death Duties, as proposals to that effect are mooted, but at present such are not in operation and the proposal does not appear to be too favourably received.

THE DEATH DUTIES IN GREAT BRITAIN.

The Death Duties on the Statute Book are seven in number, but, of these, three only are payable in connexion with deaths occurring at the present time, namely, Estate Duty, Legacy Duty and Succession Duty. The remaining four, namely, Probate Duty (in Scotland called Inventory Duty), Account Duty, Temporary Estate Duty and Settlement Estate Duty, are leviable in connexion with deaths which have occurred during certain specified periods, the last of which expired on the 12th May, 1914. The three duties which remain chargeable in relation to deaths occurring at the present time may be divided into two classes. The first class is represented by the *Estate Duty*, a duty payable with reference to the passing of property on death; the second comprises the *Legacy Duty* and the *Succession Duty*, each of which is a duty payable with reference to the acquisition of property by beneficiaries. The following table includes particulars for Ireland for the entire year 1921 22. The description of the duties is, however, limited to their operation in Great Britain as at the date of this Report.

The Net Receipt of the Death Duties in the year 1921–22 was £52,520,987 as compared with £47,181,081 in the previous year. The details for the two years, with the increases and decreases, are shown in the following table:—

Net Receipt.—United Kingdom.
(Excluding Northern Ireland from November 22, 1921.)

—	Net Receipt.		Increase.	Decrease.
	In 1921–22.	In 1920–21.

* Capital transferred to other classes exceeded that brought into this class.

The Year's Weather.

(1922) *October* was abnormally dry, with a ather low temperature and a considerable mount of sunshine. Throughout the greater part of the British Isles the rainfall totals showed a large deficiency, this being most noticeable in he centre of England and Wales. Over a ery large area less than 25 per cent. of the normal was measured, while in the Cheshire plain the amount was only a little over 10 per ent. At Liverpool the total for the month was only 0·28 in. compared with an average of 3·27 ins. Among the small areas in England, Wales and reland over which the month's rainfall was qual to or only slightly in excess of the normal, ver the eastern parts of Kent, the extreme orth-east of England and parts of Northern reland. In Scotland the deficiency in the amount of rain was not quite so marked, rather more than 50 per cent. falling over the greater part of the centre and east, with amounts equal o 75 per cent. of the normal falling in some of he eastern parts. At Totland Bay (Isle of Wight) no rain fell from the 6th - 26th, at Meltham (Yorks.) it was the driest October for at least 42 years, and at Blundellsands (Lancs.) he driest for 47 years.

Over the greater part of the country the mean emperature was below the normal, especially n the southern part, and was most marked during the latter end of the month. The weather at the beginning was mild with south-westerly winds and day temperatures in England above the average. By the end of the irst week, with north-easterly winds blowing, emperature had fallen, so that by the 6th the highest reading over England did not exceed 52°. Towards the end of the month a more marked fall had taken place, and in London on the 20th, 26th, 28th and 29th, the highest temperature throughout the day failed to exceed 45°. On the morning of the 26th an unusually severe frost for the time of year was experienced with a screen temperature of 28° at Kew. This reading was the lowest recorded at Kew in any October since 1905. Snow and sleet fell in the north on the 27th, a slight snow shower in London on the 28th, and a heavy fall of snow in the south-west of England on the 29th. The latter half of the month was severely cold in Dublin; on the 28th and 29th the higher range of the Dublin and Wicklow hills was snow capped. With the exception of the Channel Islands, sunshine was well above the average. In the north-west and east of England the amount of bright sunshine exceeded the average by rather more than one hour per day.

November was an unusually dry month with a good deal of inland fog. The general deficiency in the amount of rain over the British Isles in October was continued in November, thus giving two consecutive months of abnormally low records. Taken as a whole the rainfall was the smallest recorded in November since 1909. In Co. Waterford the scanty falls of October and November greatly diminished the water supply and caused rivers, streams and wells to become unusually low. Over the British Isles generally the largest deficiency occurred in a broad belt extending from the south-west of Ireland to the north-east of England, culminating at Dublin in a deficiency of 88 per cent., 0·31 in. compared with an average of 2·67 in. Less than a third of the normal was recorded over a considerable tract near the Scottish border, and from 50 to 70 per cent. over the greater portion of southern England. The general rainfall expressed as a percentage of the average was, England and Wales 55; Scotland 70; Ireland 42; British Isles 56. The mean temperature of the month was below the average over the greater part of England including the Channel Islands, the deficiency being most marked in the south-east. In both Scotland and Ireland the mean was above the average. During the first ten days the weather was generally of an unsettled character. On the 1st a warm south-westerly wind gave place to a cold northerly one which brought sleet and hail showers. This was succeeded by a spell of fairer weather. The week ending the 18th was abnormally mild, and it may be interesting to recall that at this time Edinburgh was warmer than Jersey and the Isle of Wight, and Balmoral was warmer than London. On the 21st London experienced a remarkable gloom or smoke pall in which darkness intense as that of night persisted almost throughout the day.

Sunshine varied considerably in different parts and the total distribution was somewhat irregular. This was to a large extent due to the prevalence of fog. A dense fog prevailed in Glasgow on the 20th. The north-east of England proved to be the most sunny district, receiving an amount equal to an excess of nearly 50 minutes per day. In Scotland the month was unusually sunny towards the south and east, but somewhat cloudy in the north-west. Aurora was seen at Banff on the 28th.

December was mild with a mean temperature everywhere in excess of the average, but was appreciably below that of December, 1921. The first part of the month was on the whole fine with westerly winds and mild weather over the British Isles, but by the 18th a stormy period set in, and there were very few days on which the wind did not attain gale force on one or more parts of the British Coasts. On the evening of the 18th southerly to south-westerly gales were blowing and thunderstorms were experienced in many places. In the early hours of the 20th a depression appeared at the mouth of the Channel accompanied by gales and heavy rain over southern England. As the system passed to the north eastward it brought snow and sleet to Scotland and some parts of England. This was followed shortly after by heavy rain and thunderstorms, particularly in the western districts. The mild character of the month may be shown in the fact that at Dornoch (Sutherland) three varieties of primroses were in bloom, while a garden in Cargen (Kirkcudbright) still showed many blooms. Scotland had both the extreme highest and extreme lowest temperature recorded for the whole of the British Isles during December. There were 59° F. at Banff on the 12th, and 15° F. at Balmoral on the 11th.

With the exception of Eastern England, the rainfall over the whole of England, Wales and Ireland was in excess of the normal. In Scotland there was a deficiency which, though widespread, was not very large. Deviations from the normal of more than 50 per cent. were rare, and occurred for the most part in a wet patch in the centre of Yorkshire. In many places more than an inch of rain fell in the 24 hours, among the heaviest of which were 2·09 on the 21st at Ashburton (Devon): 2·05 at Fort William (Inverness) on the 12th, and 1·97 at Wistanstow (Shropshire) on the 19th. Thunderstorms occurred in many places during the closing week of the year.

The distribution of sunshine showed a clearly marked contrast. The north of Scotland, with the whole of the eastern part of England and the Midlands, had an excess compared with the normal, while the whole of Ireland, the western parts of England and Wales, with the Channel Islands had a deficit. Thus while northern Scotland enjoyed over 60 hours more than the average, there was a shortage of nearly 145 hours in the Channel Islands.

(1923) *January* was characterised by a mean temperature well above the average, the excess ranging from 1·5 F. in the Channel Islands to 4·5 F. in eastern Scotland. Not only was the mean temperature above the normal for the month as a whole, but exceeded the normal in each district for each week of the month. During the first few days the weather was unsettled with somewhat heavy rain at times, between which there were considerable bright intervals. Coastal gales blew in the beginning of the month, and again on the 9th and 10th. In the rear of a deep depression which passed over the extreme north of Scotland at this time were northerly winds associated in Scotland with snow, sleet and hail showers. On the 17th fog and frost prevailed in London, the maximum temperature at Kew remaining below the freezing point all day. Yet neighbouring coast stations had temperatures from 10° to 15° higher and from 6 to 7 hours bright sunshine. The most remarkable feature about this fog was its patchy character with many sudden changes from thick fog to bright sunshine in a short distance. Some places, such as South Kensington, had fog continuously all day, while others, such as Hampstead, had no fog at all. At many stations towards the end of the month the minimum temperature for four days was higher than the average maximum temperature of the month. At Hodsock Priory (Notts) vegetation was unusually forward. Cowslips were in full bloom on the 31st in the Isle of Wight, and at Willoughton (Lincs) pansies and primroses were in bloom near the end of the month, and roses were budding. The abnormal mildness which had marked the winter in Scotland was maintained through January, so that at the close of the month that country had experienced a milder January on only two occasions during the past 60 years, and only once had the period November to January had a higher mean temperature.

The duration of bright sunshine was appreciably above the average in the east of Scotland, the whole of Eastern England and the Midlands; there was a deficiency in the north of Scotland, the whole of Ireland and the western districts of England. The amount recorded on the eastern side of England was equal to about 25 per cent. of the possible, that of northern Scotland being only 10 per cent. The total amount at Yarmouth (71 hours) was more than double that of the previous January. The sunniest days of the month were the 6th, when many places had from 6 to 7 hours, the 11th and 12th, when from 5 to 6 hours were general, and the 23rd, when many places had more than 7 hours. There was an unusual absence of snow throughout the month. Thunderstorms occurred locally between the 9th and 11th. Hail fell o several occasions but not in any large quantity.

February was a mild and extremely w month. Rainfall was so heavy in many plac that the amount exceeded that of any previous known in February. At a very large number places the ground was muddy for more than hal the month, while some places were wet an muddy every day. In Dublin the rainfall wa more than three times the average, the amoun measured (5·78 ins.) establishing a record for tha city. Considerable falls of snow occurred i Scotland and northern and central England i the latter half of the month, especially on the 21st on which date thunderstorms were experience in the London area. On the afternoon of thi day hailstorms of considerable severity occurre in the south-eastern counties of England. I the general snowfalls which occurred in Scotlan after the middle of the month, and in norther and central England mainly between the 18t and 24th, and which in some instances took th form of blizzards, the ground was covered wit snow in some places for at least six days. Ove the eastern districts of Scotland, a large part o England and Wales, and the eastern part o Ireland, the rainfall was equal to more tha twice the average, while in a large area extendin from the north of Cornwall to Staffordshire th amount was more than three times the average At some stations in this belt with observation extending back for more than 100 years it wa the wettest February on record.

The mean temperature for the month wa everywhere above the normal, and during th opening days was remarkably high for the tim of year. In Scotland the maximum temperatur of the month occurred very generally on the 1s or 2nd, and in very few cases was the readin below 50° F. It reached 56° at Edinburgh an as far north as Gordon Castle. The highes temperature in England and Wales was 61° a Hodsock Priory (Notts) on the 1st. At Rhayade on the 5th the temperature on the ground wen down to 15° F.

Except in the north of Ireland, sunshine wa everywhere deficient, the shortage being mor than an hour per day both in the east of Scotlan and the north-east of England, where the pe centage of the possible was only 14 and 1 respectively. Only in the north of Ireland an the Channel Isles did the percentage exceed 2 There was a general fog in London and th south-eastern counties of England throughou the 14th and on the morning of the 15th.

March was mild and dry. The month migh be roughly divided into three periods, a mil unsettled week, two weeks of easterly winds an rather cold weather, and a warm week wit southerly winds. During the first week sout westerly winds were predominant, and th weather generally mild and unsettled. Rai was seldom heavy, and some days had considerable amount of sunshine. A somewha cold easterly type of weather prevailed fro about the 7th to the 20th, except on the 13th when a low-pressure system passed rapidly u the English Channel, accompanied by heav rain in London and the south of Englan Unusually high day temperatures were registere about the 27th. At Kew on this day there wa a maximum of 68° F., a reading for March whic has only once before been reported during th past 50 years. March was the fourth month i succession with a mean temperature above th average, the greatest excess being 3·4° F. in the north of Scotland. Only in the north-east of England and the south of Ireland was the excess less than 2°. The last week of the month was the warmest, the deviation from the normal varying from an excess of 4·4° F. to 6·9° F. In Scotland the period November to March was the mildest since 1881-1882. Day temperatures at some places in England and Wales reached 69° F. on the 27th, and 65° F. at some places in Scotland on the same date. Ground frosts were fairly numerous, the lowest reading being 15° F. at Renfrew on the 24th.

In a region extending from Gloucestershire to the Sussex Coast and including the London area, and in a district embracing the south-west of Ireland, the rainfall of the month was above the average. Two large tracts had less than half the normal amount. These were the northern part of Scotland (where over an extensive area the fall was less than one third of the normal) and a belt comprising north-west Wales, Lancashire, the Lake District and the south-east of Scotland. At Gordon Castle (Sutherland) it was the driest March for at least 50 years. There was an unusual absence of snow in Scotland and very little in England and Wales. Except in Ireland and the North of Scotland sunshine was generally below the average. While in the north of Scotland the amount was equal to an excess of more than an hour and a half per day, in the Midland Counties there was a deficiency of more than an hour per day, which yielded a percentage of the possible of only 21. The sunniest days were the 17th, 26th, 27th, and 29th, the highest daily amount being 10·9 hours at Crathes (Kincardine) on the 26th, the same at Folkestone on the 27th, and at Douglas, Isle of Man on the 29th.

April was cold and rather wet. The warmest weather of the month occurred during the first fortnight, particularly on the 4th and 12th, when in the midland and southern counties temperature rose to 60° F. or slightly above. A cool easterly type of weather prevailed from the middle of the month until about the 25th, when there was a change to a warmer south-westerly type. During the cold period, day temperature seldom exceeded 55° F., while at night it frequently fell below the freezing point on the ground. Mean temperature on the whole did not differ much from the normal, the greatest deviation being a deficiency of 1·0° F. in the South of Ireland and the west of Scotland and of 1·8° F. in the east of Scotland. In no district did the excess equal 1·0° F. In almost every part of the British Islands each week of the month was colder relatively to the normal than the preceding one. A frost in Sussex on the 9th did a considerable amount of damage to the fruit blossom, and injured the plum blossom in Herefordshire on the 23rd, 24th, 27th and 28th. The lowest temperature on the ground was 14° F. at Rhayader on the 23rd, 13° F. at Renfrew and 12° F. at Blackpool on the 24th.

For the most part the rainfall of the month was above the average. There were, however, two large areas over which the amount was below the normal. The first comprised north-western and part of central Scotland and the second that of the east coast of England, part of Cumberland and the whole of East Anglia. The driest part of the British Isles was eastern Suffolk, with less than 50 per cent. of the normal, the wettest was southern Hampshire and part of the Sussex Coast, where over 200 per cent. of the average was registered. A magnificent display of lightning was seen in Sussex and parts of Kent on the evening and night of the 11th, in connection with a thunderstorm in the Brighton neighbourhood. Thunderstorms occurred in southern Scotland and very generally in England and Wales on the 12th, and were widely experienced in Scotland on the 28th. Sunshine was appreciably below the average, except in the north of Scotland, where the excess amounted to an equivalent of 25 minutes per day. The first three weeks of the month constituted the dull period. During the last week sunshine was about the normal in most places, several stations having a daily record of 13 hours.

May was mainly dull and cold. There were a few exceptionally warm days soon after the beginning of the month, but the general character was decidedly dull and almost wintry. The first week was the warmest, during which temperature rose locally in the south to between 75° F. and 80° F., but within a few days this dropped from 10° F. to 20° F. After the 9th day temperatures seldom exceeded 60° F., and in some cases never reached 50° F. There were many ground frosts during the month. Considerable damage was done to crops by frost on the 24th, especially in the midland and eastern counties. At Cheltenham it was the coldest May on record; at Dublin the coldest since 1869, while at other places the month was the coldest May for over 20 years. The greatest deviation of the mean temperature from the normal was in Scotland, in the eastern part of which there was a deficiency of 4·0° F., the least deviation was a deficiency of 1·2° F. in the eastern part of England

The distribution of rainfall considered in relation to the normal was very irregular. England as far south as the Wash, and nearly the whole of Wales had an excess, in many places of considerable amount. In parts of Cardigan and Merioneth nearly twice the normal was recorded. Other wet areas were the London district, lower Thames Valley, Kent, Surrey, Sussex and Cornwall. Elsewhere the rainfall was less than the average, the deficiency in some cases being very marked. In Scotland the line of normal rainfall cut that country roughly into halves, the northern part being wet, and the southern generally dry. Keith (Banff) had about four times the normal fall and was the wettest May for the last 40 years. In Ireland the amount was generally less than the average, some parts of Cork receiving less than 40 per cent. of the normal. As an instance of the irregular distribution of the rainfall it may be mentioned that while at Meltham (Yorks) it was the wettest May since 1886, at Ipswich the amount recorded was much below the average. There were frequent falls of snow in Scotland between the 9th and the 17th, the falls being abnormal with a good deal of drifting on the high ground in the north. At the end of the month rivers in the north-east were in flood. Snowfalls, usually light, occurred in England during the same period. Hail showers were frequent and very general. Falmouth had hail every day between the 11th and 16th and Markree Castle (Sligo) between the 9th and 17th.

Sunshine was everywhere below the normal, the amount at a very large number of stations being well below 40 per cent. of the possible. Compared with the normal the greatest deficiency occurred in England east and the Channel Islands, where the shortage exceeded 1·5 hour per day. At Greenwich the deficiency was equal to nearly 1·8 hour per day.

June was dull, cool, and dry. The dull, cool weather which prevailed during the last three weeks of May characterised the greater part of June. In Scotland, very cold weather was experienced between the 3rd and the 15th. On the morning of the 15th, Balmoral registered a temperature of 27° and Braemar of 26°, and on this same day the highest day reading at Nairn was only 50°. The period April to June was, in Scotland, the coldest in any year since 1879 The temperature of the ground at Meltham (Yorks.) was the lowest in any June since observations commenced in 1885. Ground frosts occurred at many places, 26° being registered at Cambridge on the 3rd. The mean temperature of the month was everywhere below the average, the deficiency ranging from 0·7° in the south of Ireland, 1·9° in the Channel Islands to 3·3° in eastern England. The extreme readings for the month were 80° in London on the 23rd and at Perth on the 28th, and 26° at Braemar on the 15th.

Except in the north of Scotland, where there was a moderate to large excess of rain, the month was remarkable for its dryness. Loch More (Sutherland) had considerably more than twice the normal. In central and southern England the amount was only from 20 to 30 per cent. of the normal, and from 30 to 40 per cent. along the east coast. Some places in the Lake district had up to 77 per cent. Southport experienced one of the driest Junes on record. At Newquay during 31 years only one drier June had been known, while on only two occasions during the last 50 years has the total fall at Kew been as low as a quarter of an inch.

The south of Ireland was drier than the north, and in a small area centred around Cork the total monthly fall was only 5 per cent. of the average. In a month so persistently dull the sunshine was naturally below the normal. In Scotland the general deficiency was more marked in the west than in the east. Stornoway had the cloudiest June on record, while at Edinburgh the sunshine was not much below the normal. The sunniest days of the month were the 11th, on which Harrogate recorded 16·1 hours, the 23rd, the 26th, when Lerwick had 16·5 hours, and the 29th.

There was a thick fog at the mouth of the Channel on the 9th, and at Shoeburyness on the 27th.

July was hot and thundery. The month opened with westerly winds, mainly overcast skies, and with temperature slightly below the normal. After the 4th, the weather became fine and sunny, with high day temperatures and warm nights. The 12th and 13th were the hottest days generally, temperature at a large number of places exceeding 90°, the highest being 96° at Camden Square on the 13th. Although in London the maximum did not equal that of August, 1911, the maximum at Kew on the 12th and 13th (91°) was slightly higher than any previous July reading at the Observatory. Several records were established, among which may be mentioned 91° at Tenbury, the highest reading recorded during 23 years; 92° at Cullompton (Devon), and 85° at Falmouth, both of which are records. At Ipswich, the maximum exceeded 90° on 3 days, and 80° on 10 days.

During this spell of hot weather, the nights were remarkably warm. At Kew, from the 6th to the 16th, the night reading only once fell below 60° and throughout the night of the 12th–13th it never went below 68°. Both at Tavistock and Lympne (Kent) the same high night reading was recorded. For the month as a whole, and for each of the first three weeks, taken separately, the mean temperature was above the normal. The greatest excess was 4·0 in the eastern counties, and the least, 1·5, in the north of Scotland and the Channel Islands.

The thunderstorms of the month occurred in three main groups. The first began on the night 6th–7th, the line of storm progressing eastward over the kingdom reaching its greatest intensity in Scotland and the northern part of England. Bridges and railway embankments suffered considerable damage in the Carrbridge district of Inverness-shire on the afternoon of the 8th from what is popularly known as a "cloud burst." The second group began with the memorable all-night storm which visited London and parts of Sussex on the night of the 9th–10th. The principal characteristic of this storm was the extraordinary frequency of the lightning which continued for a period of from 6 to 8 hours. A brontometer at Chelsea recorded over 6,000 flashes in the 6 hours, 10 p.m. 9th to 4 a.m. 10th. Between 11 p.m. and midnight the average number of flashes per minute was 26. Further storms occurred locally on the evening of the 10th. The third group, which chiefly affected the west midlands and the south-west of England, began on the 12th.

August, while warm and sunny locally, was on the whole rather cool and wet. Fine sunny weather marked the opening day of the month, but on the 2nd and 3rd there were heavy rains in Scotland and Ireland, with high winds reaching to gale force on many parts of the Irish and Welsh coasts. After this, although unsettled conditions prevailed in the north and west of the British Isles, fine warm weather was experienced for nearly a fortnight in the south-eastern part of England. At Kew, from the morning of the 1st to the night of the 14th–15th, there was no measurable rain, while the sunshine amounts exceeded 10 hours almost every day during that period. Temperature rose well above the average, reaching 80° or more on several occasions, but never attained the high temperature of July. On the 14th, a shallow depression developed over England, causing thunderstorms and heavy rain locally at night. By the next day maximum temperature in the south fell about 10°. As illustrating the general character of the month in various parts of the country, it may be mentioned that at Aberdeen it was a cold, wet, sunless month. At Cargen (Kircudbright) it was the wettest and most disappointing experienced there. At Keswick it was the wettest August for 32 years; and at Scaleby (Cumberland) the wettest for 60 years. On the other hand, at Skegness it was a beautiful month, the sunniest August on record. At Ipswich it was the sunniest since 1911. At Torquay fine warm weather continued without a break for nearly 3 weeks. The mean temperature of the month was generally below the average. The exceptions were the eastern counties of England and the Channel Islands. The highest temperature of the month was 90° at Camden Square, Canterbury, and Halstead (Essex), on the 9th, and the lowest, 31°, at Balmoral, on the 29th.

In Scotland and Ireland the maximum temperature never reached 80°.

Rainfall was more than twice the normal over two small areas, one to the north of and including Inverness, and the other in the neighbourhood of the Solway Firth. A large part of the midlands and the south of England had less than the normal, while elsewhere from 100 to 150 per cent. of the normal was recorded. In the south-west of Scotland generally it was the wettest August on record. During a sudden thunderstorm which occurred at Bexley Heath on the morning of the 24th, 0·40 in. of rain fell in 7 minutes. Falls of 2 ins. in the 24 hours occurred at several places in Cumberland and Wales. Thunderstorms were somewhat frequent in the eastern counties of England. With the exception of the east of Scotland and the north-west of England, the amount of bright sunshine was above the average. The first half of the month was the brightest generally. During the week 5th–11th 83 per cent. of the possible was recorded at Margate and 77 per cent. at Worthing. At Ipswich, 14 hours were registered on the 4th, and the total for the first week was 146 hours. At Kew, the amount during the first half of August constituted a record. On the 18th, a very large waterspout was seen from Brighton, about 2 miles out at sea.

September, though sunny, was rather wet and cool. During the early part of the month fair, warm and sunny weather prevailed generally in the southern parts of the British Isles. Comparatively high day temperatures were recorded and the amount of bright sunshine was in excess of the average. Although heavy rain fell at times in the northern and western parts of the Kingdom, the weather experienced was an improvement on the rough and unsettled conditions which prevailed at the end of August. Towards the end of the second week the weather became unsettled over the whole country and strong winds blew on the western and southern coasts on the 11th and 12th. Thunderstorms developed locally about the 13th. On the 15th there came a decided fall in temperature, and from thence to the end of the month the weather was cool. Snow was reported on the mountains of Scotland on the 20th. In many parts of the country the last day of the month was the warmest, and for the time of year the night temperature was unusually high. The general character of the month in different parts of the country is shown by the following details. At Arisaig (Inverness) it was an abnormally wet and unsettled month. At Ullapool (Cromarty) it was cold and wet, with snow down to the 2,000-ft. line on the 20th and 21st. Dublin experienced a disappointing month with only three days of summer weather. At Hodsock Priory (Notts) during the first fortnight the weather allowed the bulk of the harvest to be secured in good condition, and although the next ten days were unsettled, with a good deal of rain, the amount of sunshine was exactly double that of the previous September There were, however, rather more than the usual number of ground frosts. At Bude wild wet weather prevailed from the 16th 23rd, and the end of the month was warm and damp.

The mean temperature of the month was below the normal, the greatest deficiency being nearly 2° in the east of Scotland and the Channel Islands, and the least rather more than half a degree, in the east of England. The coldest period was from the 16th to the 22nd, and the warmest was the week ending on the 29th. A minimum of 64° during the night 29th–30th at Kew was the highest ever recorded at the observatory during the night in any previous September. The extreme readings of the month were, highest in England and Wales 78° at Ascot on the 9th, in Scotland 73° at Aberdeen, Smeaton and Edinburgh on the 30th, and in Ireland 75° at Newcastle (Wicklow) on the 6th, and Dublin on the 29th. Lowest in England and Wales was 29° at Rhayader on the 3rd, in Scotland 27° at Eskdalemuir and West Linton also on the 3rd, and in Ireland 34° at Markree Castle (Sligo) on the 18th, and Kilkenny and Dublin on the 24th. The lowest ground temperature was 18° on the 3rd at Rhayader.

With the exception of some portions of the eastern and south-eastern coastal areas of Great Britain and Ireland the rainfall was above the average. In a few restricted areas more than double the normal amount was recorded, the largest area being one which included parts of Argyllshire, Renfew, Ayr and the Clyde. In western and southern Scotland the month was the third wet one in succession, and at Rothesay (Bute) the period July to September was the wettest for at least 100 years. It was the wettest September at Greenock for at least 50 years. Speaking generally the first week of the month was the driest and the week 16th to 22nd the wettest. At a considerable number of places 1 inch or more was measured in 24 hours. Ben Lomond was capped with snow for the first time this season.

Storms and Floods in 1922–23.

(1922) *October.* At the beginning of October the government of Bengal reported the whole country from Jamalganj to Santahar in the Bhogra district was flooded. The floods swept away all the cattle, houses and foodstuffs. The number of people affected were about a million and a half and 1,500 square miles were inundated. Towards the end of October a storm swept the Coast of Brittany and destroyed the Mary Stuart Chapel at the old seaport of Roscoff. The chapel, which was reduced to a heap of ruins, was built in 1548.

November 4. Heavy floods at Naples caused landslides and the collapse of many buildings. Ten persons engaged in rescue work were killed by the fall of a wall. 20–23. Cape Breton Island was visited by the worst gale known in its history. Miles of telegraph and telephone wires were blown down. 24. The Biskra-Tuggurt (Algeria) railway was cut in five places by floods. On the track between Biskra and Tuggurt the floods formed a lake of 38 square miles.

December 10. During a violent snowstorm along the coast of Finland, the trawler *Celermo* was completely wrecked off the little island of Kornsö outside Vardö. The vessel broke in two, and some of the parts were washed ashore. 22. On arrival at Cork the *Celtic* reported that heavy seas had damaged lifeboats, hatchways and deck fittings and had flooded the third class saloon. The *Carmania* from New York reported that the gale had caused the loss of a lifeboat and had smashed in one of the hatches. 25. The Captains of the *Cedric* and the *Zeeland* on arrival at New York said they had encountered the worst storms they had ever known. **29.** On the night of the 29th the Cunard freighter *Valacia* encountered a big sea which ripped free a winch with a 150 fathoms of steel mooring-cable, hurled it into the foc'sle which was at once flooded to a depth of 4 ft. Two men were killed and twelve severely injured. **31.** The Seine was dangerously high and rose 6 ins. in 2 hours. The lower valley of the Loire was flooded. The overflowing of the Nantes-Brest Canal and the river Sévre turned large areas of gardens and fields into lakes.

(1923) *January* 4. The valley between St. Mihiel and Verdun was under water owing to the rise of the Meuse. For several days previously all river traffic was suspended. **19.** A cloud burst at Devil's Kantur, washed away a railway bridge and stopped traffic between Johannesburg and Lourenço Marques. **20.** Great storm along Belgian Coast At Ostend the sea swept over the Channel breakwaters and a considerable amount of damage was done. **21.** At Gibraltar, in consequence of heavy rains, large boulders weighing 40 tons fell from the east side of the Rock on to the main road.

February 11. During a gale the German trawler *Waltershof* was sunk in the Gulf of Bergen, nine out of a crew of twelve were drowned. **14.** Budapest water-works were flooded on account of the Danube rising. Great difficulty was experienced in keeping the City supplied with water. During a violent storm the *Tuscan Prince* was wrecked on an island at the entrance to Barclay Sound, Vancouver. **25.** The Zambezi was in high flood and 18 miles of the Central African Railway were under water. Thousands of natives were forced to leave their kraals. Two miles of line between Murassa and Kain were washed away.

March 4. The Seine was in flood, and the service of river steamers was suspended. The lower districts on the outskirts of Paris were under water. At Bordeaux 200 persons were rendered homeless owing to the flooding of the Garonne. 6. Six inches of snow fell in a terrific storm which raged over New York. Intense cold prevailed, the elevated railways being sheathed in ice. **12.** A violent storm from the south-west accompanied by rain and snow swept up the Mississippi Valley, leaving twenty-two persons dead in its track. 18 ins. of snow fell in Madison. At Pinson, Tennessee, many persons were killed and injured, and about 50 dwellings wrecked. 15. Owing to violently heavy rains in Macedonia, Southern Serbia and Thessaly entire villages were swept away by the swollen rivers. Thousands of people were rendered homeless. Hundreds of people clung to the roofs of houses or sought refuge in trees where they were held prisoners by the floods. Whole herds of cattle and flocks of sheep were drowned. Much damage was caused by the river Varda, which rose from 10 to 12 feet above its normal level. **19.** A blizzard, the most severe since 1888, swept Western and north-western America. Milwaukee was buried in snow drifts 10 to 12 ft. deep. In many towns of Colorado the snow was said to be piled up against the houses as high as the second story windows. 23. Swollen by the melting of snow in the mountains of Kurdistan, and heavy rains, the Tigris rose to an unprecedented height. **24.** The flooded Tigris burst the river bank 17 miles north of Baghdad. 300 square miles of the desert were under water and Baghdad became almost an island. **30.** The White Star liner *Pittsburg* encountered two cone-shaped waves, which broke over the fore deck and carried away the centre bridge. The quartermaster who was at the wheel was thrust through a partition into the chart room.

April 4. A tornado, 3 miles long and several hundred yards wide, tore a path through Pineville, Louisiana, killing 14 people. In Main Street the fronts of 20 houses were ripped off. In Cass County, Texas, several buildings were destroyed.

May 1. The Canadian Pacific Railway in New Brunswick was seriously affected by floods. The West and East Welsford tracks were under water. The dam which crosses the railway at Brownville Junction was carried away. This was the worst flood since 1887. A later account said that twenty bridges had been swept away. 8. Heavy rains caused the worst floods for over 50 years in the Canterbury and Marlborough districts of New Zealand. Bridges were destroyed, train services stopped, and many townships isolated. **10.** Violent hailstorms in Paris. A high wind accompanied the hail at Domfront, where the roofs of many houses were swept away, and in the surrounding country the roads were blocked by fallen trees. **14.** A tornado caused great damage in Colorado City. It mowed a path 25 miles long across Mitchell County. About 50 persons were killed and great damage caused to crops. The health resort of Hot Springs, Arkansas, suffered severely through a cloud burst which sent a wall of water 5 ft. high rushing through the main street. **23.** The Euphrates burst several miles of the Bund 40 miles north-west of Baghdad and caused about 45,000 acres of cultivated land to be inundated.

June 5. A storm of wind, rain and lightning swept over New York City and its environs. Many houses were struck by lightning, a reformatory building on Randall's Island was unroofed and on Riverside Drive many trees were torn up. Damage to buildings was estimated at £40,000. **11.** The lowlands of Kansas, Oklahoma and Texas were flooded as the result of three days torrential rains. Several hundred people were rendered homeless. In Kansas every watercourse in the State overflowed its banks and enormous damage was done to standing crops. **26.** The heat wave in New York was broken by a freakish storm which visited some parts of the city with great violence, and never went near other parts. In Brooklyn during a 10 minutes' storm a large number of houses were unroofed and flying *débris* were carried hundreds of feet. Nearly 500 trees were torn up and a brick wall, 40 ft. high and 200 ft. long, was blown down.

August 14. Disastrous tidal waves on the north-east coast of Korea carried away hundreds of houses, and did much damage to shipping. **16.** During a severe thunderstorm at Leghorn the electric tramway cables became fused by lightning. At Pistoia a house was set on fire. **23.** On the 23rd the floods in Bihar were said to be the highest ever known. The embankment which protects Patna was breached in several places and water was flowing into the town. Thousands of cattle were carried down the Ganges. One-third of the population of Arrah, and all the inhabitants of the surrounding villages were homeless.

September 20 Bombay City was flooded by torrential rains lasting for several hours. The tramway and suburban railway services were suspended and long lines of stranded motor cars were axle deep in water.

BRITISH ASSOCIATION.—The ninety-first annual meeting of the British Association for the Advancement of Science was held at Liverpool on September 12-19. Sir Ernest Rutherford, who succeeded Sir Charles S. Sherrington as President, dwelt in his address on "The Electrical Structure of Matter." There was by no means the same certainty to-day as a decade ago, he said, that the atoms of an element contained hidden stores of energy. For the first time in the history of the Association the President's address was broadcasted by wireless.

The following were the Presidents of the various sections:—*A*, Mathematics and Physics, Prof. J. C. McLennan; *B*, Chemistry, Prof. F. G. Donnan; *C*, Geology, Dr. Gertrude Elles; *D*, Zoology, Prof. J. H. Ashworth; *E*, Geography, Dr. Vaughan Cornish; *F*, Economic Science and Statistics, Mr. W. H. Beveridge; *G*, Engineering, Sir H. Fowler; *H*, Anthropology, Prof. P. E. Newberry; *I*, Physiology, Prof. G. H. F. Nuttall; *J*, Psychology, C. Burt; *K*, Botany, Mr. A. G. Tansley; *L*, Educational Science, Prof. T. P. Nunn; *M*, Agriculture, Dr. C. Crowther.

Public lectures were given in Liverpool and the neighbouring towns as follows:—Professor A. S. Eddington, "Relativity"; Dr. Johannes Schmidt, "The Dana Expeditions and their work and the Life History of the Eel"; Sir William Pope, "Colour Photography"; Mr. J. Barcroft, "The Study of Life on the Roof of the New World"; Dr. F. A. E. Crew, "The Riddle of Sex"; Prof. Seward, "Greenland"; Prof. Pear, "The Acquisition of Skill in Work and Play"; Major G. W. L. Kaye, "X-Rays and their Uses"; Prof. Roxby, "Regional Survey"; Mr. F. Balfour Browne, "Wild Bees and Wasps"; Sir John Russell, "Soil and Crop Growth"; and Prof. H. H. Turner, "The Size of a Star."

In 1924 the Association will meet at Toronto under the Presidency of Sir David Bruce.

ATLANTIC BED RISING.—A change of level in the bed of the Atlantic between Cape Town and St. Helena was reported by the Eastern Telegraph Company. One of their cable repair-ships found a depth of three-quarters of a mile at a place where the chart showed a depth of three miles when the cable was laid in 1899. Changes of level of the ocean floor have often been brought to light by soundings, but the actual rise or fall is reckoned in a few feet or fathoms, and nothing of such a stupendous character as a change of more than two miles has ever been established by surveys.

BALLOONS ADRIFT.—Mr. Henry Harries contributes to the "Meteorological Magazine" some remarkable facts concerning toy balloons sent up by Major MacLulich from Brighton during the summer of 1922. On August 23 two balloons were liberated together, and next morning they descended in the village of Marcel par Vitrey, Haute Saône, having travelled in company 295 miles. On September 21 two others started together in a dead calm, made a perpendicular ascent of about 2,000 feet, and within 12 hours dropped in the streets of Cassel, Germany, the distance being 365 miles, and the rate 30 miles an hour. Numerous balloons were sent off on September 9, under well-marked anticyclonic north wind conditions. No fewer than 43 of them were recovered within a small area in the north of France. They had attained an altitude where the wind was of gale force, one of the balloons, found 2½ hours after its despatch, having covered 108 miles at more than 43 miles an hour. On September 13, the balloons were liberated in front of a cyclone approaching Brighton from the Midlands. Of these 15 were drawn into the cyclone and descended in various places in Kent, Essex, Suffolk, Bucks., and Berks—the greater part of the circuit of the cyclone. The other five were caught in a westerly, veering north-westerly, current, which carried them to north-eastern France. One dropped at St. Ouen, Paris, 226 miles distant from another, which descended at Thatcham Park, Stowe, Bucks.

BALUCHITERIUM OSBORNI.—Professor H. F. Osborn has constructed, from the bones found after many years' search, an immense prehistoric animal called the "Baluchiterium Osborni." The animal was about 23ft. long and measured 12ft. to 13ft. in height. In 1910 the bones of an unknown extinct animal were found in the Early Miocene deposits in Baluchistan, and more recently Borrisiak, a Russian palæontologist, found the remains of a similar large animal in Turkestan, but could not get the skull. An American expedition found a complete skull 5ft. long, and with this and the other relics Professor Osborn was able to reconstruct this curious Asian monster of the past. Its limbs were as large as those of an elephant, but the feet were different, and the "waist" was three times as high. It had a horse-like neck, and a small head, and is believed to have fed on the leaves of trees.

BLACK CURRANT "BIG BUD."—Experiments have been made at the Crichton Royal Institute, Dumfries, to discover a remedy for "big bud," a disease caused by a gall mite which destroys black currant bushes. Over 400 bushes were chosen, and the ground around was covered with straw and dead branches, which were then set on fire. The scorched branches of the bushes were then cut off to within six inches of the ground, fresh straw was put on, and then burnt away. It is claimed that by this treatment less than ten per cent. of the bushes have been lost through disease, and that the remainder have made a good recovery, with every promise of a healthy crop.

BOILER AT 1,500 lb PRESSURE.—J. V. Blomquist, a Swedish engineer, has invented the "Atmos" boiler, which is said to be capable of working at a pressure of 1,500 lb. It consists of eight revolving tubes side by side in a furnace, 11 ft. 2 in. of the length being exposed to the flames, whilst the outside diameter is 1 ft. and the walls ¾ in. thick. The tubes make 330 revolutions per minute, and the boiler will work at 1,500 lb. pressure and 700 deg. F. steam temperature (100 deg. superheat), being supplied with feed-water by a centifrugal pump at 150 lb. pressure. Two boilers of this kind, evaporating 16,500 lb. of steam per hour, were in use at the Carnegie Sugar Refining Company, Gothenburg, Sweden, for twelve months, and are stated to give little or no trouble. The special feature of the design—the revolving tubes—is to enable the centifrugal force to press the water inside the tubes definitely against the metal surfaces and at the same time to enable the bubbles of steam to escape more freely through a central tube.

CHEVET TUNNEL REMOVAL.—A double-line widening scheme has been put in hand on a portion of the London Midland and Scottish Railway in the neighbourhood of Normanton. The total length of the widening projected will be three and three-quarter miles, and it affects the line between Chevet Junction and Snydale Junction. The scheme starts at Chevet Junction, opposite Haw Park Wood, and involves the opening out or removal of the Chevet Tunnel, over 700 yards long. The demolition of this tunnel, cut out of solid rock, will be a costly and difficult undertaking. The rail level is 90 ft. below the surface, and at present it carries a double track. When the scheme is completed the line will carry four tracks, and an awkward "bottle-neck," which has been a serious hindrance to passengers and goods trains, will be removed.

Deciphering Charred Documents.—Mr. Raymond Davis, of the Bureau of Standards, Washington, has discovered that the written and printed matter of papers that have been thoroughly charred, as by being heated in an iron box or safe, may be deciphered by placing the charred sheet in contact with a fast or medium plate for a week or two in the dark and then developing as usual. An emanation seems to affect the plate except where the charred ink acts as a protective coating. Films need a much longer contact than plates, and sometimes the effect is reversed unless the film is previously washed and dried.

Fading of Colours.—Many colours fade when exposed to strong sunlight, but the relative injuriousness of diffused daylight and artificial illuminants is not thoroughly understood. The subject was discussed by Sir Sidney Harmer, Director of the Natural History Department of the British Museum, in a paper read before the Royal Society of Arts. He stated that experiments by Dr. Russell and Sir William Abney led to the conclusion that: (1) fading is due to the action of light and not to moderate heat; (2) it does not take place in the absence of oxygen and moisture; and (3) the rays of the violet end of the spectrum produce the greatest amount of fading. From experiments with various glasses devised to check the transmission of ultra-violet rays it appears that in general the use of tinted glasses merely delays fading and does not prevent it, in the case of fugitive colours. The best glass for the purpose had a distinct yellow coloration, rendering its use for cases scarcely practicable. The wings of certain moths showed appreciable fading in 10–21 days; on the other hand, the fur of the tiger required 175 days, and of a brown horse and antelope 1,485 days, before there was perceptible change of colour. Direct sunlight was found to be about 20 to 70 times as injurious as electric light, and diffused daylight about six times as injurious. There seems little doubt that illumination by electric light is less liable to cause fading than natural light. Most artificial illuminants contain less ultra-violet energy than daylight.

Fatigue in Laundry Work.—Miss May Smith has undertaken an investigation into fatigue in laundry work on behalf of the Industrial Fatigue Research Board. She finds that there is a reduction in efficiency towards the end of the day, which tends to be greater during a ten-hour day than a nine-hour day. There is also clear evidence of the beneficial effects on efficiency which occur after a fifteen minutes' rest pause in the morning spell, but the greatest influence on the laundresses' output appears to be due to the vast individual differences in the workers' efficiency. Apparently the atmospheric conditions of laundries compare very unfavourably with those in potters' shops, boot and shoe factories, and cotton-weaving sheds. Miss Smith believes that laundry work, when conducted under good conditions, is not detrimental to the health of the workers.

Fire-Pistons Among the Malays.—Mr. Ivor Evans has published a description of the fire-pistons used for the production of fire among the Shans and people of Pegu in Burma, and among certain tribes in the Malay Peninsula. The fire-pistons are made of buffalo-horn, wood, and tin. The important part is the binding of a rag near the distal end of the piston, which acts as a washer and prevents the escape of air. This rag must be so adjusted that it allows the piston to pass smoothly down the cylinder when the piston-head is struck sharply with the palm of the hand, and it must not be so tight that there is difficulty in withdrawing the piston fairly quickly, nor so loose that air can escape from within.

Forest Murmurs.—Professor W. J. Humphreys, in his presidential address to the Washington Academy of Sciences, gave some interesting particulars of the murmur of the forest and the roar of the mountain, based on observations in the Gap Mills Valley, Monroe County, West Virginia. Occasionally there are strong winds blowing simultaneously up both sides of a high mountain ridge, and it is asserted that when there is an appreciable wind from the mountain there is often a lighter wind blowing in the opposite direction up portions of the mountain itself. With tempest winds the conditions are said to be much like the Helm Wind along the western side of the Pennines. Tree and forest sounds are said to be due, not to the elasticity of the twigs and branches, but as in the case of the singing telegraph wires, to the instability of the vortex sheets which their obstruction introduces into the air as it rushes past. The pitch of the æolian murmur of a forest is said to be essentially that of the average twig, and though the note of the twig may be inaudible at close quarters, the forest may often be heard miles away.

Greatest Cable in the World.—The greatest cable in the world has been laid between Weston-super-Mare and Far Rockaway, Long Island, thus establishing the sixth complete cable circuit between the United States and Europe for the Commercial Cable Company. In the construction of this new cable, the largest ever manufactured for deep-sea operation, more than 4,000,000 lb. of copper, 1,800,000 lb. of gutta-percha, and 80,000 miles of iron and steel wires (more than enough to go three times round the earth) of various sizes were used. The cable is capable of transmitting 1,200 letters per minute, 600 in each direction simultaneously, a capacity nearly twice that of any other long cable now in operation anywhere. The conductor of the main sections weighs 1,100 lb. per nautical mile, which is 50 per cent. more than the heaviest hitherto used. The deep sea portion of the cable will not be much more than 1¼ in. in diameter, and, contrary to common belief, it will everywhere sink down to the ooze at the bottom of the sea, to lie there in the darkness and stillness, from two to three miles below the surface.

Gypsies in Turkey.—In the Journal of the Gypsy Lore Society Mr. W. R. Halliday gives an account of gypsies in Turkey, collected from a wide range of literature. It is estimated that there are 200,000 of these people in modern Turkey; but the figure cannot be verified. The strict Osmanli hates them as infidels and dreads them as magicians, and the Christian view of the gypsy's irreligion and genial roguery is illustrated from the folk tales. Their thievish habit and way of life have naturally made them unpopular, and it is widely believed in Turkey that they dig up corpses, a belief probably based on their habit of eating carrion. It is also stated that they drink annually a secret potion, the composition of which is known only to the oldest and wisest of the tribe, which secures immunity from snake-bite. Their employment as bear-leaders is reflected in the dislike of black and brown bears.

HUDSON RIVER TUNNELS.—Remarkable progress is being made in the construction of the twin tunnels under the Hudson River, which are intended to unite New York and New Jersey, and be capable of accommodating 46,000 vehicles a day, or more than twice the volume of traffic now served by the New York ferries. The tunnels will be two miles long. In each of them there will be a 20 ft. roadway for a double line of one-way vehicles, and a side walk for pedestrians. Each tube will be divided internally into three horizontal planes, with the object of providing adequate ventilation for the expulsion of the deadly carbon monoxide gas from the motor-cars using the tunnels. The lowest plane will be filled with fresh air, driven in at the rate of 3,600,000 cubic ft. per minute. Air ducts at frequent intervals will admit the air to the central plane, which forms the roadway, and powerful fans will draw the foul air upwards and outwards and through the plane in the roof. It is estimated that by this plan the entire air in the tunnel will be changed every 90 seconds.

HUMAN HAIR HYGROMETER.—An improved hygrometer, which represents at a glance the percentage of moisture in the air, has been invented by Messrs. Negretti and Zambra. In order to indicate changes of moisture Saussure employed a hair, which became longer when moist and shorter when dry. Twelve or more hairs form the basis of Messrs. Negretti and Zambra's new instrument. Human hair is specially selected and scientifically treated. The hairs are anchored by their lower ends and the upper ends are connected to a link which operates on a lever attached to the pointer spindle. The dial is graduated from 10 to 100 in percentage relative humidity. Readjustment of the instrument is quite simple. On the lower part of the dial is a scale to ascertain the dew-point if required. The instrument is said to be of especial value in many industrial processes, and various types are manufactured depending on the requisite conditions. A large type of the same instrument combined with a dew-point hygrometer has also been devised.

INDUS BARRAGE.—After a discussion which has lasted on and off for seventy years the Government of India has sanctioned the construction of an irrigation barrage across the Indus at the Sukkar gorge. The scheme dwarfs all previous projects in the country. It is estimated to cost £12,300,000, or nearly twice the actual cost of the great triple canal project in the Punjab. The width of the waterway for which the Sukkar barrage has been designed is 3,960 ft., compared with 1,832 ft. for the Assiut Dam in Egypt, while the area affected exceeds the total cultivable area of Upper and Lower Egypt. After 20 years the area irrigated will amount to 5,300,000 acres.

LIGHTING AND INDUSTRIAL OUTPUT.—Mr. Leon Gaster, in a lecture on industrial lighting and the prevention of accidents, before the Royal Society of Arts, showed that industrial fatigue, ill-health, spoiled work, and diminished output were the result of unsatisfactory lighting in factories and workshops. In the cotton, fine linen, and silk industries, it had been found that the output was 5 to 12 per cent. less by artificial light than by daylight. An investigation by the National Institute of Industrial Psychology, showed that by using a lamp giving four times the light of an ordinary miner's lamp the amount of coal produced was increased by more than 14 per cent.

MAN'S ERECT POSTURE.—Sir Arthur Keith, in his Hunterian lecture on the evolution and disorders of man's posture, pointed out that extinct forms of man show that the upright carriage of the head was evolved later than the human form of the lower limb, of which the origin must be sought in Miocene or possibly Eocene times. In the hylobatic phase of evolution the gibbon was differentiated from its cousins, the Old World and New World monkeys, by postural adaptations of bones and muscles which made it orthograde and human in type as opposed to the pronograde monkeys. This change probably took place towards the end of the Eocene period. The troglodytic phase was represented by the great anthropoid apes, evolved from the small anthropoids, probably in pre-Miocene times. In the plantigrade phase, structural changes were confined almost entirely to the lower limbs. As man shares so many characters in common with the great anthropoid apes, Sir Arthur Keith holds that he must be regarded as one of several aberrant branches of one great stem which began to break up into the various fossil and living forms at the beginning of the Miocene or the end of the Oligocene period.

MARBLE MAY BE OF AQUEOUS ORIGIN.—Dr. M. Copisarow has conducted a number of experiments with the object of showing that marble may have had an aqueous origin. He heated a quantity of solid calcium chloride and hydrated sodium carbonate in an autoclave at 300 degrees at a pressure of 24 atmospheres for eight hours, and a compact mass of marble, capable of taking a high polish, was formed. When sodium sulphate was used with calcium chloride a compact mass of alabaster was produced.

MINERS' VOCAL SAFETY LAMP.—The latest device for ensuring safety in coalmines is a lamp which indicates by a clear musical note when there is more than 2 per cent. of fire-damp present. The note, which is based on simple harmonics, rises in pitch and intensity in proportion to the quantity of fire-damp present. It thus provides miners for the first time with an audible signal of danger.

MOSQUITO BREEDING UNDER CONTROL.—A new method of controlling the breeding of malaria mosquitoes has been adopted in the lower valley of the Mississippi, where the shallow streams of the delta, with their abundant vegetation, are favourable to these pests. Drainage is impossible, and a trial was made of clearing a section of the streams and impounding the water so as to convert a marsh into a lake. The value of this method is that all vegetation is first cleared away, and provision is made for a high permanent level of water, and the maintenance of a clear margin. The experiment so far has given good results.

MOUNTAINEERING AT HIGH ALTITUDES.—Mr. G. I. Finch, a member of the Mount Everest Expedition, discusses in the *Geographical Journal* the question of mountaineering at high altitudes. He found that up to 21,000 feet the climber's physical functions were unimpaired, and good sleep and recuperation from fatigue were possible. Above 23,000 feet sleep was fitful, appetite fell off, and there was a loss of physical fitness. The conclusion is that at, say, 22,000 feet, acclimatisation to altitude ceases, and above that height oxygen should be used, at first in small doses, and from 26,500 feet in larger doses, but the dose must depend on the nature of the ground. Oxygen increases the appetite, and due provision must be made for this. Although greater heights than 26,500 feet were reached without the use of oxygen, Mr. Finch thinks this procedure unwise, and believes that above the acclimatisation level a man must become steadily weaker and unable to recover from fatigue unless he makes use of oxygen.

MUSIC TYPEWRITER.—Signor Fortoni, an Italian conductor, who has been resident in London for many years, has invented a typewriter which enables music to be typed in the same way as ordinary letters. It follows the main lines of an ordinary typewriter, in that it is worked by keys moving levers, on the ends of which are the types. The music sheet is held upright and flat against a steel plate at the back of the machine. Of the 40 levers, 35 carry six types each, and the remaining five three each. At the front of the machine is a curved dummy piano keyboard of 32 notes. A movable pointer can be shifted to any one of these 32 positions. On the right side of the machine is a lever which can be altered to five different positions. Thus the combination of these with the 225 types gives over 7,000 signs. Included in the types are the ordinary alphabetical capital and small letters, so that the words of a song, musical directions, etc., can all be written with the one machine. More remarkable still seems the fact that a piece of music can be mechanically and accurately transposed from one key to another.

"NEVER-STOP" RAILWAY.—A demonstration of the "never-stop" railway system, as it is called, has been made at Southend, over a line 300 yards long. The idea of the invention is remarkably simple. The travelling cars are like the nut on a screw. A nut rotated on a screw with a coarse thread travels quickly, and if the thread is fine slowly. In the "Never-Stop" system each car is like a nut travelling on a screw which rotates under the track. At stations the pitch of the screw is fine, between them it is coarse. Between stations the cars travel eight times as fast as at the station. Thus if the speed in the station is two miles elsewhere it is sixteen. No brakes, signals, drivers or conductors are needed. The new system can be applied to overhead railways, in the central area of big cities, where tube, subway, or elevated electric trains are impracticable and where 'buses and tramcars are inconvenient. In order to make the test at Southend additionally stringent, a gradient of 1 in 30 was introduced, and there were two loops of only three feet radius. There were 24 cars, each seating 8 passengers, with room for four standing. At a speed of only 16 miles an hour, the railway will be able to deal with ten or twelve thousand seated passengers in that time. The "Never-stop" system has been applied to the City of Paris for installation in subways under the boulevards.

NEW RACE TYPE?—Mr. A. J. Pape, in a paper read before the Anthropological Section of the British Association at Liverpool, asked the question, "Is there a new race type?" He suggested that there were medical, mathematical and educational evidences of such a type. The characteristic marks included a distinct increase of cranial development above the ossification of the parietal and frontal bones, hair fine in texture, and skin fine grained and thin. The eyes were specially luminous and intelligent looking, the eyebrows were rather prominent, the type of face somewhat triangular but not sharp, and the general physiology of the body was harmonious. The psychology manifested itself in rapid response to sympathy, pity in suffering, power to comprehend principles easily, quick intuitions, thoroughness, and sensitiveness. There was a distaste for meat and coarse foods, but not a large appetite along any lines.

OTIRA TUNNEL.—The opening of the Otira Tunnel, in August 1923, completed the railway connection between the east and west coasts of the South Island of New Zealand. It pierces the Southern Alps at Arthur's Pass for 5⅓ miles, and replaces a picturesque but dangerous coach-route. The tunnel has a grade of 1 in 33, and is officially stated to be the seventh largest tunnel in the world and the longest in the British Empire. The Simplon is 12¼ miles long, and the Severn Tunnel 4 miles 624 yds. The Otira Tunnel, which has been fifteen years in construction, and has cost more than £1,000,000, will mean a great deal for Canterbury, which will be able to get west coast timber and coal direct by rail instead of by a long sea voyage.

PHEASANTS' WARNING OF EARTHQUAKES.—There does not seem much connection between earthquakes and pheasants, but Professor Omari, of Japan, has been able to show that these birds are peculiarly sensitive to slight tremors, and in many cases they gave notice of a coming shock. Thus observations were made on pheasants living in a neighbouring park, during the quiet hours of the night. In three years he recorded 22 cases of the disturbance of pheasants. In half the cases observed the movement was noticed by the birds more readily than by a trained observer. On seven occasions the birds crowed before the tremor was felt, on five occasions at the same time, and on five afterwards. In four cases they crowed while no tremor was felt, though slight movements were marked on the seismograph. In one case only did an earthquake take place without the accompaniment of crowing by the birds.

PORTRAITS BROADCASTED BY WIRELESS TELEPHONY.—On Empire Day, 1923, Dr. Fournier d'Albe was successful in the first attempt to broadcast a picture by wireless telephony. The picture chosen was a portrait of the King. It was "coded" by dividing it into thirty horizontal strips, each of which was split up into twenty squares. A letter was assigned to each square to indicate its average shading, and these letters were written out in thirty lines of twenty letters each. Each line was divided into four groups of five letters, and each group was dictated into the microphone in turn. The lines were numbered. The total time of transmission, with instructions, was twenty-two minutes, but the code message itself was taken down in eight minutes. The picture was reproduced either by graduated dots on squared paper or on an ordinary typewriter, using letters of graduated size and making the line space equal to the letter space. Recognisable reproductions were made in from twenty to twenty-five minutes.

Postage Stamps may be Abolished.—The Pitney-Bowes Postage Meter threatens to abolish adhesive or embossed postage stamps on letters, circulars or postcards. It has been set up in Manchester, where it is intended to facilitate the postal arrangements of big business houses, by enabling the correspondence to be sent direct to the sorting department at the Post Office. The meter seals and stamps simultaneously any ordinary sized envelope at the rate of 250 to 300 a minute. The postage imprint is a combination of postage stamp, cancellation and postmark. A firm using it pays for a certain number of impressions, the meter is set, and the registers on it indicate the amount of postage used. Thus the postage account of the firm is safeguarded against pilfering, whilst much of the labour of sealing and stamping letters and circulars is abolished. It is mechanically impossible to waste postage, as the meter fails to record unless an impression be made.

Radio Telephones in Express Trains.—In the United States and in France successful efforts have been made to instal complete radio telephone sets in express trains. In the fast express trains between Hoboken and Buffalo passengers could continue conversation with their friends which were interrupted by the train starting, and they could also receive radio telegrams while the train was in motion. Experiments were also carried out by three French railway companies in making concert cars. On the Paris-Orléans railway, the experimental saloon cars had two loud-speaking telephones fitted at each end. Up to a distance of 210 miles from Paris, the Eiffel Tower concerts were heard quite satisfactorily. As a rule the concerts were better heard than the news items. When the train went through deep cuttings the sound was notably reduced, and when going through long tunnels it almost disappeared. It was found that the large radio telegraphic stations near the Bordeaux-Paris line produced serious disturbances. When going round curves also discordant sounds were heard, due to the friction of the flanges of the wheels on the rails.

Radium in Katanga.—Mr. H. E. Bishop in *Science* gives an interesting account of the discovery of a rich deposit of radium near Elizabethville, in Katanga, during prospecting work by a Belgium Corporation. This was in 1913. Then the war broke out, but the secret of the find was so well kept that nothing was known by the outside world until a large plant for radium extraction had been built at Oolen in Belgium. In spite of the fact that the one is transported 2000 miles down the Congo, across the ocean to Antwerp, and then by rail to Oolen, its richness allowed of radium preparations being put on the market in 1922 at a considerably lower figure than that at which it has been maintained for some years by the American companies. As a result of conferences between the representatives of the American companies and the Belgian, a joint selling organisation was formed.

Saxon Burial Grounds.—Professor F. G. Parsons has described the result of the exploration he has made of Saxon burial grounds at Margate, Mitcham, and Bedford-on-Avon. At Margate the dead were found buried in regular rows, as in a modern cemetery, a habit the Jutes brought with them from the continent, where the so-called "row-graves" have been long recognised in North-West Germany. The Jutes' burials may be always recognised from the presence of an earthenware bottle, usually near the face of the dead; it possibly contained mead for the refreshment of the ghost. From the arms and other adornments it is considered that at Mitcham and Bedford-on-Avon the sights were occupied by pagan Saxons, long-headed, long-faced members of the Nordic race, though every now and then a broad head of Mid-European origin turns up, a sign that the Angles, Saxons, and Jutes were not an altogether pure race. The average height was 5ft. 6in. The state of the teeth show that the food consisted largely of grain roughly ground by soft stones, They suffered from chronic rheumatism; and the injuries to the head often indicate the adventurous life they led. Most of the men died before the age of forty.

"Sheep Tracks" on Grassy Slopes.—Dr. Hilmar Odum, of the Danish Geological Survey, has made a study in the Faröe Islands and in Denmark of the close-set grassy ridges running parallel on the surface of a bank, which are popularly supposed to be due to the traffic of sheep. He has found that the formation of the ridges, which he names "terracettes," originates in a settling of the loose earth on an unstable slope into a position of greater stability. A series of horizontal cracks appear at first in the turf covering a steep slope, then the narrow turf section between two cracks sinks slightly, turning at the same time about a horizontal axis, so that its surface comes to rest at an inclination rather less steep than that of the slope as a whole. The ridges, once begun, increase in definiteness, owing to the filtering out by the grassy coating and final settling of soil particles washed down by rain. The whole process is entirely a geological phenomenon.

Smoke Plague at Kew.—The Director of the Royal Botanic Gardens at Kew has called attention once more to the harmful results that may follow from the lack of control of smoke production in industrial suburbs. The heavy deposits of soot borne by the evergreens are clear indications of atmospheric contamination which will markedly lower the vitality of the plants in the Gardens, and in some cases may actually prevent their successful cultivation. At present the greatest damage arises at Kew from the deposits of dark-coloured tarry material upon the leaf surfaces cutting down the supply of light which reaches them and clogging the pores through which are carried on gas exchanges vital to their healthy existence. Apparently the atmospheric pollution at Kew can be traced in the main to the industrial area on the opposite side of the Thames.

STEERING A SHIP BY EAR.—M. Loth, a French engineer, has invented an electric pilot cable which provides for the safe navigation of ships through intricate channels by means of an electric cable sunk in the fairway. On the bridge of ships supplied with the electric pilot is a receiving apparatus very much like an ordinary telephone or wireless receiver, supplied with head-clip microphones for the use of the navigating officer. By listening to the various tones in the receiver he is able to hold the ship on an accurate course immediately above the live cable sunk in the fairway. The apparatus is unaffected by fog or heavy seas, is extraordinarily simple, and demands no specialist training for its use. All that is required is to hold the ship on a course in which the sound waves emanating from the sunk cable are heard at their most distinct pitch in the receivers. Experiments at the Norwegian naval station at Horten, in the Christiania Fjord, showed that the apparatus was most successful.

TATTOOING.—Mr. W. G. Handy has published an elaborate monograph on tattooing as formerly practised in the Marquesas. He made a study of about 125 cases of the older generation, and found that the designs were marked by considerable artistic taste. The operation was said to have been very painful in each case, and local inflammation, followed by fever or swellings, invariably persisted for eight or ten days. Mr. Handy was unable to discover how far the tattooing was supposed to possess a magical significance, but in one case a woman had been tattooed to protect her from evil spirits. In its last day the art was purely decorative.

TEACHING THE MINER TO USE HIS PICK.—Mr. Adams and Mr. Stephenson, of the University of Manchester, have spent twelve months in an investigation of the most scientific method of using a pick in a coal mine. To do this they lived the life and worked the hours of the miner. As a result the wielding of the pick has been rendered more continuous and rhythmic, and a larger output of coal secured with less fatigue to the miner. The effects of better lighting and the more orderly arrangement of work so that less shovelling had to be done were also investigated.

TELEPHONING BETWEEN AMERICA AND GREAT BRITAIN.—The first telephone conversation between the United States and Great Britain took place in the early hours of the morning of January 15, 1923. Mr. H. B. Thayer, president of the American Telephone and Telegraph Company, from his office in Broadway, New York, succeeded in addressing a party of Press representatives and others at the New Southgate works of the Western Electric Company. Communication was maintained for two hours. The demonstration was carried out by the American Telephone and Telegraph Company and the Radio Corporation of America, which had installed a transmitting apparatus at Rocky Mount, Long Island. The transmitter was connected with New York by telephone wires. At New Southgate a special receiving set with eight valves was employed, with an indo frame aerial about six feet square. Most of th words spoken by Mr. Thayer and others wer heard both by means of head telephones an also by a "loud-speaker" so clearly that it wa possible to recognise one of the speakers by hi intonation.

TIME AND SOMNAMBULISM. — Mr. Sidne Hooper has published in the "Proceedings of th Society for Psychical Research" an account o his experiments in the appreciation of time b somnambules. Hypnotic subjects, it is stated have supernormal power in appreciating th passage of the hours. If one of them is tol during hypnosis to do a certain act at the en of 10,000 minutes he will do it, at or near th exact time, although he may have had no con scious knowledge of the suggestion. How doe he come to know the time when the suggeste act should be performed? Mr. Hooper's experi ments suggest that when a long-time interva is given in minutes the subject usually calculate subliminally so as to find out when the sug gested act falls due. One of his subject maintained that as soon as the suggestion wa given she began to count rhythmically an continued to do so until the appointed moment

VAAL RIVER BARRAGE.—On July 27, 1923 Prince Arthur of Connaught opened the barra across the Vaal River, which has taken si years to build, and is the largest structure of it kind in South Africa. It has been constructe to meet the demand of the Rand gold mines fo a continuous water supply. The Vaal River i checked near Vereeniging to form a lake 4 miles in length, with a surface area of 6¼ squar miles, and containing 13,500,000,000 gallons o water. The in-take is at Vereeniging, whenc the water is pumped to Zwartkopjes before i travels to Johannesburg through its 54 miles pipes. An idea of the magnitude of the tas can be gained from the fact that there are 3 sluice gates in the barrage, each 25 ft. high an 32 ft. 6 in. wide. There are 35 piers, each 8 ft thick and 34 ft. 6 in. in height, with a length o 55 ft. from the foundations.

ROYAL SOCIETY MEDALLISTS.

THE King has approved of the followin awards this year by the President and Counci of the Royal Society :—

A *Royal Medal* to Sir Napier Shaw, F.R.S., fo his researches in meteorological science.

A *Royal Medal* to Professor C. J. Martin, F.R.S. for his researches on animal metabolism.

The following awards have also been made b the President and Council :—

The *Copley Medal* to Professor H. Lamb, F.R.S. for his researches in mathematical physics.

The *Davy Medal* to Professor H. B. Baker, F.R.S., for his researches on the complete drying of gases and liquids.

The *Hughes Medal* to Professor R. A. Millikan, for his determination of the electronic charge and of other physical constants.

An exhibition of objects of decorative art, in part selected by the Royal Academy, was opened at Burlington House at the beginning of the year. The Academy portion included contributions from many eminent sculptors, architects and painters, and one gallery was devoted to the exhibition of cartoons and drawings by Alfred Stevens. Most of the latter were the works purchased in the preceding year under the terms of the Chantrey Bequest, the others were lent by Sir George Holford. The exhibition at Burlington House also contained an Arts and Crafts section which filled five of the galleries and was arranged by the Arts and Crafts Exhibition Society.

To the Selecting Committee for the Summer Exhibition many more works were submitted than in 1922, though the number was still far short of that reached in some of the pre-war years. The Committee that judged them consisted of the President, Sir Aston Webb, Sir H. Hughes-Stanton, Sir J. J. Burnet and Sir F. Short, and Messrs. Olsson, Jack, Shannon, Pegram, Scott, Clausen, Russell and Poole. The Hanging Committee for oils and watercolours was composed of Sir H. Hughes-Stanton and Messrs. Olsson, Jack, Shannon, Clausen and Russell; the works in black and white were arranged by Sir Frank Short, the architectural designs by Mr. Scott, and the sculpture by Messrs. Pegram and Poole.

Only two works were bought for the Chantrey collection. One was the well-known portrait of Phil May in a red hunting coat, painted many years ago by Sir James Shannon; the other "The Road: Winter Morning," by Mr. George Clausen. A thousand guineas was paid for the Shannon and a hundred and fifty guineas for the Clausen. Sales at the exhibition were less satisfactory than usual although better than might have been expected considering the depressed state of trade. The principal works sold included "Pastoral" (£500) and "Kensington Gardens" (£262 10s.) both by Mr. Philip Connard; "The Hospice" (£250), by Mr. Sydney Lee; "Interior" (£250), by Mr. A. van Anrooy; "Sunrise in May: the Willows" (£262 10s.) and "Tilty Church" (£300), by Mr. George Clausen; "A Provençal Town" (£250), by Mr. H. H. La Thangue; "The Watch Tower" (£525), by Mr. Arnesby Brown; "Early Morning, Les Baux, Provence" (£300), by Sir Herbert Hughes-Stanton; "La Scala" (£126), by Mr. Horace Fisher; "Hampstead Heath" (£150), by Mrs. Laura Knight; "The Captive" (£210) by Mr. P. A. Hay; "The Heart of Suffolk" (£315), by Mr. Bertram Priestman; "The Saint and a Sinner" (£150), by Miss Madeline Green; "A Peaceful Vale" (£315), by Mr. Fred. Milner; "Romance d'autre fois" (£550), by Mr Virgil Constantini; "Memories, Hopes and Fancies" (£315), by Mr. Gunning King; "Suzanne" (£157 10s.), by Miss A. MacRitchie; "The Maker of Dreams" (£105), by Mr. Frank O. Salisbury; "Papillons" (£126), by Mr. Walter E. Webster; "Priscilla" (£126), by Mr. L. Campbell Taylor; "Love and Riches" (£262 10s.), by Mr. G. A. Pownall; "Mist rising in the Valley of the Crouch" (£100), by Miss Alice Fanner; "Sybil of the Gold Coast," bust (£150), by Mr. E. Whitney-Smith; and "Winged Joy," group (£500), by Mr. Henry Pegram. Among the unpriced works marked sold were "Gossip on the Road," by Mr. Clausen; "A Storm is Coming," by Mr. W. L. Wyllie; "The Rose Walk" and "A Blizzard," by Mr. Joseph Farquharson; "Red-haired Girl," by Mr. James McBey; and "Angry Waters," by the late B. W. Leader. In October, exhibitions were opened in the Royal Academy's galleries of Australian art and primitive English paintings.

The most important addition to the National Gallery was the group of portraits of members of the Wertheimer family, painted by Mr. Sargent. The portraits were painted for Mr. Asher Wertheimer, the picture dealer, who, when he died in 1918, bequeathed them to the National Gallery subject to the life interest of his wife. Mrs. Wertheimer died in December, 1922, and in the Spring of 1923 the Sargents, nine in number, and all representations of the donor or his family, were on view at Trafalgar Square. They were hung together in one of the small galleries and attracted an unusual amount of attention. By the death of Mrs. Ludwig Mond, in May, 1923, the National Gallery became entitled, on certain conditions, to the large collection of paintings by early Italian masters formed by the late Dr. Ludwig Mond, who was advised principally in their selection by Dr. Richter. One of the conditions attached to the bequest is that the pictures are to be hung together in rooms set apart for them. Should it be necessary to build new rooms Dr. Mond's trustees are authorized to provide the funds.

Several pictures, in addition to the Sargents, were placed on view during the year; among them the portraits of Gainsborough's two daughters, Mary and Margaret, painted on one canvas when the artist was living at Ipswich. This group is one of the Gainsborough family pictures and was sold at Christie's in May by the widow of one of Gainsborough's descendants. It was bought by Messrs. Knoedler, from whom it was acquired by the National Gallery. Other pictures hung for the first time included a small portrait by Corot of a man on a grey horse; a portrait of Lady Emilia Kerr by Romney; a flower piece by Fantin-Latour; a portrait of an Italian gentleman by Richard Wilson; and a portrait by Rubens of the Archduke Albert, bequeathed by Mr. Richard Jackson.

At the National Gallery of British Art an exhibition of examples of book illustration of the Sixties was followed by one of the works of Pre-Raphaelite painters of about the same period and containing pictures by Millais, Rossetti, Madox Brown, Burne Jones, Holman Hunt, Brett, and others. In the summer a generous offer was made by Mr. Samuel Courtauld to the Trustees and accepted by them. Mr. Courtauld placed in the hands of trustees (the Directors of the National Gallery and the National Gallery of British Art, Lord Henry Bentinck, Sir Michael Sadler and Mr. Samuel Courtauld) the sum of £50,000 for the purchase of French pictures of certain schools, to be shown in the Foreign Gallery that is now in course of erection. An exhibition of industrial art was opened at the Victoria and Albert Museum, where the Alfred William Hearn Collection of objects of art, presented by Mrs A. W. Hearn, was placed on view in the autumn. Watercolours by J. R. Cozens and Thomas Girtin were shown at the British Museum, and in spite of the already congested state of the National Portrait Gallery the Director managed somehow to find room to exhibit a number of newly-acquired paintings and drawings.

The bicentenary of the birth of Sir Joshua Reynolds (July 16, 1723) was celebrated by the Royal Academy by a reception at Burlington House, at which speeches were made by Sir Aston Webb, Mr. J. S. Sargent, R.A., Mr. Charles Sims, R.A., and Lord Crawford, and a small exhibition of Reynolds' pictures and relics was arranged in the galleries. The year was remarkable for the number of exhibitions of nineteenth century French art. The first, held at the Leicester Galleries, was composed of works in sculpture by the painter Degas. A valuable exhibition, it was followed in May by one of French paintings at Messrs. Agnew's, on the heels of which a similar and equally interesting show of nineteenth century painting made its appearance at Messrs. Knoedler's and another at the French Gallery. The French pictures at Messrs. Knoedler's were followed by an exhibition of portraits by a Russian artist, Mr. Savely Sorin. In May Mr. Max Beerbohm showed a collection of cartoons at the Leicester Galleries, some of which were as witty and as dexterously drawn as anything that has come from his hand. To some drawings, however, referring to the Royal Family, objection was made, which led to their withdrawal. Other exhibitions at the Leicester Galleries included one of a memorial collection of paintings by the late Sir James Shannon, R.A. Another memorial exhibition, of watercolours and etchings by the late Colonel Robert Goff, was held at the Fine Art Societies', where, too, were shown a number of drawings illustrating Don Quixote, by Ricardo Marin, a Spanish draughtsman and painter. An exhibition of carved ivories was held at the Burlington Fine Arts Club.

At Christie's the most sensational sale was that of Sir Joseph B. Robinson's collection. His collection contains some fine pictures, and their quality appealed so much to him when he saw them arranged at Christie's that he felt he could not part with them. Therefore, he raised the reserve prices to an extent that made the selling of them impossible except in a few cases, and as the sale proceeded picture after picture was bought in. There were several sales at famous country houses, including Ashridge, Brocket Hall, Strawberry Hill and Belhus. Of these the most important was at Ashridge, where a Vandyck fetched £29,400, and a Cuyp, "The Maas, at Dordrecht," £18,375. At Brocket Hall a Reynolds reached the highest price, an equestrian portrait of the Prince of Wales, for which 6,500 gs. were paid. At the sale of the Duke of Grafton's pictures in July, a portrait of Vandyck by himself sold for £5,985; and on the same day Gainsborough's portrait of Robert Adair went for £4,200, and a landscape by the same artist for £5,040. A self-portrait of Gainsborough, with his wife and child, realised £3,150, and his "Rural Courtship," £3,360; Romney's "Miss Diana Sturt," £3,780, and his "Lady Augusta Murray," £3,990. Among modern pictures, Holman Hunt's "Scapegoat" sold for the high price of £4,830; and for four panels of Gobelin tapestry, £15,750 was paid.

The League of the Empire (FOUNDED 1901).

THE League is entirely non-political and non-sectarian. Its practical work has been to promote co-operation between the different Countries and Colonies of the Empire, mainly in affairs connected with education, and to afford full and correct information regarding them, so that the duties of citizenship may be better understood and appreciated, and personal and active interest inspired in the great problems connected with our Empire's conditions and progress. The relation of the League to the Education Departments and Governments throughout the Empire has been regularised (*a*) through the recommendation of its work to the Governments concerned by the Colonial Office of the Imperial Government and by the Agents-General in 1902-3; (*b*) by the active and widespread acceptance of its schemes by the different Educational Authorities and Governments. In 1907 the League carried through the first Conference between the Education Departments of the Home and Colonial Governments. One of the effects of this Conference was that the Imperial Government undertook to call the Imperial Conference on Education in 1911. In 1912 the first Imperial Conference of Teachers' Associations was held by the League, and in 1913 was inaugurated the Imperial Union of Teachers. In 1921 the second Imperial Conference of Teachers' Associations was held in Toronto, by invitation of the Government of Ontario. An annual meeting of the Imperial Union of Teachers takes place each July. The League, through the liberality of the late Mr. Louis Spitzel, has published a series of text-books on the Empire, under the editorship of Professor A. F. Pollard: (1) "The British Empire—Its Past, Its Present, and Its Future" (a book of reference); (2) "The British Empire and Its History" (for Secondary Schools); (3) "The Story of the British Empire." In 1907 the League helped to establish a lace industry in St. Helena. With the co-operation of the Overseas and Home Education Authorities a Scheme for the Interchange of Teachers throughout the Empire is now in active operation, over 400 interchange appointments have already been arranged. Visits to historical places in England and on the Continent are planned for overseas teachers. The School Affiliation and Comrades' Correspondence Sections were established in 1901-2. Other work undertaken are the giving of lectures, the establishment of a bureau of information, essay competitions, exhibitions, and the furthering of the keeping of Empire Day.

During the War the League distributed from its depôt over a million articles to the hospitals and troops, besides helping prisoners and others in distress. The League has also given colours and shields to all the overseas contingents who fought for the Empire.

Hon. President, H.R.H. The Duke of Connaught and Strathearn, K.G.

Chairman, Executive Committee, The Headmaster of Winchester, M. J. Rendall, LL.D.

Hon. Treasurer, Sir Philip Hutchins, K.C.S.I.

Hon. Secretary, Mrs. Ord Marshall, C.B.E.

Address, 124 Belgrave Road, London, S.W. 1.

OPERA.—Although the glories of pre-war Covent Garden have yet to be duplicated, those who are content to savour opera in a language other than the original have reason to be grateful to the National Opera Company. "Madame Butterfly," "The Magic Flute," "The Marriage of Figaro," "Trovatore," "Aïda," and other works on which the public has set its affections were performed, and the ever-delightful "Hansel and Gretel" was revived—after some years of neglect. The "Valkyrie" and "Siegfried" had a place in a well varied *répertoire*, while "Cavalleria Rusticana" and "Pagliacci" showed no sign of diminished popularity. Indeed, they probably will be given long after "The Perfect Fool" (about which there was such a to-do) is forgotten. The music of Mr. Holst's waggish opera, though interesting in parts and generally telling, is entertaining rather than musical. As a skit on Donizetti and other composers with whom Mr. Holst is not in accord, "The Perfect Fool" has its points. But Donizetti's strains—on the lips of adequate singers—are, it is suggested, preferable to an *extravaganza*. For the rest, the new work attracted much attention—perhaps too much.

Distinction was given to the vocal side of the undertaking by the appearance of Madame Melba, who, if she has lost some of her old power, still pleases those who understand the art of singing. Many critics, by the way, expressed surprise at an artist of her age being able to continue singing, one authority on statistics having compiled a list of singers who had found it advisable to retire after being a fleeting twenty-five years before the public. Madame Melba no doubt was amused at the laborious composition, since she is well aware that those who have always sung correctly, and within their means, may continue doing so almost as long as health remains. Meanwhile, the *diva* sang Mimi with much of her former skill and effect.

British composers also have been represented in operatic realms by Mr. Boughton's "The Immortal Hour," and Mr. Beecham's "The Merchant of Venice." The Beecham effort might have stood a better chance of success had the score been overhauled by a more competent musician than young Mr. Beecham. "The Immortal Hour," though an infinitely better attempt, is some considerable way short of the ideal. Yet, it ran for over a hundred performances.

CONCERTS.—To London concerts there was, as usual, no end, vocal recitals leading. In the opinion of competent judges of singing by far the most important of these were the two recitals given by Signor Battistini, who sang with all the beauty of voice and perfection of *technique* for which he has ever been distinguished. Triumphantly defying time, this Prince of singers, whose art is well-nigh matchless, gave renderings of the exacting "Eri tu," "Non più andrai" "Largo al Factotum," the "Prologue" from "Pagliacci," and the delicious "Deh vieni," which place him in a class of his own. Signor Battistini's singing, in short, was an object-lesson to intelligent students and a joy to the *cognoscenti*. He ranged through all the moods, and was always dignified—from every point of view. In his native land Signor Battistini is known as "*la Gloria d' Italia*," a title which he has upheld for many a long year. The great baritone is the first artist to have thus been honoured.

An interesting appearance was made by Mr. Morgan Kingston, a tenor, who scarcely could have been bettered in Lohengrin's "Farewell." It is, however, to be regretted that he should have included in his programme such things as "Nirvana," and similar unworthy ditties. Other singers erred in the same direction, notably Madame Clara Butt, Miss Phyllis Archibald, and Mr. Tudor Davies, who has something of Caruso's fervent style. M. Chaliapin, on the other hand, confined his attentions to music worth the singing, as also did Mr. Joseph Hislop. The last-named is sometimes apt to "force," with the result that he sacrifices tone to effect. A very successful *rentrée* was made by Madame Selma Kurz, who first sang herself into the affections of London some years ago by prolonging, to a remarkable extent, the trill in Oscar's air from "Un Ballo in Maschera." To-day there is no more brilliant *coloratura* singer, and this is largely owing to her astonishingly fine breath-control, which apparently is limitless. Praise also is due to Mr. Philip Wilson for introducing the (forgotten) songs of Dowland, and to Madame Tetrazzini for keeping alive the glories of *il bel canto*. Welcome, too, was the return of Madame Gerhardt, who sang Schumann, Brahms and Schubert. Her singing may not be as flawless as is generally imagined, but she has some extremely fine moments. And that is more than can be said of all *Lieder* singers.

Verdi's somewhat operatic "Requiem" drew an enthusiastic audience to the People's Palace; the Royal Choral Society gave "The Dream of Gerontius"; and the Philharmonic Society relied on works which one hears rather too often to welcome frequently. The "Philharmonic," in fact, has been taken to task by interested young composers who bitterly complain that a policy of constant repetition blocks the road which talent would dearly like to tread. The Society may, however, be excused its unwillingness to encourage native enterprise, for of all the new works performed during the year scarcely any are of outstanding merit. The same must be said of the songs; whether inspired by good intentions, or mere trumpery ballads, they have, for the most part, failed to justify their publication. The various trifling piano, violin and 'cello pieces may be placed in the same category.

London has been visited by many instrumentalists of the first rank. Zacharewitsch, Paderewski, Arthur Rubinstein (technically astonishing), Ysayé; each was deservedly acclaimed. So, too, was Miss Beatrice Harrison, who secured for Mr. Goossens' extremely diffuse "Rhapsody" a better reception than, in the opinion of some critics, it merited. One could not wish for a finer performance.

THE PROVINCES.—Birmingham has again enjoyed M. Dupré's recitals, the organist having exploited the modern French school of composers. Orchestral concerts have made life at Harrogate pleasant; Leeds has heard music of every conceivable description; Liverpool was afforded the advantage of hearing Mr. Lionel Tertis, a viola player of rare quality; and Manchester rejoiced in a series of mid-day concerts which included a Wolf song recital. Romford ever keen on Coleridge-Taylor, found "Hiawatha's Wedding Feast" to its taste; Southport rang the changes on modern British works; and Ilkley, Retford, Brigg, High Wycombe and a multitude of other towns and townlets indulged in choral competitions. The

Edinburgh Harmonists' Society celebrated its centenary by including in a well-chosen programme the interesting "Matona, lovely maiden" of the sixteenth century Orlandus Lassus, while a Patterson orchestral concert was patriotically devoted to Scotch music. Subsequent Patterson concerts, being cosmopolitan, proved infinitely more acceptable to well-regulated music-lovers who are not enamoured of Northern products. Sheffield launched out into an amateur performance of "Lohengrin," truly an ambitious undertaking; the Preston Choral Society—a very ancient body—delighted Prestonians on many occasions; and the Bournemouth Festival enabled several young composers to secure a hearing. During this festival a memorial tablet to Sir Hubert Parry was unveiled, much to the satisfaction of Bournemouth, where the late composer was born. Bath held a Spring Festival, at which Mr. John Ireland gave a recital of his pianoforte compositions; Birmingham listened appreciatively to Gounod's "Redemption"; and the Doncaster Musical Society—assisted by the Leeds Symphony Orchestra—offered its patrons "The Dream of Gerontius." (It would be interesting to know how many times this work has been performed during the past twelve months.) The Cardiff Blue Ribbon Choir selected for its forty-second annual concert Elgar's "King Olaf," which scarcely shows the composer at his best; the Royal Engineers enchanted all Chatham with a spirited rendering of the "Meistersinger" overture; and the Dundee amateurs, not to be outdone by Sheffield, ventured on "La Damnation de Faust," two hundred children taking part in the final scene. The Scottish Orchestra "provided the accompaniments," to quote a local paper.

Newcastle was asked to say which it preferred, ancient or modern English songs, and (aspiring composers excepted) the Northerners showed their good taste by voting for the lights of other days. Oxford was afforded the opportunity of hearing Miss Irene Scharrer, whose pianoforte recitals are an outstanding feature of provincial music. Bristol, much to its credit, held a Byrd-Weelkes celebration, the local Musical Club following suit with a programme of Byrd madrigals. Bristol is to be congratulated on its respect for good music.

Public School Music.—Forty years ago music at the public schools consisted mainly of bad singing, more or less faulty playing, and a taste for poor compositions. Now-a-days these things are better done, as witnesseth the programmes of the Eton and Winchester Musical Societies. During the summer term the Eton Orchestra gave an excellent rendering of the slow movement from Beethoven's "First Symphony," and Moszkowsky's "Spanish Dance in G. Minor," while several of the singers (who showed promise) exhibited a preference for Mozart airs. The Winchester Glee Club was heard to considerable advantage in unaccompanied part-songs, Mr. G. E. H. Palmer, a pianist of attainment, exhibiting a pretty touch in Debussy. Decidedly an improvement on past efforts.

Minor scholastic establishments also have launched out, and with praiseworthy results.

IMPERIAL COINS ISSUED IN THE BRITISH DOMINIONS.

Year.	Gold. London Mint.	Gold. Australian and Ottawa Mints.	Gold. Total.	Silver.	Bronze.	Total.
1915	£21,301,000	£7,934,389	£29,235,389	£7,598,977	£248,415	£37,082,781
1916	1,554,000	6,847,449	8,401,449	8,192,428	452,800	17,046,677
1917	1,014,000	6,770,624	7,784,624	4,137,085	588,365	12,470,074
1918	—	13,925,178	13,925,178	8,885,384	418,845	23,229,407
1919	—	5,529,305	5,529,305	3,876,175	586,590	9,992,070
1920		3,370,506	3,370,506	5,135,515	599,780	9,105,801
1921	—	3,394,367	3,394,367	8,529,151	602,795	12,526,313

Mint Marks.—The designs adopted for gold coins are identically the same in the Mints of London, Ottawa, Sydney, Melbourne, and Perth, with minute "Mint Marks" immediately above the date on the reverse side—the letter S (Sydney), M (Melbourne), P (Perth), C (Ottawa, Canada), and I (Bombay, India); otherwise, all Imperial gold coins are of identical design.

INCOME TAX AND SUPER TAX.

Income Tax and Super Tax.—The estimated net produce of each penny of Income Tax (excluding Super Tax) was £4,900,000 (1920–21), and was estimated at £4,750,000 for 1921–2) and at £4,450,000 for 1922–3. The number of individuals in Great Britain and Northern Ireland with incomes above the exemption limit for the year 1922–3 was estimated at 4,750,000, of whom 2,500,000 were covered by personal allowances, deductions and reliefs. For the year 1921–2 it was estimated that there were 28,000 persons with incomes exceeding £5,000 and with an estimated total income of £367,000,000. It was provisionally estimated that in the same year about 80,000 people with an estimated total income of £470,000,000 would be liable for Super Tax. The estimated gross income brought under review for Income Tax and Super Tax in Great Britain and Northern Ireland was £2,900,000,000. The actual income liable to tax before deduction of personal and family allowances and reliefs was £2,250,000,000, and the total taxable income on which tax was paid was £1,250,000,000.

Apart from the productions of Flecker's *Hassan*, John Drinkwater's two dramas, and the two Czecho-Slovakian plays, a new play by Henry Arthur Jones, *The Lie*, was produced with success by Miss Sybil Thorndike at the New; John Masefield was represented by *Melloney Holtspur*; certain of Sir Arthur Pinero's and Sir James Barrie's plays were revived; and among the new productions were plays by Alfred Sutro, Somerset Maugham and A. A. Milne. One of the successes of the year was *The Green Goddess*, the first play of William Archer, the Ibsen translator and dramatic critic.

In addition to many Shakespearian productions at the "Old Vic," Miss Thorndike put on *Cymbeline* for a run, while an operatic version of *The Merchant of Venice* attracted attention.

The following is a list of the principal London productions of the year:—

Adelphi.—*July* 13, 1923. *The Young Person in Pink*, by Gertrude Jennings, and *Rosalind*, by Sir James Barrie, revived (Mr. Donald Calthrop and Mesdames Lilian Braithwaite, Sydney Fairbrother and Kate Cutler). *Sept.* 8. *Head over Heels*, a musical comedy by Seymour Hicks, with music by Harold Fraser-Simson (Messrs. W. H. Berry, Arthur Pusey, Bobbie Comber and Dennis Noble and Mesdames Mabel Sealby, Helen Ferrers and Pollie Emery).

Aldwych.—*March* 23, 1923. *Beltane Night*, a drama by Vera Beringer (Messrs. Sam Livesey and J. C. Buckstone and Mesdames Esmé Beringer, Joyce Carey and Mary Brough).

Ambassadors.—*Nov.* 2, 1922. *The Secret Agent*, a play by Joseph Conrad (Messrs. Russell Thorndike, St. Barbe West, Clifton Boyne and Jeven Brandon-Thomas and Mesdames Miriam Lewes and Amy Brandon-Thomas). *Dec.* 14. *Sweet Lavender*, Sir Arthur Pinero's comedy revived (Messrs. E. Holman Clark, Jack Hobbs and E. Lyall Swete and Mesdames Lilian Braithwaite, Isobel Elsom and Ann Trevor). *Feb.* 19, 1923. *A Little Bit of Fluff*, W. W. Ellis's farce revived (Messrs. Ernest Thesiger and Fernley Bisshop and Mesdames Nan Marriott-Watson and Peggy Hyland). *March* 29. *Marriage by Instalments*, a comedy by Bernard Merivale and Richard Bird (Messrs. Henry Kendall, George Hayes and Frank Bertram and Mesdames Muriel Alexander and Clare Greet). *April* 16. *Trespasses*, a comedy by Edward Percy (Messrs. Lyn Harding and Frank Lister and Mesdames Ethel Griffies and Doris Lytton). *May* 14. *The Piccadilly Puritan*, a comedy by Lechmere Worrall, founded on the novel of Mrs. Wentworth James (Messrs. Langhorne Burton and James Carew and Mesdames Dorothy Minto and Rita Page). *June* 5. *The Lilies of the Field*, a comedy by J. Hastings Turner (Messrs. J. H. Roberts and Clifford Mollison and Mesdames Edna Best, Meggie Albanesi and Gertrude Kingston).

Apollo.—*Nov.* 16, 1922. *Devil Dick*, a drama by A. Schomer (Messrs. Maurice Moscovitch, Michael Sherbrooke and Robert Horton and Mesdames Mary Merrall and Muriel Pratt). *Dec.* 5. *Hawley's of the High Street*, an eccentric comedy by Walter W. Ellis (Messrs. Francis Lister and Edward Irwin and Mesdames Alice Moffat, Clare Greet and Elsie Craig). *Dec.* 18. *Through the Crack*, a children's play by Algernon Blackwood and Violet Pearn (Messrs. Farren Souter and Gerald Anderson and Mesdames Clare Greet and Lorna Hubbard). *Jan.* 16, 1923. *A Roof and Four Walls*, a comedy by E. Temple Thurston (Messrs. Nicholas Hannen, O. B. Clarence, Allen Jeayes and Lauderdale Maitland and Miss Phyllis Neilson-Terry). *May* 24. *What Every Woman Knows*, Sir James Barrie's comedy, revived (Messrs. Godfrey Tearle, Henry Vibart and Athole Stewart and Mesdames Hilda Trevelyan, Marie Hemingway and Lady Tree).

Comedy.—*July* 31. *Peace and Quiet*, a comedy by Horace Hodges (Messrs. Horace Hodges, Tom Reynolds and Douglas Burbidge and Mesdames Louise Hampton and Winifred Izard). *Aug.* 28. *The Elopement*, a comedy, from the French of Armont and Gerbidon, by Arthur Wimperis (Messrs. Ronald Squire, John Deverell and Franklyn Bellamy and Mesdames Edna Best, Tonie Bruce and Helen Haye). *Oct.* 24. *The Last Warning*, a drama by Thomas F. Fallon, revised by Arthur Rose (Messrs. Thurston Hall, Brember Wills and D. A. Clarke-Smith and Mesdames Frances Carson and Olive Sloane).

Court.—*Dec.* 26, 1922. *Alice in Wonderland*, by H. Savile Clarke, revived (Miss Evelyn Joyce) and *When Knights were Bold*, Charles Marlowe's farce, revived (Mr. Bromley Challenor). *Jan.* 31, 1923. *Three's a Crowd*, a farce by Earl Derr Biggers (Messrs. Bromley Challenor, Eric Lewis and Frederick Leister and Mesdames Marie Hemingway and Dora Barton). *March* 2. *Carte Blanche*, a revue (Messrs. Bob Adams, Bob Alden and Tubby Edlin and Mesdames Billie Hill and Odette Myrtil).

Criterion.—*Jan.* 25, 1923. *Advertising April*, a farce by Herbert Farjeon and Horace Horsnell (Messrs. Frank Cellier and Lawrence Anderson and Mesdames Sybil Thorndike, Margaret Yarde and Elizabeth Pollock). *July* 4. *Send for Dr. O'Grady*, a comedy by "George Birmingham" (Sir Charles Hawtrey, Messrs. Holman Clark and Arthur Sinclair and Mesdames Marie O'Neill and Margaret Bannerman). *Oct* 11. *Trust Emily*, a farcial comedy by May Edgington (Messrs. Hugh Wakefield and Tom Reynolds and Mesdames Athene Seyler, Edna Best, Helen Haye and Connie Ediss).

Daly's.—*May* 19, 1923. *The Merry Widow*, Franz Lehar's musical comedy, revived (Messrs. George Graves, Derek Oldham and Carl Brisson and Mesdames Evelyn Laye, Ivy Tresmand and Nancie Lovat).

Drury Lane.—*March* 28, 1923. *Angelo*, a drama adapted from the German by Louis N. Parker (Messrs. Maurice Moscovitch, Gerald Lawrence, Owen Roughwood and Nat Madison and Miss Moyna Macgill). *May* 9. *Ned Kean of Old Drury*, a drama by Arthur Shirley (Messrs. H. A. Saintsbury, William Farren, Henry J. Twyford and Edward Cooper and Mesdames Louise Regnis, Haidée Wright and Margaret Yarde). *Sept.* 27. *Good Luck*, a melodrama by Seymour Hicks and Ian Hay (Messrs. Edmund Gwenn, Julian Royce, Claude Rains and C. W. Somerset and Mesdames Ellis Jeffreys and Joyce Carey).

Duke of York's.—*Nov.* 20, 1922. *The Merchant of Venice*, operatic version of Shakespeare's drama by Adrian Beecham (Messrs. Augustus Milner, Gregory Stroud, Webster Millar and Frank Webster and Mesdames Ena Riess and Desirée Ellinger). *Dec.* 26. *The Blue Bird*, Maeterlinck's play revived (Messrs. Ernest Hendrie and Norman Page and Mesdames Joan Duan, Phyllis Jay and Lily Brough). *Feb.* 14, 1923. *Good Gracious, Annabelle!* a comedy by Claire Beecher Kummer (Messrs. Graham Browne, J. C. Buckstone and Ivo Dawson and Mesdames Marie Tempest and Polly Emery). *March* 1. *The*

Marriage of Kitty, the comedy adapted from the French by Cosmo Gordon Lennox, revived (Messrs. Graham Browne and Athole Stewart and Mesdames Marie Tempest, Hilda Moore and Saba Raleigh). *May* 8. *Her Temporary Husband*, a comedy by Edward A. Paulton (Messrs. George Tully, George Elton and A. E. Matthews and Mesdames Edna Best and Ena Grossmith). *June* 14. *Eliza Comes to Stay*. H. V. Esmond's farcial comedy revived (Messrs. Donald Calthrop, Charles Grove and John Deverell and Mesdames Dorothy Minto and Rosemary Corry). *July* 25. *Civilian Clothes*, a comedy by Thompson Buchanan (Messrs. Thurston Hall, Martin Lewis and William Devereux and Mesdames Saba Raleigh, Oliven Roose and Gladys Webster). *Sept.* 4. *London Calling*, a revue by Ronald Jeans and Noel Coward, with music by Noel Coward (Messrs. Noel Coward and Tubby Edlin and Mesdames Maisie Gay, Gertrude Lawrence and Eileen Molyneux).

EMPIRE.—*Dec.* 21, 1922. *Arlequin*, a comedy phantasy by Maurice Magre, translated by Louis N. Parker, with music by André Gailhard (Messrs. Godfrey Tearle, Dennis Neilson-Terry and J. H. Barnes and Mesdames Moyna MacGill, Viola Tree and Rosina Filippi). *April* 3, 1923. *The Rainbow*, a revue (Messrs. Ernest Thesiger, Earl Rickards, George Willie, Billy West and Fred McGinty and Mlle. Andree).

GAIETY.—*Sept.* 22, 1923. *Catherine*, a musical play by Reginald Arkell and Fred de Gresac, with Tchaikowsky's music (Messrs. Bertram Wallis, Billy Leonard and Robert Michaelis and Mesdames Amy Augarde, Cressie Leonard, Faith Bevan and José Collins).

GARRICK.—*Nov.* 28, 1922. *Biffy*, a farcical comedy by Vera Beringer and William Ray (Messrs. Robert Hale, Stanley Cooke and Roy Byford and Mesdames Maidie Hope and Teddie Gérard). *Feb.* 5, 1923. *Via Crucis*, a morality play adapted from the German by the Hon. Sybil Amherst and Dr. C. E. Wheeler (Sir Martin Harvey and Mesdames Maud Milton, Marie Linden and N. de Silva). *Feb.* 28. *Partners Again*, a comedy by Montague Glass and Jules Eckert Goodman (Messrs. Robert Leonard, Philip White and Edward Combermere and Mesdames Joyce Carey and Marie Ault). *Sept.* 1. *Ambush*, a drama by Arthur Richman (Messrs. George Elton, Robert Minster and James Carew and Mesdames Auriol Lee and Madeleine Marshall). *Oct.* 15. *Outward Bound*, a play by Sutton Vane (Messrs. E. Lyall Swete, Leslie Faber, William Stack and John Howell and Mesdames Gladys Ffolliott and Diana Hamilton).

GLOBE.—*Nov.* 17, 1922. *The Laughing Lady*, a comedy by Alfred Sutro (Messrs. Godfrey Tearle, Herbert Ross, Julian Royce and Brian Gilmour and Mesdames Marie Löhr, Edith Evans and Henrietta Watson). *April* 10, 1923. *Aren't We All*, a comedy by Frederick Lonsdale (Messrs. Julian Royce, Herbert Marshall, Eric Lewis and Martin Lewis and Mesdames Marie Löhr, Ellis Jeffreys, Elizabeth Chesney and Cyllene Moxon). *July* 12. *Reckless Reggie*, a farce by Eric Hudson (Messrs. John Deverell, Austin Melford and E. Vivian Reynolds and Mesdames Peggy Rush and Mary Leigh). *Sept.* 12. *Our Betters*, a comedy by W. Somerset Maugham (Messrs. Alfred Drayton, Reginald Owen and Yorke Stephens and Mesdames Constance Collier, Marion Terry and Margaret Bannerman).

HAYMARKET.—*Jan.* 17, 1923. *Plus Fours*, a comedy by Horace Annesley Vachell and Harold Simpson (Messrs. C. Aubrey Smith and John Deverell and Mesdames Peggy O'Neil, Athene Seyler and Clare Greet). *March* 31. *Isabel, Edward and Anne*, a comedy by Gertrude E. Jennings (Messrs. Allan Aynesworth and Harold French and Mesdames Lilian Braithwaite, Athene Seyler and Margaret Bannerman). *June* 21. *Success*, a comedy by A. A. Milne (Messrs. Charles Cherry, Reginald Owen and Halliwell Hobbes and Mesdames Moyna Macgill and Grace Lane). *Aug.* 23. *The Prisoner of Zenda*, the comedy adapted from Anthony Hope's story by Edward Rose revived (Messrs. Robert Loraine, Allan Aynesworth and Franklin Dyall and Mesdames Fay Compton and Stella Arbenina).

HIPPODROME.—*Dec.* 21, 1922. *Cinderella*, a pantomime (Messrs. Stanley Lupino, Bert Errol and Fred Whittaker and Mesdames Clarice Mayne, Daisy Wood and Daisy Burrell). *March* 28, 1923. *Brighter London*, a revue by Lauri Wylie, with music by Herman Finck (Messrs. Billy Merson, Lupino Lane and Reginald Sharland and Mesdames Annie Crofts and Elsie Prince).

HIS MAJESTY'S.—*April* 3, 1923. *The Gay Lord Quex*, Sir Arthur Pinero's comedy revived (Messrs. George Grossmith, Nicholas Hannen and Malcolm Keen and Mesdames Irene Browne, Viola Tree and Rosina Filippi). *May* 29. *Oliver Cromwell*, a drama by John Drinkwater (Messrs. Henry Ainley, Milton Rosmer, William J. Rea and Hayden Coffin and Mesdames Irene Rooke and Mary O'Farrell). *Sept.* 20. *Hassan*, a drama by James Elroy Flecker (Messrs. Henry Ainley, Leon Quartermaine, Malcom Keen and Basil Gill and Mesdames Cathleen Nesbitt and Laura Cowie).

KINGSWAY.—*Dec.* 30, 1922. *Polly*, Gay's sequel to *The Beggar's Opera*, adapted by Clifford Bax, with music by Frederic Austin (Messrs. Pitt Chatham, E. Thornley-Dodge and Percy Parsons and Mesdames Lilian Davies, Muriel Terry and Adrienne Brune). *March* 31, 1923. *Love in Pawn*, a comedy by Roy Horniman (Messrs. Arthur Wontner, William Farren and Fewlass Llewellyn and Mesdames Doris Lloyd and Winifred Izard). *July* 16. *Tancred*, adapted from Disraeli's novel by Edith Millbank (Messrs. Lawrence Hanray and Hector Abbas and Mesdames Henzie Raeburn and Diana Bourbon). *Sept.* 9. *Harwood Blood*, a comedy by Frank A. Russell (Messrs. William Stack, Leo Carroll and Raymond Massey and Mesdames Doris Lloyd and Gwynne Whitby).

LITTLE.—*Oct.* 2, 1923. *Little Revue Starts at Nine* (Messrs. Jack Hulbert, Thomas Weguelin, Harold French and Bobby Howes and Mesdames Cicely Courtneidge, Mai Bacon and Vesta Sylva).

LONDON PAVILION.—*May* 31, 1923. *Dover Street to Dixie*, a revue by Morris Harvey and Lauri Wylie, with music by Herman Darewski and others (Messrs. Stanley Lupino and Lloyd Garrett, and Mesdames Odette Myrtil, Mabel Green and Florence Mills).

LYCEUM.—*Nov.* 13, 1922. *My Old Dutch*, drama by Arthur Shirley and Albert Chevalier revived (Messrs. Albert Chevalier and Charles Fawcett and Mesdames Jessie Belmore and Lily Edwards). *Dec.* 26. *Robinson Crusoe*, a pantomime (The Brothers Egbert and Miss Nancy Benyon.) *Feb.* 28, 1923. *The Orphans*, a melodrama adapted from "Les Deux Orphelines" (Messrs. Dennis Neilson-Terry, Sam Livesey and Billie Owen, Lady Tree and Mesdames Mary Merrall and Colette O'Niel). *April* 14. *A Night of Temptation*, a melodrama by Percy Gordon Holmes (Messrs. Dennis Neilson-

Terry and Albert Ward and Mesdames Mary Merrall and Violet Farebrother). *June 6.* *David Copperfield*, W. F. Evelyn's version of the novel (Messrs. Bransby Williams, William Lorrimer and Leslie Barrie and Miss Minnie Waterford). *June 25.* *The Lyons Mail* revived (Mr. Bransby Williams). *Sept. 26.* *What Money Can Buy*, a melodrama by Arthur Shirley and Ben Landeck (Messrs. Dennis Neilson-Terry, Herbert Landeck and Jefferson Gore and Mesdames Jessie Belmore, Sybil Arundale and Ethel Warwick).

LYRIC.—*Dec. 22, 1922.* *Lilac Time*, a play with music by Franz Schubert, adapted by Adrian Ross (Messrs. Courtice Pounds, Percy Heming and Edmund Gwenn and Mesdames Clara Butterworth and Dorothy Clayton).

NEW.—*Nov. 13, 1922.* *The Cenci*, Shelley's tragedy produced for first time in public (Messrs. Robert Farquharson, Lewis Casson, Brember Wills and Victor Lewisohn and Mesdames Beatrice Wilson and Sybil Thorndike). *Nov. 18.* *The Smiths of Surbiton*, a comedy by Keble Howard, produced by the Repertory Players (Messrs. Harvey, Adams and Richard Bird, and Mesdames Doris Lloyd and Olive Walter). *Dec. 19.* *The Great Well*, a comedy by Alfred Sutro (Messrs. Matheson Lang, Reginald Owen, Michael Sherbrooke and Athole Stewart and Mesdames Laura Cowie and Mary Jerrold). *March 3, 1923.* *The Bad Man*, a melodramatic comedy by Porter Emerson Browne (Messrs. Matheson Lang, H. O. Nicholson and Alfred Drayton and Mesdames Florence Saunders and Elma Royton). *June 9.* *Carnival*, a comedy adapted from the Italian by H. C. M. Hardinge and Matheson Lang, revived (Messrs. Matheson Lang and Dennis Neilson-Terry and Miss Mary Glynne). *Aug. 8.* *The Eye of Siva*, a mystery play by Sax Rohmer (Messrs. Arthur Wontner, Edmond Broen and Reginald Bach, and Mesdames Cathleen Nesbitt and Agatha Kentish). *Sept. 19.* *Cymbelene*, Shakespeare's tragedy, revived (Messrs. Robert Farquharson, Lewis Casson, George R. Foss and Lawrence Anderson and Mesdames Sybil Thorndike and Margaret Yarde). *Oct. 13.* *The Lie*, a drama by Henry Arthur Jones (Messrs. O. B. Clarence, Lawrence Anderson and Ralph Horton and Mesdames Sybil Thorndike, Mary Merrall and Margaret Yarde).

NEW OXFORD.—*Dec. 8, 1922.* *Battling Butler*, a musical comedy by Stanley Brightman and Austin Melford, lyrics by Douglas Furber, and music by Philip Braham (Messrs. Jack Buchanan, Austin Melford, Fred Groves and Frederick Ross and Mesdames Peggy Kurton, Sydney Fairbrother and Sylvia Leslie). *July 2, 1923.* *Little Nellie Kelly*, a musical piece by George M. Cohan (Messrs. Roy Royston and Sonnie Hale and Mesdames June and Anita Elson).

PALACE.—*May 15, 1923.* *The Music Box*, a revue by Sam H. Harris, with music by Irving Berlin (Messrs. Solly Ward, Fred Duprez and Gregory Stroud and Mesdames Ethelind Terry and Albertina Vitack).

PLAYHOUSE.—*Dec. 20, 1922.* *The Private Secretary*, Sir Charles Hawtrey's farce revived (Messrs. Charles Windermere and Eric Lewis). *March 24, 1923.* *Magda*, Hermann Sudermann's play revived (Messrs. Franklin Dyall, Gilbert Hare and William Stack and Mesdames Gladys Cooper, Mona Harrison and Lila Maravan). *Aug. 2.* *Enter Kiki!* adapted from the French of André Picard by Sydney Blow and Douglas Hoare (Messrs. Ivor Novello, Paul Arthur and Frank Verner and Mesdames Gladys Cooper and Madeline Seymour).

PRINCE'S.—*Feb. 24, 1923.* *The Cousin from Nowhere*, a musical comedy adapted by Fred Thompson from Herman Haller and Rideamus, with music by Edward Kunneke (Messrs. Walter Williams, Roy Royston and Jimmy Godden and Mesdames Cicely Debenham and Helen Gilliland). *Oct. 9.* *The Return of Sherlock Holmes*, a drama by J. E. Harold Terry and Arthur Rose (Messrs. Eille Norwood, Lauderdale Maitland and H. G. Stoker and Miss Hilda Moore).

PRINCE OF WALES'S.—*Feb. 26, 1923.* *Taffy*, a Welsh comedy by Caradoc Evans (Messrs. Lawrence Anderson, Ben Field and Roy Byford and Mesdames Edith Evans and Hannah Jones). *April 11.* *So This is London*, a comedy by Arthur Goodrich (Messrs. Fred Kerr and Edward Robins and Mesdames Amy Brandon-Thomas and Gertrude Sterroll).

REGENT.—*Dec. 20, 1922.* *The Christmas Party*, a children's play by Barry Jackson (Master Sidney Bromley and Miss Kathleen Hewitson). *May 5, 1923.* *The Insect Play*, a satire by the Brothers Capek, adapted by Nigel Playfair and Clifford Bax (Messrs. Robert Parker, Walter Hyde and Frederic Collier and Mesdames Edna Thornton and Maggie Teyte).

ROYALTY.—*Dec. 4, 1922.* *Destruction*, a play by Agnese de Llana (Messrs. Ben Webster and Allan Jeayes and Mesdames May Whitty and de Llana). *Dec. 19.* *Charley's Aunt*, Brandon Thomas's farce revived (Messrs. Jack Hellier, Gerald Merrielees and James E. Page and Mesdames Violet Elliott and Margaret Riddick). *Feb. 7, 1923.* *The Love Habit*, a comedy adapted by Seymour Hicks from the French of Louis Verneuil (Messrs. Seymour Hicks, Dennis Eadie and Claude Rains and Mesdames Frances Carson and Alix Dorane). *April 2.* *At Mrs. Beam's*, a comedy by C. K. Munro (Mr. Dennis Eadie and Mesdames Jean Cadell and Adela Mavis).

ST. JAMES'S.—*Nov. 6, 1922.* *The Beating on the Door*, a play by Austin Page (Messrs. Arthur Wontner, Franklin Dyall, Athole Stewart and A. Scott Gatty and Miss Mary Jerrold). *Nov. 30.* *The Happy Ending*, a comedy by "Ian Hay" (Messrs. Robert Loraine, John Williams, Fred Kerr and Miles Malleson and Mesdames Jean Cadell, Ethel Irving and Elizabeth Irving). *Dec. 21.* *Peter Pan*, Sir James Barrie's phantasy revived (Messrs. Lyn Harding, George Shelton and Charles Trevor and Mesdames Edna Best, Sylvia Oakley and Prudence Vanbrugh). *Jan. 31, 1923.* *If Winter Comes*, a comedy by A. S. M. Hutchinson and B. Macdonald Hastings (Messrs. Owen Nares, Tarver Penna and Frederick Volpé and Mesdames Grace Lane, Barbara Hoffe and Helen Spencer). *March 21.* *The Inevitable*, a comedy by Isabel Jay (Messrs. Henry Caine and Frank Curzon and Mesdames Isabel Jay and Cecilia Cavendish). *May* 31. *The Outsider*, a play by Dorothy Brandon (Messrs. Leslie Faber, Dawson Milward and E. Lyall Swete and Mesdames Isobel Elsom and Stella Rho). *July* 17. *The Coming of Gabrielle*, a comedy by George Moore (Messrs. Nicholas Hannen and Leslie Faber and Mesdames Athene Seyler and Aimee de Burgh). *Sept.* 6. *The Green Goddess*, a drama by William Archer (Messrs. George Arliss, Owen Roughwood, George Relph and Arthur Hatherton and Miss Isobel Elsom).

ST. MARTIN'S.—*March* 6, 1923. *The Great Broxopp*, a comedy by A. A. Milne (Messrs. Edmund Gwenn, Dawson Milward, J. H. Roberts and Sam Hunter and Mesdames Mary Jerrold and Faith Celli). *April* 24. *R. U. R.*, by Karel Capek (Messrs. Leslie Banks, Basil Rathbone, Charles V. France and Clifford Mollison and Mesdames Frances Carson and Ada King). *July* 10. *Melloney Holtspur*, a play by John Masefield (Messrs. S. E. Percy and Ian Hunter and Mesdames Laura Cowie, Mary Jerrold and Meggie Albanesi). *Aug.* 15. *The Likes of Her*, a play by Charles McEvoy (Messrs. Allan Jeayes, Ben Field and Leslie Banks and Mesdames Barbara Gott and Mary Clare), and *The Will*, by Sir James Barrie (Messrs. Allan Jeayes and Malcolm Keen and Miss Olga Lindo).

SAVOY.—*Feb.* 1, 1923. *The Young Idea*, a comedy by Noel Coward (Messrs. Noel Coward, Herbert Marshall and Ambrose Manning and Mesdames Ann Trevor, Kate Cutler and Muriel Pope). *June* 12.—*The Man Who Ate the Popomack*, a tragi-comedy by W. J. Turner (Messrs. Herbert Marshall and Frank Royde and Miss Isabel Jeans).

SHAFTESBURY.—*April* 17, 1923. *Merton of the Movies*, a version by George S. Kaufman and Marc Connelly of Harry Leon Wilson's story (Messrs. Tom Douglas, J. H. Barnes, James Carew and Henry Wenman and Miss Patricia Collinge). *May* 30. *Stop Flirting*, a musical farce by Fred Jackson, with music by William Daly and Paul Lannin (Messrs. Jack Melford, Henry Kendall and Fred Astair and Mesdames Marjorie Gordon, Mimi Crawford and Adèle Astair). *Aug.* 30. *Katinka*, a musical comedy by Otto Haverbabach, with music by Rudolf Friml (Messrs. Joe Coyne and Peter Gawthorne and Mesdames Helen Gilliland and Binnie Hale).

STRAND.—*Dec.* 23, 1922. *Treasure Island*, adapted from Robert Louis Stevenson's story by James Bernard Fagan (Messrs. Arthur Bourchier, Frederick Peisley, Reginald Bach and Charles Groves). *April* 10, 1923. *Anna Christie*, a play by Eugene O'Neill (Messrs Frank Shannon and George Marion and Miss Pauline Lord).

VAUDEVILLE.—*Feb.* 4, 1923. *Rats*, a revue by Ronald Jeans, with music by Philip Braham (Messrs. Alfred Lester, Herbert Mundin and Rex O'Malley and Mesdames Gertrude Lawrence, Norah Blaney and Gwen Farrar). *Sept.* 29. *Yes!* a revue by Dion Titheradge and Douglas Furber (Messrs. A. W. Baskcomb and Herbert Mundin and Mesdames Norah Blaney and Gwen Farrar).

WINTER GARDEN.—*Sept.* 5, 1923. *The Beauty Prize*, a comedy by George Grossmith and P. G. Wodehouse, with music by Jerome Kern (Messrs. George Grossmith, Leslie Henson, Peter Haddon and Jack Hobbs and Mesdames Dorothy Dickson and Heather Thatcher).

WYNDHAM'S.—*Dec.* 26, 1922. *Bull-Dog Drummond*, "Sapper's" play revived (Messrs. Alfred Drayton, Basil Foster and Ronald Squire, Sir Gerald du Maurier and Mesdames Madeline Seymour and Audry Carten). *Feb.* 15, 1923. *The Dancers*, a comedy by "Hubert Parsons" (Sir Gerald du Maurier, Messrs. Norman Forbes, Jack Hobbs and A. Scott-Gatty and Mesdames Audry Carten, Lilian Braithwaite and Tallulah Bankhead). *July* 2. *The Writing on the Wall*, a propaganda play by W. J. Hurlburt (Messrs. William Stack, Edmund Willard and Hugh Wakefield and Mesdames Olga Nethersole and Joyce Carey).

THE STAGE SOCIETY produced *The Rumour*, by C. K. Munro, at the Globe on *Dec.* 4, 1922 (Messrs. Claude Rains, Milton Rosmer, Harcourt Williams and Edmond Breon and Mesdames Edith Evans and Margaret Yarde); *The Mental Athletes*, by Georges Duhamel, translated by Graham and Tristan Rawson, at the Lyric, (Ham.) on *Feb.* 18, 1923 (Messrs. George Hayes, Roy Byford and Brember Wills and Mesdames Hermione Baddeley and Nadine March); *The Machine Wreckers*, by Ernst Toller, translated by Ashley Dukes, at the Kingsway on *May* 6 (Messrs George Hayes, Michael Sherbrooke, Reginald Dance, Herbert Marshall and Edward Rigby and Mesdames Muriel Pratt and Louise Hampton).

THE PHŒNIX SOCIETY produced *The Jew of Malta*, Marlowe's tragedy, at Daly's on *Nov.* 6, 1922 (Messrs. Baliol Holloway, Ernest Thesiger, Frank Cellier and Howard Rose and Mesdames Isabel Jeans and Helena Millais); John Ford's play, *'Tis Pity She's a Whore* (Messrs. Ion Swinley, Michael Sherbrooke and Harold Scott and Mesdames Moyna Macgill, Barbara Gott and Florence Saunders); *The Alchemist*, by Ben Jonson at the Regent on *March* 19 (Messrs. Baliol Holloway, Frank Cellier and George Desmond and Mesdames Margaret Yarde and Nell Carter); *The Faithful Shepherdess*, by John Fletcher, at the Shaftesbury on *June* 25 (Messrs. Harcourt Williams, Murray Kinnell, Basil Howes and Edward Rigby and Mesdames Nell Carter, Mary Merrall and Cathleen Nesbitt); *Volpone*, by Ben Jonson, at the Regent on *June* 29 (Messrs. Rupert Harvey and Baliol Holloway and Mesdames Isabel Jeans and Margaret Yarde).

THE PLAY ACTORS produced *Yetta Polowski*, by Mrs. F. C. Montagu, at the Kingsway on *Nov.* 12, 1922 (Messrs. Robert Minster and George Hayes and Mesdames Hilda Bayley and Dora Gregory); *Widow's Weeds*, by Edgar Welford, at the Kingsway, on *Dec.* 10, 1922 (Messrs. J. Leslie Frith, Gerald Jerome and A. Corney Grain and Mesdames Margaret Watson and Sybil Arundale); *The Case for the Prosecution*, by Thomas Stirling Boyd, at the Shaftesbury, on *Feb.* 18, 1923 (Messrs. J. J. Bartlett, Reginald Dance and Herbert Marshall and Mesdames Dora Barton and Muriel Barnby).

THE REPERTORY PLAYERS produced *Antony Settles Down*, a farcical comedy by J. O. Francis, at the Shaftesbury, on *Dec.* 17, 1922 (Mr. William Kershaw and Mesdames Margot Drake and Louise Hampton); *Lavender Ladies*, a comedy by Daisy Fisher, at the Strand, on *Feb.* 25, 1923 (Mr. Henry Kendall and Mesdames Olga Lindo, Cicely Oates, Elspeth Dudgeon and Laura Smithson); *The Lure*, a drama by "Major" at the Strand on *Mar.* 25 (Messrs. Richard Bird, William Stack and Harvey Adams and Mesdames May Kendall and Rita John); *South Wind*, a comedy by Norman Douglas and Isabel C. Tippett, at the Kingsway, on *April* 31 (Messrs. Ben Webster and Leo Carroll and Mesdames Doris Lloyd and Edith Smith).

WORLD'S PRODUCTION OF CEREALS.

WHEAT.

Country.	Production (Millions of Quarters of 480lb.).	
	Actual 1922.	Estimated 1923.

India	11	10
Italy	9	9
Egypt	9	9
Mexico	8	8

The estimated total world production (1923) is 540,000,000 quarters.

BIRTH RATES AT HOME AND ABROAD.

The birth-rate in England and Wales for 1921, at 22·4 per 1,000 persons living, was the lowest recorded (except for the war years 1915–19), since civil registration was instituted in 1837. For the decade 1841–50 the birth-rate was 32·6, for that from 1871–80 it was 35·4, and for the first of this century (1901–10) it was 27·2. Had the births in 1921 been at the rate prevailing in 1871–80 they would have numbered about 1,340,000, instead of 848,814. The death-rate was 12·1 per 1,000, and the excess of births over deaths, or natural increase, was 390,185, or 10·3 per 1,000 of the population.

The records from the British Dominions show wide variations in birth, death, and marriage rates. The highest birth-rate was 30·3 in Manitoba and the lowest 20·3 in British Columbia. New Brunswick showed both the highest death-rate (13·9) and the highest infant mortality rate (113 per 1,000 births). Below are the aggregate figures for the principal Dominions:—

	Population.	Birth Rate.	Death Rate.	Marriage Rate.
Australia	5,455,426	24·95	9·91	17·18
Canada	6,417,000	26·03	10·06	15·08
New Zealand	1,223,901	23·34	8·73	17·38
South Africa	1,526,462	28·33	11·07	16·50

WORLD IMPORTS AND EXPORTS OF WHEAT, 1922.

* Figures for Consumption are estimated on average for 3 years.

In the first half of the 17th century (1633 has been cited as the best approach to a definite date) we meet with the earliest mention of the introduction of *rails* for the lessening of friction upon roads. Beams of wood, some six or seven inches in breadth, were about this time laid down to facilitate the draught of the wagons in the vicinity of some of the coal-mines at Newcastle; and as a matter of necessity the addition of "sleepers" had speedily to follow. In 1738, at Whitehaven, it is stated that iron was first substituted as the material of the rails; and in 1767 it appears established that this revolution was adopted at Coalbrookdale, being followed nine years later at the Sheffield Colliery. As yet, however, only thick plates of iron were fastened to the surface of the wooden rails, and it was not till 1789 that "edge rails" were introduced, the credit of their adoption being assigned to William Jessop, on the Loughborough and Nanpantan line. James Watt had conceived the idea of utilising steam for locomotion, and there is a record of a model locomotive having been used in Cornwall in 1784. George Stephenson, however, in the year 1825, was the first to bring the project fairly into practical shape.

The first Act obtained for the construction of a railway was that of the Surrey Iron Railway Company in 1801, for a line 9½ miles long from Wandsworth to Croydon. In 1804 an Act was passed "for making and maintaining a railway or tramroad from the town of Swansea into the parish of Oystermouth, in the County of Glamorgan, and for the hauling or drawing of wagons or other carriages passing upon the said railway or tramroad with men, horses, *or otherwise*."

Up to 1840, inclusive, 299 Acts, authorizing the construction of 3,000 miles of line, had been passed. The inevitable reaction set in, and in 1841-2-3 only a few small Bills were passed by the Legislature; but in the Liverpool and Manchester, the London and Birmingham, and other leading concerns were paying 10 per cent. dividends, and some of the smaller lines were yielding even larger returns, attention was naturally drawn to the remunerative character of this class of property, and the supply of railway shares became far below the demand. A flood of new projects appeared before the public, and the Legislature even, labouring apparently under the general excitement, encouraged promoters by relaxing or withdrawing the general opposition which had previously been offered. In 1844, 797 miles were authorized; in 1845, 2,883 miles; and in 1846, the prodigious total of 4,790 miles, under no less than 272 Acts, obtained Parliamentary sanction. The succeeding years saw some abatement, but still there were 1,663 miles passed in 1847, and 300 in 1848. These figures illustrate the rise and fall of the great fever known as the "railway mania."

The Railways Regulation Act of 1840, the first of the General Acts, provided for a month's notice being given to the Board of Trade before opening; for returns of traffic to be made by the companies, as also of accidents involving personal injury; for Government inspection of works, for the approval of bye-laws, &c. Afterwards were passed Acts for their better regulations, and for the conveyance of troops, 1842, the Railways Further Regulation Act of 1844, the Railways Clauses Consolidation Act, 1845, and the Canal and Railway Carriers Act of the same session.

The Cheap Trains Act, 1883, provides that fares not exceeding the rate of one penny per mile shall be exempt from duty, but fares for return or periodical tickets shall be exempt from duty only where the ordinary fare for the single journey does not exceed that rate. Duty shall be payable at a reduced rate of 2 per cent. on fares exceeding the rate of one penny a mile between stations within one urban district. Such district shall contain not less than one hundred thousand inhabitants, and must be of a continuous urban as distinguished from a rural or suburban character.

Officers or men in the military or police forces, when travelling on public service, are charged three-fourths or one-half of ordinary passenger rates, according to number travelling. The Act does not extend to Ireland.

Hiring of Special Trains.—The charges per mile for hire of special trains are 13s. 4d. Single and 20s. Return, plus the ordinary fare for each passenger according to class of vehicle hired.

The Workmen's Compensation Act, 1897.—This Act, which received the Royal assent on Aug. 6, 1897, came into operation on July 1, 1898.

Government Control of Railways commenced August 4, 1914, and ceased at midnight on Monday, August 15, 1921.

THE RAILWAYS ACT, 1921.

The Railways Act, which received the Royal Assent on Aug. 19, 1921, contains 86 clauses, and is divided into six parts, to which are added nine schedules. Under the Act railways in Great Britain are formed into groups. Before Jan. 1, 1923, the constituent companies in any group may submit to the Minister of Transport an agreed amalgamation scheme, and the amalgamated companies may submit agreed schemes for the absorption of the subsidiary companies in their groups. Failing agreement, schemes for amalgamation and absorption are to be settled by the amalgamation tribunal set up under the Act. The date tentatively fixed for the completion of grouping is July 1, 1923, the amalgamations of constituent companies preceding the absorption of subsidiary companies. Agreed amalgamation or absorption schemes must be submitted to the stock and debenture holders concerned before being referred to the tribunal. In the event of postponement later than July 1, 1923, in the case of any group, during the period of postponement the undertakings concerned "may, and shall if the amalgamation tribunal so direct, be used, worked, managed, maintained and repaired as one joint undertaking" and the net receipts shall be distributed as agreed or as may be decided by the tribunal. This tribunal will consist of Sir Henry Babington Smith, G.B.E. (President), Sir William Plender, G.B.E., and Mr. G. J. Talbot, K.C., and will be a court of record. The remuneration of the members of the tribunal and their clerks, &c., must not exceed in the aggregate £35,000 and this and any other expenses have to be defrayed by the Amalgamated Companies. The decision of the Court of Appeal or of the Court of Session on a special case stated by the amalgamated tribunal shall be final, except with leave of such Court. Sections 11 and 12 deal with the payment of £60,000,000 in settlement of the "Railways Compensation Account" in two instalments of £30,000,000. Part Two deals with the protection of the public inasmuch that the railway companies may be required by the Railway and Canal Commission, on a proper complaint being made, to afford reasonable services, facilities and conveniences. The Minister of Transport may require railway companies to conform gradually to measures of general standardisation of ways, plant and equipment, and to adopt schemes for the co-operative working or common user of rolling stock, workshops, manufactories, plant and other facilities. Under Section 18 the Minister has power to confirm agreements between companies for the purchase, lease or working of railways.

Part 3. Section 20 to 26 deals with the constitution and procedure of Rates Tribunal. They establish a court of record styled the Railway Rates Tribunal, consisting of three permanent members, and the staff attached to it must not exceed 10 persons. Permanent members of the tribunal will be appointed by the Crown on the joint recommendation of the Lord Chancellor, the President of the Board of Trade, and the Minister. In November, 1921, the following appointments to Rates Tribunal were made:—(the late) Sir F. Gore-Browne, K.C., President, succeeded by Mr. W. B. Clode, K.C.; Mr. W. A. Jepson, late assistant to General Manager of L. & N.W. Rly., as the railway representative; and Mr. G. C. Locket, of Messrs. Gardner, Locket & Hinton, Ltd., London, as the commercial member. The appointments are for a period of seven years, and the members will be paid whole-time officers. The Minister is entitled to be heard in any proceedings before the tribunal which must make an annual report to him for laying be ore Parliament. With reference to charges for competitive traffic, Section 52 provides that within a prescribed time the companies shall submit schedules of rates where the distance is 30 per cent. or more in excess of the shorter route, and that these schedules shall be referred to the rates tribunal, which will settle the schedule of equal rates by the alternative routes. In the case of new "circuitous routes" (*i.e.* routes longer by 30 per cent. or more than the shortest route between the two places) the company must submit the route, and the Minister may refer the matter to the tribunal if the difference is above 30 per cent. If it exceeds 50 per cent. the route must have the consent of the tribunal before the equal rates are applied.

The following are the four railway groups.

1. North Western, Midland and West Scottish Group, and contains the following Railways—

L. & N.W.
Mid.
L. & Y.
North Staffs
Furness
Highland
Caledonian
G. & S.W.
Maryport & C.
Cockermouth K. & P.
S. on A. & Mid. J.
Other Companies

2. North Eastern, Eastern and East Scottish Group, and contains the following railways—

N.E.
G.C.
G.E.
G.N.
Hull & B.
N.B.
G.N. of S.
Other Companies

3. Western Group, and contains the following railways—

G.W.
Cambrian
Mid. & S.W. Jct.
Local S. Wales
Other Companies

4. Southern Group, and contains the following railways—

L. & S.W. L.B. & S.C. S.E. & C. I. of W.

Section 54 orders that each Company shall at each station keep available for public inspection a copy of the general classification of merchandise. These books are to be available during all reasonable hours without fee. Each company must also keep available for 10 years at its head office all documents specifying the rates and conditions in use on Jan. 14, 1920, and a sub-section requires the proportion of any rate appropriated to conveyance by sea to be stated. Part 4 deals with wages and conditions of service, Part 5 with Light Railways, and Part 6 includes sections dealing with facilities and the allocation of receipts of worked railways. Irish Railway Companies are required to furnish accounts and statistics as at present, until other provision is made by the Council of Ireland. Otherwise this Act does not apply to them.

RAILWAYS IN 1922.*

The average rate of interest or dividend paid.—The average rate of interest or dividend paid per cent. of total nominal capital was 4·07 in 1922, as compared with 3·74 in 1921, 3·73 in 1920, 3·74 in 1919, and 3·62 in 1913. The corresponding returns paid on the total issued capital were 4·74, 4·43, 4·41, 4·42 and 4·28, whilst the interest and dividends paid per cent. of receipts from

Note 1.—COMPENSATION PAYABLE TO RAILWAY COMPANIES.—The sum receivable per annum by the Railway Companie as compensation during the period of Government Control is limited to the Net Receipts of the year 1913 wit the addition of 4 per cent. upon Capital Expenditure brought into use since the beginning of that year.

Note 2.—AUDIT.—The figures for the year ended March 31, 1920, are subject to audit, and as regards Governmen Traffic the rates at which the charges are to be raised are not finally agreed.

Note 3.—No sum has been allowed for any liabilities which may attach to the Government in respect of:—(*a*) Replacement of stock of stores and materials; (*b*) Abnormal wear and tear; (*c*) Arrears of maintenance othe than permanent way and rolling stock.

Note 4.—Arrears of maintenance—permanent way and rolling stock—are estimated at 1913 cost of ascertaine arrears plus 75 per cent. for additional cost of labour and material. The actual cost is not yet ascertainable but payments have only been made on the basis of a 15 per cent. addition.

Note 5.—There is a debit amount of £447,680 balance of expenditure over revenue for the year ended March 3 1920, on Pass Road Vehicles, Steamboats, Canals, Docks, Harbours and Wharves, Hotels, Refreshment Room and Cars, etc., thus reducing the net balance to £7,141,070. The Government Guarantee is:—

Standard year proportion of net Receipts	£47,440,000
Interest on capital works brought into use	1,050,600
Total Government Guarantee	£48,490,600
Less net Balance of Revenue over Expenditure	7,141,070
Net Government Liability for year ended March 31, 1920	£41,349,530

† Exclusive of amounts received under Section 2 of Railways Act, 1921.

‡ Preference.

§ Ungrouped Railways on page 920.

¶ Largest on the system—Maryport is the largest belonging to the Company.

by 13·2 per cent. Coaching-train-miles (electric traction) increased from 30,903,033 to 32,081,716.

Compared with 1921, coaching train miles per train-hour increased from 13·24 to 13·85, and per engine-hour from 10·22 to 10·72, while freight train-miles per train hour increased from 8·81 to 8·85, and per engine-hour from 3·41 to 3·51.

The total number of ordinary passenger and workmen's tickets issued in 1922 was 1,194,682,116, as compared with 1,229,423,512 in 1921, a decrease of 2·83 per cent. Receipts from ordinary and workmen's tickets fell from £73,503,127 to £70,706,930. Season ticket receipts, on the other hand, increased from £11,967,422 to £12,051,-71. Parcel receipts, however, fell from £18,133,223 to £16,967,942.

The tonnage of goods and minerals conveyed in 1922 was 301,625,608, an increase of 83,744,325 tons, or 38 44 per cent. compared with 1921. In coal, coke and patent fuel there was an increase of 71,810,455 tons, or 55·97 per cent., in other minerals an increase of 9,617,302 tons, or 24·62 per cent., and in general merchandise an increase of 2,316,568 tons, or 4·58 per cent. Total goods train receipts in 1922 were £115,563,986, against £109,551,788 in 1921.

On standard-gauge railways the average haul was 52·51 miles compared with 57·58 in 1921, and the average receipt per ton-mile was 1·71¼*d.* in 1922 compared with 2·120*d.* in 1921. The average wagon-load increased from 5·07 tons to 5·52 tons, and the average train load from 121·17 to 127·54 tons, but the average length of haul fell from 57·58 miles to 52·51 miles. Reduced rates came into operation at various dates during the year and the average receipt per ton fell from 9*s.* 10·08*d.* to 7*s.* 6·08*d.*

Total railway traffic expenditure in 1922 was £174,409,620, or 80·24 per cent. of traffic receipts. Corresponding expenditure for 1921 was £225,971,352. Maintenance and renewal of way and works fell from £36,630,130 in 1921 to £28,538,124 in 1922; maintenance and renewal of locomotives and rolling stock from £49,289,330 to £32,211,104; locomotive running expenses from £52,652,267 to £40,064,498, and traffic expenses from £67,101,771 to £56,117,645.

CAPITAL OF NEW RAILWAY COMPANIES.

In place of the numerous separate railway companies, each with several descriptions of debentures, stock and shares, the Railways Act of 1921 has welded the whole of these railway companies, with a few minor exceptions, into four companies each with its huge capital divided into but a few classes. The division of capital, with the approximate amount of each class, is given in the list below :—

SOUTHERN RAILWAY.

		Present Price.
Ordinary "A" (ranking with Deferred, not exceeding 3½ per cent.)	£2,480,198	35

THE RAILWAY CLEARING HOUSE.

This Institution was opened in Jan. 1842, and in addition to the work of clearing through bookings of passenger and luggage traffic, is the medium through which agreements relating to rates and fares, &c., are arrived at. *Chairman*, E. R. Turton, M.P.; *Secretary*, P. H. Price, O.B.E.; *Offices*, Seymour Street, N.W.

IRISH RAILWAY CLEARING HOUSE.

The Irish Railway Clearing House occupies much the same position to the railway system of Ireland as the (London) Clearing House does to the railways of Great Britain. It was established July 1, 1848. *Chairman*, Sir William J. Goulding, Bart.; *Secretary*, Peter J. Brennan; *Offices*, 5 Kildare Street, Dublin.

Indian Railways.

THE construction of Railways in India commenced in 1853, and the total length open at the close of the year 1922 was 37,266 miles. They have in their service 751,752 employees, of whom 6,901 are Europeans, 11,699 Anglo-Indians, and 733,152 Indians. The following are the principal Officials of the Government of India Railway Department:—

Government of India Railway Department (Railway Board).

Chief Commissioner, C. D. M. Hindley, M.A., M.I.C.E.
Members, Col. W. D. Waghorn, C.B., C.M.G.; E. A. Bell, C.I.E.
Government Director, * G. Deuchars.
Secretary, R. McLean, B.Sc.
Chief Engineer, G. Richards, B.A., F.C.H.

India Office (Railway Department),
Whitehall, London, S.W. 1.

Secretary, W. Stantiall.
Government Director, G. Deuchars.
Con. Engrs., Messrs. Rendel, Palmer & Tritton.

Total gross earnings of all the railways in India during 1921–22 were about Rs. 92·89 crores, of which the Imperial Government's share was Rs. 81·87 crores, Provincial Governments Rs. 0·02 crore, District Boards Rs. 0·25 crore, Indian States Rs 3·46 crores, and private companies Rs 7·29 crores. Gross receipts from State-owned railways were Rs 81·69 crores and working expenses Rs 65·67 crores, leaving net receipts of Rs. 16 crores, which represent 2·75 per cent. on the total capital, as compared with 4·74 per cent. for 1920–21, and 6·28 per cent for 1919–20. The net receipts are, however, insufficient to provide for "other liabilities," which include Rs. 19 crores for interest, Rs. 5·51 crores for annuities and sinking fund, and Rs. 1·06 crores for companies' share of surplus profits, and the final result is a net loss to the State of Rs. 9,27,30,501. This means that for the first time since 1900 the railways have fallen from the status of an important source of revenue to the country and have added to the Government's annual liability. As the report points out, however, the railways have not ceased to be a paying proposition and the poor results are not due to faults in the administration. They are suffering from a combination of unfavourable factors which have similarly affected every form of business in the world. Working expenses have risen to an unprecedented degree, and the earning power of the lines has not responded because trade was almost at a standstill.

Even under these unfavourable conditions the total earnings of all lines were Rs. 92·89 crores in 1921–22 as compared with Rs. 91·98 crores in 1920–21. Passenger traffic earnings (Rs. 34,29,31,000) were less by Rs. 47,34,000 on account of the shorter distances travelled by third-class passengers. In goods traffic, on the other hand, though the tonnage lifted (86,248,000) showed a decrease of over a million tons, the earnings (Rs. 49,52,32,000) went up by Rs. 1½ crores. This is explained by a fall in the quantity of commodities carried at cheap rates, principally coal, accompanied by increases in some of the better paying commodities. Other contributory causes were the increase of rates for coal carried for use by the public and the withdrawal of concession rates in some cases.

---

* Address—India Office, Whitehall, S.W. 1. All others at Simla, India.

Working expenses in 1921–22 were 76·22 per cent. of gross earnings, as compared with 65·54 per cent. in 1920–21 and 56·81 per cent. in 1919–20. In 1913–14 the percentage was 51·79. Compared with 1919–20 there was an increase in all departments, but nearly half of the total increase occurred in the locomotive department alone because of the high price of fuel. This is temporary, and so are the heavier renewals of permanent-way, locomotives, carriages and wagons which are caused by overtaking war arrears. In all departments, however, the rise in the cost of wages constitutes the most difficult problem which still awaits solution.

During the year under review 125·14 miles of new lines were opened for public traffic, about one-third of which represented mileage built by Indian States, and about half by private companies. Government lines opened during the year were 25·64 miles in length and were intended chiefly for military purposes. The total railway mileage is now 37,266.

NOTE:—At the standard rate of exchange of Rs. 10 to the pound sterling, which has been adopted, with effect from the beginning of the official year 1920–21, in accordance with the proposals of the Currency Commission, a lakh of rupees (Rs. 1.00.000) is equivalent to £10,000, and a crore of rupees (100 lakhs) to £1,000,000.

RAILWAY SPEED (Year 1923).

BRITISH SHIP-REPAIRING.

By JOSEPH L. CAROZZI, Editor of "Syren and Shipping."

THE consensus of opinion amongst British ship-repairers is that 1923 has been a very bad one for the industry. There was a slight indication at the beginning of the year that the conditions were improving, and a period of normal employment was anticipated. Unfortunately, however, this early promise did not fructify, and the balance-sheets of the firms engaged in the business, as well as the domestic budgets of the workers, will afford ample corroboration of the fact that 1923 has been an unsatisfactory year. The causes of this are not far to seek. Freights have shown a declining tendency right through the year, with the result that when a shipowner had a vessel upon which repairs were necessary he often laid her up instead of putting her in the hands of the repairers, because he realised that were he to continue running her his voyage accounts would show, if not an actual loss, very little profit indeed. Thus ships, the overhaul of which would have provided many welcome jobs, were relegated to the tiers of idle ships lying up in the Fal, the Tyne, the Clyde reaches and the lesser-used docks of some of our principal ports. Another factor which told against the industry was the falling off in orders for the conversion of steamers from coal to oil-burning. During 1922 this section of the industry was kept fairly busy, but the returns for last year show that shipowners regard the economies secured by oil-burning with less enthusiasm than they did a year or two back. No doubt the explanation is that they are face to face with such stringent conditions that they do not feel inclined to indulge in any expenditure—economical though it may be—unless it is absolutely necessary to keep the ship in commission. But besides these reasons there is another and greater one which has exerted its malevolent influence upon British ship-repairing. This is the regrettable friction between employers and employed. It is peculiarly unfortunate that these labour troubles should have been so persistent during 1923, because the position on the Continent was such that the competition of foreign firms was much less in evidence than it was during the previous year. The restriction of the coal output of the Ruhr increased the price of fuel at Hamburg, Rotterdam and Antwerp very considerably, and, in addition to this, shipyard workers demanded higher wages, and thus the Continental ship-repairer, hampered as he was by unstable exchanges, found that he was not able to quote so successfully against his British competitors as during 1922. This increase in Continental prices assisted the British ship-repairer, but not to the extent which it would had the labour conditions here been more favourable. Still, there were certainly fewer British ships sent to Continental yards for overhaul and repair during 1923 than in the previous year, while at the same time the foreign tonnage which came into the hands of British firms was, if anything, larger. There can be no question that when the shipping industry recovers from the depression under which it labours, the ship-repairing business will be found thoroughly competent to deal with any calls made upon it. The general policy which firms have adopted is that of preparing for the improved trade when it comes. In this connection, it may be noted that considerable progress has been made during the year with the big ship-repairing and overhauling establishments which are being provided by Messrs Harland and Wolff in the Port of London. The largest of these will be situated at King George V. Dock. It will extend to some 14 acres, and be equipped with the most modern types of shipyard and engineering machinery. Elsewhere on the Thames there will be subsidiary yards and shops under the same organisation, where, in particular, engineering repairs will be carried out at the shortest notice. As many of the larger boats which come up the Thames have been built by Messrs. Harland and Wolff, it follows that these new works will provide facilities which will be much appreciated by the ship-owners concerned. Not the least interesting feature of the equipment of these works will be a floating dock capable of taking the average size vessel which uses the London docks. During the year an agreement was come to between certain North Atlantic steamship companies as to the curtailment of services during the winter, an arrangement which enables the companies concerned to lay off for repair or overhaul any other vessels without impairing the efficiency of the service. This principle of withdrawing boats during a slack season is likely to be extensively followed, and it is calculated to have a stabilising effect upon the ship-repairing industry, as it will be known that big liners will come off for overhaul at a certain definite time. Under this arrangement the *Olympic*, *Mauretania* and *Homeric* were withdrawn from service at the close of the North Atlantic passenger season. Each of them will be reconditioned and will resume operations in the spring of this year. The *Mauretania* job will be a very interesting one, as, in addition to a general overhaul, her turbines will be re-bladed. The *Homeric*, the largest reciprocating-engined vessel in the world, will be adapted to burn oil fuel under her boilers instead of coal.

SHIPS' COMPOSITIONS AND PAINTS.

By Sir WILLIAM MAXWELL, K.B.E.

PAINT in its simplest form consists of powder colour, or "pigment," mixed with a liquid vehicle which serves the double purpose of enabling the colour to be spread evenly over the surface to be painted, and then, on "drying," of binding the particles of colour together to form a durable film. The purpose of this film is either to protect the surface of the material and to enhance its appearance, or, in the case of ships, to prevent the growth of weed, grass, barnacles, &c.

The pigments used may be metallic salts alone or in combination, or dye colours precipitated on to finely powdered earths.

The liquid vehicle may take a variety of forms, according to the purpose for which the paint is required. Of the "drying" oils, linseed oil is by far the most important, used either in the raw state or "boiled"—a process which consists of heating the oil in the presence of some "drier" such as litharge or a manganese salt. On exposure, the "drying" oil combines with the oxygen of the air, more or less rapidly, according to the proportion of chemical products added in order to assist this oxidation. Such a paint is termed an "oil paint," to distinguish it from "varnish paint," in which the oil vehicle is replaced by a combination of gums or resinous materials alone, or with the addition of oil and thinned out with a suitable solvent. After application the solvent evaporates, leaving a resinous film which may or may not continue to harden still further by the process of oxidation, according to the type of paint.

Paint may be applied merely as a protective coating: to protect the surface (wood, iron, steel, stone, cement or whatever it may be) against the destructive action of the atmosphere, water, acids, or acid and other chemical fumes, or even as a proofing material against the penetration of such materials as petroleum, motor spirit, &c. Each of these cases is a study in itself, and in few other industries has chemistry played so important a part in solving the problems presented. Not only the vehicle used, but also the pigment adopted, has to be studied with a view to producing a chemically stable film that will adhere to the particular surface in question, and last for as long a period as possible as a protection against the action to which the surface will be exposed.

These problems are rendered still more complicated when it is required to produce a paint fulfilling such difficult conditions and at the same time having to be of a particular colour. An otherwise perfect composition may be rendered worthless by the introduction of certain colours which set up chemical action on other ingredients of the paint. Even in the case of ordinary oil or coloured enamel paints, the chemistry of the pigments is of primary importance, as unskilled mixing of certain colours together may produce chemical reactions which, although not immediately evident, may, in a short time, cause the disintegration of the paint film.

Another important point in the case of iron structures subjected to the varying temperature of the air, and the consequent expansion and contraction of the iron, is the necessity of producing a paint film which, after the initial drying, will remain elastic. The Chemical Laboratory has done much to produce such a paint, both by the selection of first-class materials after careful chemical analyses and the judicious blending of oils and pigments, as well as by the exclusion of all resinous materials or chemical products likely to produce cracking of the paint film.

One of the most astounding and certainly, both from a chemical and economical point of view, most interesting developments of scientific paint-making during the last fifty years has been the production of special compositions for protecting the bottoms of ships. To trace the history of these paints step by step is beyond the scope of these notes, but, briefly, it was the advent of iron ships that brought with it the problems of corrosion and fouling—that is, the marine growth which attaches itself to objects immersed for any length of time in the sea.

Copper sheathing, formerly applied to wooden vessels, in order to prevent the growth of weeds and barnacles as well as the ravages of the boring worm, could not be applied to iron vessels, owing to the galvanic or electrolytic action set up between two such metals as iron and copper when immersed in a salt solution. A protective layer of wood was tried before covering the bottom with copper sheets, but this soon became impregnated with sea-water, and the corrosive action continued as before. Experiments were then made to produce anti-fouling paints. By a continual process of trial and elimination of various antiseptic and toxic compounds, coupled with close study of the complex chemical reactions, it has been possible to produce a composition, applied just like an ordinary paint, which is acted upon by the sea-water in such a way as to cause a gradual emanation of a poisonous compound, thus killing in the germ stage all that varied animal and vegetable marine life which would otherwise adhere to and develop on the ship's bottom.

Such a paint, however, is itself very corrosive if allowed to be directly in contact with the iron or steel plates. This defect has been overcome by further study of the chemical reactions produced, and for some time it has been the general practice to apply a first coating of a special anti-corrosive paint to insulate from the ship's bottom the last or anti-fouling coating.

The economical importance of a reliable anti-fouling paint can readily be appreciated when it is considered that on an unprotected ship there may accumulate, in a comparatively short time, tons of barnacles and weed, thereby reducing the speed of the vessel by several knots. In the case of warships the importance of speed is obvious, but in the case of merchant vessels the fact is sometimes overlooked that if the ship's bottom is allowed to become foul through the use of an ineffective anti-fouling paint, a day or two's delay may result in even a short voyage, with consequent high fuel consumption and extra wages, to say nothing of valuable time lost to the owners of the vessel, such monetary losses being out of all proportion to the cost of a reliable composition.

Britishers have long realised the importance of protecting and maintaining property in general, on land or afloat, and perhaps that, coupled with the results of highly organised chemical research, is why British paints enjoy a reputation unequalled by any other in the world.

LIFE RAFTS AND BUOYANT APPARATUS FOR OCEAN-GOING CRAFT.

By ERNEST W. BLOCKSIDGE, M.I.N.A., Author of "Ships' Boats."

"SAFETY of Life at Sea" is a subject of the greatest importance to the travelling public. It is one which demands the close attention of the naval architect, shipbuilder and shipowner.

The difficulties confronting the ship's officers, when it becomes necessary to abandon a large passenger vessel at sea after casualty, and transfer 4,000 people from her decks in 66 lifeboats safely to the water, cannot be fully realised by the "man in the street." It is the constant desire of the responsible Government authority and the shipowner to reduce the perils to which passengers and crews would be exposed under such circumstances; consequently, the rules for controlling the equipment of vessels with suitable life-saving appliances are periodically revised.

In the year 1894 the Board of Trade was empowered to appoint a Committee of fifteen gentlemen representative of all the shipping interests, for the purpose of advising the Board on the preparation of rules for life-saving appliances. This elected body is known as the Merchant Shipping Advisory Committee.

The attention of the whole civilised world was focussed on the inquiry into the circumstances attending the remarkable and regrettable disaster to the *Titanic* which occurred in mid-Atlantic just before midnight on the 14th April, 1912, when 60 per cent of the persons on board were drowned.

Immediate steps were taken by the Board of Trade, through their Advisory Committee to formulate new regulations for the purpose of avoiding in the future a repetition of the conditions which attended this disaster, and their recommendations were published in July, 1912.

The principal requirement of the Rules for Life Saving Appliances, issued in 1913 and 1914 as a result of the Advisory Committee's suggestions, was that lifeboats should be carried on all foreign-going passenger vessels in sufficient number to accommodate all persons on board, and it is around this enactment there has been much discussion since the introduction of the Rules.

Experience during the early stages of the submarine war on merchant vessels prompted the Board of Trade to issue a circular to shipowners urging the necessity of carrying light rafts or buoyant apparatus on all vessels, in addition to the statutory equipment of lifeboats. This type of life-saving equipment was the means of saving a large number of lives, and in certain instances, when time did not permit of the lifeboats being lowered, rafts were the only available means for saving life.

It has been fully realised by the Merchant Shipping Advisory Committee that the experience gained under the working of the Rules for Life Saving Appliances makes it very doubtful whether modern legislation has been as effectual as was anticipated when the Rules were issued in 1914. The Committee, therefore, have again given careful consideration to the whole subject and have formulated recommendations for adoption by the Board of Trade.

It is now considered that rafts of sufficient strength to be thrown from a vessel's deck, and strong enough to *carry* persons *out* of the water rather than *support* them *in* the water, could not, in the opinion of the Committee, be handled without mechanical appliances.

The apparatus recommended by the Committee is, therefore, that which can be *easily handled* and thrown overboard if necessary, sufficient buoyancy being provided to enable a weight of 32 lbs. to be supported in the water for each person the apparatus is certified to carry.

Time is the factor which controls the situation when a disaster occurs at sea. The quality of handiness is, therefore, of great importance in the design of a light raft.

The practical advantages of the light form of life-rafts are:—

(1) They can be easily stowed for immediate use when the limit of time is not sufficient to enable all the boats under davits being launched overboard, and

(2) If a vessel takes a heavy list after casualty, the light rafts can be used from either side.

All foreign-going passenger vessels will, in the near future, carry light rafts, in addition to the accommodation provided in lifeboats. The space occupied by one stack of light rafts (16 in number), stowed in double tier, would measure overall 8 ft. 5½ in. by 6ft. 3 in. and 5 ft. 4¾ in. in height, and give support to 320 persons in the water. Four stacks of life-rafts would, therefore, be sufficient for an Atlantic passenger vessel carrying over 4,000 persons, to comply with the Committee's requirement that life-rafts should be supplied in numbers equal to 25 per cent. of the number of persons on board.

Certain classes of home trade vessels carry more passengers in relation to their length than the foreign-going vessel, owing to their limited voyages. Being within easy reach of harbour and assistance from other vessels, they are, therefore, permitted to carry, in addition to a scheduled number of lifeboats, a percentage of approved buoyant apparatus in the form of light rafts, buoyant deck seats or other approved design.

Before lifeboats or buoyant apparatus can be accepted as a part of the statutory equipment of a passenger vessel, they are subjected to severe tests, and constructed under the supervision of Board of Trade surveyors to an approved specification.

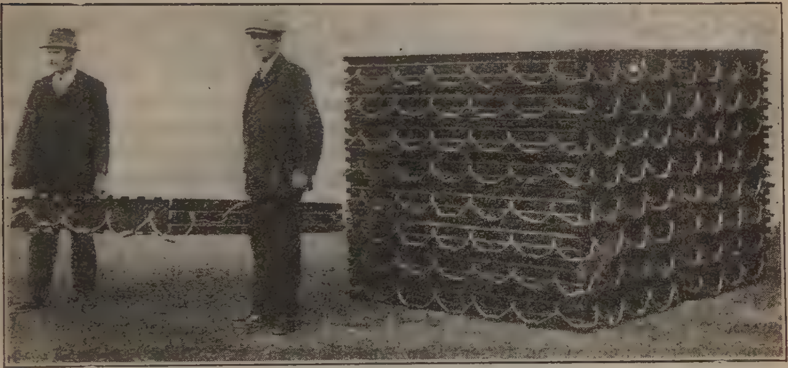
The light rafts carried on foreign-going passenger vessels are suitably equipped with paddles, boathook, painter, self-igniting lights and signal flares. Rafts supporting less than 25 persons are not required to be fitted with paddles, boathooks and flares.

The light life-raft or buoyant apparatus has now become an important part of the life-saving equipment on board passenger vessels, and if simplicity and efficiency are rigidly maintained in other details of equipment, loss of life at sea will be reduced to a minimum.

PERRY & CHAMBERS'

PATENT

DOUBLE & SINGLE BUOYANT DECK SEATS & LIGHT RAFTS



The above illustrates 16 Light Rafts each certified for 20 persons stacked in 2 tiers of 8, only occupying a deck area of 8 ft. 5½ ins. × 6 ft. 3 ins., the total height being 5 ft. 4¾ ins. The lightest and handiest Light Raft on the market.

THE IRON AND STEEL WIRE INDUSTRY.

By H. D. LLOYD, Assoc.M.Inst.C.E.

THE Trade Statistics for the past twelve months ended June 30, 1923, show that, in spite of continued depression in general trade, and of numerous difficulties in foreign trade arising from depreciated Exchanges, the British Iron and Steel Wire Manufacturers have succeeded in securing an increased share of the world's business.

The figures of British Exports, given in detail below, show a gratifying increase in British Trade, particularly in the Exports of Wire Cables and Rope, Wire Netting and general Wire business.

In the Home Trade production has also been well maintained, in spite of severe competition, both amongst the Home Trade Manufacturers themselves and from imported goods.

The total output of the Trade for the current year will, so far as it is possible to make an estimate at the present time, be equal to, if not in excess of, the total output for 1913; in other words, the trade has regained a position in regard to quantity of output at least equal to that which it held before the War. How this position has been secured may be a matter of individual opinion, but there is no real doubt but that the chief factor in establishing the position of the Wire Trade has been the willingness of Manufacturers generally to incur heavy losses in their efforts to bring down prices to a competitive world level. Every effort in this direction has been successful in securing more business for the British Wire Industry, with a corresponding reduction in the cost of overhead charges per unit of output, and, whilst the policy referred to is a drastic remedy to pursue, it has at least resulted in such a measure of business that the trade can now be carried on, if not with profit, at any rate without serious loss.

LEAD.

THE manufacture of lead is amongst the oldest of British industries, and within recent years it has developed into one of considerable magnitude and importance.

Among the chief uses to which lead is put is its conversion into white lead (hydrated carbonate), which, when ground with oil, forms a pigment of great value in itself, and is the most reliable base for practically all paints.

It is also largely used in glazing pottery and porcelain.

The method of manufacture chiefly adopted in this country is the old stack process, which, though slow, produces white lead of great covering capacity, density and durability.

Red Lead (sesquioxide) is manufactured on a large scale, and after mixing with oil, forms the most valuable pigment for protecting steel and ironwork; it is also an important ingredient in optical and other glasses, and during the war was in great demand for the electrical storage batteries used in submarines, &c.

Litharge (monoxide), an equally important oxide of lead, is largely used in the rubber, varnish and accumulator industries.

Metallic lead is in universal use in civilized countries in the form of sheet lead for roofing, &c., and pipes for water and gas; and owing to its great acid resisting power, pure lead is extensively utilized in plant for the manufacture of sulphuric acid and other chemical products.

For chemical purposes the presence of slight impurities is sufficient to seriously reduce the life of the sheets and pipe, and ingenious methods have recently been introduced for freeing the lead from all traces of impurities.

Alloyed with tin, lead forms solder, and lead alloyed with antimony is used for shrapnel bullets, type metal, &c.

Lead also is largely used for covering electric cables.

In Nature, lead occurs chiefly as a sulphide ore, which, after being mined and dressed, is calcined for the removal of the sulphur, and the roasted ore is smelted — usually in water-jacketed blast furnaces—to the metallic state.

The metallic lead thus obtained frequently contains silver of considerable value and appreciable quantities of gold and other metals.

Before such lead can be manufactured, the silver and gold must be extracted and the other impurities removed.

Impurities such as copper, antimony, and arsenic are eliminated by liquation and calcination, and the precious metals are usually recovered by stirring zinc into the molten lead: zinc, being lighter than lead and having a greater affinity for gold and silver than lead possesses, on cooling carries the precious metals to the surface, so that they can be removed by skimming.

Lead ore is mined to a small extent in the North of England, Derbyshire, and Wales, but the chief lead-producing countries at the present time are America, Australia, Spain and Burma.

The world's production of lead exceeds a million tons per annum.

NEWCASTLE-UPON-TYNE.

LEAD SMELTERS AND DESILVERIZERS

AND

MANUFACTURERS OF LEAD COMPOUNDS

WHITE LEAD: Manufactured by the Old Stack Process and supplied either DRY or GROUND in Oil.

RED LEAD: Manufactured in different grades to meet the requirements of GLASSMAKERS, ACCUMULATOR MAKERS, COLOUR MAKERS and POTTERS.

NON-SETTING RED LEAD: For Grinding in Oil.

LITHARGE: Flake and Ground. Specially prepared for ACCUMULATOR MAKERS, RUBBER and VARNISH MANUFACTURERS.

ORANGE LEAD: For COLOUR MAKERS.

SHEET LEAD: All sizes and weights supplied up to 8 feet wide.

PIPE LEAD: Supplied in all sizes up to 10 inches diameter.

CHEMICAL LEAD: Specially Refined for use in CHEMICAL WORKS and supplied in SHEETS and PIPE.

PIG LEAD: Refined for White Lead Making, &c.

LEAD ALLOYS: For SHRAPNEL BULLETS, TYPEMAKING, SOLDER, &c.

SHOT: All sizes, hard and soft.

ROPEMAKING.

THE industry of ropemaking is one of remotest antiquity. The earliest materials were probably the fibres of plants and grasses, the inner bark of trees, the hairs of animals, and their hides cut into thongs and twisted together. By the old Egyptians, as their inscriptions show, flax and the fibres of the date tree, besides raw hide, were utilised. Herodotus records that in constructing the bridge of boats by means of which the army of Xerxes crossed the Hellespont the Persians made cables of flax and papyrus of 28 inches circumference. The natives of Peru used fibres of the maguey, from which they twisted cables strong enough to support their primitive suspension bridges. For thousands of years ships have been rigged with ropes. As long ago as 1250 B.C. the hulls of Egyptian vessels were often strengthened by girdles of them, and heavy rope cables were a part of the equipment of the Athenian navy. In first-class ships of to-day the running rigging is made of hemp rope, the standing rigging, shrouds, stays and back-stays being of wire rope.

Up to about 1860 the spinning of yarns, stranding and laying of ropes had been carried on by hand, but the general adoption of steam as a motive power, which revolutionised the industries of the world, had a direct effect on rope manufacture. Steam engines were installed and power-driven machinery was laid down. The equipment of a modern rope works is costly and elaborate, and the business, being a highly specialised one, necessitates the employment of skilled labour on a large scale. It is of some interest to note that the first machines for twisting handspun yarn into strands were made in England; and a few of them being sent to the United States, the new method was at once adopted there.

Prior to the outbreak of war in the Crimea, manufacturers had been dependent on a hempen fibre imported exclusively from Russia, from which were made the tarred 24-inch mooring-cables of our old wooden first-raters. A part of the mooring hawser of the *Royal George*, sunk at Spithead in 1787, is still in existence, and although it had been immersed for half a century its fibre is almost as fresh as when new. When hostilities cut off Russia as a source of supply, and British ropemakers had to look elsewhere, they found a superior substitute in Manila hemp—*musa textilis*. This plant is indigenous in the Philippine Islands, and all attempts to extend its geographical range have failed. To-day the resources of the Philippines are supplemented by importations of other vegetable fibres from, principally, Russia, India, Italy, New Zealand, East and South Africa, China, Mexico, the United States and South America. On the differences and variations of properties and qualities of these materials depend the heaviness and other characteristics of the products made from them. On account of its strength, flexibility and durability, Manila hemp holds first place. It is the principal raw material from which the wants of the Royal Navy and Merchant Marine are supplied, ropes and hawsers made from it being capable of bearing a maximum strain. Its origin is the leaf stalks of a non-edible plantain, which is cut down close to the root, its leaves being cut off just below their expansion, after which the fibrous coats are stripped, split into 3-inch widths and scraped. The preparation of the hemp for shipment is a slow process, two men manipulating about 25 lbs. a day. It takes more than 3,000 plantains to produce one ton of hemp. Sisal hemp, from Mexico and East Africa, though not so strong as Manila, is in considerable use, especially for ropes of small size. New Zealand hemp is obtained from the leaves of a species of lily, the yield being 12 to 15 per cent. of clean fibre, against 3 to 5 per cent. of the sisal hemp plant. Another vegetable fibre largely used is coir, from the inside of the husk of the cocoa-nut. This fibre is very short, but, owing to a natural twist in the yarn, it makes excellent ropes, possessing extraordinary elasticity, and having the additional advantage of being relatively very light. A coir rope or hawser will stretch 40 or 50 per cent., and thus is especially adapted for mooring purposes where there is a heavy range of sea, or where a ship has to lie off the shore while loading or discharging. The elasticity of the coir hawser also recommends it for "springs" in towing cables, ensuring the easement of any sudden strain on the steel wire ropes which are now widely used for towage of big vessels. It is further much in favour of a coir rope that sea-water improves it. A coir towline 90 fathoms long and 18½ inches round would weigh a little more than 31 cwt. An equivalent tarred hemp rope would have a circumference of 11¾ inches, while white Manila, doing the same work, would need to have only 10 inches. A coir cable of quite exceptional size—47 inches in circumference and containing 3,780 yarns—was used in connection with the launch of the historic *Great Eastern*.

In some cases ropemakers include in their activities the making of binder twine, trawl twine, patent log lines, sash lines, packing cords, parcel twine, etc. Binder twine is in demand by farmers, and is largely in use in connection with harvesting operations: considerable quantities of it go overseas to the Colonies and foreign countries. One factory, with an average annual output of 4,000 tons of a favourite brand of this article, last year exported 1,500 tons of it to the Canadian market alone. Trawl or fishing twine is made by special plant from the finest qualities of Manila hemp, and knitted by hand into immense nets for our fleets of steam trawlers. These nets are made in sections, which have to be joined together and tarred and mounted with the necessary ropes before they are ready for service.

A few words may appropriately be said of Irish activities in the industry under review, for to the qualities of Irish-made cordage (which is the general term applied to all varieties, irrespective of size) the trade owes much of the popularity of its products all over the world. Rope manufacture is not by any means a new industry in North Ireland, the first ropewalk having been started in Belfast as long ago as 1758. To-day the town is the chief seat of the manufacture, to it belonging the distinction of possessing the largest and most completely and comprehensively equipped ropeworks in any part of the earth, producing an output of cordage of different sorts of about 18,000 tons per year. The development of the industry in Belfast has synchronised with the extension of shipbuilding in that port. It has become one of the most important industries in the whole province, and there are prospects of its even greater growth.

To realise how useful a part the cordage manufacturer plays in the world, it is only necessary to reflect for a moment on what a ropeless and stringless civilisation would be like.

The making of metallic wire ropes is a separate industry. The first British patent for manufacturing these—of iron or steel wire—was taken out in 1840, but at the beginning of the 19th century iron-wire ropes were used in the construction of a suspension bridge at Geneva. For centuries before this the art appears to have been a lost one, but that it was known by the ancients is proved by the fact that an excellent specimen of brass wire rope made by the Ninevites some 800 years B.C., and found at Pompeii, is exhibited at the Naples museum.

BRITISH GRANITE QUARRIES.

By H. J. GRACE.

GRANITE primarily consists of quartz and orthoclase, biotite, muscovite, hornblende, augite; and is holocrystalline. Other minerals entering into its composition are plagioclase felspar, oxides of iron, apatite, zircon, garnet, epidote, cordierite, sphene, topaz and tinstone; calcite, limonite, kaolin and chlorite being among the resultant products of decomposition. Commercially, the term "granites" covers products that evade the strictly correct geological definition, such as syenites, diorites, granophyres, gabbros, greenstones, and in some cases grits.

Aberdeen quarries yield a true and distinctive granite; Peterhead, Kemnay, Dalbeattie, Creetown and Ross of Mull being other deservedly renowned centres of the industry.

In England, Leicestershire, Cornwall, Cumberland and Westmorland are rich in areas of supply; Warwickshire also possesses local sources. Wales has large areas extensively worked in Carnarvonshire. Ireland has a considerable supply in several districts, notably in Newry. The Channel Islands produce a large quantity of material, and the Isle of Man has an extensive area; but difficulties of transport hinder the development of the Manx industry.

The first step in the opening of any quarry is the removal of the top soil, or overburden, after which lifts or levels are excavated of varying depths. The accumulation of spring and surface water during the operation of sinking, and afterwards, necessitates almost continuous pumping where the quarries are worked in excavations or pits. The granite having been bored, the faces are divided into motions, averaging usually about 10 yards in width up to about 20 yards, with a set of men to each motion. Preparatory to blasting, holes are drilled into the rock by hand or by means of steam drilling machines, the customary depth being from 10 to 12 feet, the deepest about 20 feet, with a top diameter of 3½ to 4 inches. As a rule two to four charges are necessary, the first being so regulated as to be only sufficiently powerful to spring the rocks—that is, to loosen and open out their joints—the final stronger charge completing the work. Stones that remain unworkably large after the explosion are separately bored, charged with blasting powder, and reduced in size. Blocks intended for sundry specific purposes are roughly dressed below, prior to their removal to the surface for monumental, building, kerb or sett-making purposes and for the crushing or breaking mills. The carriage of the deposits to these mills is facilitated by tram-lines and effected by horse and mechanical power. In some instances the most up-to-date quarries have successfully adopted for this haulage an aerial power-worked cableway of extraordinarily ingenious design, the system being suggestively known as the Blondin. Steel skips carried along this cableway have each a loading capacity of 50 cwts. and upwards. With clock-like regularity these receptacles are lowered empty, hauled up full, run swiftly overhead to the crushers, into the hoppers of which their contents are deposited, and then return to their starting place, to be again lowered and refilled. In the crushing mills the stones pass through breakers into rollers, falling into elevators and then into screens, which sort out the different sizes; rejections, or tailings, being recrushed.

In the dressing of stones for setts, kerbs, etc., the first or preparatory stage is carried out on the floor of the quarry, where the blockmakers shape them into the rough form in which they reach the settmakers and kerbdressers above. These settmakers exercise a wonderfully accurate judgment in deciding at sight how each block will shape best and with least waste under their hands. Into this judged shape it is wrought by heavy hammers, lighter ones being substituted for the finishing touches. For kerbmaking much larger blocks are used, the dressers wielding a variety of tools. For certain purposes, such as "Durax" setts, a stone-splitting machine of Danish invention, in the working of which a movement of the foot controls the action of steam hammers, has proved serviceable. The bursting of big stones of a size otherwise unwieldy has also to be accomplished by hand. An expert, with a sharp heavy hammer, nicks the line of fracture in about the centre, then draws the great block by striking it smartly at one end. After a varying number of blows it severs at the line made by nicking. Stones still larger are divided by what is known as the plug and feather process; the largest of all are drilled and blasted when the former process would be ineffectual. A trade is carried on in block or unbroken granite for breaking by hand on roads and in workhouses.

The latest available returns are those for 1922, in which year the production of igneous rocks in England was 2,999,485 tons; Scotland 1,761,097; Wales 1,118,255; Isle of Man 49,127; total, 5,927,964 tons against 5,740,014 in 1921. Felspar, felsite and felstone (55,605 tons) are excluded, 1921 figures for these being 39,244 tons. Total production of limestone in Great Britain, excluding calcspar (6,453 tons), was 9,418,678 tons against 7,335,862 in 1921, including calcspar 1,798 tons. Foregoing figures apply to all workings except those of under 20 feet in depth. Irish returns, which in 1921 were 277,368 tons igneous rocks and 95,246 limestone, are not included.

The official returns for 1922 accounted for 2,235 tons of manufactured and 47 tons of rough granite exported, and 84,435 tons of manufactured and 449,267 tons of rough imported.

WOOLLEN INDUSTRIES.

THE processes of spinning and weaving wool were introduced into the British Isles by the Romans, and native woollens early established a Continental reputation which endured through the Middle Ages, becoming at length only less highly esteemed than those of Spain, the home of the famous merino sheep, developed from the strain originally brought into the Peninsula by the Moors. Owing much from time to time to the knowledge and skill of Flemish refugees, the trade became the most important staple industry of England and the source of its prosperity. Tradition has it that the woolsack of the Lord Chancellor was first installed as a symbol of wool's vital value as a national asset. Edward III.—who did much to encourage the industry, inducing weavers, dyers, and fullers to settle in England from Flanders—was among the monarchs who mistakenly forbade the exportation of wool in any form. In practice the policy of non-exportation injured where it was intended to benefit. Production greatly exceeded home consumption, prices of the raw material fell, smuggling was systematised, and the business thrown generally out of gear. Abrogated, the law forbidding exportation was re-enacted in 1660, and not finally repealed until 1825.

At times strange devices were resorted to with the object of increasing and enforcing the use of woollen manufactures. In the reign of Charles II., for instance, it was decreed that all corpses should be buried in woollen shrouds—a law nominally operative for 120 years. Development of technical skill, particularly during the reign of Edward III. and again of James I., synchronised with a movement to increase the range and bulk of home manufactures and limit exportation to woven cloth. At one period the right of sending woollen cloth abroad was granted to the City of London as an exclusive privilege.

The Colonial developments of the seventeenth, eighteenth and nineteenth centuries, with the invention of the spinning frame and power loom, supplied an impetus that carried the trade far and quickly ahead. No branch of British commerce has more closely "followed the flag" of Empire. Colonial expansion, broadly speaking, has had the two-fold effect of widening the areas of supply of the raw material and multiplying our markets for the manufactured article.

A hundred years ago the value of the woollen yarns and piece goods distributed from the manufacturing centres of Great Britain and Ireland was about £17,000,000, as against an average of about £55,000,000 of later years.

The chief oversea sources of supply of raw wool are Australia, New Zealand, South America, South Africa, and India; China, Persia, Russia, Turkey, Egypt, North Africa, Spain, Portugal and other countries also figuring on the list, even Iceland contributing a quota. The supplies from the East are considerable.

The importation into Australasia of Lincoln, Leicester and Shropshire sheep for inter-breeding with the merino fine-wool sheep on which the Australian exporters were before solely dependent has resulted to advantage in the production of a variety known as Colonial cross-breed wool. To naturalised English stock, too, the Argentine owes a long-wool variety resembling the English long-wool.

The principal home-produced varieties are classified as lustre, demi-lustre, and short, the races of sheep associated with each class each thriving in its own tract and each preserving its racial characteristics, improvements long standardised having been effected by scientific crossing. Scottish long rough wool is in demand for carpet making. Welsh wool, which in washing shrinks practically to its limit of shrinkage, is in favour for flannels.

Woollen textiles are divided into three general classes of fabric, in the manufacture of which three principles are operative—the woollen, worsted and "stuffs"—and to a great extent these principles are localized in practice. At one time the famous products of the West of England and parts of Scotland were almost wholly those of the first-named principle, the output to-day being much more varied. While re-manufactured materials, cotton "sweepings" and "fud" and "flocks"—the wastes in the manufacture of woollens and worsteds—are used in the making of the cheap cloths of Batley, Dewsbury and the Yeadon districts in Yorkshire, nothing but the genuine material at its best enters into the composition of the best cloths of the "West Countrie" and certain defined Scottish areas. Leeds and its districts adhere in the main to the woollen principle, Huddersfield to the worsted, and Bradford to the "stuffs." But both Bradford and Leeds make worsted fabrics in large quantities, and Huddersfield, working in part on the woollen principle, turns out cloths with both woollen and worsted properties. The woollen differs from the worsted principle in the construction of the yarn (thread), or the arrangement of the fibres of which the threads are composed. In the "stuffs" trade cotton warps are the rule, though warps of worsted wool, silk and linen are also in use, the wefts being usually of Botany (the original Australian variety) and English wool, mohair and silk.

During the end of the sixteenth century Irish woollen imports into England were prohibited, and, referring to this prohibition, Lecky describes native Irish wool (in his *History of Ireland in the Eighteenth Century*) as "supremely good." It is to be hoped that under the auspices of the Irish Government steps will be taken for improving the sheep of the country. At present the wools used by the Irish mills are principally Shropshires, Leicesters, Crossbreds, Blackface and Mountain, and their products from these of saxonies. worsted suitings and serges have a deservedly high reputation, while their cheviots and costume cloths are in great favour in Great Britain, France and other European countries. The United States of America have also been large buyers, but it is feared that the new American tariff will continue to be prohibitive for all except perhaps the highest grades of Botany goods. Irish woollens have a closer general affinity with those of Scotland than those of England. The abundant supply of water-power available in the country is in its favour, and important developments of the Irish woollen trade are anticipated.

British woollen industries remained the capital source of national wealth until the development of the cotton trade towards the close of the eighteenth century.

VELVET AND CORDUROY INDUSTRY.

Of all the many sub-divisions of the Lancashire cotton industry, that concerned with the production of velvets and corduroys, summed up formerly under the heading of fustians, may claim to be amongst the oldest. Velvet—one of the most ancient fabrics in history—was produced by the Chinese, probably from cotton, long before the Christian Era.

With other textile arts, this made its way slowly across the continent of Asia, more civilised in those remote times than now, and in the clash of East and West during the spacious times of the great Crusades, these arts touched the undeveloped western world.

Persia, in her great days, took her share in velvet development, and the influence of Persian design on figured and woven velvet is traceable.

The trading activities of the Venetian Republic linked up Persia and the Levant with the countries beyond the Pillars of Hercules, but the space of this article does not permit of more than a brief mention of the movement of the textile arts through Genoa, France, Flanders, and the Spanish Netherlands to Lancashire and Manchester.

Fustian, probably of Egyptian derivation, is the parent of modern cotton velvet, and in mediaeval England was the wear of the serving-man, whilst people of quality wore velvet. Originally made from the coarse wool of the country, combined with linen warps from Ireland, it was by the 17th century being manufactured from cotton, then newly imported from the Levant, and it is chronicled that Manchester had a considerable export of these goods to the Continent and America. From this parent fabric were velvet and corduroy evolved. Fustian, however, remains the family name covering all classes of cotton pile fabrics: velveteens, cords, moleskins, beaverteens, imperials, diagonals, &c.

Many highly-specialised processes are necessary to convert the raw material into the beautiful finished article as seen in an outdoor costume or evening gown in Regent Street or the Champs Elysées.

The grey material is woven in Oldham, Preston, Bolton and East Lancashire, and then centralised in Manchester, where the merchant arranges the various processes contributing to the successful production of the finished velvet or corduroy. To make velvet successfully, nothing but the best material must be used—fine Egyptian yarn for strength in the warp, and for the weft, soft silky American, suitably spun to give the velvety touch. So far velvet, as it comes from the loom, is hardly distinguishable from plain cotton cloth. The next stage, and one of the most important, consists in forming the pile.

After preparatory stiffening and limeing, this operation, calling for much manual dexterity, consists in opening up the fine longitudinal tunnels, or "races," into which the cloth is woven by means of a fine steel knife, sheathed in a long, finely-pointed guide, which opens up the race, enabling the sharp edge of the knife to sever the top of the tunnel, leaving the walls, as it were, of tufts of pile standing. These tufts form the velvet.

Indifferent weaving, or poor material in the shape of low-grade cotton, would result in imperfections which would deflect the knife and damage would result.

The problem of cutting velvet pile by machinery was unsuccessfully attacked by many inventors in the last century, but in recent times one or two effective cutting machines have been introduced, and whilst the bulk of the work is still done by hand, a well-designed machine has a great future before it. Cords have long been cut by machinery of an entirely different design.

The pile is next prepared by brushing, dressing and singeing to give it a smooth, even surface, preparatory to bleaching and dyeing. The "Fast Dye" is now a necessary accompaniment of good quality velvet, and after dyeing, a beautiful finish is applied to the fabric, giving it a high degree of lustre and richness.

Much is being done to develop the "Fast to Light" dye in velvet fabrics, and for house decoration this process is invaluable.

Beautiful styles are produced in figured, printed, striped and brocaded velvets, as also in acid printing and with shot effects.

Velvet supplies such diverse uses as: ribbons, trimmings, elegant footwear, juvenile clothing.

Corduroy may be briefly described as velvet made with coarser, cheaper yarns, in stripes or ribs of almost infinite variety—from the very fine thicksett to the wide cable cord. A well-proved article of great utility, it gives endless wear and satisfaction to its world-wide users, including the agriculturist, the navvy, the iron-worker, the constructional gangs of North America, the South African farmer, the Australian stockman, and other workers. During the war the British and Allied War Departments discovered that corduroy was a material unequalled for hard wear in the labour battalions.

For juvenile clothing velvet and corduroy give unequalled results, and in the home furniture manufacturers and upholsterers have wide scope for the fast dyed velvet and corduroy in house adornment.

Some approach to stabilisation of the depreciated exchanges would permit of the re-opening of many outlets which velvets and corduroys found in the settled times before the Great War.

Meanwhile competition in the restricted markets tends to lower the quality of the article by the employment of unsuitable material and inferior dyes, and the necessity of keeping up the standard of quality for which Manchester was famous cannot be too strongly stressed. The buyer can make himself secure on these points by insisting on purchasing and employing one of the well-known branded qualities on the market.

At the forthcoming British Empire Exhibition at Wembley overseas buyers and others will have an opportunity of inspecting velvet fabrics, comprehensively displayed, and of seeing for themselves what is being done in this ancient industry.

SHIRT AND COLLAR MAKING.

THE comfort of a well-made, well-fitting shirt is best appreciated by those whose misfortune it has ever been to wear an ill-made, ill-fitting one. To ensure the former characteristics, there are still fastidious men who get measured for their shirts as they get measured for their coats, but to do so is quite unnecessary, for first-class factory shirts, made to standard sizes, are as comfortable as any which are made to measure. In their manufacture, in all reputable establishments, the same meticulous care is taken at every stage irrespective of the nature or quality of the material employed, be it cotton, linen, flannel, silk, imitation silk, or mercerised cotton, "zephyr," or a combination of cotton and wool.

The first step is to mark out on the material the different parts of the shape of the intended garment in all its dimensions. Exactly to the lines delineated the shape is cut by electric cutters, guided by skilled hands. The "making" is technically the process of joining the pieces together, for the smooth seams two-needle sewing machines being employed. "Trimmings" are added in the form of neck and wrist-bands, and, in the case of dress shirts, the fronts; and for the formation of buttonholes at one complete operation another machine of great ingenuity is used. Before being sent to the laundry every shirt is critically examined by specialists, any flaw detected, however slight, entailing its rejection. It is the duty of the examiners to see to it not only that each garment is perfectly made, but that it is in conformity with the prevalent taste in the particular part of the world which is to be its ultimate destination, for "tastes vary" even in the matter of shirts. By residents in some regions an ampler or other different cut of the lower part is preferred than is in favour with men in another region.

In the laundry, where the processes of washing, drying, starching, and ironing are conducted, a scrupulous re-examination takes place, subject to which the articles are ready for dispatch to the warehouse.

Similar methods and principles apply to the manufacture of pyjamas, which have to a considerable extent supplanted the older-fashioned night-shirt.

The making of a collar involves many more processes than, from the smallness of its size, might be supposed, the higher priced varieties going through as many as twenty-eight different operations. Every "single" collar is in four parts (two outside and two interlinings), most "double" ones in seven parts; and each part is separately dealt with. The least expensive collar is that of cotton, the most expensive that of linen: in between comes the collar made of cotton with a linen facing.

The design having been pencilled on the cloth according to an iron or zinc model (iron for the shapes most frequently used, as being less liable to wear and deviation), the cutting-out is accomplished in either of two ways—by hand or by machinery. Cutting by hand is a work of highly trained skill and much delicacy and dexterity. Cutting by machinery is done by means of rapidly revolving power band-knives, making hundreds of revolutions per minute. The material on which they operate is folded into certain lengths, these lengths being piled one above another, and from each fold a large number of parts are cut to pattern. Great skill is also required by the operators of the band-knives, and much art and care have to be exercised to avoid waste, as the loss of a few inches on each cutting would result in a considerable loss.

The shapes and styles of collars are many, double and single. Of the former, the top is either three-fold or four-fold according to the requirements of the particular customer for whom they are being made, and the band is four-fold. These folds are assembled and prepared for the stitcher by heated irons, the edges being turned over by means of shapes or dies, so that an absolutely correct shape is formed according to the required design.

In the meantime, one of the plys that form the band has been sent to the stamper to have the name, shape, size and depth put on in special ink, and after this the folds are run together and turned. Top and band being now ready for the machinist, they are deftly and quickly stitched together by neat rows of thread, by machines capable of 3,000 stitches per minute. Button-holing follows, a machine capable of 1,600 operations a minute cutting the hole, seaming it and clipping off the end of the thread, simultaneously and almost instantaneously. Similarly treated is the single collar, of which—in one variety—the crucial point is the "wings." Great pains are taken that there should be no variation in the "roundness of the round" and the "squareness of the square," for both wings must be uniform, and the least deviation would mar the effect.

The last stage is reached in the laundry, which the stainless and smoothened goods leave with a pure white finish. Before the final processes in this department every collar has had to pass through a minute inspection in the examining room.

Shirt-making and collar-making are allied industries. In them, as in so many other industries, the leading position of Great Britain is demonstrated by the fact that the reputation of British shirts and British collars is literally world-wide; the export trade in them extends to every part of the earth. The name of a British firm of good standing on either article is a guarantee not only that it is the product of the most modern scientific mechanism and consummate human skill, but that it has been made in the purest hygienic conditions—conditions that safeguard the health of the workers and protect their work from all danger of contamination.

Eulogiums of a like sort apply to another industry which is sometimes carried on in the same factory—that of tie-making. Of every shape and pattern and of divers materials, British ties are worn in many countries besides the land of their origin. Every mechanical device that can assist or improve the work of trained hands is available; and on the artistic side experts in form and colour bring to bear the benefit of their judgment and experience.

SEEDS INDUSTRY.

THE culture of seeds is an industry of both vital national concern and of individual interest. In one ramification or another it is a factor in the life of each and the lives of all. On an adequate and well-conditioned supply of agricultural and vegetable seeds depends the adequate and healthy supply of essential foods; thanks alone to the availability of flower seeds any man, however poor, can grow his own little Eden; by grass seeds bare wastes are transformed into green pastures rich with sustenance, lawns that delight the eye are created and maintained, spaces are carpeted that serve the ends of pleasant recreation and beneficial exercise. Royal appreciation of the importance of the subject under brief review has been twice signified in our time, the visit of their Majesties King George and Queen Mary to the Royal Seed Establishment at Reading in 1918 having been preceded by a visit there of his august father when Prince of Wales; the public interest these visits aroused reflecting the interest in seed culture of all classes of the community.

For long the commerce in seeds lacked system and organisation, and many abuses flourished. Adulteration was the rule. Mechanical means were in use for killing the vitality of cheap seeds without affecting their appearance, guarantees being offered by the owners of the mechanisms that not a single seed subjected to the process could by subsequent germination betray the fraud in which it was to be an item. These killed cheap seeds were mixed and sold with dear seeds of a different species but of similar form and colour. For instance, killed rape at threepence a pound was mixed with cabbage, broccoli and other round seeds worth many shillings a pound. In the early years of last century the scandal of this and other malpractices became so great that an agitation was set afoot which resulted in a commission of inquiry, and ultimately to the passing of the Seeds Adulteration Act.

If genius be an infinite capacity for taking pains, seed culturers on a commercial scale are a race of geniuses, for in almost every detail of their work at its every stage meticulous care must be exercised, in conjunction with exhaustive knowledge and experienced judgment, which without painstaking would be wasted. They have to deal with numerous species and innumerable varieties of each. To illustrate the multiplicity of varieties in floriculture alone, of asters there are more than two hundred, of stocks almost as many, and of sweet peas at least one hundred and seventy, other species being equally diversified. This prodigality of variation is by no means confined to flower species. The ordinary person knows of only one sort of blackberry—some few years ago four hundred *new* varieties were discovered in China. It is noteworthy that the tendency of varieties to revert to their original type, which all breeders of live-stock have observed, is equally persistent in the vegetable kingdom. The fertile seed of a variety germinates to species, but not with any degree of certainty to its own variety of that species. The peculiarities of varieties are perpetuated by other means.

In such qualities and characteristics as the longevity of their vitality, the duration of the period of germination, and their hardihood (there are some not injuriously affected by either boiling or freezing) the seeds of different species are in extreme contrast, but the conditions required for germination are in principle the same—exposure to moisture and a certain quantity of heat, communication with the atmosphere being also necessary for the maintenance of a healthy state. A seed, when fully ripe, contains a larger proportion of carbon than any other living part, and so long as it is thus charged with carbon it cannot grow. The only means of ridding itself of this element, essential to its preservation but an impediment to its development, is in the conversion of the carbon into carbonic acid, for which a supply of oxygen is necessary. This it procures from the water absorbed in germination, fixing hydrogen, the other element of water, in its tissue. With the carbonic acid thus formed it parts by means of its respiratory organs, until the proportion of fixed carbon is lowered to the amount suited to its growth.

The typical Seed Establishment of to-day is a colony of experts. Growing on their own lands for the sake and purpose of seed harvesting, the cultivators are sponsors for their produce when it passes into the hands of growers for other purposes. Farm seeds, grass seeds, garden and kitchen garden seeds must all be tested, the unfit and the unlikely be eliminated; means must be taken to preserve pedigree stocks from extinction or decadence. All this entails scientific, costly and elaborate equipments in some departments and an unerring discrimination and ceaseless watchfulness in all.

Since the reform and consolidation of the seed industry more than a hundred years ago, its history has been one of continuous extension and development. It has been, and is, importantly influential in advancing British interests at home and overseas, its export returns running into big figures, even in this age of big figures. British-grown seeds are in preferential demand all over the world. A feature of the trade is that the smallest customer may buy direct from the largest producers.

THE PIANO AND GRAMOPHONE INDUSTRY.

WHILST the following notes relate more especially to the piano and its up-to-date prototype, the player-piano, they are also applicable to the gramophone which, not wholly without justification so far as the better types are concerned, has acquired the status of a musical instrument, and cannot be separated from any review of the musical instrument industry.

The past three years have probably been the most difficult period which the British musical instrument trade has ever been called upon to face, and records at least the failure of one eminent house.

That this depression has been less due to conditions peculiar to the trade than to those which equally affected other British industries is the only satisfactory feature to record. Summarised, these conditions have been :—

(1) Limitation of home demand as a result of excessive taxation.

(2) Heavy decreases in values of stock.

(3) Inability, mainly due to exchange disparities, to trade in the foreign markets.

(4) German competition.

The latter is placed last because, whilst the threat of German competition bulks largely in the popular eye, it has yet to be demonstrated that, save in the cheapest grade of goods, the German makers can redress the disadvantages of the present tariff and at the same time give a greater value than the British maker. For them to do so will become increasingly difficult as the value of their currency tends to rise.

Labour conditions have become more satisfactory, the Trade Unions concerned wisely acquiescing in the reduction of a wage which was severely hampering the trade. Due to this and other reasons, prices fell considerably during 1923, and to-day may be regarded as having become stabilized, an important consideration for the purchaser.

During the past year a most important development has occurred in connection with the player-piano. Emanating from America, but delayed in this country by the war, the reproducing piano has practically superseded the earlier and more mechanical type of instrument, whilst offering the same facilities for playing by hand and by music-roll as the player-piano. This instrument also exactly reproduces the characteristic playing of the most eminent pianists. Its powers were strikingly evinced at a concert held at Queen's Hall, where a reproducing model of the "Pianola" Piano, accompanied by the Queen's Hall Orchestra, under the direction of Sir Henry J. Wood, played Harold Bauer's interpretation of Saint-Saëns Pianoforte Concerto in G minor, and subsequently accompanied Miss Carrie Tubb in several vocal numbers and William Murdoch in a pianoforte duet. It seems likely that in course of time this instrument is destined to replace both the piano and player-piano.

The gramophone has benefited by the great amount of research work devoted to sound reproduction in recent years, and whilst its evolution may not yet be so complete as that of the piano, an extraordinary degree of excellence has been reached in the best makes. A new competitor to the gramophone recently arose in the form of wireless receiving sets, but, except in early days of the "boom," no appreciable diminution in the sale of gramophones and records was felt. Several manufacturers of musical instruments have embarked in this new business, but it cannot be said that the wireless industry has yet justified the predictions of its supporters.

Paderewski says:

"I welcome the opportunity to advise the general adoption of the instrument known as the 'Duo-Art,'" and when he entrusts his whole reputation to this instrument by recording exclusively for it, you must realise that the "Duo-Art" stands in a class distinct from any other piano-playing instrument.

Ignace Paderewski

The "Duo-Art"

REPRODUCING PIANO

reproduces the actual playing of the great pianists.

Suppose you owned a piano on which Paderewski had played the great masterpieces of music—compositions of Liszt, Chopin, Beethoven and the other immortal composers. And suppose that in your own home, whenever you desired, this miraculous instrument would repeat these performances as the master himself played them.

This is precisely what the "Duo-Art" Piano does. It reproduces the playing of Paderewski—and not Paderewski alone, but all the other great pianists—and does it with absolute fidelity. Every element of tone, technique and expression is preserved, giving you a perfect reproduction of the artist's original performance.

The "Duo-Art" Piano is also a "Pianola," and as such it endows you with the ability to play yourself and express your own ideas of interpretation.

And, finally, it is a piano for ordinary hand-playing. There are three different pianos made as "Duo-Arts"—the Steinway, Weber and Steck. Each of these is the leading instrument in its class.

THE BISCUIT INDUSTRY.

"BISCUIT" being, lexicographically, dough twice baked, the making of biscuits is—in the indicated sense—probably older than civilisation, but as applied to the modern commodity with which we feed ourselves and the world, the word itself is by way of being a misnomer, for only one of the article's very numerous varieties—the rusk—goes a second time into the oven. The cracknel, however, is twice "cooked," being boiled before it is baked; and the cracknel is the oldest biscuit known by a distinctive name. It is mentioned in 1 Kings, xiv. 3: "and take with thee ten loaves and cracknels." Biscuits have always been made, but it was only their comparatively recent manufacture by machinery that elevated biscuit making to the status of a great industry. It is an industry in which British supremacy is undisputed and indisputable. We make far more, and incomparably better, than any other country. The British biscuit is ubiquitous. A curious instance of its "peaceful penetration" into the least likely regions was mentioned by the commander of the British troops who entered Lhasa in 1904. In this sealed city of Tibet (in which, it is said, only one white man had ever been before) he was offered a biscuit made in Reading—where is situated the first-built and largest biscuit factory in the world; this ancient English town having been selected as its location partly because of its nearness to the finest and most suitable wheat-growing areas.

The magnitude of the modern British Industry of biscuit manufacture represents, as already implied, an instance of rapid development, for its beginning synchronised with the cheapening in price and increase in quantity of flour and sugar that resulted from legislative action and other causes not longer ago than some eighty years, the invention and adoption of scientific mechanism being coincident. Theprimitive methods this mechanism superseded would generations ago have proved hopelessly inadequate; and to reflect on what a comparatively biscuitless England would now mean to us is to realise that of a truth the pioneer of the new system did "the State some service": to draw imaginary lines from the site of the works he established to the overseas sources from which they are to-day supplied with rice, mace, currants, sultanas and other fruits, almonds, nuts, spices, gingers—not to enumerate other ingredients of utility and luxury which enter into the composition of some of the products of any typical biscuit factory to-day, the making of cakes usually being combined with the making of biscuits—is to realise that the trade has played an important part in the promotion and consolidation of British commercial interests in our colonies and protectorates and in every civilised country; while at home it has permanently and expansively enlarged the market for British flour, British dairy produce and British eggs, increasing in addition the demand for timber and metal for the construction of packing-cases and tins, and of other goods for divers purposes.

Detailed statistical particulars would be bewildering rather than enlightening where so many items are involved, but the following facts will be sufficiently suggestive. The returns of the Great Western, London and South-Western, and South-Eastern Railways show that the output of biscuits and cakes from one factory alone, and the delivery of materials for their manufacture, require annually more than 62,000 railway trucks.

In the beginning the export trade in biscuits owed much to the great Crystal Palace Exhibition of 1851, which was a means of spreading the knowledge of the proved superiority of the British comestible. Similar results followed other International Exhibitions—notably the Great Paris Exhibition of 1878.

To witness the process of manufacture in an English factory of the first class is to discern why the British biscuit has won the reputation it can never lose while those processes are conducted as they always have been and are to-day. In themselves, accomplished by the operation of the most ingenious machinery, supplemented by the labour of thousands of skilled hands, they are simple, but at every stage of each the most meticulous care is exercised, the most elaborate pains are taken to ensure that each finished article is individually flawless and faultless. The absence of any adulterant is not enough—every ingredient, separately examined, scrupulously tested, must be not only good but the best, not only pure but the purest, and free from acquired as well as native defect. As illustrative of the precautions taken, two examples will serve. The scrutiny of currants is so close that each currant out of millions of currants comes under it, and the methods by which they are cleansed and freed from even the tiniest of stalks, and the smallest specks of dirt and dust, occupy 36 hours. Each egg out of millions of eggs is twice tested—first by electric light, unbroken, and then after it is broken. In composition, taste, size, shape and price the differences are many and great, but in the preparation of all descriptions, and in every department, the same rigidity of principle is strictly observed.

This high standard was originally set by the first firm to transform biscuit making from a casual occupation into an organised manufacturing enterprise of national and international service and importance. Consistently adhered to, it has become the accepted standard, and helped to put a reality of meaning into the familiar phrase "British and best."

It remains to refer to the dietetic value of the biscuit, which is greatly enhanced by the variety of its classifications. It is at once a food and a delicacy, a meal and a tit-bit, and in at least one form has medicinal virtues. It satisfies the hunger of the robust and tempts the appetite of the sick and convalescent. From the commissariat of no expedition is it ever omitted—it has helped to sustain life in Arctic cold and Tropic heat. During the Great War vast quantities were especially made for our soldiers on all the fronts and our sailors on all the seas. It is nourishment in the handiest and most portable of forms, and differs from many concentrated foods in that each one of its constituents has a dietetic value of its own, besides the value of them all in combination.

Although the ship or cabin biscuit is no longer the necessity that it used to be, no vessel ever sets sail biscuitless. It is a truism that trade follows the flag: the British biscuit goes with it.

BY APPOINTMENT

IN the science of economy there is an axiom that the best is the cheapest.

¶ Huntley & Palmers biscuits cost you no more than inferior kinds, yet their superiority is beyond all question.

¶ They are manufactured of only the purest materials, under conditions of most exceptional cleanliness, in buildings which are models of sanitation.

¶ By these methods, practised consistently for over ninety years, Huntley & Palmers have won their great reputation.

¶ The millions who, in every quarter of the world, daily enjoy Huntley & Palmers biscuits need fear no modification of their quality.

¶ Those who have yet to try them may do so with confidence.

THE BRITISH PENCIL INDUSTRY.

By G. H. MEADMORE.

THE manufacture of lead pencils in similar form to the familiar article of to-day dates from a period immediately following the discovery of the once famous Borrowdale mine, situated a few miles from Keswick, in Cumberland, in the year 1564. At a much earlier period metallic lead was used for marking on parchment, paper or other material, and it is doubtless owing to the earlier use of this substance that the erroneous term "black lead" has been applied to plumbago or graphite.

The history of the lead pencil for nearly three centuries is closely associated with the fortunes of this mine, and it is probable that in no other part of the world has similar graphite been found equal to that found there. Analyses, however, which have been taken of the Borrowdale graphite show that it was not of exceptional purity, but it was the physical condition in which it occurred that gave it its value for pencils. The product was in such great demand and was so closely maintained as a monopoly, that, in pursuance of an Act of Parliament, the mouth of the mine was guarded by an armed force, and to maintain the monopoly and conserve the supply, the mine was only worked during six weeks in each year. To prevent pilfering, the mine was closed by flooding. The graphite was sold by public auction in London, and for many years the Cumberland mines were probably the only source of supply for pencil making. The graphite was used in its natural state, being cut or sawn into rectangular sticks and enclosed in their wooden casing. This method was not economic, and towards the close of the 18th century, when the deposits began to show signs of exhaustion, and also during the early part of the 19th century, efforts were made to discover a means by which the waste which had accumulated in the factories and the residue from the mine could be utilised. Pulverisation, with the addition of a binding medium such as glue, isinglass, or gum, was tried, but without marked success, and was eventually abandoned in favour of the process originated by Conté, a French chemist, in 1795. By this process finely-ground graphite is mixed with clay, formed into strips, and baked. This invention marks the most important step in the manufacture of the modern pencil, and is the process now in universal use.

Graphite, of which there are two distinct types, viz., foliate or crystalline, and compact or amorphous, has since been found in many parts of the world, but that mostly used by the pencil manufacturer comes from Mexico. Foliate graphite is difficult to grind to the required fineness, and is less brilliant in colour than the amorphous, which, on the other hand, can be ground to a gritless fineness, and is of a nature which combines readily with other materials.

The manufacture of modern pencils requires great technical knowledge, combined with practical experience, and involves a large number of operations. The graphite, which has already been prepared at the mines, is mixed with clay in a dry state, then moistened and milled to the requisite fineness. Filter presses free the "batch" from an excess of moisture, and it then passes through a series of compressors, from the last of which it is extruded through a hole or holes slightly larger than the actual thickness required, to allow for shrinkage, and the "strip" is thus formed. At this stage it is in plastic form. It is laid out in trays, in lengths of about 22 ins., and after drying is ready for baking. The degrees of hardness are primarily obtained by varying the proportions of clay and graphite.

Nearly all high-grade pencils are made of cedar wood, which, owing to its softness, straight grain, and freedom from knots, make it peculiarly adapted for this purpose. The red cedar, or pencil cedar, belongs to the juniper family, being the *Juniperus virginiana*, which is found at its best in the south-eastern States of the U.S.A. The wood is usually imported in the form of "slats," i.e., strips about 7¼ ins. long, 3-16ths in. thick, and from 2 ply to 6 ply in width, 6 ply being the width of 6 pencils. The slats are grooved, coated with glue, and the lead strips inserted. Two slats, one of which contains the strips, are glued together, and the blocks thus formed are fed into the shaping machine. This machine cuts a series of semi circular grooves on each side of the blocks, converting them into shaped pencils. The pencils have then to be sand-papered, coloured and polished, the ends cleaned, and finally stamped and bronzed.

The raw materials employed in the manufacture of coloured pencils are clay, wax, and a colouring agent, but the clay is of a softer nature than that used for black pencils. Bohemian clay having this requisite property, has in the past been greatly favoured for this purpose, but clay eminently suitable for the purpose exists, however, in the United Kingdom, and British aniline dye suitable for the production of copying ink pencils is now obtainable. As a result of careful research work the technical difficulties in regard to the manufacture of coloured "strip" have been surmounted, and to-day British copying ink and coloured pencils, of high grade, including dermatograph pencils for surgical purposes, and pencils for marking on china and glass, are being produced.

The Pencil and Colour Industries are closely allied, the pencil manufacturer being dependent on the dye manufacturer for colours, often specially produced, and it is this connection which largely contributed towards the pencil industry being so successful in Germany. British manufacturers were obviously well equipped in other respects, and a comparison between British and Continental productions a few years ago would have shown that where any difference existed in favour of foreign productions it was primarily the finish due to colour.

As is well known, one of the greatest industrial developments in the United Kingdom in recent years has taken place in the dye industry, one of the results of which is that United Kingdom pencil manufacturers are no longer dependent on foreign dyes, and the handicap under which they formerly contended no longer exists.

The industry has rapidly developed and has become of considerable importance in the United Kingdom. The great increase in production has been made possible by the installation of additional machinery of the most modern type; but whilst many processes lend themselves to mechanical production, and whilst from the nature of the commodity the wide use of machinery is imperative, it must not be overlooked that the art of pencil making is one of the old crafts, which has been handed down from father to son for generations.

In spite of the perfection of modern mechanical means of production, craftsmanship is the important factor in the production of the finest qualities, and it is owing to the craft of the workers engaged in the industry that to-day British pencils stand supreme.

THE CHEMICAL HAND FIRE EXTINGUISHER.

As far back as it has been possible to trace, the possession of fire and the art of making it have belonged to the vast majority of mankind. Its utility has been appreciated and extended all through the ages until it has become an indispensable part of existence. Its danger when uncontrolled was recognised in very early days, and organised efforts made to combat the evil. Trained men with more or less efficient means of throwing water or other liquids to a distance were fully organised in Roman and pre-Roman times. These organised fire-extinguishing bands have developed into our modern Fire Brigades with their magnificent equipment. The need of such organised efforts has been illustrated again and again by conflagrations which have caused widespread disaster. In the classics we have the burning of Troy and Carthage, and the famous satisfaction of the Emperor Nero's madness in the destruction of Rome. Later, we read of great fires in London in the eleventh and thirteenth centuries, and *the* Great Fire of 1666. In 1812 Moscow was burned, the loss amounting to £30,000,000. In 1871 the Communist outrages caused losses to the extent of £32,000,000, in the same year the loss through the Chicago fire amounted to £39,000,000, and some thirty years later this town lost 600 lives in a fire at the Iroquois Theatre. The year following, Baltimore and Toronto suffered terrible losses through fire. These are a few of the startling catastrophes which shock humanity. If the daily loss of life and property resulting from fire could be presented in total figures for one year, it is highly probable the shock would be equally great. At a recent conference of the Professional Fire Brigades' Association, a Chief Officer remarked that it was not generally recognised to how great a total the fire losses in Great Britain amounted. During the year 1921 the financial forfeit was about £10,000,000, and an insurance did not cover it. He emphasised the fact of the national importance of efficiency in connection with fire-fighting and preventive devices, and that such efficiency demanded that a fire should be put out, not washed out, and that the least possible amount of water damage should be incurred. He further stated that the country could not afford the huge losses at present sustained.

Although a fire affects a certain number of individuals directly, it is bound to affect a very large number indirectly in numerous ways which are apparent when a little thought is given to the subject. Outbreaks of fire cannot be absolutely prevented, although every possible care may be taken. The causes are too numerous and often beyond human control. Therefore the only remedy is to fight the fire in the earliest possible stages by means which will overcome it with the minimum amount of water damage. To this end the Chemical Hand Fire Extinguisher has been brought into existence. The majority of these are based on the principle of the formation of gas as the result of the combination of chemicals, *i.e.*, the production of CO_2 as the result of a mixture of acid and alkali, thus propelling the jet of chemical a serviceable distance, and at the same time, as water is capable of absorbing large quantities of Carbonic Acid Gas, it is carried in the water to the seat of the fire, and the evaporation of the water liberates the gas. This gas is the enemy of all kinds of combustion, and therefore forms the main factor in the extinguishment of the fire. This principle has been presented in various forms by firms who have realised the possibilities of sales. The foregoing remarks prove the necessity of Fire Protection, but frequently it is not recognised until too late,—insurance is applied for and paid according to policy; re-organisation is started, premises rebuilt and customers re-canvassed—the latter may or may not return to the victim of the fire. Insurance should in no circumstances be depreciated, but it forms very inadequate compensation for the immense amount of worry, loss of trade and loss of treasures incurred, apart from the fact that life may be endangered. When considering a matter with so grave issues at stake, it is essential that the precautions adopted should be adequate to meet requirements in all respects. One of the most vital points to be considered is whether the appliance installed will be found to be effective and in order years hence, as of course it may be many years before the appliance be used. A machine which has deteriorated, or in which the mechanism refuses to act, is worse than useless, as valuable time is wasted in trying to use it. It is also essential that the appliance can be set in action instantly, without the reading of lengthy instructions, thus avoiding loss of time, and enabling the uninitiated to set the appliance in action. Its weight and construction should enable it to be used by one man alone, and where necessary, a size within the capabilities of a woman or even child should be installed. It is a great advantage if the appliance can be used with one hand alone, and of course this cannot be done when a hose is attached to the appliance. A conical appliance, provided the exit is at the apex and the handle is correctly placed, can with the greatest ease be directed where required. A brief examination would satisfy one regarding some of the above necessary qualifications, and a test fire would show whether or not the extinguisher could put out a fire, but this would be no guarantee that the extinguisher would be equally efficient years hence and in the hands of an inexperienced person. The only guarantee which can be accepted with absolute confidence is the actual use of the fire extinguisher after it has been hanging up filled for years and then used by one without instruction. Any firm which makes a claim that its appliance will not deteriorate should be able to produce such evidence from their customers.

As fires give no warning, and have been known to occur on the same premises within a few hours interval, a system of fire protection which is always ready is essential. Therefore it follows that a fire extinguisher must be capable of being easily and quickly refilled, and spare refills should always be at hand. In selecting an appliance it is advisable to give preference to the one that carries with it a continuous system, under the terms of which refills are supplied free after each actual outbreak of fire, appliances are periodically inspected and advice given by experts when desired, provided the abovementioned qualifications are also included.

FIRES GIVE
NO WARNING!

Preparation NOW is the only safeguard.

SURGICAL INSTRUMENTS AND APPLIANCES.

NO science and no art has made more marked progress in modern times than the science and art of surgery. This improvement has synchronised with the striking improvement in the instruments and appliances on which, generally speaking, the success of all serious surgical operations is to a large degree dependent. While it is true that the perfection of the implement he wields will not make good a lack of skill on the part of the operator, it is equally true that a faulty instrument may stultify the ability of the most skilful. The work of the maker of surgical instruments and appliances plays a part of vital importance in the work of those who use them, and in their manufacture a knowledge is necessary of the exact purposes they are designed to serve. In number they have greatly increased — for instance, in dentistry, all teeth were formerly extracted with one and the same forceps; now a different one is made and in use for different teeth. Operations that were never attempted before have necessitated the making of new instruments, or new forms of old ones.

Surgery having become a science before medicine proper was anything better or more than a superstition, the industry of the manufacture of its necessary tools is one of the most ancient in the history of civilisation. In the oldest Egyptian temples and the oldest of Egyptian obelisks proofs have been found that implements were made for incisions, scarifications and other surgical purposes, most likely including amputations, long anterior to the date of the Ebers papyrus—3500 B.C. Lancets, tweezers, uterine specula, catheters, iron rods for cautery, and means for the removal of some forms of cataract, all dating back to the earliest Egyptian times, are to be inspected in a number of museums in various countries. By practitioners in ancient India, who probably derived their surgical knowledge from the Greeks, no fewer than 127 instruments, chiefly for cutting and cauterizing, are known to have been used. In Greece surgery had reached a high stage of development before Hippocrates placed medicine on a more rational foundation than it had occupied before his time — in fact, certain modern appliances, such as splints and scientific bandages, appear to have been originally of Hippocrates' invention. The Romans and other ancients adopted all known surgical means and aids. Rome's conquering armies were accompanied by practitioners well equipped with them.

Excavated at Pompeii, there are preserved in Naples about 300 implements of about 60 different kinds—hollow probes (straight, curved and hooked), needles, specula vaginæ, catheters, pincers, cauteries, bistouries, lancets, scissors, etc. Mostly these are made of bronze, but many of the cutting ones are of iron.

The most important characteristic of the appliances and instruments of the surgeon of to-day, from the operating table—itself a wonder of constructional ingenuity—to dressings and sponges, is that everything is either aseptic or antiseptic; a fact for which the gratitude of humanity is due to Lord Lister (born 1827)—the pioneer in the only surgical advance worth much notice since the time of Ambroise Paré (1510–1590). Lister's first employment of carbolic paste as a dressing has been followed by the use of sponges as well as outside dressings of sundry preparations of absorbent wool (wool which, having been freed from grease, readily absorbs moisture). Nothing merely ornamental or in the way of embellishment is now allowed on any implements, which must all lend themselves to rapid and thorough cleansing.

The discovery of radium, the recognition of the bacteriological properties of the electric light, and the therapeutic use of the forces of electricity have led to the manufacture of various ingenious mechanical appliances. Among these may be mentioned the cystoscope, a long, narrow tube, shaped and curved somewhat on the lines of a catheter. At one end are a minute glow-lamp and reflector and a small window; its other end is fitted with a lens and connected by a switch with a main current. Other instances are the Filsen lamp and the galvano-cautery—a series of minutest points of platinum, with a suitable trigger.

Besides the multitude of instruments and appliances by which operations are effected there are those designed to relieve and cure without the risks and pains of the operation they may make unnecessary. Such dangers and sufferings, in cases of any importance, there must always be. Both are matters of degree, but both are inevitable. As regards the latter, there is mental distress in anticipation that no anæsthetic can deaden, and some physical pain subsequently. Then, again, there are appliances for use in cases the nature of which puts an operation out of consideration—such, for instance, as those of many cases of hernia, or rupture, for which a truss is worn.

It is a noticeable and, in view of the very large number of men, women and children who, from various causes, are afflicted with hernia, a noteworthy feature of the truss that the ordinary instrument remains to-day in principle and very much in make what it was hundreds and perhaps thousands of years ago—which by no means indicates the impossibility of improvement. As a matter of fact, of quite recent years an article to supersede the old form has been manufactured for which radical and very distinct advantages are claimed.

That the superiority of British-made surgical, medical, dental and veterinary instruments and appliances is appreciated abroad is proved by the existence of an export trade with the Continent and countries far more distant. The latest available returns show that instruments during 1921 were exported to the value of £160,181; and appliances, including trusses and artificial limbs but excluding artificial eyes, to the value of £160,719. These figures are considerably below those for the previous year.

291,000 MEN WOMEN & CHILDREN

OF 12 different nationalities living in all parts of the world-testify to the efficiency of Brooks Rupture Appliance

Every Brooks Appliance is made up specially for the person who is to wear it—it is sent on trial so that you can test it in your own home or at your work. If you do not like the Appliance, you send it back to us and we refund your money.

The Brooks Rupture Appliance does not chafe or hurt, and it cannot be thrown out of position once it is adjusted. There is no metal to touch the flesh. It is comfortable to wear and cannot be detected through the lightest clothing. You can try this Appliance in your own home free by writing to us or to the Agency nearest you, for particulars of our free trial offer.

LETTERPRESS PRINTING.

By J. R. RIDDELL, Principal, London School of Printing.

LETTERPRESS printing, the Craft which turned the darkness of the Middle Ages into light and secured the intellectual achievements of the past, and also furnished a sure guarantee of the future, is the art of obtaining impressions from relief surfaces, such as type and engraved blocks.

It is claimed that the earliest attempts at printing were made in China before the Christian era. It is known that printing from engraved blocks and movable characters was practised in the Celestial Kingdom in the eleventh century, when a smith named Pi Shing made movable types, but the large number of characters in the Chinese alphabet made the invention practically useless. Books printed from blocks were published in China and Korea as early as 922: these are said to be still in existence. In the British Museum there is a copy of a Chinese Encyclopedia printed from movable types in the year 1337.

There is no actual certainty of the date of the invention of printing from movable types, but it is assumed it took place about 1440. Certain "Letters of Indulgence" are the first known documents to have been printed by this method. These were issued from a press at Mainz and bear the date 1454.

The first book printed in English was "The Recuyell of the Histories of Troye" partly printed at Bruges about 1473 by William Caxton, the first English printer, who set up his Press at Westminster in 1476.

The art of producing metal types is a very exacting one, calling for great accuracy and skill, not only in the designing of the letters and cutting of the punches, but also in the casting of the individual letter. The unit of type measurement is a "point," twelve of which equal "a pica em," or the sixth of an inch. The height of type is 0·918 in., or approximately the diameter of a shilling. "Founts of type," which are of varying weights and sizes, are supplied to the printer in recognised proportions of characters, *i.e.*, letters, signs, spaces, and are based on the number of "A's" in the fount.

In the actual production of letterpress printing, there are two main operations, the setting up of the type by the compositor, and the printing of the type on the sheet of paper by the pressman, or machine manager.

COMPOSING.

In hand composition the compositor stands in front of a frame on which is placed a tray, called a "case"; this is divided into a number of compartments or "boxes" of varying sizes, each of which contains either a number of one particular letter of the alphabet, or punctuation marks, signs, figures, spaces, &c. These letters are picked up from the case by the compositor with the thumb and forefinger of the right hand and placed in a metal tool called a "composing stick," held in the left hand, and from which the letters, in the form of lines, are taken and placed upon a long shallow tray with flanges, called a "galley." The spaces, shaped like type but somewhat shorter, are placed between words. The lines of movable type are ultimately made up into pages of a book of a particular size and placed inside a steel frame called a "chase," and the type "locked up"—*i.e.*, made portable by means of a system of wedges making the forme of type suitable for printing from on a machine.

Between the setting up of type and the actual printing, there are several important operations to be performed, such as reading—a most responsible task—the reader's position usually being held by a man of wide learning and practical experience. There are also the making and revising of the reader's and author's corrections, and finally the arranging or "imposing" of the pages in such a way that when the sheet is printed on both sides and folded, the pages will fall in proper sequence and with correct margins.

After the number of copies required have been printed, the type is "distributed"—*i.e.*, each letter or space is put back into its respective box by the compositor so that the type may be used over again. In this work great care has to be exercised to prevent the letters getting into the wrong boxes, or, as the printer would say, "pieing" the case.

We live in a mechanical age, and mechanical science has made great advances in connection with Printing during the past 50 years. In setting up "solid matter," such as newspapers and books, composing machines are used to a large extent. Of these there are various styles which can be divided into two classes; those which cast a solid line of type, called a "slug," and those which produce, as in hand composition, a line made up of separate letters.

The compositor on the composing machine is called an "operator." He manipulates a keyboard similar in appearance to that of a typewriter, the keys of which when depressed set certain mechanism into operation, ultimately producing lines of type spaced and ready for printing, either in solid lines, as with the Linotype or Intertype, or in single letters as produced by the Monotype.

MACHINE PRINTING.

When the forme of type and illustrations has been sent to press, a large amount of work and skill is demanded of the pressman or machine manager, before the results are obtained which enable even a novice to recognise that the book or the piece of printed matter he is handling is an example of good craftsmanship. There is an indefinable charm about a well-printed page. Hours, and sometimes days, of what is called "making ready" may be spent on the machine to produce an even, clear, solid and sharp impression from the forme. Particularly is this the case when printing illustrations: the printer has to adjust the weight of pressure to suit the different tones in the plate, so that the "tone-values" of the original design will be retained throughout the printing of a large edition. This is done by cutting out on sheets of paper the parts which print too heavily, and patching up those which require to print solidly, by the use of papers of varying thicknesses and pasting them together, forming what is called an "overlay." This is fixed on the platen or cylinder of the machine in such a way that it corresponds exactly with the forme when the impression is made. This work requires a high order of intelligence, skill and much experience.

When the make ready is completed, the machine is "set" to suit the job. Ink suitable for the work is placed in an adjustable trough, called a "duct," which is regulated by means of screws so that an even and sufficient supply of ink is automatically maintained and carried to the forme by means of a system of rollers throughout the run of the job, which may last for a day or even for weeks. On an average something like 9,000 sheets of a school book will be printed in a day; but during their printing great care has to be exercised and a sharp look-out kept for letters breaking off or for something (such as a space between words which should not print) "working up" and spoiling the appearance of the work.

There are many kinds of printing machines, too numerous to mention, varying from those which give a flat impression, such as the hand press and platen machines, to the large cylinders and rotaries which produce books and daily newspapers. The various styles of machines are capable of printing anything from a few hundred up to about 200,000 copies per hour.

BLOCK MAKING.

A reference as to how illustrations are obtained may not be considered out of place in this "tabloid article." The artist's drawing, photograph, or design is photographed by a particular process (sometimes through a screen representing a number of minute dots which can be seen if a print from a half-tone block is closely examined). The process-negative is then photographically printed on to a sensitised piece of metal, which, when developed, is subjected to the action of certain acids, which etch, or eat away, the metal not protected by the photographic image. After varying degrees of etching, the image is left standing in relief, providing a surface from which the letterpress printer can print. These relief blocks, when mounted on wood to bring them to type height, are placed in a forme and printed at the same time as type.

Blocks for printing in colours are made very much in the same way, but instead of employing one negative, there are three, each representative of one of the fundamental colours scientifically dissected, and from these negatives, blocks are made. Each block is printed in a different one of the three primary colours—yellow, red and blue—and when the colours are printed on top of each other, a reproduction of the colour tones approximating those in the original painting is obtained.

Printing is acknowledged to be one of the most important of our national industries. It is estimated that some 8,000 firms in the United Kingdom have invested over £30,000,000 in the business, which gives employment to some 300,000 workers. Further, it is the art which has educated the world, and as a career for young men it provides considerable scope in its future development. There are great opportunities for men of education coupled with technical knowledge to become leaders who will influence the public to a fuller realisation of the commercial value of good printing, whether it be for newspapers, books or the larger and probably most important section—commercial job printing.

North South East West

All the World over—

IN whatever corner of the earth your market may be, whatever may be the language of its people, we can produce effective printing for you in the language of that Country.

There is no language in the entire world in which we have not printed in moveable type.

No organisation in the world can equal our service in this direction.

If you require advice on your printing, write to us about it.

PAPER TRADE INDUSTRY.

By H. P. STEVENS, M.A., F.I.C.

RAW MATERIALS.—The raw materials used in the British Isles for the manufacture of paper consist of (1) vegetable fibres, derived chiefly from wood, esparto, rags and straw; recently even sawdust has been utilised; (2) soda, lime and bleaching powder for the purification of the fibres; (3) resin, glue, gelatine and starch for sizing and giving a finish to the paper; (4) loading materials such as china clay, chalk, gypsum, etc., to cheapen and render the paper opaque; (5) colours such as ultramarine, coal-tar dyes, the former being used chiefly to counteract the natural yellow tinge in the manufacture of white papers; and (6) waste papers. The manufacture of paper also requires coal for steam raising and a very ample supply of good water.

Rags, which once supplied the bulk of the papermakers' raw material, are now used for high-grade papers only, and Great Britain is dependent on its Colonies and on foreign countries for the supply of the great bulk of vegetable fibres. Of these wood pulp is the most important. In normal times this comprises four-fifths of the amount of our imports of fibrous materials.

Wood pulp is of two varieties—"mechanical" wood pulp and "chemical" wood pulp. The former predominates and consists of wood ground to pulp in a stream of water; the latter consists of wood disintegrated by chemical processes and fetches two or three times as much as the mechanical pulp. The wood used is mostly coniferous (spruce fir) and therefore derived from countries with temperate or cold climates. Norway and Sweden supplied the bulk of our requirements. Wet mechanical pulp comes mostly from Norway—although Canada now runs the latter close—bleached chemical pulp mostly from Norway, and unbleached from Sweden. There are ample reserves of wood in Canada and Newfoundland to supply all British requirements.

Esparto is imported in the raw state and converted into pulp in English mills. It is mostly derived from Algeria, the remainder from Spain and parts of the North Coast of Africa. Imports have shown a considerable increase, but even at the end of 1922 had not regained pre-war figures.

Rags are largely imported. The present figures show a decrease in value, as with other raw materials.

The following figures give the imports of fibrous raw materials for the three years 1920, 1921 and 1922.

Description	1920 Tons.	1921 Tons.	1922 Tons.	1920 £	1921 £	1922 £
Mechanical Wood Pulp ..	538,969	372,051	565,450	8,169,704	4,338,865	2,924,482
Chemical Wood Pulp ..	555,204	218,707	360,164	21,360,535	8,292,468	5,612,248
Esparto	162,539	73,424	171,375	3,179,942	938,503	829,476

IMPORTS AND EXPORTS OF PAPER.—For our purpose the term "paper" must be held to include not only printing, writing and wrapping papers, but also paste board, cardboard, mill board, straw boards, and many specialities.

As regards imports Norway and Sweden supply us with the greater part of the cheaper kinds, such as news and wrapping papers, while Germany's exports of paper to this country, such as packings, wrappings, tissues and coated for 1922 are double those for 1921, and the value over 50 per cent. more.

During 1922 both imports and exports show large increases in quantity. During 1921 the reverse is the case.

Figures for 1923 are not yet available.

The following figures give the quantity and value of the British imports of paper and boards during th last three years :—

IMPORTS.

1920 Tons.	1921 Tons.	1922 Tons.	1920 £	1921 £	1922 £
647,263	339,128	553,594	30,252,181	11,601,303	12,374,2

Two-thirds of these quantities and one-third o these values are accounted for by strawboards manu factured in countries where straw is plentiful. Th feature of the 1922 imports is the recovery in quantitie to the 1920 figure, although the value is little altere Great Britain is estimated to produce about 11 per cent of the world's output of paper and Canada 3 per cent The United States is by far the largest producer. Th British exports of paper for the last three years ar given in the following table :—

EXPORTS.

1920 Tons.	1921 Tons.	1922 Tons.	1920 £	1921 £	1922 £
117,622	73,249	122,751	12,817,859	7,736,444	6,737,28

MANUFACTURE OF PAPER IN THE BRITISH ISLES.—There are 231 paper and cardboard mills in England sixty-one in Scotland and seven in Ireland. Woo pulp is only manufactured at two mills. There ar thirty-seven paper mills in Canada and a larg number of wood pulp mills. Some Canadian mill combine the manufacture of both wood pulp an paper. In Newfoundland there are two larg establishments, one producing wood pulp and pape and the other wood pulp only. There are seve paper mills in Australia, three in New Zealand an eight in India. Official statistics of the paper ou put in Great Britain and Ireland were furnished i 1907 for the Census of Production :—

Paper :—	United Kingdom Quantity. Tons.	 Value. £
Paper for Writing and Drawing and for Envelopes	124,250	3,085,0
Paper for Printing and for Posters, etc.	436,050	5,590,0
Packing and Wrapping Paper, Biscaps, etc.	181,850	1,943,0
Printing and Coated Papers (not Hangings)	34,050	846,0
Pasteboard, Cardboard and Millboard	44,650	565,0
Other Sorts	28,200	700,0
Paper Bags	35,500	487,0
	884,550	
All other Products—Recorded by Value only	..	112,0
Total Value ..	..	13,328,0

A more recent but unofficial estimate has been kind supplied me by the Paper Makers' Association. T following figures give the annual pre-war productio of paper manufactured in the British Isles :—

	Tons
News, all grades	377,0
Printing and Writing Paper from Wood Pulp ..	254,8
Printing, mostly from Grass (Esparto)	148,2
Brown Papers and Specialities	228,8
Best Writings and Blottings, mostly from Rags	20,8
	1,029,6
Mill Boards, Leather Boards, etc.	62,4
Total quantity	1,092,0

OR TO THE MANAGERS—

ALFRED HOLT & CO.,

INDIA BUILDINGS, WATER STREET, LIVERPOOL

In the early part of the 18th century numerous inventors propounded schemes for applying steam power to vessels to be run upon rivers and canals. A chronological list from 1707 to 1858 is given below.

For the establishment of lines from 1861 to 1888 and for further information *see* WHITAKER'S ALMANACK, 1913 edition, including the Evolution of the Steamship in the North Atlantic.

In 1824 ocean trade was then carried on with sailing ships, mostly under 500 tons each, and all the steamboats in the United Kingdom only numbered 109.

As the size of steamships increased the heavy cost of construction necessitated the establishment of Corporations, with great strength of capital, which control the principal ocean routes (*see* page 961).

In 1814 the steamboats of all kinds registered in the United Kingdom amounted to less than 1,000 tons, increased to nearly 8,000 tons by 1820. There were 766 British steamers afloat in 1838, in all just short of 150,000 tons. The invaluable Register Book which is published by the Committee of Lloyd's Register of British and Foreign Shipping shows that on June 30, 1923, the steamship empire builders of Great Britain owned 10,164 vessels, 21,695.074 gross tons, exclusive of 971 ships (363,038 tons) belonging to the dwindling disciples of time-honoured canvas. The total for the world was—Steam, 62,335,373 tons; and sail, 2,830,865 tons.

Owing to recent inventions passengers enjoy greater immunity from accidents, the majority of passenger steamers being now fitted with installation of wireless telegraphy and with submarine signalling apparatus.

FIRST STEAMBOATS, PIONEER SAILINGS AND EARLIEST LINES.

1707. Denis Papin experimented on River Fulda with paddle-wheel steamboat.

1736. Jonathan Hulls patented designs similar to modern paddle boat.

1769. James Watt invented a double-acting side-lever engine.

1783. Marquess of Jouffrey made experiments in France.

1785. James Ramsey, in America, propelled a boat with steam through a stern-pipe.

1785. Robert Fitch, in America, propelled a boat with canoe-paddles fixed to a moving beam.

1787. Robert Miller, of Edinburgh, tried primitive manual machinery.

1788. Miller, with Symington, produced a double-hull stern-wheel steamboat.

1802. *Charlotte Dundas*, the first practical steam tugboat, designed by Symington.

1804. *Phœnix*, screw-boat designed by Stephens in New York; first steamer to make a sea voyage.

1807. *Clermont*, first passenger steamer continuously employed; built by Fulton in U.S.A.

1812. *Comet*, first passenger steamer continuously employed in Europe; built by Miller in Scotland.

1818. *Rob Roy*, first sea-trading steamer in the world; built at Glasgow.

1819. *Savannah*, first auxiliary steamer, paddle wheels, to cross the Atlantic; built in New York.

1821. *Aaron Manby*, first steamer (English canal boat) built of iron.

1823. City of Dublin Steam Packet Co. was established.

1824. General Steam Navigation Co. was established at London.

1824. George Thompson & Co. (Aberdeen Line) were established.

1825. *Enterprise* made the first steam passage to India.

1825. *William Fawcett*, pioneer steamer of the P. & O. S.N. Co.

1830. T. & J. Harrison (Harrison Line) were established at Liverpool.

1832. *Elburkah*, iron steamer, took a private exploring party up the Niger.

1834. Lloyd's Register for British and Foreign Shipping established.

1836. F. Green & Co. established at London.

1836. Austrian Lloyd Steam Navigation Co. established at Trieste.

1837. *Francis B. Ogden*, first successful screw tugboat; fitted with Ericsson's propeller.

1838. *Archimedes*, made the Dover-Calais passage under two hours, fitted with Smith's propeller.

1838. *R. F. Stockton*, built for a tugboat, fitted with Ericsson's propeller, sailed to America; first iron vessel to cross the Atlantic; first screw steamer used in America.

1839. *Thames*, pioneer steamer of the Royal Mail Steam Packet Co.

1839. George Smith & Sons (City Line) were established at Glasgow.

1840. *Britannia*, pioneer steamer of the Cunard Line.

1840. *Chile*, pioneer steamer of the Pacific Steam Navigation Co.

1845. *Great Britain*, first iron screw steamer, precursor of modern Atlantic steamer.

1845. Thos. Wilson, Sons & Co., Ltd. (Wilson Line) established at Hull.

1847. Pacific Mail Steamship Co. established in America.

1849. Houlder Brothers & Co. established at London.

1850. Bullard, King & Co. (Natal Line) established at London.

1850. Messageries Maritimes de France established.

1850. Inman (now American) Line established at Liverpool.

1851. *Tiber*, first steamer of the Bibby Line, established 1821 at Liverpool.

1852. *Forerunner*, pioneer steamer of the African Steamship Co.

1853. Union Steamship Co. was established (now Union-Castle Line).

1853. *Borussia*, first steamer of the Hamburg-American Packet Co., established 1847.

1854. *Canadian*, first steamer of the Allan Line, established 1820.

1854. Donaldson Bros. established at Glasgow.

1855. British India Steam Navigation Co. was established.

1856. *Tempest*, first steamer Anchor Line.

1857. *Waldensian*, first steamer of J. T. Rennie, Son & Co. (Aberdeen Line).

1858. *Bremen*, first Atlantic steamer of the Norddeutscher Lloyd, established 1856.

1858. *Great Eastern* launched into the Thames, Jan. 31; commenced, May 1, 1854.

1858. British and African Steam Navigation Co., Ltd., established at Liverpool.

ADMIRALTY CHARTS

The LATEST EDITIONS of Charts, Plans, and Sailing Directions published by the Hydrographic Dept. of the Admiralty can be had from

J. D. POTTER, Admiralty Agent for Charts and Publisher of Nautical Books, **145, Minories, London, E.1**

Official Catalogue of Admiralty Charts, Plans, and Sailing Directions, a vol. of 330 pp., with 45 Index Charts (gratis).

On the Correction and Use of Charts, Light Lists, and Sailing Directions, a vol. of 40 pp., royal 8vo; bound red cloth (gratis).

You'll find it in "Whitaker."

Every "well found" Passenger Ship carries a Library.

It is a commonplace to say that no reference library is complete without "Whitaker." One can go much further and remark that a great many people find the Almanack a reference library in itself. There is nothing to equal it, either in conception or in the completeness and care with which it is put together and kept up-to-date. —*The Times.*

"Whitaker" is a Library in itself.

Of All Booksellers & Stationers.

PUBLIC SCHOOLS' SCHOLARSHIPS.

KING'S SCHOOL, CANTERBURY.

Scholarships are offered for competition twice annually, in June and November. A King's Scholarship is tenable with an Entrance Scholarship, so that a boy may at entrance win scholarships to the value of £55 15*s.* a year for five years. Full information from HEADMASTER, KING'S SCHOOL, CANTERBURY.

DOVER COLLEGE.

Three Entrance Scholarships for Boarders are awarded in July, value £40, £30, and £20, one of each. The Common Entrance Examination is used as a Preliminary Test and selected Candidates are asked to do higher papers. The examination can be taken at the Preparatory School.

EXETER SCHOOL, EXETER.

Entrance Scholarship Examination July 3rd and 4th, 1924. Four Scholarships, £40–10, may be offered, and one Honour Scholarship of £40 for the Sons of Officers who have fallen in the War. University Endowment, £600 a year. Apply to THE HEADMASTER, EXETER SCHOOL, EXETER.

SEDBERGH SCHOOL.

Entrance Scholarship Examination in May or June in London, after preliminary test at Preparatory Schools. Ten Scholarships (£100 to £40) are offered. House Exhibitions may be awarded to deserving candidates. Apply to the BURSAR, SEDBERGH SCHOOL, YORKS.

UPPINGHAM.

An Examination will be held in May or June, 1924, for about Eight Open Scholarships, varying from £85 to £30 per annum. Allowance is made for age, but a candidate must be under 14 on May 1st, 1924. Apply to THE BURSAR, OLD SCHOOL HOUSE, UPPINGHAM.

KING'S COLLEGE SCHOOL, WIMBLEDON COMMON, S.W.

An examination is held each Summer Term. Candidates for Senior Scholarships must be under 16, and for Junior Scholarships under 14, on May 1st. The value of the Scholarships depends upon the Standard attained, but never exceeds the amount of Tuition Fees (£39 per annum). See "Public Schools' Year Book."

EDUCATION.

MESSRS. GABBITAS, THRING & CO.,

36, Sackville Street, Piccadilly, W., Tel. 4926 Regent.

have a department specially organised for **advising** Parents and Guardians as to the best **Educational Establishments** for **Boys** and **Girls** in the United Kingdom or on the Continent. The Firm have had experience as Educational Agents for fifty years, and during their long career have been instrumental in sending Masters and Tutors to the leading Schools and Tutors' Establishments, and are in the closest touch with all educational matters. They can give, FREE OF CHARGE, to the Parent or Guardian information and advice as to—

SCHOOLS FOR BOYS OR GIRLS. TUTORS' ESTABLISHMENTS. EDUCATIONAL HOMES. DOMESTIC ECONOMY, AGRICULTURAL AND SECRETARIAL COLLEGES. } EITHER AT HOME OR ABROAD.

To enable the Firm to advise efficiently it is necessary that *full particulars should be given*; especially as to the age of the Pupil, previous education, and present standard of attainments, special subjects of study, locality, whether a large or small establishment is preferred, and the fees it is intended to pay.

The Firm also can assist in procuring the services of Private Tutors and Governesses, Resident, Travelling, Non-Resident, or Visiting, of whom they always have a large number on their Lists.

Transfers of and **Partnerships** in **Boys'** and **Girls'** Schools are also negotiated.

Masters, Tutors, and Governesses seeking Posts can have a Prospectus on application, free of charge.

For Prospectus and List of Successes, address—

MISS BRAGINTON, M.A., ST. GEORGE'S COLLEGE, RED LION SQUARE, W.C. 1.

BLACKHEATH, S.E.

The Medical Officer of Health writes:—"Blackheath is a fine healthy and invigorating district, enhanced by the proximity of Greenwich Park and the Royal Observatory situated therein."

BOYS. CHRIST'S COLLEGE.

Principal - ARTHUR C. WIRE, B.A., F.R.G.S.

Assisted by Highly Qualified Staff.

Old-established, High-class Boarding School and Day School for Sons of Gentlemen.

Provides first-class education on Public School lines; prepares boys and students, English and Foreign, for Universities, Army, Navy.

Preliminary Professional Examinations, Commerce, &c.

College overlooks extensive heath; well equipped every way; 5 acres ground.

Chapel, Laboratory, Gymnasium, Carpenter's Shop. Sports, Magazine.

Entire charge of Foreign and Colonial Pupils.

Illustrated prospectus on application to the Principal.

HIGHGATE, N.

The Medical Officer of Health writes:—"A northern residential suburb of London, 4¼ miles N.N.W. of King's Cross. District is noted for its pure bracing air, open spaces, facilities for shopping, recreation, and cheap inter-communication by tube, tram, and omnibus."

KING'S HOUSE SCHOOL.

Inspected and recognised by Board of Education.

Principal - Miss LEAR.

Premises.—Consist of 3 houses. Large, airy classrooms.

Aim.—To provide a thorough and general education, and to develop to fullest extent any particular talents the pupils possess.

Preparation for the School Leaving Certificates and for the Universities.

Modern Languages, Music and Art special features.

Tennis. Cricket. Hockey. Net Ball.

Entire charge where parents abroad.

Fees.—25-30 guineas per term.

METROPOLITAN SECTION.

CHARING CROSS HOSPITAL MEDICAL SCHOOL

(UNIVERSITY OF LONDON).

OPEN TO MEN AND WOMEN STUDENTS ON EQUAL TERMS.

The most central of all the University Schools, immediately accessible by Train, Tram, Tube, and 'Bus.

Courses of Study arranged to meet the requirements of all the Examining Bodies.

Low Inclusive Fees.

For Prospectus and full information apply personally or by letter to the Dean—

W. J. FENTON, M.D., F.R.C.P.,

Charing Cross Hospital Medical School, London, W.C. 2.

HONOR OAK, S.E.

London's remarkable health standard is due to excellent drainage, pure water, together with less exposure, greater warmth, and less humidity than outlying country. Honor Oak, a high-class residential quarter, 6 miles from London Bridge.

BOYS. (*Established* 1686.)

ROYAL SAVOY SCHOOL.

Governors—

The Chancellor of the Duchy of Lancaster.
The Chaplain of the Chapel Royal, Savoy.

Warden—The Hon. Sir W. H. GOSCHEN.

Headmaster - COLIN M. H. CAMPBELL.

Premises.—Healthily situated in Colyton Road, within easy distance of all parts of London. 25 acres of grounds and playing fields.

The School is preparatory, and aims at giving a thoroughly sound education. Choral Scholarships are awarded. Cricket, Football, Hockey, Swimming, Rifle Range.

Boarding Fee.—£75 per annum.
Tuition Fee.—£24 per annum.

SWISS COTTAGE, N.W.

Owing to its proximity to Hampstead Heath, which is one of the finest and largest open spaces in London, it enjoys a fine record for salubrity. The death rate and infantile mortality are the lowest in London.

ÉCOLE FRANÇAISE.

Mdlle. AURORE LAUXERROIS, B.S., C.A.P.

Thorough preparation for all public examinations in **French.** Success assured to serious students. **Postal** and **Oral Tuition. Public Lectures.** Special classes for **Adults** wishing to acquire a thorough knowledge of French.

Special courses in **Conversational French** comprising the **Rules of Spoken French,** and the use of French tenses of verbs in conversation and composition.

Private Tuition.

15, CROSSFIELD ROAD,
ETON AVENUE,
SWISS COTTAGE, N.W. 3.

PROVINCIAL SECTION.

ASHFORD

(Kent). **The Medical Officer of Health writes** :—"A market town with large cattle market, situated in East Kent, on River Stour, 14 miles S.W. of Canterbury and 54 miles from London, Southern Railway. About 200 feet above sea-level. The subsoil consists of the greensand. The climate is bracing. Drainage modern, water-supply pure and constant. Open-air swimming bath. General and zymotic death rates low." Golf, 19 holes. Pop. 14,355.

GIRLS.

FAIRVIEW.

Principal - Miss BAILEY, L.L.A.

(Assisted by certificated English and Foreign Governesses and Visiting Professors.)

Receives a limited number of pupils for thorough instruction in the usual branches of a High-class Modern Education. Individual Care. Home Comforts. Every effort made to secure religious, mental, and physical well-being of the girls.

Entire charge taken.

Swedish Drill, Hockey, Cricket, Tennis, Riding, Cycling.

Fees Moderate and inclusive.

GIRLS.

HIGH SCHOOL FOR GIRLS.

Principals { **Mrs. EDWARDS, B.A. (Lond.).**
Miss BRAKE, A.C.P., O.H.L.

Recognised by the Board of Education as an Efficient Private Secondary School.

Buildings. — Spacious Tudor Residences. Modern sanitation. Charming old world gardens. Lawns and playing fields 10 acres in extent. Gymnasium. *Aim.*—To provide on Public School lines thoroughly efficient education in cultured Christian atmosphere.

School Course includes preparation for University Examinations and Scholarships, Drawing, Class Singing, Drill, Needlework, Organised Games, Dancing, and Singing.

Fees.—25 to 28 guineas per term.

BATH.

The Medical Officer of Health writes :—"Bath City and County Borough. Health resort, Somerset. Pop. 68,648. Only Hot Springs in British Isles. 'Most perfectly equipped modern bathing establishments in Europe.' Extensive Roman remains. Subsoils, freestones, clay, sand and gravel. Elevation, 60 to 750 feet. Climate: where sheltered, similar to southern marine climates; where exposed, good range of temperature and bracing winds. Sunshine (1922)—1,405 hours. Water-supply, pure and abundant springs." Bath stands alone in Great Britain as a City of considerable size, and much reputation, the beginnings of which have been determined by the existence of Thermal Springs. Traditions assert that the first discovery of the Spring and acquaintance with their healing virtues were made in primitive times before the advent of the Romans.—Vide: *Climate and Baths of Great Britain and Ireland.*

[*See* p. 1007 for HOLIDAY GUIDE.

BOYS. *Founded 1844.*

VICTORIA COLLEGE.

Headmaster—

ALEX. W. CUNINGHAME

(*Sometime Senior Master, The King's School, Gloucester*).

BEXHILL-ON-SEA

(Sussex). The Medical Officer of Health writes :—"The town holds a first place among health resorts, owing to the general salubrity of the climate, genial influences of invigorating breezes and brilliant sunshine, perfect drainage, the purity of its water, and its freedom from epidemics. The sea-bathing is excellent. Residence at Bexhill is very beneficial in anæmia, scrofula, and tuberculous complaints, and in diseases of the respiratory organs, which may be sent here with advantage during the greater part of the year. Especially suitable for convalescents and delicate children." Golf links, 18 holes. Pop. 20,363.

[*See* p. 1008 for HOLIDAY GUIDE.

Three Years' Course.

Extensive grounds and playing fields
Prospectus on application.

BOURNEMOUTH.

The Medical Officer of Health writes :—"Bournemouth is built on a sandy subsoil, the dry and porous nature of which makes it an ideal site for a health resort. Whilst the thousands of pine trees constitute a physical feature of great beauty, their effect is hygienic as well as æsthetic, for the emanations from the myriad pine needles have an undoubted purifying effect on the atmosphere."

The town is one of the most beautiful seaside and health resorts in the kingdom. The public gardens are very extensive, and excellent facilities are provided for golf, bowls, croquet and tennis. Sunshine (1922), 1,709 hours. Southern Rly., L. & N.E. Rly., and L.M. & S. Rly. Pop. 91,770.

[*See* p. 1008 for HOLIDAY GUIDE.

BRIDGE OF ALLAN, N.B.

The Medical Officer of Health writes:—"Bridge of Allan has a long-standing and deservedly high reputation as a health resort. It is charmingly situated, well wooded, well watered, and sheltered by the Ochils from the north-east winds." L.M. & S. Railway. Pop. 3,579.

GIRLS.

THE BEACON, SCHOOL FOR GIRLS.

Principal - Miss E. DOUGLAS MORTON

Premises picturesquely situated on the hill, with south aspect and commanding delightful view of the Trossach Hills. Attractive gardens. Excellent playing field. Gymnasium. Laboratory.

Aim.—Development of character. Thorough modern education. Cultivate special gifts, and give a healthy joy in life.

Pupils prepared Oxford and Cambridge Locals, English and Scottish University Entrances, and Associated Board of Music.

Hockey. Cricket. Tennis. Swimming.

Fees.—£35 to £38 10s. per term.

BRIGHTON.

The Medical Officer of Health writes:—"Brighton has the bracing qualities of East Coast resorts, with a larger amount of sunshine and more shelter during unfavourable weather. During 1910 the record of bright sunshine was 48 per cent. in excess of London; in the winter months the excess was even more marked, being 88 per cent. Whilst Brighton has more sunshine than London, at the same time it is cooler in summer. There is an unlimited pure water-supply and perfect sanitary arrangements."

With its two piers, its immense promenade, its pavilion grounds, and numerous parks and recreation grounds, together with a fine municipal orchestra, Brighton offers attractions to meet the requirements of all tastes, and combines with the advantages of the seaside resort the amusements of the town. Sunshine (1922), 1,746 hours. *See* p. 1009 for HOLIDAY GUIDE.

BROADSTAIRS.

The Medical Officer of Health writes:—"Broadstairs is built on the cliffs half-way between Ramsgate and Margate. Aspect, S.E. The town, which is built upon high land on a sub-soil of chalk, thus enjoying the advantages special to this geological formation, has no northerly aspect and is sheltered from cold winds. It is peculiarly fortunate in climatic fluctuations. Remarkably free from fogs and mists. Unusually high record of bright sunshine. The climate is equable and dry, bracing in summer and mild in winter, suitable for invalids and delicate children throughout the year. The drainage system is excellent, and the water-supply pure and abundant." Sunshine (1922), 1,773 hours. Pop. 15,465. Southern Railway, 75 miles from London.

[*See* p. 1009 for HOLIDAY GUIDE.

Illustrated prospectus on application.

EASTBOURNE

(Sussex). Municipal Borough. Population, 52,544. L.B. & S.C. Railway. 62 miles from London. Elevation, from sea-level to 140 feet above; the districts of Mead and Upperton stand upon very high ground. Climate mild, invigorating; moderate rainfall. Bathing excellent.

The Medical Officer of Health writes:—"Its advantages as a health resort are much sunshine, pure air, absence of fog, clean, quickly-drying roadways, large parks and gardens with many trees, a plentiful and good water-supply from wells sunk in the deep chalk, and the proximity to the breezy, health-giving South Downs. The climate is generally beneficial in anæmia, scrofula, and *early* tubercular disease; and its effects are especially beneficial in the case of convalescent children. Death rate 1921, inclusive, 10·28 per 1,000. Full benefit of winter sun is secured. Warm, sunny shelter always obtainable in centre of town. Beachy Head breaks S.W. winds, and diverts much rain, dryness of soil being promoted by great porosity of chalk. Always at or near the top for sunshine in official records." Sunshine (1922), 1,751 hours.

[*See* p. 1013 for HOLIDAY GUIDE.

Fees.—75-105 guineas per year.

Entire charge from 120 guineas per year.

FOLKESTONE.

The Medical Officer of Health writes :—"Aspect, S. & S.E. The town is one of the best-planned seaside resorts. The comparatively very healthy and dry climate is due to the porous nature of the geological formation and, in addition, the facilities for drainage make mists, damp and fogs almost unknown. The sanitation of the town is carefully guarded, and precautions taken from time to time to maintain its efficiency. For an educational centre it is particularly adapted. A fashionable holiday resort, residential town, and cross-Channel packet station, close to Shorncliff camp, one and a half hours from London, modern Folkestone stands on a lofty cliff on the Kentish coast facing the Straits of Dover." Sunshine (1922), 1,754 hours. Pop. 37,571.

[*See* p. 1015 for HOLIDAY GUIDE.

BOYS. **PENFILLAN HOUSE.**

Great attention paid to health.

Fees.—120 guineas per annum.

HOYLAKE.

The Medical Officer of Health writes:—"Situated facing sea. Subsoil sandy. Very equable temperature—climate excellent for convalescents, for growing boys and girls; air is bracing and very pure." Sunshine (1922), 1,385 hours.

BOYS. KINGSMEAD SCHOOL.

Principal - A. T. WATTS, M.A., B.Sc.
Assisted by
J. H. WATTS, B.A., H. WATTS, M.A., and others.

Boarding and Day School (accommodation for forty Boarders). Preparation for Public Schools.

Religious Teaching and Influence thoroughly Evangelical.

The School is situated near the Sea and faces south. It stands in own grounds of 5½ acres and in an open position.

There is a Carpenter's Shop and separate Sanatorium.

HUNSTANTON-ON-SEA.

The Medical Officer of Health writes:—"Hunstanton shares with all the East Coast watering-places a great reputation for convalescents. Apart from this, Hunstanton seems specially adapted for children. The rapidly-drying soil, the absolutely safe bathing, the magnificent sands for exercise in wet or dry weather, perfect drainage, and splendid water, combine to make it an ideal place for them. The number of schools and the wonderful physical progress of weakly children bear testimony to these advantages."

This quiet East Coast health resort stands on the north-west coast of Norfolk, facing the Wash, between Cromer and King's Lynn. Pier, 800 feet in length. Golf Links, 18 holes. Pop. 4,282. L. & N.E. Rly.

[*See* p. 1017 for HOLIDAY GUIDE.

BOYS AND GIRLS.

ELLALAND.

HOME SCHOOL FOR CHILDREN.

Principal - - - Miss EDITH AUKLAND.

Premises situated on Cliff, in own grounds, with beautiful surroundings.

Both Boys and Girls received. The children lead a happy, regular and, as far as possible, outdoor life.

Training throughout on Froebelian principles. Health and Happiness chief consideration.

Entire charge taken of children from India and Colonies, the genial climate being especially suitable.

Physical Exercises, Games, and Daily Walks.

Fees.—From 50 guineas per annum.

MALVERN

(Worcester). **The Medical Officer of Health writes**:—"Malvern is picturesquely situated on the eastern and western slopes of the range of Malvern Hills, with extensive and magnificent views on both sides. The hills, which rise to an altitude of 1,400 feet, are easily accessible for delicate persons, either on foot or by carriage. The climate has a most beneficial effect on invalids. The houses are so placed as to receive more than the ordinary amount of sunshine. Weakly children, especially those suffering from tubercular glands or continually recurring catarrhs, in nearly all cases do remarkably well here. The rainfall is low, and the soil dries with remarkable rapidity. The water-supply is bountiful and of great purity, and the sanitary state of the district generally of a high standard. The average annual death-rate is 10·5 per 1,000 of the population. Outbreaks of infectious diseases are few and quickly suppressed, as the Urban Council are provided with every means for promptly dealing with any case that may arise." Pop. 17,809.

[*See* p. 1020 for HOLIDAY GUIDE.

BOYS.

THE SCHOOL, MALVERN LINK.

WESTON-SUPER-MARE.

The Medical Officer of Health writes :—"Lies on the shores of Weston Bay in the Bristol Channel, covering the southern slopes of Worlebury, and the alluvial and sandy plain at its foot. Well protected from the cold northerly winds by the Weston-Worle ridge, it is open to pure invigorating breezes direct from the Atlantic Ocean which tend to produce an equability of climate through all the seasons of the year, difficult to find anywhere else in England. Favoured with a dry sub-soil, and a high sunshine record (1,755·8 hours in 1911), and remarkably free from infectious diseases, the town is admirably suited for invalids and delicate children."

BOYS.

LEWISHAM SCHOOL.

Headmaster—

LEONARD C. COMFORT, B.Sc. (Lond.).

Objects.—To give sound Education suitable for Commercial or Professional life, with good Moral and Physical training.

Prepares for Cambridge Locals, Matriculation, also Preliminary Law and Chartered Accountants.

BEDFORD, C.B. Pop. 39,183. 50 miles from London. L.M. & S. Railway. A noted educational centre on the banks of the Great Ouse, with charming riverside promenade. Golf Links (18 holes).

[*See* p. 982 for SCHOOLS.

THE PRINCIPAL HOUSE AGENTS FOR BEDFORD AND COUNTY. W. and H. PEACOCK, 84, High St., Bedford. (Telephone, No. 115.) The Bedford Illustrated Property Register contains Map, school fees, 50 views and photos of houses. Post free. Weekly Sales. Auction Rooms, Lime St. Auction Mart, Horne Lane.

BEXHILL,

SUSSEX. M.B. Pop. 20,363. Southern Railway. 71 miles from London, 5 miles from Hastings, 12 miles from Eastbourne. **Aspect**—South. **Climate**—Dry, invigorating. **Water Supply**—Constant. Soil—Sandy. A modern select seaside resort, with good educational facilities. 2 Golf Links. Public Park, 12½ acres. **Excursions**—Battle Abbey, 8 miles; Pevensey Castle, 7 miles; Hurstmonceux Castle, 10 miles.

The rapid growth of Bexhill is to be attributed to its bracing air and sunny climate, and it has been found that the air possesses recuperative and stimulating qualities in a remarkable degree. It is one of the sunniest spots on the South Coast; fogs are practically unknown, while the soil is for the most part sandy, and dries quickly after rain. The excellent quality of the water is attributed to the Ashdown Green sands beneath the subsoil of the district.

[*See* p. 982 for SCHOOLS.

AUCTIONEERS, HOUSE AND ESTATE AGENTS. STAINES & CO., 28, Devonshire Road, and Sea Road, Cooden Beach. Agents for all available Furnished and Unfurnished Houses to be Let or Sold. Special Lists, Map, and Guide gratis. Telegrams, "Property, Bexhill." Telephone, 349 and Cooden 15.

RESIDENT PROPRIETOR.

BOSCOMBE,

HANTS. (In Borough of Bournemouth.) Occupies a naturally beautiful sheltered position, at good elevation. Overlooking sea. Good bathing. Pier.

GODWIN PRATT AND REA, Estate Agents, Auctioneers and Valuers, 126, Christchurch Road, Boscombe. A selected list of Properties to be Sold or Let, furnished or unfurnished, forwarded free upon application.

BOURNEMOUTH,

HANTS. C.B. Pop. 91,770. 107½ miles from London. L.M. & S. Railway and Southern Railway. **Aspect**—South. **Climate**—Mild, equable temperature. **Sunshine**, 1922—1,709 hours. **Water Supply**—Constant. **Drainage**—Modern. Soil—Sand and gravel. **Beach**—Sandy, no currents, double tides render bathing always practicable. A fashionable south coast health resort extending along a stretch of chine-broken cliffs in the wide-open bay which forms the western extremity of Hampshire. It owes its prosperity to the natural beauty of its situation, its climatic advantages and the purity of its air, laden with the aromatic health-giving exhalations of its innumerable pine trees. 2 Golf links (18 holes). 3 large Parks. Good educational facilities. Excellent London train service and direct communication Midlands and North.

[*See* p. 983 for SCHOOLS.

HOUSE AND ESTATE AGENTS. Bournemouth, New Forest and District.
Established 1845.
REBBECK BROS., Estate Agents,
Gervis Place and County Gates, Bournemouth.

BRIGHTON, SUSSEX. Pop. 142,427. **Means of access**—Southern Railway. 51 miles from London. **Elevation**, 26 to 462 feet. **Aspect**—South. **Sunshine** (1922), 1,746 hours. **Water-Supply**—Constant. **Drainage**—Modern. **Soil**—Chalk. **Front**—4½ miles. Marine drive with promenade; lawns, ornamental terrace walks. **Piers**—West Pier, 1,100 feet; Palace Pier, 1,710 feet. **Beach**—Shingle. **Excursions**—Paris, 9 hours *via* Newhaven; Rottingdean, 4½ miles; Devil's Dyke, 5½ miles; Stanmer Park, 3½ miles; Bramber Castle, 10 miles; Hurst, 7 miles; Ditchling Beacon, 7½ miles.

Society's liveliest seaside rendezvous; favourite resort of Londoners. Great educational facilities. Development of the town due to salubrious location, accessibility to London and resemblance thereto, excellent train service, and its enormous capacity for accommodating and amusing all tastes and all classes all the year round. Racecourse meetings; 6 golf links (18 holes); harriers, foxhounds, county cricket ground, numerous parks and recreation grounds, boating, fishing; Royal Pavilion, once a Royal residence, now used for public amusements and concerts; public library, museum, art galleries.

[*See* p. 984 for SCHOOLS.

For further information and ILLUSTRATED GUIDE apply SECRETARY, ADVERTISING COMMITTEE, THE MUSEUM, BRIGHTON.

BROADSTAIRS, KENT. U.D.C. Pop. 15,465. Southern Railway. 75 miles from London. **Location**—Between Ramsgate and Margate; connected with both by electric tram service. **Elevation**—About 150 ft. **Neighbourhood**; high cliffs. **Aspect**—South-east. **Climate**—Dry, bracing. **Sunshine** (1922) 1,773 hours. **Water Supply**—Constant. **Drainage**—Modern. **Soil**—Chalk. **Front**—Promenade on top of cliff; ornamental gardens. **Beach**—Sands. A quiet, select, family resort and exhilarating retreat. Remarkably free from fogs and mists; bracing in summer and mild in winter; suitable for invalids and delicate children throughout the year. The old town is a primitive place with straggling streets; the cliffs, which rise perpendicularly, overlook a cosy little bay and command splendid sea view from the parade. Dickens often stayed at 12, High Street, and at Lawn House and Bleak House. [*See* p. 985 for SCHOOLS.

DARTMOOR, DEVON. An extensive upland tract from Brent to Okehampton, 22 miles long, 20 miles broad. Area—about 140,000 acres. Okehampton, Moretonhampstead, Tavistock, and Ivybridge indicate the four corners, and the G.W. Rly. runs up to Princetown. Two Bridges, 1¼ miles from Princetown, is a good spot to begin or end a tramp on the moor. The higher portions of Dartmoor are bleak, wild, and rugged, huge masses of granite culminating in fantastic peaks called tors, from 1,000 to 2,000 feet high. Hay Tor is one of the principal. Amongst the numerous places of interest are :—Cranmere Pool, the source of the rivers Tay, Dart Taw, and Teign ; Widdecombe, with its perpendicular church and famous fair ; Fingle Bridge, one of the most beautiful spots ; Postbridge, with its original Clapper Bridge. There are numerous British antiquities on Dartmoor, consisting of maenhirs, or long stones, circles and clam (or stone slab) bridges.

MALVERN,

WORCESTERSHIRE. U.D.C. 129 miles from London. Pop. 17,809. **Means of Access**—G.W. Railway and L.M. & S. Railway. **Location**—On the slopes of the Malvern Hills, 8 miles from Worcester. **Elevation**—300 to 900 feet above sea-level. **Climate**—Dry and bracing. **Water Supply**—Pure, constant. **Drainage**—Modern. **Soil**—Gravel. **Season**—Summer and winter. **Sunshine** (1922), 1,571 hours. **Annual Fixtures**—Shakespeare week in May; Croquet and Lawn Tennis tournaments in May and June. Malvern is an inland watering-place, important educational centre, and a pretty residential town, consisting mostly of villas standing in own grounds. The highest point of the Malvern Hills is the Worcestershire Beacon, 1,400 feet high, from the summit of which is obtained one of the most extensive panoramic views in Great Britain, embracing the Severn and Wye Valleys, the Cotswold, Mendip and Welsh hills; and in the plain below can be seen Droitwich, Worcester, Evesham, Cheltenham, Gloucester and the Bristol Channel.

At Malvern a hermitage was endowed by Edward the Confessor. After the Conquest it was changed into a Benedictine Priory. Of the buildings, which date from 1083, there still remain the Abbey Gate and the Norman and Perpendicular church. A Benedictine Priory was established at Little Malvern in 1171, of which the tower and chancel of the old priory church are preserved.

[*Continued on next page. See also* p. 995 for SCHOOLS.

TORQUAY, DEVON. M.B. Pop. 39,432. **Means of Access**—G.W. Railway. 220 miles from London. **Location**—S.E. coast of Devon, in the N. recess of Torbay. 25 miles S. of Exeter. **Neighbourhood**—Cliffs and hills. **Sunshine**—(1922) 1,771 hours. **Climate**—Mild, soft, equable; luxuriant vegetation. **Water Supply**—From Dartmoor; constant, soft. **Drainage**—Modern. **Soil**—Limestone. **Front**—Ornamental promenades and marine drive. **Pier**—1,500 feet; pavilion, skating rink. **Beach**—Sand and shingle. **Baths**—Corporation (fresh and salt water), Nauheim and Vapour Baths, Radiant Light and Heat, High Frequency and Diathermy Treatments, All Electric Baths, Plombières-Intestinal Douche, Torquay Seaweed Baths, Aix and Vichy Douche Massage, Peat Baths, Turkish Baths. **Excursions**—Rail and river, coaching and marine.

In a curve of Torbay, on a peninsula between the Rivers Dart and Teign, Torquay is built on seven hills, the highest reaching 400 feet, sheltered N. and E.; lower part is built round harbour (enclosed by quay and piers), the houses rising behind in tiers, affording choice of elevation. A fashionable, high-class watering place, favourite resort for the delicate, and popular winter residence; claims to be warm in winter and cool in summer. Its peculiar charm is the matchless combination of sea coast, wild moorland and beautiful valleys. Good yachting facilities in harbour, and safe anchorage in bay. Convenient centre for excursionists over Dartmoor.

BELLA VISTA. Board Residence. Opposit Barricam Shell and Battery Beach. Uninterrupted sea views. Separate Tables. Excellent Cooking (Chef). Special terms fo Winter and Spring. Under personal supervision of

Mrs. FERINHOUGH, Proprietress.

WORTHING,

SUSSEX. M.B. Pop. 35,224. Southern Railway. 61 miles from London. **Aspect**—South. **Climate**—Dry, mild, equable. **Sunshine** (1922)—1,781·2 hours. **Water Supply**—Constant, from the hills. **Drainage**—Modern. **Soil**—Loam and marl. **Beach**—Safe level sands with plenty of shingle. A select seaside resort, residential town and winter haven for invalids, protected from the north by the South Downs, which rise in breezy uplands some little distance inland, its great charm being that it has developed into a modern seaside town without losing much of its rural aspect; much foliage and sylvan surroundings. Homefield Park, 16 acres (cricket, tennis, bowls); Steyne Gardens, 3 acres (promenade concerts); Broadwater Green; Victoria Recreation Ground. Golf links (two 18-hole courses). Hunting, boating, fishing. **Places of Interest**—Arundel (10 m.), Bramber Castle (9 m.), Goring Woods (3 m.), Broadwater (1 m.), 13th Century Church, Chanctonbury (7 m.) (800 ft.), Cissbury, and other remains of Roman encampments.

Worthing is noted for the equability of its climate, which is largely due to its geographical situation. The proximity of the sea and the shelter afforded by the South Downs combine to modify the climate and avoid extremes. The absence of hills enables convalescents to take exercise without exertion, and so derive the greatest benefit from the high percentage of ozone in the air and the large amount of sunshine.

EXPRESS SERVICE (PULLMAN CARS) to LONDON, 76 minutes.

BROAD STREET CORNER, BIRMINGHAM

DOUBLE YOUR INCOME

ELIMINATE RISK.

Every person whose income is derived from investments knows how harassing is the anxiety entailed by the constant rise and fall in their value.

You can get a guaranteed income for life if you purchase a Canada Life Annuity. It is, humanly speaking, equivalent in safety to a Government pension. It cannot shrink. What you contract to get is paid you punctually. And you get a much larger income.

FOR INSTANCE

A man of 62 who takes out a Canada Life Annuity for £1,000 gets a yearly income of £106 3s. 2d. A woman of 64 gets a yearly income of £100 18s. 0d. for the same investment.

OVER 10% PER ANNUM.

Other ages pro rata, on equally generous terms. You can invest any amount from £100. The Assets of the Canada Life Company are £18,000,000, and are under direct Government supervision. Write at once for full particulars to the Canada Life—the oldest Colonial Life Assurance Company and the office that gives the best value for Annuities.

Write to-night (stating age) to Annuity Department,

CANADA LIFE ASSURANCE CO.

Accumulated Funds, £18,000,000.

(Established 1847)

15, King Street, Cheapside, LONDON, E.C. 2.

**CLERICAL,
MEDICAL & GENERAL
LIFE ASSURANCE SOCIETY.**

CENTENARY YEAR 1923–24.

THE Society has an unbroken Bonus record extending over a century of time, and is conspicuous for having maintained its pre-war rate of profit both during and after the War period.

To-day everything indicates that the profits of the Society in the future will enable it to surpass anything that has been achieved in the past.

Chief Offices:
GENERAL BUILDINGS, PERTH, SCOTLAND.
GENERAL BUILDINGS, ALDWYCH, LONDON, W.C. 2.

FIRE BONUS POLICIES.

Many thousands of pounds have been returned to Insured by way of Bonus since 1908. The "General" is the only Office transacting business under such a large and extensive Fire Insurance Bonus Scheme.

Bonus Policies are issued for all Insurances on Dwelling Houses and Non-hazardous Properties, and also all Householders' Insurances on Furniture, &c.

The Scheme is particularly attractive to those who have paid Fire Premiums year after year without having made a claim, and who naturally look for some reduction by way of Bonus.

THE LATEST IMPROVEMENTS IN LIFE ASSURANCE

1. **AUTOMATIC REPLACEMENT** of the **ASSURANCE** when it matures **without further payment of premium or Medical Examination.** Thus when a Policyholder receives, say, £1000 cash after 25 years, the assurance is replaced by **another £1000 without further charge. Thus securing £2000** in all.
2. **GUARANTEED ADDITIONS of £2 : 10 : 0** per cent. per annum if death occurs within the 25 years.
3. **Guaranteed Surrender Values** ranging from **75%** to **120%** of the tabular premiums, excluding the first year's. **Large Loan Values.**

Policies are issued for larger or smaller amounts and for other terms of years.

Write for particulars of new "Perfect" Policy.

WHY BE CONTENT WITH 5%?

You can get a Guaranteed 7%, 10%, 15%, or even 20%, according to Age.

WHY deprive yourself one day longer than necessary of comforts which this larger income will provide for you? Why run the risk of a further depletion of your Capital and a further loss of Income? Why not make your Income *surer* as well as larger, and thereby enjoy contentment of mind with its beneficial effect on your health?

Do what many others are to-day doing: sell your stocks and shares and buy a "Sun Life of Canada" Annuity with the proceeds. A retired professional man has just doubled his income by making this safe exchange. This "*two years' Income in one*" will be paid to him every year as long as he lives. It will never fail. No more worry, no more wondering how to make ends meet. Life is now a different thing for him.

Think what it would mean to you—a far *larger* Income; an absolutely *safe* Income; an *unalterable* Income for Life, Guaranteed by a Company with over £40,000,000 assets under very strict Government supervision.

Write for full details of our Annuities, so that we can show you how much better you can employ your capital what a much larger income you can enjoy, and how much safer it will be. *Better terms are granted in cases of impaired health*, and there are many kinds of annuities, including *a guaranteed return of Purchase Price.* Please give exact date of birth and amount of capital at your disposal.

FOR YOUNGER MEN AND WOMEN

£250 a year for life, commencing, say, at age of 60.

A deferred annuity, purchased by easy yearly instalments, and to commence when the annuitant wishes to retire—say at 60 or earlier—solves the problem of providing for old age. Meanwhile it protects the family; for £3000, £2000, or whatever amount is agreed upon will be paid to them should the Policy-holder not live to qualify for the annuity. This is a wonderfully advantageous Plan—the biggest step you can take towards financial independence. Thrift without sacrifice! Let us explain it more fully to you. Write, giving exact age and amount you can save yearly, to J. F. Junkin (Manager), Sun life of Canada, 20 Canada House, Norfolk Street, London, W.C. 2.

COLONIAL AND CONTINENTAL CHURCH SOCIETY.

(Now in its One Hundred and First Year.)

Patron - - HIS MAJESTY THE KING.

Vice-Patrons: The Archbishops of Canterbury, York, etc.

The Society exists for the purpose of supplying the means of Grace to our fellow-countrymen abroad, especially in those pioneer parts of the Empire where they are in danger of drifting into irreligion for lack of the Gospel.

Many Colonial Dioceses receive aid from the Society, including those in Western Canada, Australasia, British East Africa, and India. Many Colonial Bishops are applying for far more aid than the Society's Funds can meet.

306 Clergy and Lay Evangelists have been sent out.

Assistance is also given to ministrations among British Artisans, Sailors, and others in Continental Cities, and Services (self-supporting) are organised for visitors at health resorts.

Bankers: BARCLAYS BANK, LTD., 54, Lombard Street, London, E.C. 3.
Address: The Secretary, The Rev. J. D. MULLINS, M.A., D.D., 9, Serjeants Inn, Fleet Street, London, E.C. 4.

EAST LONDON HOSPITAL FOR CHILDREN

SHADWELL, E. 1.

The Hospital, which contains **130** Cots, with the Convalescent Home (**28** Cots) at the Seaside, is conducting a most valuable work in restoring sickly little ones to complete health. Accidents and Urgent Cases are attended to at any hour of the day or night. **HELP IS NOW GREATLY NEEDED.**

£1,000 ENDOWS A COT IN PERPETUITY.

Legacies earnestly solicited. DONATIONS will be thankfully received, and Cheques should be crossed "National Provincial and Union Bank of England, Ltd. (Cornhill Branch)," and made payable to
W. M. WILCOX, Secretary.

CHURCH MISSIONARY SOCIETY

6, SALISBURY SQUARE, LONDON, E.C. 4.

Vice-Patron - - - - THE ARCHBISHOP OF CANTERBURY
President - - - - COL. SIR ROBERT WILLIAMS, Bart.
Treasurer - - - - - R. L. BARCLAY, Esq., C.B.E.
General Secretary - - - HERBERT LANKESTER, Esq., M.D.

In 1922 in C.M.S. Missions there were 47,204 baptisms, of which 27,356 were adult.

In the C.M.S. fields of service, viz.: Africa, India, China, Japan, Persia, and Palestine, the very success of the work is often a menace. For instance, at Owerri and Okigwe (in Nigeria) 18 years ago there were no Christians, to-day there are 21,000 adherents, with 143 African Christian workers.

In a certain district in North India 41 years ago there were only two Christians; since then 3,239 persons have been baptized, and there are now 44 congregations in that district, with four churches. The 14 village schools are self-supporting, and there are 50 children in the two homes for the untainted children of lepers.

From China come reports of growing congregations, of increased numbers of children in the schools, of Chinese Christians themselves taking a fuller part in the work of preaching the Gospel —and yet, the building plans for a new girls' college in South China must be cut down by one-third owing to lack of funds. What is to happen to the girls on the waiting list?

During the past year 329,423 scholars attended the 5,076 C.M.S. institutions, colleges, and schools; and the mission hospitals received 42,166 in-patients, and 791,644 visits from out-patients.

THE C.M.S. HAS A RESPONSIBILITY TOWARDS THOSE WHO HAVE BEEN BROUGHT INTO TOUCH WITH CHRIST THROUGH THESE AGENCIES. THE C.M.S. CLAIMS THE HELP OF THE CHURCH TO DISCHARGE THIS RESPONSIBILITY.

THE DOGS' HOME

OR TEMPORARY HOME FOR LOST AND STARVING DOGS

(An Institution for the Protection of Dogs & Cats)

4, BATTERSEA PARK ROAD, S.W. 8.
and HACKBRIDGE, SURREY.
(For Boarder and Quarantine Dogs Only).

Patron:
His Most Gracious Majesty the King.
President:
His Grace the DUKE OF PORTLAND, K.G.

OBJECTS:

1. To provide food and shelter for the lost, deserted, and starving dogs of London and the immediate neighbourhood.
2. To restore lost dogs to their rightful owners.
3. When good dogs are unclaimed, to find suitable homes for them at nominal charges.
4. To destroy, by a merciful and painless method, all valueless and diseased dogs.

Out-Patients (Dogs and Cats only), at Battersea, Thursdays, 3.0 p.m.

Since the Foundation of the Home in 1860, *over* 1,330,000 *dogs have received food and shelter.*

Dogs and Cats can be received as Boarders at Hackbridge, and Dogs for Quarantine under the Importation of Dogs Order, 1914.

Contributions will be thankfully received by
G. GUY S. ROWLEY, *Secretary.* [150

THE CANCER HOSPITAL—FREE

(FOUNDED 1851. INCORPORATED UNDER ROYAL CHARTER.)

The only Special Hospital in London for the treatment of Cancer, Tumours, and Allied Diseases.

A special refuge for poor persons afflicted with this fearful disease, who are admitted free without letters of recommendation.

A number of beds are provided for the use of Patients who may remain for Life.

Out-patients are seen on their own application each week-day except Saturday at 2 p.m.

New Annual Subscriptions and Donations are urgently solicited for General Expenses and for the Research Department.

Bankers: COUTTS & CO. *Secretary:* J. COURTNEY BUCHANAN, C.B.E.

FORM OF BEQUEST.

"*I give and bequeath unto the Treasurer for the time being of* THE CANCER HOSPITAL (FREE), *situate in the Fulham Road, Brompton, London, Middlesex, the sum of*

(free of Legacy Duty), to be applied towards carrying on the charitable design of the said Institution."

[328

EVELINA HOSPITAL —FOR— CHILDREN,

SOUTHWARK, LONDON, S.E.

Under the Patronage of THEIR MAJESTIES THE KING AND QUEEN.

Supported by Voluntary Contributions.

LARGEST CHILDREN'S HOSPITAL IN SOUTH LONDON.
Situated in its poorest District.

FUNDS GREATLY NEEDED.

Please help this Charity, "not only because it is a Hospital, but because it is a Hospital for Children."

President—THE EARL OF BESSBOROUGH, C.M.G.
Chairman—D. MALCOLM SCOTT, ESQ.
Treasurer—GERALD D. SMITH, ESQ.
Secretary—H. C. STANILAND SMITH.

THE GIRLS' FRIENDLY SOCIETY

Patrons Her Majesty the QUEEN: Her Majesty QUEEN ALEXANDRA.
Central Presiding Associate—H R.H. PRINCESS MARY (Viscountess Lascelles).
President—The Hon. Lady Cunliffe, C.B.E. *Secretary*—Miss Mytton.

The G F.S. was founded in 1875, and has now a total of over 250,000 Associates and Members, who are girls and women of all ages, and drawn from all ranks of society. Its object is :—

To unite for the Glory of GOD in one Fellowship of Prayer and Service, the Girls and Women of the Empire; to uphold Purity in Thought, Word and Deed.

The Society works almost all over the world, and its departments are very varied. They include an Invalids' Work Depôt, Clubs, Hostels, Holiday Camps, Homes of Rest, Savings Associations, Girl Guides, and the maintenance of a Social Centre in South London.

Donations towards any of these activities will be thankfully received, and further information will be gladly given by—

THE SECRETARY, G.F.S. Central Office, 39, Victoria Street, London, S.W. 1
Telegrams—"AUGUST, SOWEST, LONDON." Telephone—2521 Victoria.

GUY'S HOSPITAL

LONDON BRIDGE, S.E. 1,

NEEDS HELP.

President: H.R.H. THE PRINCE OF WALES, K.G.

Founded in 1724 by Thomas Guy, a Bookseller and Publisher in the City of London, Incorporated and Governed by Acts of Parliament, 11th George 1st, ch. xii., and 61st Victoria, ch. vi., as "The President and Governors of the Hospital founded at the sole costs and charges of Thomas Guy, Esquire."

The Hospital is empowered to receive gifts of, and to hold, land up to an aggregate yearly value of Sixty Thousand Pounds (exclusive of the site of the Hospital), notwithstanding the provisions of the Mortmain Acts.

BEDS	IN-PATIENTS (1922)	OUT-PATIENTS (1922)
614	**9,653**	**118,438**

Expenditure: £157,684 :: :: Income from Endowments: £63,788.

The Governors earnestly appeal for further Subscriptions and Donations. The present Subscription List is less than £5,000 a year, although the Charity is dependent upon support from sources other than its endowments to the extent of nearly £100,000 per annum.

To form a permanent Memorial, if desired, a Donation or Bequest should be allocated to the Re-endowment Fund, which is permanently invested and the income only applied for the general purposes of the Hospital.

A Gift of £1,000 to this Fund, or an Annual Subscription of £50, will respectively endow, or support a Bed, over which a brass tablet, inscribed in accordance with the wishes of the Benefactor, can be placed.

A copy of the Annual Report of the Hospital can be obtained on application to Mr. W. J. Curry, Clerk to the Governors, Guy's Hospital, S.E. 1. Telephone: Hop 1086.

Bankers: THE BANK OF ENGLAND. Treasurer: VISCOUNT GOSCHEN

THE GORDON BOYS' HOME

(THE NATIONAL MEMORIAL TO GENERAL GORDON).

Patron—THE KING. *Vice-Patrons*—H.M. THE QUEEN and H.M. QUEEN ALEXANDRA.

THE HOME IS SITUATED AT WEST END, WOKING, NEAR BROOKWOOD.

The Home is constructed to accommodate 250 Boys, chosen from the homeless and destitute, between the ages of about 14 and 15½, and give them a training, up to the age of 17 or thereabouts, which will fit them alike for civil life in this country or its Colonies, and for service in the Army, Navy or Mercantile Marine.

CONDITIONS OF ADMISSION.—1. The age for admission is from about 14 to 15½ years. 2. A boy must, in the opinion of the Committee, be really necessitous. 3. He must be free from such physical or mental infirmity as would disqualify him for service in the Army or Navy, or for civil employment in the Colonies or elsewhere, which would require active bodily exertion. 4. Boys of known bad character are ineligible.

Free admission is given to such number of boys as above as can be provided for out of the general income of the Home. A guaranteed payment of £35 annually during his stay at the Home will give a right of nomination for a lad fulfilling the conditions of admission. *Subscriptions and Donations are urgently needed in order that the above number of boys may be maintained.*

Subscriptions are received by THE WESTMINSTER BANK, LIMITED, 1, St. James's Square, S.W.; by the Treasurer, General the Right Hon. Sir DIGHTON PROBYN, V.C., G.C.B., Marlborough House, S.W.; and by the Commandant at the Home, from whom any further information can be obtained. For financial reasons the London Office has been abolished.

COMMANDANT:—MAJOR SIR T. E. S. PASLEY, BART.

GENERAL LYING-IN HOSPITAL,

York Road, Lambeth, S.E. 1.

ESTABLISHED 1765.

Patrons—H.M. The Queen and H.M. Queen Alexandra.

This Hospital is situated in one of the poorest parts of London, in the district South of the Thames, with a population of nearly two millions.

Married women in indigent circumstances, especially the wives of Soldiers and Sailors, and certain single women (with their first child, after investigation by the Committee), are admitted to the Hospital from all parts of the kingdom, but mainly from the immediate neighbourhood, from which, owing to its poverty, little pecuniary help is obtainable.

Subscriptions and Donations thankfully received by the Treasurer, or Miss ROSE E. WHYTE, *the Secretary, at the Hospital.* [146

THE HOSPITAL FOR DISEASES OF THE SKIN,

70-71, BLACKFRIARS ROAD, S.E.

Telephone: Hop 1021. ESTABLISHED 1841.

Patroness—HER MOST GRACIOUS MAJESTY QUEEN ALEXANDRA.
Treasurer—THE RT. HON. THE LORD MORRIS, P.C., K.C.M.G.

This Hospital is the oldest in London specially devoted to the study and treatment of diseases of the skin. It is thoroughly equipped with the most modern therapeutic appliances.

Unfortunately, the present position of the finances of the Hospital will not permit the re-opening of the In-Patient Department, which was closed owing to lack of funds. Donations and more Annual Subscriptions are urgently desired.

The practice of the Hospital is open to all qualified medical practitioners and senior students.

Since the foundation of the Hospital in 1841, over 545,000 patients have been treated.

Patients are required to contribute towards the funds of the Hospital according to their means, and should attend daily at 1.30 p.m., or on Fridays at 6 p.m.

FREDERICK HAYTER, *Secretary.* [152

LONDON CITY MISSION

Instituted 1835. **240 Agents Employed.**

The Society exists for the social and spiritual uplift of the millions of London, chiefly the poor and the artizan classes. Besides preaching the Gospel from house to house, and in Hospitals and Poor Law Institutions, the Missionaries visit the great centres of industry—Government works, docks and wharves, rail and goods yards, public offices, and wherever the masses foregather, either for business or pleasure—teaching the principles of righteousness and truth, and urging their application to daily life and conduct.

£1,200 required week by week for the maintenance of the Society's daily operations among the poor and working classes of the Capital. Your help will be gratefully received.

Treasurer: W. G. BRADSHAW, ESQ., C.B.E *Secretary:* THE REV. W. P. CARTWRIGHT, M.A

LONDON FEVER HOSPITAL

LIVERPOOL RD., ISLINGTON, N.1.

Patron: H.M. KING GEORGE V.
President: The Rt. Hon. LORD MUIR MACKENZIE, G.C.B., K.C.

The only Fever Hospital for the Middle Classes in or around London.

FUNDS VERY URGENTLY NEEDED.

Will you please help those who try to help themselves.

Secretary: Commander T. J. FARRELL, D.S.C.

London Lock Hospital and Home.

Patron - - H.M. THE KING.

Founded 1746, this Special Hospital has for 178 years devoted all its energies to the treatment of venereal diseases. Thousands of young women and girls from all parts of the kingdom have been relieved of their bodily suffering and helped to regain their self-respect, and thereby enabled to make a fresh start in life.

£15,000 REQUIRED ANNUALLY.

Annual Subscriptions, Donations and Legacies are earnestly pleaded for, and will be gratefully received by:—
J. F. W. DEACON, Esq., M.A., D.L., J.P., Chairman and Hon. Treasurer, LORD KINNAIRD, Deputy-Chairman and Joint Hon. Treasurer, or by HY. J. EASON, Secretary.

Offices: 283, HARROW ROAD, LONDON, W. 9.

THE NATIONAL BENEVOLENT INSTITUTION,

FOUNDED BY THE LATE PETER HERVÉ.

ESTABLISHED 1812. INCORPORATED BY ROYAL CHARTER.

Under the Patronage of His Most Excellent Majesty KING GEORGE V.
Treasurer—ROBERT W. DIBDIN, ESQ., J.P.

This Institution grants Annuities of **£21** and **£25** to distressed members of the Upper and Middle Classes of Society who have attained the age of 50 years and upwards.

The Pensioners are elected half-yearly, in May and November, by the votes of the Life Governors and Subscribers.

The sum disbursed in Pensions now amounts to over **£16,000** per annum.

The total number of aged Persons who have been supported by the Institution is **Four Thousand and twelve**, the gross sum distributed to them up to the present exceeding **£879,000.**

Subscriptions from 5*s.* and upwards will be thankfully received at the Office, and any further information given between the hours of 10 and 4 daily; Saturdays, 10 and 2.

Office—65, SOUTHAMPTON ROW, LONDON, W.C.1. HENRY C. LATREILLE, *Secretary.* [164

THE NATIONAL SOCIETY FOR THE PREVENTION OF CRUELTY TO CHILDREN

has earned a

NATIONAL REPUTATION

as the

GUARDIAN OF DEFENCELESS CHILDREN.

No less than 3,205,180 children have been rescued from cruelty and neglect. Never was kinder charity than to shield these little ones from ill-treatment and injustice.

LEGACIES ARE A GREAT HELP.

Gifts welcomed by ROBT. J. PARR, O.B.E., Director, "Victory House," N.S.P.C.C., Leicester Square, London, W.C. 2.

LONG GREAT SILENCE

Please help those who act as "Ears to the Deaf and Speech to the Dumb."

"*Without this Association Life to these folk would be almost* INTOLERABLE."
(BISHOP OF LONDON.)

All Subscriptions gratefully acknowledged by Secretary—

ROYAL ASSOCIATION IN AID OF THE DEAF AND DUMB,
361, OXFORD STREET, W. 1.

Suppose for a moment

that a little child of your acquaintance was suddenly orphaned, with no legacy but friendlessness, destitution and distress.

Would you, could you, turn away from that orphaned child with cold indifference, willing to let it drift no one knows whither? No, of course, not! Such callousness is unthinkable.

We, who have cared for orphans for nearly 166 years, know many such children; and they are waiting for admission into our school at Haverstock Hill, where 7,000 orphans have been maintained and educated since the year 1758.

The particulars of some of the cases are very, very pathetic indeed, and in every case there is this deep abiding pathos—each child is **fatherless!** The whole future of these little ones is at stake. We dare not take the responsibility of ignoring the appeal of their great and urgent need. We want to act in the place of parents who are dead, and to do that we have to appeal for your help. Will you give it?

THE ORPHAN WORKING SCHOOL and ALEXANDRA ORPHANAGE.

[382

SOCIETY FOR THE ASSISTANCE OF LADIES IN REDUCED CIRCUMSTANCES

Under Royal Patronage.

We have the poor always with us. By the poor I do not mean the indigent poor, but those who would work if they could. There are many such who have fallen on evil times, and there are also the aged and feeble who need our loving sympathy, and who perchance need the tender help and comfort of those stronger than themselves.

Unless I can raise £2,000 quickly, not only must I refuse all help to "outsiders," but I must, alas, cease to help those who have been on our books for years.

Many Charities are suffering and I feel powerless, but I remember that man's extremity is God's opportunity. He is in Heaven, so all must be right with those who trust in Him. Let us therefore go forward in His strength. He will melt the stony hearts and open the closed purses, and all will yet be well once more.

Hon. Sec.: **EDITH SMALLWOOD, Lancaster House, Malvern.**

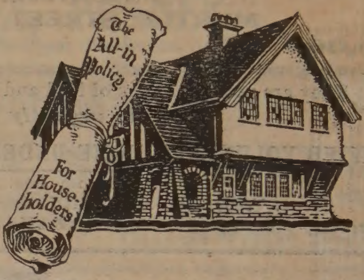
B.D. B.D.

A safeguard to the house and its contents.

‘ALL-IN’
POLICY

For HOUSEHOLDERS.
For HOUSEOWNERS.

Practically every important risk to the contents of the home is covered by the Householder's "All-In" Policy for a single annual premium of 5/- per £100 (Minimum Premium 7/6). The Houseowner's "All-In" Policy covers the building for 1/6 per £100 per annum.



The "All-In" Policies issued only by the "British Dominions" are recognised as affording the most comprehensive cover yet devised.

Prospectuses sent on request to:—

"ALL-IN" DEPARTMENT, 41, THREADNEEDLE ST., LONDON, E.C. 2.

The married man's best policy

"ALL-IN" LIFE POLICY

A policy that has the fourfold distinction of providing :—

(1) The cost of a good education for your children.

(2) An income for yourself on retirement.

(3) Remission of premiums during your total disablement or illness.

(4) Provision for your family in the event of your early death.

In addition to all these benefits substantial rebate is allowed by the Income Tax Authorities in respect of the yearly payments.

Every married man concerned with the welfare and financial security of himself and his family, should send for prospectus of the "All-In" Life Policy, which gives particulars of the attractive premium rates. Life Dept., 32, Moorgate, London, E.C. 2.
